Moreover, only two benefit tables would have to be prepared and used, and this also results in a less complex procedure. Finally, because this option is administratively simpler than either the proration of benefits or quarter-month issuance. State agencies would most probably be able to implement it more quickly and thus begin cost savings earlier.

The Department is proposing to define the period of application in half-month time periods because it places the least administrative burden on the State agencies, it would result in the earliest savings since it can be implemented easily and quickly, and it is the option least apt to result in errors being made at initial certification. In addition, it is responsive to program participants because it recognizes that a household applying for benefits has been in a need situation for more than just the day of application. The proposed regulations reflect this definition of the period of application and would revise current rules to provide for half-month issuance.

Minimum Allotment

The Act specifies that one and two person households receive minimum allotments of $10 *per month*. Since the Department is proposing half-month issuance, provisions have been incorporated into these proposed regulations to allow for the issuance of a minimum allotment of $6 for those households which would receive the $10 minimum allotment if issuance was for the whole month, but which apply in the second half of the month and consequently receive a smaller issuance. While $5 was the obvious minimum allotment for half-month issuance, being half of the $10 minimum monthly allotment, this amount poses issuance problems. As previously mentioned, coupons are issued in books of $2, $7

and $10 and thus, unless loose coupons are issued, it is not possible to issue a $5 allotment. For this reason, the Department is proposing that the half-month minimum benefit be $6.00 for those households applying in the second half of the month.

Implementation

Because of rising program costs and the need to lessen some of the administrative burden being experienced by State agencies in a time of increased program participation, the Department believes that these regulatory changes should be implemented as early as possible. It is especially essential to lower program costs since program spending, if it continues at the present level, will exceed the amount of money appropriated for the program by Congress. The earliest date the Department expects to be able to publish final regulations is July 1st. In order to allow States sufficient time to implement these provisions the Department is proposing that the regulations be implemented 60 days following publication of final regulations. The Department believes that this strikes a balance between the time State agencies will need to implement the provisions, and the need to realize program savings as soon as possible so that the Department can continue to issue program benefits at their current level.

Therefore Parts 271, 272 and 273 are proposed to be amended as follows:

PART 271—GENERAL INFORMATION AND DEFINITIONS

1. In § 271.7 paragraph (d)(1)(ii) is revised as follows:

§ 271.7 Allotment reduction procedures.

* * * * *

(d) *Implementation of Allotment Reductions. (1) Reductions.* * * *

(ii) Upon receiving notification that a reduction is to be made in an upcoming month's allotments, State agencies shall act immediately to implement the reduction. Such action would differ from State to State depending on the nature of the issuance system in use. Where there are computerized issuance systems, the program used for calculating allotments shall be altered to reflect the appropriate percentage reduction in the Thrifty Food Plan for each household size and the computer program shall be adjusted to allow for a minimum benefit of $10. The computer program shall also be adjusted to allow for those households who, because of applying in the second half of the month, are issued a half-month allotment of $6 for the month of initial certification, as provided in § 273.10(e)(2). FNS will provide State agencies with revised issuance tables reflecting the percentage reductions to be made in the Thrifty Food Plan levels. In States where manual issuance is used, State agencies shall reproduce the issuance tables provided by FNS and distribute them to issuance personnel. State agencies shall ensure that the revised issuance tables are distributed to issuance agents and personnel in time to allow benefit reductions during the month ordered by FNS.

In an HIR card system State agencies have the option of enacting the reduction in benefits either by changing all HIR cards before issuance activity for the affected month begins or by adjusteing allotments at the point of issuance as each household appears at the issuance office.

* * * * *

PART 272—REQUIREMENTS FOR PARTICIPATING STATE AGENCIES

2. A new paragraph (g)(32) is added § 272.1 as follows:

§ 272.1 General Terms and Conditions.

* * * * *

(g) *Implementation.* * * *

(32) Amendment 196. State agencies shall implement these regulations no later than the first of the month the 60th day after following publication of final regulations.

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

3. In § 273.10:

(a) Paragraph (a)(1) is revised,

(b) paragraphs (e)(2)(i) and (ii) are revised,

(c) paragraph (e)(2)(iii)(B) is revised, and

(d) paragraph (e)(3) is removed and (e)(4) is designated as (e)(3). The changes read as follows:

§ 273.10 Determining household eligibility and benefit levels.

(a) *Month of Application.* (1) The eligibility for most households submitting an initial application shall be based on circumstances for the entire calendar month in which the household filed its application. However, State agencies may, with the prior approval of FNS, use a fiscal month if the State determines that it is more efficient and satisfies FNS that the accounting procedures fully comply with certification and issuance requirements contained in these regulations. A State agency may elect to use either a standard fiscal month for all households, such as from the 15th of the calendar month to the 15th of the next calendar month, or a fiscal month that will vary for each household depending on the date an individual files an application for the program. A household's eligibility shall be determined for the month of application by considering the household's circumstances for the entire month, calendar or fiscal, as defined by the State agency. A household's benefit level for the initial month of participation will be based on the day of the month it applies for benefits. Using a calendar month, households applying from the 1st through the 15th of the month shall receive a full month's benefits and households applying from the 16th to the end of the month shall receive a half-month's benefits. Using a standard fiscal month, households applying in the first 15 days of the fiscal month shall receive a full month's benefits and those applying after the first 15 days shall receive a half-month's benefits.

* * * * *

(e) *Calculating net income and benefit levels.* * * *

(2) *Eligibility and benefits.* (i) Household's net monthly income, as calculated in paragraph (e)(1) of this section, shall be compared to the monthly income eligibility standards for the appropriate household size to determine eligibility for the month.

(ii) Except as provided in paragraph (iii) below, the household's monthly allotment shall be equal to the Thrifty Food Plan for the household's size reduced by 30 percent of the household's net monthly income as calculated in paragraph (e)(i) of this section. After multiplying the net income by 30 percent, the State agency shall round the product down if it ends in 1 through 49 cents and round the product up if it ends in 50 through 99 cents, prior to subtracting that amount from the Thrifty Food Plan. This rounding method shall be used in all determinations of allotments. For those households who apply after the first 15 days of the month the household's initial monthly allotment shall be divided in half. All eligible one and two-person households shall receive a minimum monthly allotment of $10 or, if half-month issuance is applicable, a minimum monthly allotment of $6.

(iii) * * *

(B) Except as provided in paragraph (e)(2)(iii)(C) of this section below, if the amount of benefits obtained by the calculation in paragraph (e)(2)(iii)(A) of this section is less than $10, the household shall be provided a minimum

benefit of $10, or, half-month issuance is applicable, a minimum benefit of $6.

* * * * *

Benzene-Containing Consumer Products; Withdrawal of Proposed Rules

Cross Reference: In the rules section of this **Federal Register**, the Consumer Product Safety Commission (CPSC) is withdrawing its proposed ban of consumer products which contain certain amounts of benzene (16 CFR Part 1307, 43 FR 21839, May 19, 1978). This withdrawal appears in the Rules section at the request of the Agency and in conformity with section 2058 of the Consumer Product Safety Act. The CPSC is also withdrawing several other proposed conforming amendments which were published in the same **Federal Register** (16 CFR Parts 1145, 1500 and 1700) (43 FR 21838, 21852 and 21853, respectively).

For more detailed information on the withdrawals, see FR Doc. 81-15426 in the rules section of this **Federal Register**. Refer to the Table of Contents in the front of the Register for the proper page number.

BILLING CODE 6355-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 271

[Docket No. RM79-76 (Mississippi-2)]

High-Cost Gas Produced From Tight Formations; Proposed Rulemaking

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by Section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions that present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas subject to an incentive price (18 CFR 271.703). The rule establishes procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This notice of proposed rulemaking contains the recommendation of the State Oil and Gas Board of Mississippi that the Rea sand of the Mississippian Formation be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on June 17, 1981.

PUBLIC HEARING: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on June 2, 1981.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357–8307 or Walter W. Lawson, (202) 357–8703.

Issued: May 18, 1981.

I. Background

On March 30, 1981, the State Oil and Gas Board of Mississippi (Mississippi) submitted to the Commission a recommendation in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that the Rea Sand of the Mississippian Formation in Clay County, Mississippi, be designated as a tight formation. Pursuant to § 371.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Mississippi's recommendation that the Rea Sand of the Mississippian Formation be designated a tight formation should be adopted. Mississippi's recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of the Recommendation

Mississippi recommends that the Rea Sand of the Mississippian Formation found in portions of Township 16 South, Range 5 East; Township 17 South, Range 5 East; Township 16 South, Range 6 East; and Township 17 South, Range 6 East, Clay County, Mississippi, be designated as a tight formation.

The recommended formation varies in thickness from 30 feet to 160 feet and occurs at depths ranging from 8,865 feet to 9,975 feet. The only producing well in the Rea Sand of the Mississippian Formation in the recommended area is completed in an interval of 9,058 feet to 9,100 feet.

III. Discussion of Recommendation

Mississippi claims in its submission that evidence gathered and presented at a public hearing in support of this recommendation domonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stablized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Mississippi further asserts that existing State and Federal regulations assure that development of this formation will not adversely affect any fresh water aquifers that are, or are expected to be, used as a domestic or agricultural water supply.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80–68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by Mississippi that the Rea Sand of the Misissippian Formation, as described and delineated in Mississippi's recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before June 17, 1981. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79–76 (Mississippi-2), and should give reasons including supporting data for any recommendation. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be placed in the Commission's public files and will be

available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing that they wish to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than June 2, 1981.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432)

Accordingly, the Commission proposes to amend the regulations in Part 271, Chapter I, Title 18, Code of Federal Regulations, as set forth below, in the event Mississippi's recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

Section 271.703 is amended by adding new paragraph (d)(49) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.* The following formations are designated as tight formations. A more detailed description of the geographical extent and geological parameters of the designated tight formations is located in the Commission's official file for Docket No. RM79–76, as subindexed below, and is also located in the official files of the jurisdictional agency that submitted the recommendation.

* * * * *

(25) through (48) [Reserved]

(49) *The Rea Sand of the Mississippian Formation in Mississippi.* (Mississippi-2).

(i) *Delineation of Formation.* The Rea Sand of the Mississippian Formation is found in portions of Township 16 South, Range 5 East; Township 17 South, Range 5 East; Township 16 South, Range 6 East; and Township 17 South, Range 6 East, in Clay County, Mississippi.

(ii) *Depth.* The recommended formation occurs at depths ranging from 8,865 feet to 9,975 feet and varies in thickness from 30 feet to 160 feet.

[FR Doc. 81–15318 Filed 5–21–81: 8:45 am]

BILLING CODE 6450–85–M

18 CFR Part 271

[Docket No. RM79–76 (Texas–10)]

High-Cost Gas Produced From Tight Formations; Proposed Rulemaking

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by Section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions that present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas subject to an incentive price (18 CFR 271.703). The rule establishes procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This notice of proposed rulemaking contains the recommendation of the Railroad Commission of Texas that the Edwards Limestone Formation be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on June 17, 1981.

PUBLIC HEARING: No public hearing is scheduled in this docket as yet. Written request for a public hearing are due on June 2, 1981.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357–8307 or Walter Lawson, (202) 357–8556.

Issued: May 18, 1981.

I. Background

On March 30, 1981, the Railroad Commission of Texas (Texas) submitted to the Commission a recommendation in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that the Edwards Limestone Formation in Dewitt, Karnes, and Lavaca Counties, Texas, be designated as a tight formation. Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Texas' recommendation that the Edwards Limestone Formation be designated a tight formation should be adopted. Texas' recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of the Recommendation

Texas recommends that the following named fields where the Edwards Limestone Formation is encountered be designated as a tight formation. These fields are found along the Gulf coast in the southeastern part of the state in DeWitt, Karnes, and Lavaca Counties, in a portion of Railroad Commission District 2.

DeWitt County: Yoakum (Edwards) Field
Karnes County: Kenedy, East (Edwards) Field
Lavaca County: Sweethome (Edwards) Field
Lavaca County: Word (Edwards) Field
Lavaca County: Word North (Edwards) Field
Lavaca County: Yoakum (Edwards) Field

The Edwards Limestone Formation is massive in thickness. An upper and lower limit can be established across the three county area. In the west, the upper limit may be encountered at approximately 13,460 feet and in the east, the shallowest depth at which it is found, is approximately 13,150 feet. The base of the Edwards Limestone Formation in the west is located at an undetermined depth. At 14,000 feet, the Edwards Limestone Formation is still apparent which indicates a minimum thickness of approximately 540 feet, while in the east the base appears at an approximate depth of 14,500 feet resulting in a thickness of 1,350 feet. Texas points out that these depths are approximations based on available data.

III. Discussion of Recommendation

Texas claims in its submission that evidence gathered through information and testimony presented at a public hearing convened by Texas on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stablized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Texas further asserts that existing State and Federal regulations assure that development of this formation will not adversely affect any fresh water

aquifers that are, or are expected to be, used as a domestic or agricultural water supply.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80–68 (45 FR 53456, August 12, 1980), notice is hereby given to the proposal submitted by Texas that the Edwards Limestone Formation, as described and delineated in Texas' recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before June 17, 1981. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79–76 (Texas-10), and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing that they wish to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than June 2, 1981.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432)

Accordingly, the Commission proposes to amend the regulations in Part 271, Chapter I, Title 18, Code of Federal Regulations, as set forth below, in the event Texas' recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

Section 271.703 is amended by adding new paragraph (d)(47) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.* The following formations are designated as tight formations. A more detailed description of the geographical extent and geological parameters of the designated tight formations is located in the Commission's official file for Docket No. RM79–76, as subindexed below, and is also located in the official files of the jurisdictional agency that submitted the recommendation.

* * * * *

(21) through (46) [Reserved]

(47) *Edwards Limestone Formation in Texas.* RM79–76 (Texas-10)

(i) *Delineation of Formation.* The Edwards Limestone Formation is encountered in the following named fields. These fields are found along the Gulf coast in the southeastern part of the state in DeWitt, Karnes, and Lavaca Counties, Railroad Commission District 2.

DeWitt County: Yoakum (Edwards) Field
Karnes County: Kenedy, East (Edwards) Field
Lavaca County: Sweethome (Edwards) Field
Lavaca County: Word (Edwards) Field
Lavaca County: Word, North (Edwards) Field
Lavaca County: Yoakum (Edwards) Field

(ii) *Depth.* The top of the Edwards Limestone Formation, in the west, is at approximately 13,460 feet and the base is undetermined. In the east, the top of the formation is at an approximate depth of 13,150 feet and the base is the 14,500 feet resulting in a thickness of approximately 1,350 feet.

18 CFR Part 271

[Docket No. RM79–76 (Utah-1)]

High-Cost Gas Produced From Tight Formations; Proposed Rulemakinng

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by Section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This notice of proposed rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the State of Utah Board of Oil, Gas and Mining and the United States Geological Survey that the Wasatch/Mesaverde Formation be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on June 17, 1981.

PUBLIC HEARING: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on June 2, 1981.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357–8307 or Victor Zabel, (202) 357–8616.

Issued: May 18, 1981.

I. Background

On May 11, 1981, the State of Utah Board of Oil, Gas and Mining and the United States Geological Survey (Utah) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's final regulations (45 FR 56034, August 22, 1980), that the Wasatch/Mesaverde Formation located in Uintah County, Utah, be designated as a tight formation. Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Utah's recommendation that the Wasatch/Mesaverde Formation be designated a tight formation should be adopted. Utah's recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

The recommended formation underlies certain lands in the Bitter Creek-Red Wash area of Uintah County, Utah, approximately 25 miles southeast of the town of Roosevelt, Utah. The recommended area contains 448,000 acres located in the general area of Townships 7 South through 12 South and Ranges 18 East through 25 East.

Approximately 85 percent of this land is federal, 11 percent state and 4 percent fee. The average depth to the top of the

Wasatch/Mesaverde Formation is 4,559 feet. The average gross productive interval averages approximately 1,150 feet in thickness.

III. Discussion of Recommendation

Utah claims in its submission that evidence gathered through information and testimony presented at a public hearing in Cause No. TGF-100 convened by Utah on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 milidarcy;

(2) The stablized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Utah further asserts that existing State and Federal regulations assure that development of this formation will not adversely affect any fresh water aquifers.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80-68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by Utah that the Wasatch/Mesaverde Formation, as described and delineated in Utah's recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before June 17, 1981. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79-76 (Utah-1), and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing that they wish to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than June 2, 1981.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301-3342)

Accordingly, the Commission proposes to amend the regulations in Part 271, Chapter I, Title 18, Code of Federal Regulations, as set forth below, in the event Utah's recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

Section 271.703 is amended by adding new paragraph (d)(52) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.* The following formations are designated as tight formations. A more detailed description of the geographical extent and geological parameters of the designated tight formations is located in the Commission's official file for Docket No. RM79-76, subindexed as indicated, and is also located in the official files of the jurisdictional agency that submitted the recommendation.

* * * * *

(25) through (51) [Reserved]

(52) *Wasatch/Mesaverde Formation in Utah* RM79-76 (Utah-1)

(i) *Delineation of formation.* The Wasatch/Mesaverde Formation is found in the Bitter Creek-Red Wash area of Uintah County, Utah and is the general area of Townships 7 South through 12 South and Ranges 18 East through 25 East.

(ii) *Depth.* The average depth to the top of the Wasatch/Mesaverde Formation is 4559 feet.

18 CFR Part 271

[Docket No. Rm79-76 (Wyoming-4)]

High-Cost Gas Produced From Tight Formations; Proposed Rulemaking

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by Section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive incentive price (18 CFR 271.703). This rule establishes procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This notice of proposed rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the State of Wyoming Oil and Gas Conservation Commission that the Fox Hills Formation be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on June 17, 1981.

PUBLIC HEARING: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on June 2, 1981.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT:

Leslie Lawner, (202) 357-8307 or Victor Zabel, (202) 357-8616.

Issued: May 18, 1981.

I. Background

On May 5, 1981 the State of Wyoming Oil and Gas Conservation Commission (Wyoming) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's final regulations (45 FR 56034, August 22, 1980), that the Fox Hills formation located in Sweetwater County, Wyoming, be designated as a tight formation. Pursuant to § 2271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Wyoming's recommendation that the Fox Hills Formation be designated a tight formation should be adopted. The United States Geological Survey concurs with Wyoming's recommendation. Wyoming's recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of the Recommendation

The recommended formation is located in Sweetwater County, Wyoming in the southern portion of the Green River Basin, south of the town of Table Rock. The area is described as encompassing Township 16 North, Ranges 97 through 99 West; Township 17 North, Ranges 96 through 98 West; Township 17 North, Range 99 West, Sections 24 through 28 and 33 through 36. Township 18 North, Ranges 96 and 97 West; and Township 18 North, Range 98 West, Sections 24 through 26 and 34 through 36.

The vertical limits of the Fox Hills Formation are defined by the Lance Formation above and the Lewis shale below. The average depth to the top of the formation is 7,412 feet.

III. Discussion of Recommendation

Wyoming claims in its submission that evidence gathered through information and testimony presented at a public hearing in Cause No. 1, Docket No. 69–80, convened by Wyoming on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 milidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Wyoming further asserts that existing State and Federal Regulations assure that development of this formation will not adversely affect any fresh water aquifers.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80–68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by Wyoming that the Fox Hills formation, as described and delineated in Wyoming's recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before June 17, 1981. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79–76 (Wyoming-4), and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. written comments will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing that they wish to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than June 2, 1981.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3342)

Accordingly, the Commission proposes to amend the regulations in Part 271, Chapter I, Title 18, Code of Federal Regulations, as set forth below, in the event Wyoming's recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

Section 271.703 is amended by adding new paragraph (d)(51) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.* The following formations are designated as tight formations. A more detailed description of the geographical extent and geological parameters of the designated tight formations is located in the Commission's official file for Docket No. RM79–76, subindexed as indicated, and is also located in the official files of the jurisdictional agency that submitted the recommendation.

* * * * *

(25) through (50) [Reserved]

(51) *Fox Hills Formation in Wyoming* RM79–76 (Wyoming-4)

(i) *Delineation of formation.* The Fox Hills Formation is found in Sweetwater County, Wyoming, in Township 16 North, Ranges 97 through 99 West; Township 17 North, Ranges 96 through 98 West; Township 17 North, Range 99 West, Sections 24 through 28 and 33 through 36; Township 18 North, Ranges 96 and 97 West; and Township 18 North, Range 98 West, Sections 24 through 26 and 34 through 36.

(ii) *Depth.* The Fox Hills Formation vertical limits are defined by the Lance Formation above and the Lewis Shale below. The average depth to the top of the Fox Hills Formation is 7,412 feet.

NAVAJO AND HOPI INDIAN RELOCATION COMMISSION

25 CFR Part 700

Commissions Operations and Relocation Procedures; Recodification, Revision and Additions to Part 700 Commission Operations and Relocation Procedures

AGENCY: Navajo and Hopi Indian Relocation Commission.

ACTION: Notice of extension of time for filing comments on proposed Recodification, Revision and Additions to Part 700.

SUMMARY: On March 9, 1981, a proposed Recodification, Revision and Additions to Part 700-Commission Operations and Relocation Procedures was published in the **Federal Register** (46 FR 15720). Comments were authorized to be received until May 8, 1981. The Commission has determined that additional time is required for review of the proposed Recodification and has extended the time for comments to July 7, 1981. The purpose of this notice is to advise the affected public that time for comment on the proposed Recodification, Revision and Additions to Part 700-Commission Operations and Relocation Procedures has been extended to July 7, 1981.

DATE: Comments are now due on or before July 7, 1981.

FOR FURTHER INFORMATION CONTACT: William G. Lavell, General Counel, Navajo and Hopi Indian Relocation Commission, P.O. Box KK, Flagstaff, Arizona 86002, Telephone 602–779–3311, Extension 1376, FTS: 261–1376.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[LR-108-80]

Income Tax; Consolidated Return Regulations; Public Hearing on Proposed Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of change of date of a public hearing on proposed regulations relating to the bad debt deduction for a thrift institution that is a member of an affiliated group which files a consolidated return.

DATES: The public hearing will be held on September 9, 1981, beginning at 10:00 a.m. Outlines of oral comments must be delivered or mailed by August 26, 1981.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, NW, Washington, D.C. The outlines should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (LR-108-80), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Charles Hayden of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW, Washington, D.C. 20224, 202-566-3935, not a toll-free call.

SUPPLEMENTARY INFORMATION: By a notice appearing in the **Federal Register** for Friday, May 1, 1981 (46 FR 24595), it was announced, among other things, that a public hearing on proposed regulations relating to consolidated returns would be held on August 13, 1981, beginning at 10:00 a.m. in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, NW, Washington, D.C. The proposed regulations were published in the **Federal Register** for Friday, January 30, 1981 (45 FR 9965).

The date for the public hearing has been changed and it will be held on Wednesday, September 9, 1981.

Outlines of oral comments must be delivered or mailed by August 26, 1981.

In all other respects the details with respect to the hearing remain the same.

This document does not meet the criteria for significant regulations set forth in paragraph 8 of the Treasury Directive for improving government regulations appearing in the **Federal Register** for November 8, 1978.

By direction of the Commissioner of Internal Revenue:

David E. Dickinson,

Acting Director, Legislation and Regulations Division.

26 CFR Part 1

[LR-267-79]

Income Tax; Dollar-Value LIFO Inventory; Public Hearing on Proposed Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to the valuation of dollar-value last-in, first-out (LIFO) inventories.

DATES: The public hearing will be held on June 30, 1981, beginning at 10:00 a.m. Outlines of oral comments must be delivered or mailed by June 16, 1981.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, D.C. The outlines should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (LR-267-79), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Charles Hayden of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224, 202-566-3935, not a toll-free call.

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under section 472 of the Internal Revenue Code of 1954. The proposed regulations appeared in the **Federal Register** for Friday, January 16, 1981 (46 FR 3912).

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and also desire to present oral comments at the hearing on the proposed regulations should submit an outline of the comments to be presented at the public hearing and the time they wish to devote to each subject by June 16, 1981. Each speaker will be limited to 10 minutes for an oral presentation exclusive of time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

This document does not meet the criteria for significant regulations set forth in paragraph 8 of the Treasury Directive for improving government regulations appearing in the **Federal Register** for Wednesday, November 8, 1978.

By direction of the Commissioner of Internal Revenue:

David E. Dickinson,

Acting Director, Legislation and Regulations Division.

BILLING CODE 4830-01-M

DEPARTMENT OF THE INTERIOR

Geological Survey

30 CFR Part 221

Oil and Gas Operating Regulations

AGENCY: Geological Survey, Interior.

ACTION: Notice of Intent to Propose Rulemaking.

SUMMARY: The Geological Survey (GS) is considering the development of a rulemaking to revise and modernize the regulations in 30 CFR Part 221 governing the operation of oil and gas leases with the exception of the royalty provisions. Comments and suggestions are hereby invited to assist in the determination of the need for and extent of such a rulemaking. The GS desires to receive maximum participation from the petroleum industry, State governments, all other interested individuals and segments of the public and other Federal Government Agencies at the earliest stages of the rulemaking process.

DATE: Comments and recommendations must be received by July 6, 1981.

ADDRESS: Comments and recommendations should be submitted to the Deputy Division Chief, Onshore Minerals Regulation, Conservation Division, U.S. Geological Survey, National Center, Mail Stop 650, Reston, Virginia 22092.

V 46 / 99
MAY 22 81
UMI

FOR FURTHER INFORMATION CONTACT:

Mr. Charles L. Sours, Chief, Branch of Rules and Procedures, or Mr. Gerald R. Daniels, Chief, Branch of Fluid Minerals Management, Onshore Minerals Regulation, Conservation Division, U.S. Geological Survey, National Center, Mail Stop 650, Reston, Virginia 22092 (704–860–7535).

SUPPLEMENTARY INFORMATION: It is the intent of the GS to develop a proposed rule if the need for revision of Part 221 is shown. The last substantial revision of this Part was completed in 1942, and while changes have been promulgated since that time, no rulemaking to completely review the Part has been published. In addition to the removal and updating of outdated forms, the GS wishes to receive specific comments on the need to revise the overall structure of the Part. The royalty computation and collection provisions will not be included in this rulemaking because the royalty accounting procedures covering all Federal and Indian leases of all minerals regulated by Title 30 of the CFR are currently undergoing a complete system redesign. Upon the completion of that system design, a separate rulemaking will be initiated dealing with the royalty provisions of various Parts of Title 30 of the CFR.

All comments and suggestions received will be considered in determining the need to revise Part 221. Any such proposed rulemaking will be published in the **Federal Register** for further comments before final rulemaking is adopted.

Dated: May 15, 1981.

John J. Dragonetti,

Deputy Division Chief for Onshore Minerals Regulation, Conservation Division.

BILLING CODE 4310–31–M

DEPARTMENT OF THE TREASURY

Fiscal Service

31 CFR Part 209

Service Charges for Allotments of Pay to Savings Accounts of Federal Civilian Employees

AGENCY: Bureau of Government Financial Operations, Fiscal Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department of Treasury proposes to amend 31 CFR 209.8, the regulation governing the service charge for allotments of pay to savings accounts of civilian employees who are employed within the United States. The proposed amendment increases the service charges, established in 1968 and unchanged from that date, to comply with the statutory requirement, referenced below in the authority citation, that employing agencies be reimbursed by recipient financial organizations for the additional cost of sending allotments requested by employees. The proposed amendment also substitutes a more appropriate statutory reference for the information that collected service charges are deposited into the Treasury as miscellaneous receipts unless the agency has statutory authority otherwise to dispose of the credit.

DATES: Proposed effective date: October 4, 1981. Comments on this proposal must be received by July 10, 1981.

ADDRESS: Comments should be addressed to the Commissioner, Bureau of Government Financial Operations, Department of the Treasury, Treasury Annex, Washington, DC 20226.

FOR FURTHER INFORMATION CONTACT:

Mr. John MacArthur, Government Accounting Systems Staff, Bureau of Government Financial Operations, Room 412, Treasury Annex, Department of the Treasury, Washington, DC 20226 (202/566–8374).

SUPPLEMENTARY INFORMATION:

Classification: The Department of the Treasury has determined that this regulation will not cause a significant effect on the economy and will not result in a major increase in costs or prices for financial organizations, consumers, or government agencies. The Department, therefore, does not consider this regulation to be a major rule for the purposes of Executive Order 12291 (1981).

Background

Title 31 U.S. Code, section 492, requires that agencies be reimbursed for the additional cost of sending checks for allotments of pay to savings accounts of Federal civilian employees, by the financial organizations to which these checks are sent. Service charges were established in 1968. They no longer adequately reimburse the Government for the cost of administering the savings allotment program. The revised service charges proposed by this rule reflect the current additional cost to the Government for processing and mailing savings allotment checks to financial organizations.

Authority: This amendment is proposed under the authority of Revised Statute 3620, as amended by Pub. L. 90–365, 82 Stat. 274 (31 U.S.C. 492).

For the reasons set out in the preamble, part 209 of Chapter 11 of Title 31 of the Code of Federal Regulations is proposed to be amended as follows.

Accordingly, § 209.8 is amended by revising paragraphs (a)(1), (a)(2), and (b) as follows:

§ 209.8 Service charge.

* * * * *

(a) * * *

(1) Twelve (12) cents for each payroll deduction stated on the record which is to accompany the aggregate remittance (for all administrative and payrolling costs in the agency); plus

(2) Twenty-seven (27) cents for each remittance, as a single charge for the entire record accompanying the remittance, regardless of the number of payroll deductions listed (for all check preparation and mail preparation costs in the disbursing office, including postage).

(b) In accordance with Revised Statute 3617, as amended by section 6, Pub. L. 91–375, 84 Stat. 783 (31 U.S.C. 484), the total service charge collected pursuant to this section shall be covered into the Treasury as miscellaneous receipts unless the agency has statutory authority otherwise to dispose of the credit.

W. E. Douglas,

Commissioner.

March 19, 1981.

BILLING CODE 4310-70-M

POSTAL SERVICE

39 CFR Part 111

Facing Identification Marks on Official Mail

AGENCY: Postal Service.

ACTION: Proposed rule.

SUMMARY: This proposal would amend postal regulations to modify the specifications for printing the official mail imprint and to add the requirement that a Facing Identification Mark (FIM) be printed on certain official mail post cards, letter-size envelops and self mailers. State employment security agencies mailing under the U.S. Department of Labor indicia would also be required to comply with the processing of official mail of the executive and judicial branches of the Government.

DATE: Comments must be received on or before June 22, 1981.

ADDRESS: Written comments should be addressed to the Director, Office of Mail Classification, Rates and Classification Department, U.S. Postal Service, Washington, D.C. 20260. Copies of written comments received will be available for public inspection and photo-copying between 9 a.m. and 4 p.m., Monday through Friday, in Room 1640, 475 L'Enfant Plaza West SW., Washington, D.C. 20260.

FOR FURTHER INFORMATION CONTACT: Bill Maguire, (202) 245-4353.

SUPPLEMENTARY INFORMATION: In order to improve the processing of official mail of the executive and judicial branches of the United States Government, the Postal Service proposes to phase in a policy requiring certain official mail of authorized departments and agencies to bear a Facing Identification Mark (FIM). A FIM would have to be printed on all letter-size official postage and fees paid mailing pieces procured after September 1, 1981. Agencies would be allowed to use up existing mailing stocks. We specifically invite comment of the reasonableness of the September 1, 1981 proposed implementation date.

Addition of FIM would also necessitate the modification of the official mail imprint. State employment security agencies mailing under U.S. Department of Labor indicia would also be required to comply with the FIM requirement. This would be accomplished by the deletion of section 137.4 of the Domestic Mail Manual (DMM) and the addition of a new section 137.242j to cover employment security mail. Official metered mail and official permit imprint mail would not require the FIM. Official business reply mail currently has to meet the FIM requirement (see Section 137.252). In order to implement this change, the indicia requirements of section 137.241 would be modified and the placement of the official emblem would be changed in sections 137.242a, 137.243 and 137.244.

Accordingly, although exempt from the notice and comment requirements of the Administrative Procedure Act (5 U.S.C. 553 (b), (c)) regarding proposed rulemaking by 39 U.S.C. 410(a), the Postal Service invites public comment on the following proposed revisions of the Domestic Mail Manual, which is incorporated in the **Federal Register** by reference (39 CFR 111.1):

Part 137—Official Mail

In part 137, revise 137.24 to read as follows:

.24 *Indicia*

.241 There are four general types of official penalty mail indicia: (a) Standard penalty indicium, (b) official metered indicium, (c) official permit imprint indicium, and (d) official business reply indicium. Each type must conform with an authorized format, as described in 137.242–137.245.

.242 *Standard Penalty Indicium.* All official mail using the standard penalty indicium must comply with the following described specifications.

a. The indicium for letter-size mail must be printed and must consist of the postal emblem (see Exhibit 137.242b) located ⅜ of an inch from the top edge of the mail piece; and immediately below the postal emblem, the words POSTAGE AND FEES PAID, the name of the department or agency and the agency sampling number, if assigned.

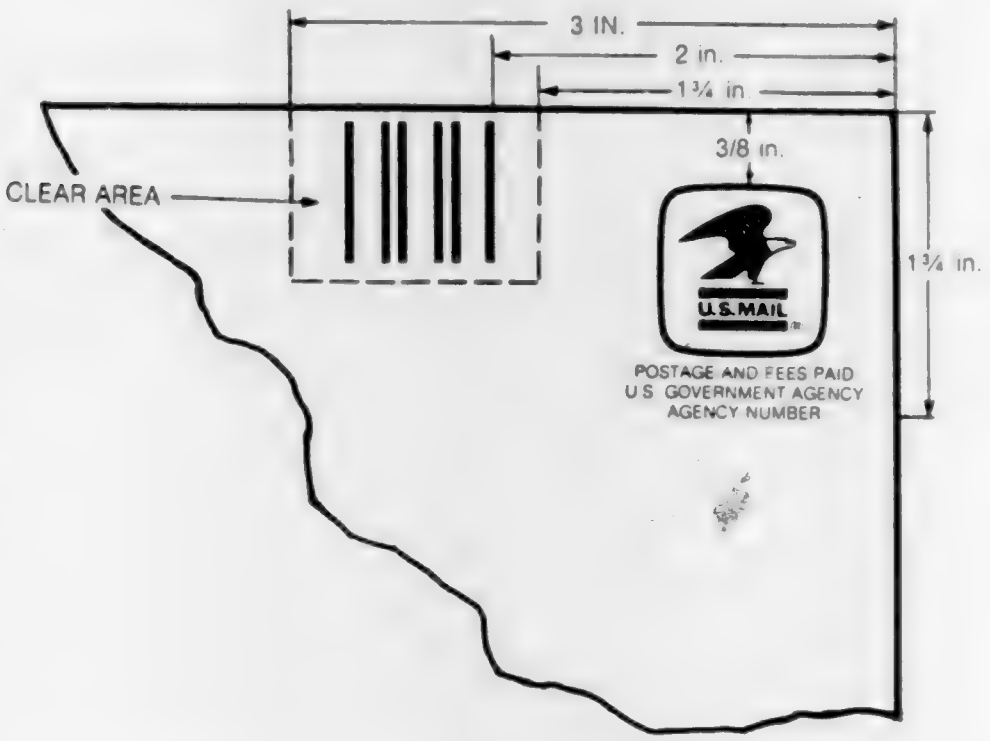
b. Except for second-class, and bulk third-class mail (see 137.273 b and c), the Facing Identification Mark (FIM), a vertical bar code pattern which functions as an orientation mark for automatic facing and canceling equipment, is required as follows:

(1) An area of 3 inches by 1¾ inches in the upper right corner of the address side of each mail piece must be reserved for the indicium and the FIM. The entire indicium, including the postal emblem, must be within 1¾ inches from the right and within 1¾ inches from the top edge of the mailing piece. A FIM must be printed on all mailing pieces, including cards, letter-size envelopes and self mailers, (see 128) but is not required on labels or envelopes larger than letter-size.

(2) The FIM must be positioned in such a manner that the distance from the right edge of the nearest FIM bar is 2 inches plus or minus ⅛ of an inch, and the top of the FIM pattern is *within* ⅛ of an inch from the top edge of the mail piece. It is permissible for the pattern to touch the top edge of the mail piece. The bars must be at least ½ inch long. A clear area free of any other printing must be maintained around the FIM. This clear area begins 1¾ inches from the right edge of the mail piece and extends 1¼ inches to the left. The height of the clear area is ⅝ of an inch down from the top edge. (See Exhibit 137.242b) Additional specifications for printing the FIM are contained in Publication 12, *United States Postal Service Instructions Facing Identification Marks.* Because the spacing between the vertical bars requires control, the Postal Service provides negatives for printing the FIM pattern. In all cases,

Postal Service specifications and negatives must be used. The specifications and negatives for FIM are available from local post offices or from the Manager, Government Revenue and Examination Branch, Finance Department, U.S. Postal Service Headquarters, Washington, D.C. 20260.

Exhibit 137.242b



(3) A FIM must appear on all letter-size mailing pieces procured after September 1, 1981. Stocks of cards, envelopes and self-mailers procured prior to September 1, 1981, which do not bear a FIM may be used until exhausted.

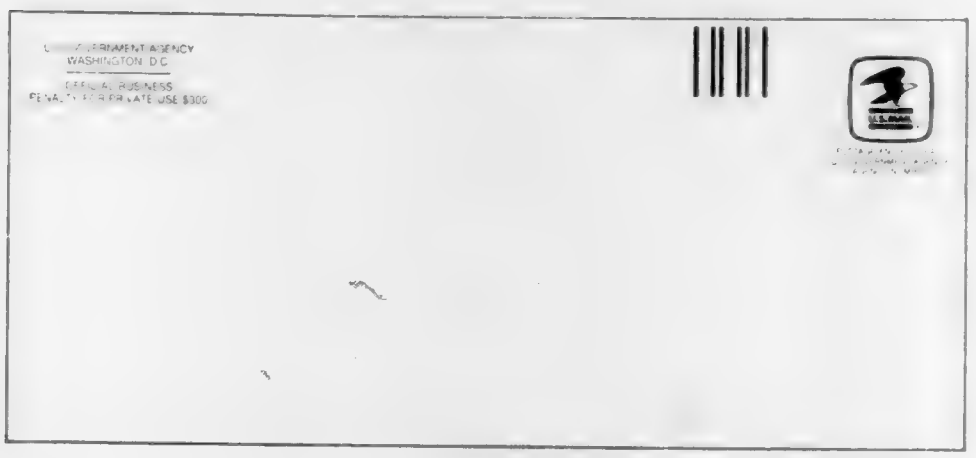
c. The FIM pattern and use of the postal emblem as part of the indicium is optional on larger than letter-size mail.

d. The postal emblem and FIM pattern may be omitted on self-mailers completely printed by computer with no provision for printing designs other than letters and numbers, provided the items are faced, sorted and tied in bundles by ZIP Code.

e. Any endorsement for a special service or class of mail must be placed approximately ¼ inch below the indicium.

f. The complete return address and the words "OFFICIAL BUSINESS, PENALTY FOR PRIVATE USE, $300" must appear in the upper left corner of the mail piece (see Exhibit 137.242f). The penalty statement may not be handwritten or typewritten.

Exhibit 137.242f



g. Official mail of a designated State extension director must bear in the upper left corner the name of the agricultural college and the name of the post office at which the mail is to be accepted without prepayment of postage, followed by the name and title of the designated officer and the words COOPERATIVE AGRICULTURAL EXTENSION WORK—Acts of may 8 and June 30, 1914. The words POSTAGE AND FEES PAID U.S. DEPARTMENT OF AGRICULTURE, and the agency sampling number must appear in the upper right corner of the address side immediately below the postal emblem. The FIM pattern must be used as described in 137.242b.

h. Official mailings by agricultural experiment stations must bear in the upper left corner of the address side the name of the station, the name of the post office at which the matter is to be accepted, and the name and title of the officer in charge of the station, followed by the word PUBLICATION. The title of the bulletin or report may be used. The words POSTAGE PAID U.S. DEPARTMENT OF AGRICULTURE, and the agency number must appear in the upper right corner of the address side immediately below the postal emblem. The FIM pattern must be used as described in 137.242b.

i. Official mailings made by cooperative extension agents described in 137.22c must be prepared in accordance with the provisions of 137.242 a through f.

j. Official mailings made by State employment security agencies cooperating with the Department of Labor must bear in the upper left corner the name and complete return address of the state agency and the words "OFFICIAL BUSINESS, PENALTY FOR PRIVATE USE, $300". The words "POSTAGE AND FEES PAID, EMPLOYMENT SECURITY MAIL, LAB–449" must appear in the upper right corner of the address side immediately below the postal emblem. The FIM pattern must be used as described in 137.242b.

.243 *Official Metered Indicium.* Penalty mail may be sent under official postage meter procedures when an agency has obtained a license for each meter in accordance with 137.273a. Mail sent from agency locations licensed to use meters must bear in the upper right corner a meter stamp or tape with the official meter format illustrated in 144.416 and a complete return address in the upper left corner. The FIM pattern and other indicia described in 137.242b must not be used on official metered mail.

.244 *Official Permit Imprint Indicium.* Permit imprints may be used by government agencies to facilitate postage accountability for larger mailings. Unless a meter is used, permit imprints are required for all First-Class, single piece third-class, and fourth-class mailings made by contractors, and for all presort First-Class and fourth-class bulk rate mailings made either by a government agency or its contractors. Departments and agencies wishing to mail under permit imprint procedures must obtain prior authorization and follow the appropriate procedures in 137.273d and 145. The format for official permit imprint mail is as follows:

a. The official permit imprint indicium must appear in a rectangular box in the upper right corner of the mail piece. It consists of the statement of mail class, the words "Postage and Fees Paid", the agency name and a permit number preceded by the letter, "G". The city of mailing and date may be included but are not required. Illustrations of the official mail permit imprint indicium are provided in 145.5e and f,

b. The FIM pattern and the postal emblem should not be included on official permit imprint mail.

c. The complete return address and the words, "OFFICIAL BUSINESS, PENALTY FOR PRIVATE USE, $300" must appear in the upper left corner as illustrated in 137.242f.

.245 *Official Business Reply Indicium.* The format described in 137.252 must be used for cards, envelopes and labels furnished by government agencies for reply purposes.

.246 The markings required in 137.242 through .245:

a. May be used only to transmit official mail, and

b. Shall not be used on items carried outside the U.S. Mail except under the following circumstances:

(1) When official items are carried by employees of the originating agency;

(2) When official items are carried by contractors for subsequent entry into the U.S. Mail under the provisions of 137.253 and .254; or

(3) When agencies reach written agreement with the Manager, Government Revenue and Examination Branch, Finance Department, U.S.P.S. Headquarters, to account for and pay postage on official items carried outside the U.S. Mail to avoid violation of the Private Express Statutes (13 U.S.C. 1693–1699 and 39 U.S.C. 601–606).

.247 Mail of departments and agencies which is not sent by use of official envelopes or labels as provided in 137.242 through 245 must have postage prepaid. The rates and conditions applicable to non-federal government mailers apply.

An appropriate amendment to 39 CFR 111.3 to reflect these changes will be published if the proposals are adopted.

(39 U.S.C. 401(2)(10), 404(a) (2)–(4))

W. Allen Sanders,

Associate General Counsel, Office of General Law and Administration.

BILLING CODE 7710–12–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A–7–FRL–1835–7]

Approval and Promulgation of State Implementation Plans: Kansas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Availability and Advance Notice of Rulemaking.

SUMMARY: On April 16, 1981, the State of Kansas submitted State Implementation Plan (SIP) revision for the Wichita-Sedgwick County carbon monoxide (CO) nonattainment area, as required by the Clean Air Act (CAA) as amended. Interested persons are invited to examine the Kansas SIP revision and submit comments.

EPA's proposed action on the submitted SIP revision will appear in a Notice of Proposed Rulemaking, to be published at a later date.

DATES: The period for receiving comments on the state's submittal and what EPA's final action should be will extend until June 22, 1981.

ADDRESSES: Comments should be addressed to Michael T. Marshall, Air, Noise and Radiation Branch, Environmental Protection Agency, 324 East 11th Street, Kansas City, Missouri 64106.

The Kansas submittal may be examined during normal business hours at the above address and also at the following locations:

Environmental Protection Agency, Public Information and Reference Unit, Room 2922, 401 M Street, SW., Washington, D.C. 20460;

Kansas Department of Health and Environment, Division of Environment, Bureau of Air Quality and Occupational Health, Forbes Field, Topeka, Kansas 66620;

Wichita-Sedgwick County, Metropolitan Area Planning Department, City Hall—10th Floor, 455 North Main Street, Wichita, Kansas 67202;

Wichita-Sedgwick County Department of Community Health, Air Quality Control, 1900 East Ninth Street, Wichita, Kansas 67214.

FOR FURTHER INFORMATION CONTACT: Michael T. Marshall, (816) 374–3791 (FTS 758–3791).

SUPPLEMENTARY INFORMATION: The SIP revision was submitted, as required by Section 172 of the CAA, to provide for the attainment of the National Ambient Air Quality Standards (NAAQS) in areas which are currently nonattainment. EPA published the Wichita-Sedgwick County attainment status in the **Federal Register** of March 3, 1978 (44 FR 8962). The State's submission describes the CO attainment and maintenance demonstration of the delineated nonattainment area.

The purpose of this notice is to announce that the revision has been formally submitted and is available for public inspection. The public is encouraged to make written comments. A description of the revision and the proposed EPA action on the revision will appear in the **Federal Register** as a notice of proposed rulemaking at a later date.

Dated: May 12, 1981.

William Rice,

Acting Regional Administrator.

40 CFR Part 180

[PH–FRL–1833–6; PP 7E1978/9E2242/P171]

2-Chloroallyldiethyldithiocarbamate; Proposed Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This notice proposes that tolerances be established for the herbicide 2-chloroallyldiethyldithiocarbamate. These proposals were submitted by the Interregional Research Project No. 4 (IR–4). This amendment will establish a maximum permissible level for residues of the subject herbicide on radishes and upland cress at 0.2 part per million (ppm).

DATE: Written comments must be received on or before June 22, 1981.

ADDRESS: Written comments to: Clinton Fletcher, Registration Division (TS–767C), Office of Pesticide Programs, Enironmental Protection Agency, 401 M St. SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Clinton Fletcher (703–557–7123).

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, PO Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petitions 7E1978 and 9E2242 to EPA on behalf of the IR–4 Technical Committee and the Agricultural Experiment Stations of Tennessee and Florida.

These petitions requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for negligible residues of the herbicide 2-chloroallyldiethyldithiocarbamate in or on the raw agricultural commodities radishes and upland cress at 0.2 ppm.

The data submitted in the petitions and all other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. The toxicology data considered in support of the proposed negligible tolerance of 0.2 ppm in or on radishes and upland cress were subchronic oral feeding studies in rats and dogs, both with a no-observed-effect-level (NOEL) of 200 ppm, highest level fed, a delayed neurotoxicity study in the hen negative at 3.85 gram (g)/kilogram (kg), highest dose. While the toxicity of this chemical has not been completely characterized, there is little or no expectation of finite residues remaining in the subject commodities. Thus, the incremental exposure and risk to humans is insignificant.

The National Cancer Institute (NCI) report on the carcinogenicity of 2-chloroallyldiethyldithiocarbamate indicated that, based on the terms of the bioassay, it was carcinogenic to Osborne-Mendel rats and to $B_6C_3F_1$ mice by inducing mammary gland adenocarcinoma and gastric neoplasia.

On the basis of the NCI study, the agency considers the cancer risk from dietary exposure of 2-chloroallyldiethyldithiocarbamate-treated radishes and upland cress to be very small. If it is assumed as a worst possible case that 2-chloroallyldiethyldithiocarbamate would be present in all fresh radishes and upland cress at the proposed tolerance level and all radishes and upland cress at the would be treated with 2-chloroallyldiethyldithiocarbamate, the lifetime risk of cancer from consuming radishes and upland cress is estimated to be less than 10^{-6}. However, it is unlikely that any real residue will exist on these commodities. The lifetime risk of cancer from dietary residues of 2-chloroallyldiethyldithiocarbamate resulting from prior established tolerances is estimated to be 2×10^{-6}.

The acceptable daily intake (ADI), based on the 90-day dog feeding study (NOEL of 200 ppm) and using a 2,000-fold safety factor, is calculated to be 0.0025 milligram (mg)/kg of body weight (bw)/day. The maximum permitted intake (MPI) for a 60 kg human is calculated to be 0.1500 mg/day. The theoretical maximum residue contribution (TMRC) from existing tolerances for a 1.5 kg daily diet is calculated to be 0.0554 mg/day. The current action will utilize 0.32 percent of the ADI. Published tolerances utilize 36.94 percent of the ADI.

The metabolism of 2-chloroallyldiethyldithiocarbamate is adequately understood and an adequate analytical method (gas chromatography) is available for enforcement purposes. There are presently no actions pending against the continued registration of this chemical.

Based on the above information considered by the agency, the tolerance established by amending 40 CFR Part 180 would protect the public health. It is proposed, therefore, that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request on or before June 22, 1981, that this rulemaking proposal be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. The comments must bear a notation indicating both the subject and the petition and document control number "[PP 7E1978/9E2242/P171]". All written comments filed in response to this notice of proposed rulemaking will be available for public inspection in the office of Clinton Fletcher, from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

As required by Executive Order 12291, EPA has determined that this proposed rule is not a "Major" rule and therefore does not require a Regulatory Impact Analysis. In addition, the Office of Management and Budget (OMB) has exempted this proposal from the OMB review requirement of Executive Order 12291, pursuant to section 8(b) of that Order.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

For information on Regulatory Flexibility Act requirements, see the appendix to this proposed rule.

(Sec. 408(e), 68 Stat. 514, (21 U.S.C. 346(e)))

Dated: May 7, 1981.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that Subpart C of 40 CFR Part 180 be amended by revising § 180.247 by (1) reformatting it into alphabetically tubular format and (2) alphabetically inserting the raw agricultural commodities "radishes" and "upland cress" to read as follows:

§ 180.247 2-Chloroallyldiethyldithiocarbamate; tolerances for residues.

Tolerances are established for residues of the herbicide 2-chloroallyldiethyldithiocarbamate in or on the following raw agricultural commodities:

Commodities	Parts per million
Bean vines	0.2(N).
Broccoli	0.2(N).
Brussels sprouts	0.2(N).
Cabbage	0.2(N).
Cantaloupes	0.2(N).
Celery	0.2(N).
Collards	0.2(N).
Corn (kernels plus cob with husk removed)	0.2(N).
Corn fodder	0.2(N).
Corn forage	0.2(N).
Corn grain	0.2(N).
Cucumbers	0.2(N).
Endive (escarole)	0.2(N).
Kale	0.2(N).
Lettuce	0.2(N).
Lima beans	0.2(N).
Mustard greens	0.2(N).
Okra	0.2(N).
Potatoes	0.2(N).
Radishes	0.2(N).
Snap beans	0.2(N).
Soybeans	0.2(N).
Soybean forage	0.2(N).
Soybean hay	0.2(N).
Spinach	0.2(N).
Tomatoes	0.2(N).
Turnip greens	0.2(N).
Turnips	0.2(N).
Upland cress	0.2(N).
Watermelons	0.2(N).

Appendix to [PP7E1978/9E2242/P17] 2-Chloroallyldiethyldithiocarbamate Proposed Tolerance

Certification Under Regulatory Flexibility Act:

Congress enacted the Regulatory Flexibility Act (Pub. L. 96-543, 94 Stat. 1164, 5 U.S.C. 601-612) effective January 1, 1981. The purpose of the Act is to assure that the Agency analyzes the effect of regulatory requirements on small businesses, government jurisdictions, and organizations (collectively referred to as "small entities"). The law requires that all "notice-and-comment" rulemaking, both proposed and final, be accompanied by an initial or final regulatory flexibility analysis, or by a certification by the Administrator that no such analysis is necessary because the regulation will not have a significant adverse impact on a substantial number of small entities.

Under sec. 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended (21 U.S.C. 346a), the Agency is authorized to establish by regulation tolerance levels, or exemptions from the requirements for ■ tolerance, for pesticides resulting in residues on raw agricultural commodities. Under sec. 409 of the same Act (21 U.S.C. 348), the Agency is authorized to issue regulations establishing permissible levels of residues of pesticides found as additives in processed food or feed. These tolerance and additive regulations are intended to protect the public while giving appropriate consideration to the production of an adequate, wholesome and economical food supply.

The establishment of a tolerance or an exemption or an additive level allows a pesticide product to be registered for a particular use resulting in residues on food or feed. This generally has beneficial economic impact on the producer, distributor, and professional applicator of the pesticide, all of whom benefit through sale of the pesticide. It also benefits the ultimate user of the pesticide, usually a grower or food processor, who would otherwise not be able to sell crops containing residues of that pesticide.

This proposed regulation would establish a maximum permissible level for residues of the herbicide 2-chloroallyldiethyldithiocarbamate in or on radishes and upland cress at 0.2 part per million.

The only potential adverse impact on the proposed ruling would be that it would require some labeling changes by registrants. However, the number of affected registrants is relatively very small, the burden of amending the labeling would be slight, and any costs would almost certainly be outweighed by the benefits to the registrants of being able to register this additional use.

Accordingly, I hereby certify that this proposed regulation would not, if promulgated, have a significant adverse impact on a substantial number of small entities. Therefore, this regulation does not require a regulatory flexibility analysis.

Dated: March 11, 1981.

Walter C. Barber, Jr.,

Acting Administrator.

[FR Doc. 81-15382 Filed 5-21-81; 8:45 am]

40 CFR Part 180

[PH-FRL-1833-8; PP 1E2479/P178]

S-Propyl Dipropylthiocarbamate; Proposed Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This notice proposes that a tolerance be established for the herbicide *S*-Propyl dipropylthiocarbamate in or on the raw agricultural commodity peanut hulls at 0.1 part per million (ppm). This proposal was submitted by Stauffer Chemical Company. This proposal would establish the maximum permissible level for residues of *S*-Propyl dipropylthiocarbamate in or on peanut hulls.

DATE: Written comments must be received on or before June 22, 1981.

ADDRESS: Written comments to: Richard F. Mountfort, Product Manager (PM) 23, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. Sw., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Richard F. Mountfort (703-557-7070).

SUPPLEMENTARY INFORMATION: The Stauffer Chemical Company, 1200 S. 47th St., Richmond, CA 94804 has submitted a pesticide petition (PP 1E2479) to the EPA. This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for residues of the herbicide *S*-Propyl dipropylthiocarbamate in or on the raw agricultural commodity peanut hulls at 0.1 part per million.

The data submitted in the petition and all other relevant material have been evaluated. Tolerances of 0.1 part per million on peanuts, peanut forage, and peanut hay were established in August 1967. Elanco Product Company has submitted an amendment to EPA to add the application of a tank mix of trifluralin and *S*-Propyl dipropylthiocarbmate to peanuts in

accordance with the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). Both pesticides are registered for individual application to peanuts. During the review of this application it was determined that a tolerance for residues of *S*-Propyl dipropylthiocarbamate in peanut hulls would be required to cover expecterd residues in that commodity. A related document (PP 1E2480/P177) proposing establishment of a tolerance in peanut hulls for trifluralin appears elsewhere in this issue of the **Federal Register**.

Peanut hulls are an animal feed item. Since no detectable residues are expected in peanuts from the registered uses, there is no expectation of residues in meat, milk, poultry, or eggs. Therefore, there will not be an increased exposure to humans.

The metabolism of *S*-Propyl dipropylthiocarbamate is adequately understood and an adequate analytical method (gas chromatography) is available for enforcement purposes. Tolerances have previously been established for residues of *S*-Propyl dipropylthiocarbamate at 0.1 ppm in a variety of commodities. Thus based on the above information it is concluded that the tolerance of 0.1 ppm in or on peanut hulls will protect the public health.

Any person who has registered or submitted an application for registration of a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act, which contains any ingredient listed herein, may request, on or before June 22, 1981, that the proposal be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on this proposed regulation. The comments must bear a notation indicating both the subject and the petition and document control number, "[PP 1E2479/P178]." All written comments filed in response to this notice of proposed rulemaking will be available for public inspection in the office of Richard F. Mountfort from 8:00 a.m. to 4:00 p.m., Monday through Friday, excluding legal holidays.

As required by Executive Order 12291, EPA has determined that this rule is not a "Major" rule and therefore does not require a Regulator Impact Analysis. In addition, the Office of Management and Budget (OMB) has exempted this regulation from the OMB review requirement of Executive Order 12291, pursuant to section 8(b) of that Order.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

For information on the Regulatory Flexibility Act requirements, see the Appendix to this proposed regulation.

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e)))

Dated: May 8, 1981.

Douglas D. Campt,

Director, Registration Division, Office of Pesticides Programs.

Therefore, it is proposed that Subpart C of 40 CFR Part 180 is amended by revising § 180.240 by (1) reformatting the text into alphabetical tabular format and (2) inserting the raw agricultural commodity "peanut hulls" to read as follows:

§ 180.240 S-Propyl dipropylthiocarbamate; tolerances for residues.

Tolerances are established for the herbicide *S*-Propyl dipropylthiocarbamate in or on the following raw agricultural commodities:

Commodities	Parts per million
Corn, fodder	0.1
Corn, forage	0.1
Corn, fresh (inc sweet) (K-CWHR)	0.1
Corn, grain	0.1
Peanuts	0.1
Peanut, forage	0.1
Peanut, hay	0.1
Peanut, hulls	0.1
Potatoes	0.1
Soybeans	0.1
Soybean, forage	0.1
Soybean, hay	0.1
Sweet potatoes	0.1

Appendix

[PP 1E2479/P178]

S-Propyl Dipropylthiocarbamate

Proposed Tolerance

Certification Under Regulatory Felexibility Act:

Pursuant to the Regulatory Flexibility Act (Pub. L. 96-543, 94 Stat. 1164, 5 U.S.C. KK601-612), all "notice-and-comment" rulemaking which is proposed after January 1, 1981, must be accompanied by a regulatory flexibility analysis, or by a certification by the Administrator that no such analysis is necessary because the regulation will not have a significant economic impact on a substantial number of small entities.

Under sec. 408 and 409 of the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended (21 U.S.C. KK346a, 348), the agency is authorized to establish, by regulation, tolerance levels, exemptions from the requirements for a tolerance, or food additive levels, for pesticides whose use results in residues on food or feed. The establishment of a tolerance or an exemption or an additive level allows a pesticide product to be registered for a particular use resulting in residues on food or feed. This generally has some beneficial economic impact on the producer, distributor, and professional applicator of the pesticide, as well as on the ultimate user of the pesticide, usually a grower or food processor, who would otherwise not be able to sell crops containing residues of that pesticide. Adverse impacts are usually nonexistent or insignificant.

This proposed regulation would establish a tolerance of 0.1 part per million in or on peanut hulls for the herbicide *S*-Propyl dipropylthiocarbamate. Any costs resulting from this rule would almost certainly be outweight by the benefits to the registrants of being able to register this additional use.

Accordingly, I hereby certify that this proposed regulation would not, if promulgated, have a significant economic impact on a substantial number of small entities. Therefore, this regulation does not require a regulatory flexibility analysis.

Dated: May 1, 1981.

Walter C. Barber, Jr.,

Acting Administrator.

40 CFR Part 180

[PH-FRL-1833-7; PP 1E2480/P177]

Trifluralin; Proposed Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This notice proposes that a tolerance be established for the herbicide and plant growth regulator trifluralin in or on the raw agricultural commodity peanut hulls at 0.1 part per million (ppm). This proposal was submitted by Elanco Products Company. This proposal would establish the maximum permissible level for residues of trifluralin in or on peanut hulls.

DATE: Written comments must be received on or before June 22, 1981.

ADDRESS: Written comments may be submitted to: Richard F. Mountfort, Product Manager (PM) 23, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Richard F. Mountfort (703-557-7070).

SUPPLEMENTARY INFORMATION: Elanco Products Company, a Division of Eli Lilly and Company, PO Box 1750, Indianapolis, IN 46206 has submitted a pesticide petition (PP 1E2480) to the EPA. The petition proposes that the Administrator, pursuant to section

408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for residues of the herbicide and plant growth regulator trifluralin (alpha,alpha,alpha-trifluoro-2,6-dinitro-*N,N*-dipropyl-*p*-toluidine) in or on the raw agricultural commodity peanut hulls at 0.1 ppm.

The data submitted in the petition and all other relevant material have been evaluated. A tolerance of 0.05 ppm in or on peanuts for trifluralin was established on March 8, 1968. The petitioner has submitted an amendment to EPA to add an application of a tank mix of trifluralin and *S*-Propyl dipropylthiocarbamate to peanuts in accordance with the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). Both pesticides are registered for individual application to peanuts. During a review of this application it was determined that a tolerance for residues of trifluralin in peanut hulls would be required to cover expected residues in that commodity. A related document (PP 1E2479/P178) proposing establishment of a tolerance for *S*-Propyl dipropylthiocarbamate in or on peanut hulls appears elsewhere in this issue of the **Federal Register**.

Peanut hulls are an animal feed item. Since no detectable residues are expected in peanuts from the registered uses, there is no expectation of residues in meat, milk, poultry, or eggs. Therefore, there will not be an increased exposure for humans.

The metabolism of trifluralin is adequately understood and an adequate analytical method (gas chromatography) is available for enforcement purposes. Tolerances have previously been established for residues of trifluralin ranging from 0.05 ppm to 2.0 ppm in a variety of raw agricultural commodities. Thus, based on the above information it is concluded that the tolerance of 0.1 ppm in or on peanut hulls will protect the public health, and it is proposed that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act, which contains the ingredient listed herein may request, on or before June 22, 1981, that this proposal be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on this proposed regulation. The comments must bear a notation indicating both the subject and the petition and document control number, "[PP 1E2480/P177]." All written comments filed in response to this proposal will be available for public inspection in the office of Richard F. Mountfort from 8:00 a.m. to 4:00 p.m. Monday through Friday, excluding legal holidays.

As required by Executive Order 12291, EPA has determined that this rule is not a "Major" rule and therefore does not require a Regulatory Impact Analysis. In addition, the Office of Management and Budget (OMB) has exempted this regulation from the OMB review requirement of Executive Order 12291, pursuant to section 8(b) of that Order.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

For information on the Regulatory Flexibility Act requirements, see the Appendix to this proposed regulation.

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e)))

Dated: May 8, 1981.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that Subpart C of 40 CFR Part 180 be amended by alphabetically inserting the raw agricultural commodity "peanut, hulls" in the table under § 180.207 to read as follows:

§180.207 Trifluralin; tolerances for residues.

* * * * *

Commodity	Part per million
* * * * *	
Peanut, hulls	0.1
* * * * *	

Appendix

Trifluralin

Proposed Tolerance

Certification Under Regulatory Flexibility Act:

Pursuant to the Regulatory Flexibility Act (Pub. L. 96–543, 94 Stat. 1164, 5 U.S.C. 601–612), all "notice-and-comment" rulemaking which is proposed after January 1, 1981, must be accompanied by a regulatory flexibility analysis, or by a certification by the Administrator that no such analysis is necessary because the regulation will not have a significant economic impact on a substantial number of small entities.

Under sec. 408 and 409 of the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended (21 U.S.C. 346a, 348), the agency is authorized to establish by regulation, tolerance levels, exemptions from the requirements for a tolerance, or food additive levels, for pesticides whose use results in residues on food or feed. The establishment of a tolerance or an exemption or an additive level allows a pesticide product to be registered for a particular use resulting in residues on food or feed. This generally has some beneficial economic impact on the producer, distributor, and professional applicator of the pesticide, as well as on the ultimate user of the pesticide, usually a grower or food processor, who would otherwise not be able to sell crops containing residues of that pesticide. Adverse impacts are usually nonexistent or insignificant.

This proposed regulation would establish a tolerance of 0.1 part per million in or on peanut hulls for trifluralin. Any costs resulting from this rule would almost certainly be outweighed by the benefits to the registrants of being able to register this additional use.

Accordingly, I hereby certify that this proposed regulation would not, if promulgated, have a significant economic impact on a substantial number of small entities. Therefore, this regulation does not require a regulatory flexibility analysis.

Dated: May 1, 1981.

Walter C. Barber, Jr.,

Acting Administrator.

BILLING CODE 6560-32-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-6033]

National Flood Insurance Program; Proposed Flood Elevation Determinations; Correction

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Proposed rule; correction.

SUMMARY: This document corrects a Notice of Proposed Determinations of base (100-year) flood elevations for selected locations in the Unincorporated Areas of Des Moines County, Iowa, previously published at 45 FR 22619 on April 20, 1981.

EFFECTIVE DATE: May 22, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, National Flood Insurance Program, (202) 755–5585, Federal Emergency Management Agency, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives

notice of the correction to the Notice of Proposed Determinations of base (100-year) flood elevations for selected locations in the Unincorporated Areas of Des Moines County, Iowa previously published at 45 FR 22619 on April 20, 1981, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR 67.4(a)).

The listing appears correctly as follows:

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
Iowa	(Unincorporated) Des Moines County	Hawkeye Creek	About 1750 feet upstream of confluence of West Tributary Hawkeye Creek.	*672

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator)

Issued: May 6, 1981.

Richard W. Krimm,

Acting Administrator, Federal Insurance Administration.

Federal Register
Vol. 46, No. 99
Friday, May 22, 1981

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Forest Land and Resource Management Plan, Chugach National Forest, Alaska; Intent To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture will prepare an Environmental Impact Statement on the Land and Resource Management Plan for the Chugach National Forest.

The Forest Plan will be developed in accordance with Sec. 6 of the National Forest Management Act of 1976 and regulations issued pursuant to the Act.

The Forest Plan will provide management direction for these National Forest System lands and will replace existing Multiple Use Plans and other functional plans.

The Forest Plan will be selected from a range of alternatives which will include at least:

a. A no action alternative which represents the most likely conditions expected to exist in the future if current management direction would continue unchanged;

b. Alternatives that display possible outputs of resources at each of several expenditure levels; and

c. Alternatives designed to resolve the identified major public issues and management concerns.

Public input will be an integral part of the planning process. Input has been received through a series of meetings held in area communities and through letters received over the past three years on this and previous planning efforts. Times and places for these "scoping" meetings were announced by notices in area newspapers, news releases, and notices mailed to other agencies, organizations and individuals known to have interest in management of the Chugach National Forest.

The anticipated release date for the Draft Environmental Impact Statement (DEIS) is March 31, 1982. A 90-day period for public review and comments will follow. The final Environmental Impact Statement (FEIS) is tentatively scheduled for filing with the EPA by December 31, 1982, with implementation of the Forest Plan thereafter. All dates are in accordance with requirements of the NFMA Regulations and directions from the Chief of the Forest Service.

The Regional Forester, Alaska Region, is the Responsible Official. For further information, contact Mr. Clay G. Beal, Forest Supervisor, 2221 E. Northern Lights Blvd., Suite 230, Anchorage, AK 99504.

John A. Sandor,
Regional Forester.

BILLING CODE 3410-11-M

Rural Electrification Administration

Big Rivers Electric Corporation, Inc.; Finding of No Significant Impact

Notice is hereby given that the Rural Electrification Administration (REA) has prepared an Environmental Assessment (EA) and, based upon this EA, REA made a Finding of No Significant Impact (FONSI) in connection with proposed financing assistance for proposed ash handling facilities of the Big Rivers Electric Corporation, Inc., (Big Rivers) of Henderson, Kentucky. The existing ash pond at the Reid Generating Station has reached its design capacity. To meet future ash handling requirements and to ensure that the existing ash pond complies with the National Pollution Discharge Elimination System permit requirements, Big Rivers proposes to reroute the discharge canal; to dredge this pond; and to dispose of the dredged ash in an ash hold area within the scrubber waste disposal area for the Green Station. These actions together will provide for the long-term disposal of ash from the Reid Station in an environmentally sound manner. Alternatives to these actions were considered. The proposed actions were found to be preferred for environmental, economic, and engineering reasons.

Big Rivers prepared a Borrower's Environmental Report (BER) concerning the proposed project. Based on this BER and other support documents, REA prepared an Environmental Assessment which fully incorporates the BER. REA's independent evaluation of the project and the above-mentioned documents leads it to conclude that approval of the project does not represent a major Federal action that will significantly affect the quality of the human environment, and in accordance with Sections IV.B and IV.D.1 of REA Bulletin 20-21:320-21, REA has made a Finding of No Significant Impact (FONSI).

Various alternatives to the proposed ash handling facility have been considered by Big Rivers and REA. These alternatives include no action, alternative ash pond locations, fly ash trucking to a landfill, pneumatic conveying, mechanical dewatering, and conversion of the existing pond to a landfill. It has been determined that the most economical and environmentally acceptable alternative is the proposed project.

REA has determined also that the proposed project will not adversely impact any threatened or endangered species or critical habitat, important farmlands, archeological and historic resources, wetlands, nor floodplains. Approximately 10 acres of the disposal area will be located in the 100-year floodplain. This acreage is part of the Green Station disposal area which was previously approved for scrubber waste disposal. Alternatives to locating in the floodplain were considered. REA has determined that there are no practicable alternatives that will avoid location of facilities in the floodplain. Further discussion of floodplains can be found in the EA and BER. Copies of the EA and Big Rivers' BER may be reviewed in the office of Frank W. Bennett, Director, Power Supply Division, Room 5168, South Agriculture Building, Rural Electrification Administration, Washington, D.C. 20250, Telephone (202) 447-6183, and Big Rivers' Headquarters, 201 3rd Street, P.O. Box 24, Henderson, Kentucky 42420.

This Federal assistance program is listed in the Catalog of Federal Domestic Assistance as 10.850—Rural Electrification Loans and Loan Guarantees.

Dated at Washington, D.C., this 18th day of May 1981.

Joe S. Zoller,

Acting Administrator, Rural Electrification Administration.

[FR Doc. 81-15414 Filed 5-21-81; 8:45 am]

BILLING CODE 3410-15-M

Plains Electric Generation & Transmission Cooperative, Inc.; Finding of No Significant Impact

The Plains Electric Generation and Transmission Cooperative, Inc., (Plains) of Albuquerque, New Mexico, is making a design change in the transmission lines to interconnect its Escalante steam generating station with the electric transmission systems in the area.

On January 9, 1980, the Rural Electrification Administration (REA) issued a Final Environmental Impact Statement (FEIS) on the Escalante generating plant and related transmission facilities that considered certain transmission facilities different from those now proposed. The FEIS discussed four 115 kV transmission lines emanating from the Escalante generating station. Plains now proposes to change two of these lines that were to be built in an easterly direction and tying into the Public Service Company of New Mexico's (PNM) transmission grid at Ambrosia Lake to a single 230 kV transmission line. This new plan was chosen to improve interconnection and transmission arrangements in the area.

Plains prepared a Borrower's Environmental Report (BER) on the proposed design change. REA prepared an Environmental Assessment (EA) on the change.

After an independent evaluation of the BER and EA, REA concluded that the design change will not have a significant impact on the quality of the human environment and prepared a "Finding of No Significant Impact" (FONSI).

This FONSI, REA's, EA, and Plain's BER may be reviewed in the office of the Director, Power Supply Division, Rural Electrification Administration, Room 5168, South Agriculture, Washington, D.C. 20250, and at the office of the cooperative, Plains Electric Generation and Transmission Cooperative, Inc., 2401 Aztec Road, NE, Albuquerque, New Mexico 87107.

This program is listed in the catalog of the Federal Domestic Assistance, 10.850 Rural Electrification Loans and Loan Guarantees.

Dated at Washington, D.C., this 15th day of May 1981.

Joe S. Zoller,

Acting Administrator, Rural Electrification Administration.

[FR Doc. 81-15146 Filed 5-21-81; 8:45 am]

BILLING CODE 3410-15-M

San Isabel Electric Association, Inc., Finding of No Significant Impact

Notice is hereby given that the Rural Electrification Administration (REA) has prepared a Finding of No Significant Impact which concludes that there is no need for REA to prepare an environmental impact statement in connection with the proposed financing assistance by REA for San Isabel Electric Association, Inc., Pueblo, Colorado, (San Isabel). The proposed financing will assist San Isabel in constructing 70.8 km (44 miles) of 115 kV transmission line and associated substation facilities.

The 115 kV transmission line will be built between the Walsenburg Substation located in Huerfano County, Colorado, and the proposed Burro Canyon Substation located in Los Animas County, Colorado. Associated substation facilities include the construction of a new distribution substation and the expansion of one existing substation. San Isabel has prepared a Borrower's Environmental Report concerning the proposed project. An Environmental Assessment was prepared by REA.

Threatened and endangered species, important farmlands, known archaeological and historic sites, wetlands and floodplains, and other potential impacts of the project are adequately considered in the San Isabel and REA Environmental Assessments.

REA's independent evaluation of the proposed project leads it to conclude that its proposed financing assistance for this project does not represent a major Federal action that will significantly affect the quality of the human environment.

Based on this independent evaluation, the REA Environmental Assessment, and a review of San Isabel's Borrower's Environmental Report, a Finding of No Significant Impact was was reached in accordance with Sections IV.B and IV.D.1 of REA Bulletin 20-21:320-21, Part I.

Various alternatives to the proposed transmission line and substation were reviewed by San Isabel and REA. The alternatives include no action, rebuilding existing facilities, underground construction, alternate connection points, and alternate routes. The most viable alternative to deliver power to all existing and future loads of San Isabel in Huerfano and Los Animas Counties is the proposed project.

Copies of REA's Finding of No Significant Impact, REA's Environmental Assessment and San Isabel's Borrower's Environmental Report may be reviewed in the office of the Director, Distribution Systems Division, Room 3306, South Agriculture Building, Rural Electrification Administration, Washington, D.C. 20250 and at the office of the cooperative, San Isabel Electric Association, Inc., Enterprise & Aerospace Drive, (P.O. Box 872), Pueblo West, Colorado 81007.

This Program is listed in the Catalog of Federal Domestic Assistance as 10.850—Rural Electrification Loans and Loan Guarantees.

Dated at Washington, D.C. this 15th day of May, 1981.

Joe S. Zoller,

Acting Administrator, Rural Electrification Administration.

[FR Doc. 81-15147 Filed 5-21-81; 8:45 am]

BILLING CODE 3410-15-M

San Luis Valley Rural Electric Cooperative, Inc.; Finding of No Significant Impact

Notice is hereby given that the Rural Electrification Administration (REA) has prepared a Finding of No Significant Impact which concludes that there is no need for REA to prepare an environmental impact statement in connection with proposed financing assistance by REA for San Luis Valley Rural Electric Cooperative, Inc. (SLV), of Monte Vista, Colorado. The proposed financing assistance will be used by SLV for the construction of 72 km (45 miles) of 115 kV transmission line and associated substation facilities.

The 115 kV transmission line will be built between the Waverly Substation located in Alamosa County, Colorado, and the proposed Mesita Substation in Costilla County, Colorado, and the proposed Mesita Substation in Costilla County, Colorado. Associated substation facilities entail construction of the Mesita Substation and construction of a new Stockade Substation to replace the existing Stockade Substation. SVL has prepared a Borrower's Environmental Report concerning the proposed project. An Environmental Assessment was prepared by REA.

Threatened and endangered species, important farmlands, archaeological and historic sites, wetlands and floodplains, and other potential impacts of the

project are adequately considered in the SVL and REA Environmental Assessments.

REA's independent evaluation of the proposed project leads it to conclude that its proposed financing assistance for this project does not represent a major Federal action that will significantly affect the quality of the human environment.

Based on this independent evaluation, the REA Environmental Assessment, and a review of SLV's Borrower's Environmental Report, a Finding of No Significant Impact was reached in accordance with Section IV.B and IV.D.1 of REA Bulletin 20–21:320–21, Part I.

Various alternatives to the proposed transmission line and substations were reviewed by SLV and REA. The alternatives include no action, use of existing facilities and underground construction. The most viable alternative to deliver power to all existing and future loads of SLV in Alamosa, Conejos, and Costilla Counties is the proposed project.

Copies of REA's Finding of No Significant Impact, REA's Environmental Assessement and SLV's Borrower's Environmental Report may be reviewed in the office of the Director, Distribution Systems Division, Room 3306, South Agriculture Building, Rural Electrification Administration, Washington, D.C. 20250 and at the office of the cooperative, San Luis Valley Electric Cooperative, Inc., 3625 West U.S. Hwy. 160, Monte Vista, Colorado 81144.

This Program is listed in the Catalog of Federal Domestic Assistance at 10.850—Rural Electrification Loans and Loan Guarantees.

Dated at Washington, D.C., this 15th day of May, 1981.

Joe S. Zoller,

Acting Administrator, Rural Electrification Administration.

BILLING CODE 3410–15–M

Office of the Secretary

Price-Undercutting of Domestic Swiss Cheese by Imported German, Danish and French Swiss Cheese

On April 20, 1981, the U.S. Department of Agriculture received three complaints alleging price-undercutting of domestic Swiss cheese by imported Swiss cheese produced in the Federal Republic of Germany, Denmark and France. On April 28, a fourth complaint was received alleging price-undercutting of domestic Swiss cheese by imported Swiss cheese produced in Denmark and France. Under Section 702 of the Trade Agreements Act of 1979 (PL 96–39), the Secretary of Agriculture must conduct a price-undercutting investigation and make a determination as to the validity of the allegation no later than 30 days after receiving a complaint.

Based on the investigation of the Director of the Dairy, Livestock and Poultry Division, Foreign Agricultural Service, pursuant to the regulations at 7 CFR 6.40–44, I have determined that the duty-paid wholesale price of imported Swiss cheese produced in the Federal Republic of Germany is $1.74 per pound; that the duty-paid wholesale price of imported Swiss cheese produced in Denmark is $1.61 per pound; that the duty-paid wholesale price of imported Swiss cheese produced in France is $1.83 per pound; and that the domestic wholesale market price of U.S. produced Swiss cheese is $1.81 per pound for Grade A–B and $1.78 per pound for Grade C. I have determined that current imports of German and French Swiss cheeses are Grade A–B and that current imports of Danish cheese are Grade C. I, therefore, have determined that there is price-undercutting of U.S. produced Swiss cheese by imported Swiss cheese produced in the Federal Republic of Germany and Denmark and I have notified the United States Trade Representative accordingly.

Done at Washington, D.C., this 20th day of May 1981.

John R. Block,

Secretary.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 6–81]

Proposed Foreign-Trade Zone—Baltimore/Washington International Airport, Md.; Application and Public Hearing

Notice is hereby given that an application has been submitted to the Foreign-Trade Zones Board (the Board) by the Maryland Department of Transportation (MDOT), a State public agency, requesting authority to establish a general-purpose foreign-trade zone at the Baltimore/Washington International Airport (BWI), in Anne Arundel County, Maryland, with the Baltimore Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act of 1934, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on May 14, 1981. The applicant is authorized to make this proposal under Chapter 519, Acts of 1978, Sections 466–469 of Article 23, Annotated Code of Maryland.

The applicant proposes to establish a foreign-trade zone within BWI's Air Cargo/Industrial Park Complex which covers 500 acres on airport property. The zone will consist of two sites on 38 acres to be developed in successive stages. Site one is a 16-acre parcel on Maryland Route 170 near Taxiway "A". It contains three existing air cargo buildings totaling 103,000 square feet of floor space to be used for initial zone operations. Site two, located on Maryland Route 176 near Taxiway "T" would be developed to accommodate the needs of anticipated processing and manufacturing users. The State Aviation Administration, and MDOT agency, would operate the zone in conjunction with its overall operation of the airport.

MDOT has been working in close cooperation with the Maryland Department of Economic and Community Development in formulating a zone project consistent with State needs. As a result, the project has been designed as an integral part of the State's economic development efforts to attract new business and to support existing industries.

The application contains evidence concerning the need for zone services in the Baltimore area. The applicant's market survey indicates substantial interest on the part of the Maryland business community, particularly firms using BWI airport.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: Paul R. Nichols (Chairman), Program Manager, Import Administration, U.S. Department of Commerce, Washington, D.C. 20230; Carl W. Johnson, Program Analyst, Customs Service, Region III, 40 South Gay Street, Baltimore, Maryland 21202; and Colonel James W. Peck, District Engineer, U.S. Army Engineer District, Baltimore, P.O. Box 1715, Baltimore, Maryland 21203.

As part of its investigation, the examiners committee will hold a public hearing on June 25, 1981, beginning at 10:00 a.m., in Conference Room 2 of the Passenger Terminal, Baltimore/Washington International Airport, Maryland. The purpose of the hearing is to help inform interested persons, to provide an opportunity for their expression of views, and to obtain information useful to the examiners.

Interested parties are invited to present their views at the hearing. They should notify the Board's Executive Secretary of their desire to be heard in writing at the address below or by phone (202/377-2862) by June 17, 1981. Instead of an oral presentation, written statements may be submitted to the examiners committee in accordance with the Board's regulations, care of the Executive Secretary, at any time from the date of this notice through July 25, 1981. Evidence submitted during the post-hearing period is not desired unless it is clearly shown that the matter is new and material and that there are good reasons why it could not be presented at the hearing. A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

District Office, U.S. Department of Commerce, 415 U.S. Customshouse, Gay and Lombard Streets, Baltimore, Maryland 21202

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 2006, Washington, D.C. 20230

Dated: May 18, 1981.

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-25-M

International Trade Administration

Discrete Semiconductor Device Subcommittee of the Semiconductor Technical Advisory Committee; Partially Closed Meeting

AGENCY: International Trade Administration, Commerce.

SUMMARY: The Semiconductor Technical Advisory Committee was initially established on January 3, 1973, and rechartered on August 29, 1980 in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act. The Subcommittee was approved for continuation on September 19, 1980 pursuant to the charter of the Committee.

The Discrete Semiconductor Device Subcommittee was formed to study transistor, diode, photoconductive, and thyristor semiconductor devices with the goal of making recommendations to the Department of Commerce relating to the appropriate parameters for controlling exports for reasons of national security.

TIME AND PLACE: June 9, 1981, at 9:30 a.m. The meeting will take place at the Main Commerce Building, Conference Room B, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230.

AGENDA:

General Session

(1) Opening remarks by the Chairman.

(2) Presentation of papers or comments by the Public.

(3) Presentation on civil application of microwave tubes.

(4) Presentation on civil application of image intensifiers and other photo tubes.

Executive Session

(5) Discussion of matters properly classified under Executive Order 12065, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

PUBLIC PARTICIPATION: The General Session of the meeting will be open to the public and limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 16, 1980, pursuant to Section 10(d) of the Federal Advisory Committee Act, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12065. A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 5317, U.S. Department of Commerce. Telephone: 202–377–4217.

FOR FURTHER INFORMATION CONTACT:

Mrs. Margaret A. Cornejo, Office of the Director of Licensing, Office of Export Administration, Room 1609, U.S. Department of Commerce, Washington, D.C. 20230, telephone: 202–377–2583.

Dated: May 14, 1981.

Saul Padwo,

Director of Licensing, Office of Export Administration.

BILLING CODE 3510–25–M

Semiconductor Technical Advisory Committee; Closed Meeting

AGENCY: International Trade Administration, Commerce.

SUMMARY: The Semiconductor Technical Advisory Committee was initially established on January 3, 1973, and rechartered on August 29, 1980 in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration with respect to questions involving (A) technical specifications and policy issues relating to those specifications which are of concern to the Department, (B) worldwide availability of products and systems, including quantity and quality, and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to semiconductors, or technology, and (D) exports of the aforementioned commodities subject to unilateral and multilateral controls which the United States established or in which it participates including proposed revisions of any such controls.

TIME AND PLACE: June 10, 1981, at 8:00 a.m. The meeting will take place at the Main Commerce Building, Room 6802, 14th Street and Constitution Ave., NW., Washington, D.C.

The Committee will meet only in Executive Session to discuss matters properly classified under Executive Order 12065, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 16, 1980, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government In The Sunshine Act, P.L. 94–409, that the matters to be discussed in the meeting should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the meeting will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12065.

A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 5317, U.S. Department of Commerce, telephone: 202–377–4217.

FOR FURTHER INFORMATION CONTACT:

Mrs. Margaret Cornejo, Office of the Director of Licensing, Office of Export Administration, Room 1609, U.S. Department of Commerce, Washington, D.C. 20230, telephone: 202–377–2583.

Dated: May 15, 1981.

BILLING CODE 3510–25–M

Carbon Steel Plate From Taiwan; Preliminary Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of antidumping finding.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on carbon steel plate from Taiwan. This review covers the only known exporter of the merchandise to the United States, China Steel Corporation, Kaohsiung, Taiwan, for two consecutive time periods up to May 31, 1980. This review indicates for the first period the existence of a weighted-average margin of 19.97% and no shipments for the second period. As a result of the review, the Department has preliminarily determined to assess dumping duties equal to the calculated differences between foreign market value and purchase price on shipments during the first time period. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: May 22, 1981.

FOR FURTHER INFORMATION CONTACT:

Susan M. Crawford, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230 (202–377–2209).

SUPPLEMENTARY INFORMATION:

Procedural Background

On June 13, 1979, a dumping finding with respect to carbon steel plate from Taiwan was published in the **Federal Register** (44 FR 33877–8). On January 1, 1980, the provisions of title I of the Trade Agreements Act of 1979 became effective. Title I replaced the provisions of the Antidumping Act of 1921 ("the 1921 Act") with a new title VII to the Tariff Act of 1930 ("the Tariff Act"). On January 2, 1980, the authority for administering the antidumping duty law was transferred from the Department of the Treasury to the Department of Commerce ("the Department"). The Department published in the **Federal Register** of March 28, 1980 (45 FR 20511–20512) a notice of intent to conduct administrative reviews of all outstanding dumping findings. As

required by section 751 of the Tariff Act, the Department has conducted an administrative review of the finding on carbon steel plate from Taiwan. The substantive provisions of the 1921 Act and the appropriate Customs Service regulations apply to all unliquidated entries made prior to January 1, 1980.

Scope of the Review

Imports covered by this review are shipments of hot-rolled carbon steel plate, 0.1875 inch or more in thickness, over 8" in width, not in coils, not pickled, not coated or plated with metal, not clad, other than black plate, and not pressed or stamped to nonrectangular shape. Carbon steel plate is currently classifiable under item 607.6615 of the Tariff Schedules of the United States Annotated (TSUSA). China Steel Corporation ("CSC") is the only known exporter to the United States of Taiwanese carbon steel plate. This review covers two consecutive time periods from February 14, 1979, the date of suspension of liquidation, through May 31, 1980. For the period July 1, 1979 through May 31, 1980, there were no known shipments to the United States.

Purchase Price

The Department used purchase price, as defined in section 203 of the 1921 Act, since all sales were made to unrelated U.S. purchasers. In this case purchase price was calculated on the basis of the CIF or C&F price to an unrelated purchaser in the United States, with deductions, where appropriate, for ocean freight and insurance. Additions were made for both harbor dues and customs duties on imported raw materials not collected for producing exported merchandise. Additions were also made for the amount of sales tax, stamp tax and education tax rebated upon exportation, but only to the extent that such taxes were incurred with respect to home market sales and were added to or included in the price of such or similar merchandise. No other adjustments were claimed or made.

Foreign Market Value

In calculating foreign market value the Department used home market price, as defined in section 205 of the 1921 Act, since sufficient quantities were sold in the home market to provide a basis for comparison. CSC sold at least 55% of its total sales in Taiwan and home market sales were over 100% of the quantity sold for exportation to countries other than the United States. CSC provided the Department with a complete list of home market sales. However, this list did not identify what extras were included in individual sales. In the absence of such specific information, foreign market value was calculated on the basis of the weighted-average base list price plus the home market list price of the extras included in the sales to the United States. Available evidence indicates that the firm adheres to its list prices. The foreign market values were adjusted for differences in credit costs in accordance with § 153.10 of the Customs regulations. No other adjustments were claimed or made.

The Department's review of cost of production data submitted in response to an allegation of sales below the cost of production in the home market indicates that there were no sales at less than the cost of production in the home market.

Preliminary Results of the Review

As a result of our comparison of purchase price to foreign market value, we preliminarily determine that the following margins exist:

Time period	Margins, Percent
Feb. 14, 1979 to June 30, 1979	19.97
July 1, 1979 to May 31, 1980	[1]19.97

[1]No shipments during this period.

Interested parties may submit written comments on these preliminary results on or before June 22, 1981 and may request disclosure and/or a hearing on or before June 8, 1981. Any request for an administrative protective order must be made on or before May 27, 1981. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

The Department shall determine, and the U.S. Customs Service shall assess, duties on all entries made during the period. Individual differences between purchase price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions separately directly to the Customs Service.

Further, as required by § 353.48(b) of the Commerce Regulations, a cash deposit of 19.97%, based upon the last known shipments, shall be required on all shipments of carbon steel plate from Taiwan entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results. This requirement shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

B. Waring Partridge III,

Acting Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

Ferrite Cores (of the Type Used in Consumer Electronic Products) From Japan; Preliminary Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of antidumping finding.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on ferrite cores (of the type used in consumer electronic products) from Japan. The review covers the one exporter of this merchandise to the United States not covered by the Department's previous 1981 review for the period November 1, 1976 through February 29, 1980. The review indicates the existence of dumping margins for this exporter during this period.

As a result of the review, the Department has preliminarily determined to assess dumping duties for this exporter equal to the calculated differences between foreign market value and purchase price on each of its shipments occurring during the period. Where company-supplied information was not complete the Department has used the best information available. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: May 22, 1981.

FOR FURTHER INFORMATION CONTACT: Linda L. Pasden, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230 (202-377-4106).

SUPPLEMENTARY INFORMATION:

Procedural Background

On March 13, 1971, a dumping finding with respect to ferrite cores (of the type used in consumer electronic products) from Japan was published in the **Federal Register** as Treasury Decision 71-84 (36 FR 4877). On January 1, 1980, the provisions of title I of the Trade Agreements Act of 1979 became effective. Title I replaced the provisions of the Antidumping Act of 1921 ("the 1921 Act") with a new title VII to the Tariff Act of 1930 ("the Tariff Act"). On

January 2, 1980, the authority for administering the antidumping duty law was transferred from the Department of the Treasury to the Department of Commerce ("the Department"). The Department published in the **Federal Register** of March 28, 1980 (45 FR 20511–12) a notice of intent to conduct administrative reviews of all outstanding dumping findings. As required by section 751 of the Tariff Act, the Department has conducted an administrative review of the finding on ferrite cores (of the type used in consumer electronic products) from Japan. The substantive provisions of the 1921 Act apply to all unliquidated entries made prior to January 1, 1980.

Scope of the Review

Imports covered by this review are magnetically soft ferrite magnets and are usually wound with wire. The merchandise is magnetized with the induction of electric current, and is of the type commonly used as components in consumer electronic products, such as household television receivers, projection television sets, radios, stereos and high fidelity radio systems, automobile radios, electronic home computers, etc. These ferrite cores are currently classifiable under item 535.1240 of the Tariff Schedules of the United States Annotated (TSUSA).

The Department knows of a total of nine exporters to the United States of such Japanese ferrite cores. This review covers the one exporter, TDK Electronics Co., Ltd. ("TDK"), not covered by the review published in the **Federal Register** on April 3, 1981 (46 FR 20249), for all time periods up to February 29, 1980, during which shipments of ferrite cores may have been made to the United States and for which appraisement instructions ("master lists") have not been issued. The issue of the Department's obligation to conduct administrative review of entries, unliquidated as of January 1, 1980 and covered by prior master lists, is under review. Liquidation has been suspended pending disposition of the issue.

The Department has determined that TDK's response did not cover all sales during the period and was, therefore, incomplete. Where information was complete, we used that information solely for appraisement. Where information was incomplete, we used TDK's fair value weighted-average margin as the best information available.

On September 11, 1978, TDK requested a revocation. Since our current analysis indicates that margins exist for TDK, we will not consider this request.

United States Price

In calculating United States price the Department used purchase price, as defined in section 772(b) of the Tariff Act and section 203 of the 1921 Act. Purchase price was based on the CIF packed price to unrelated purchasers in the United States. Where applicable, we deducted ocean and inland freight, insurance, and U.S. duty. No other adjustments were claimed or allowed.

Foreign Market Value

In calculating foreign market value the Department used home market price, as defined in section 773(a) of the Tariff Act and section 205 of the 1921 Act, since sufficient quantities of such or similar merchandise were sold in the home market to provide a basis for comparison. TDK sold in the home market at least 10 percent of total sales, and at least 12 percent of sales for export to countries other than the United States, during the period covered. The home market prices were based on delivered prices with adjustments for inland freight, and differences in packing and in the merchandise, where applicable. Claims for differences in credit costs, direct selling costs, and general selling expenses were disallowed since the firm provided insufficient supporting documentation. No other adjustments were claimed or allowed.

Preliminary Results of the Review

As a result of our comparison of United States price to foreign market value, we preliminarily determine that the following margins exist:

Exporter	Period	Margin on reported items percent	Margin on unreported items percent
TDK	Nov. 1, 1976 to Mar. 31, 1978.	1.28	28
	Apr. 1, 1978 to Nov. 30, 1978.	18.34	28
	Dec. 1, 1978 to Feb. 29, 1980.	8.32	28

Interested parties may submit written comments on these preliminary results on or before June 22, 1981 and may request disclosure and/or a hearing on or before June 8, 1981. Any request for an administrative protective order must be made on or before May 27, 1981. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

The Department shall determine, and the U.S. Customs Service shall asses, dumping duties on all entries made during the time periods involved. Individual differences between purchase price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions directly to the Customs Service.

Further, as required by § 353.48(b) of the Commerce Regulations, a cash deposit of 28 percent shall be required on all shipments entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results. This requirement shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751 (a)(1) of the Tariff Act (19 U.S.C. 1675 (a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

B. Waring Partridge, III,

Acting Deputy Assistant Secretary for Import Administration.

May 19, 1981.

BILLING CODE 3510-25-M

Microcircuit Subcommittee of the Semiconductor Technical Advisory Committee; Closed Meeting

AGENCY: International Trade Administration, Commerce.

SUMMARY: The Semiconductor Technical Advisory Committee was initially established on January 3, 1973, and rechartered on August 29, 1980 in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act. The Subcommittee was approved for continuation on September 19, 1980 pursuant to the charter of the Committee.

The Microcircuit Subcommittee was formed to study microcircuit and acoustic wave devices with the goal of making recommendations to the Department of Commerce relating to the appropriate parameters for controlling exports for reasons of national security.

TIME AND PLACE: June 9, 1981, at 8:30 a.m. The meeting will take place at the Main Commerce Building, Room 5611, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230.

AGENDA:

General Session

(1) Opening remarks by the Chairman.

(2) Presentation of papers or comments by the public.

(3) Review of minutes of April 14, 1981, meeting.

(4) Discussion of microprocessor peripheral circuits for educational purposes of the Subcommittee.

Executive Session

(5) Discussion of matters properly classified under Executive Order 12065, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

PULBIC PARTICIPATION: The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 16, 1980, pursuant to Section 10(d) of the Federal Advisory Committee Act, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552(c)(1) and are properly classified under Executive Order 12065.

A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 5317, U.S. Department of Commerce, Telephone: 202–377–4217.

FOR FURTHER INFORMATION CONTACT: Mrs. Margaret A. Cornejo, Office of the Director of Licensing, Office of Export Administration, Room 1609, U.S. Department of Commerce, Washington, D.C. 20230 Telephone: 202–377–2583.

Dated: May 19, 1981.

Saul Padow

Director of Licensing, Office of Export Administration.

BILLING CODE 3510–25–M

Semiconductor Manufacturing Materials and Equipment Subcommittee of the Semiconductor Technical Advisory Committee; Closed Meeting

AGENCY: International Trade Administration, Commerce.

SUMMARY: The Semiconductor Technical Advisory Committee was initially established on January 3, 1973, and rechartered on August 29, 1980 in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act. The Subcommittee was approved for continuation on September 19, 1980 pursuant to the charter of the Committee.

The Semiconductor Manufacturing Materials and Equipment Subcommittee was formed to study the technical and strategic value of semiconductor device production equipment and materials for the purpose of maintaining a continuous review of the export control technical parameters, and to formulate recommendations to the Commerce Department for parameter updating as appropriate for reasons of national security.

TIME AND PLACE: June 9, 1981, at 9:30 a.m. The meeting will take place at the Main Commerce Building, Room 6802, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230. The Subcommittee will meet only in Executive Session to discuss matters properly classified under Executive Order 12065, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

FOR FURTHER INFORMATION CONTACT: Mrs. Margaret A. Cornejo, Office of the Director of Licensing, Office of Export Administration, Room 1609, U.S. Department of Commerce, Washington, D.C. 20230. Telephone: 202–377–2583.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 16, 1980, pursuant to Section 10(d) of the Federal Advisory Committee Act, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12065. A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 5317, U.S. Department of Commerce, Telephone: 202–377–4217.

Dated: May 19, 1981.

BILLING CODE 3510–25–M

Sugar and Syrups From Canada; Final Results of Administrative Review of Antidumping Duty Order

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Final Results of Administrative Review of Antidumping Duty Order.

SUMMARY: On March 24, 1981, the Department of Commerce published the preliminary results of its administrative review of the antidumping duty order on sugar and syrups from Canada. The review covered five exporters and the time period November 8, 1979 through March 31, 1980.

Interested parties were given an opportunity to submit oral or written comments on these preliminary results. Based on comments received from one of the exporters, the Department made adjustments which resulted in a new margin for that company.

EFFECTIVE DATE: May 22, 1981.

FOR FURTHER INFORMATION CONTACT: Betty L. Hood, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C., 20230 (202–377–5222).

SUPPLEMENTARY INFORMATION:

Procedural Background

On April 9, 1980, an antidumping duty order with respect to sugar and syrups from Canada was published in the **Federal Register** (45 FR 24126–7). On March 24, 1981, the Department of Commerce ("the Department") published in the **Federal Register** the preliminary results of its administrative review of the antidumping duty order (46 FR 18326). The Department has now completed its administrative review of that antidumping duty order.

Scope of the Review

Imports covered by this review are shipments of sugar and syrups produced from raw sugar derived from sugar cane and sugar beets. The sugar is refined into granulated or powdered sugar, icing, or liquid sugar. The subject merchandise is currently classifiable under items 155.2025, 155.2045, and 155.3000 of the Tariff Schedules of the United States Annotated (TSUSA).

The Department knows of a total of five exporters to the United States of Canadian sugar and syrups. This review covers all five of the exporters from the date liquidation was suspended, November 8, 1979, through March 31, 1980. This is the initial administrative review of this order.

Interested parties were afforded an opportunity to furnish oral or written

comments. F. W. Jones & Son, Ltd., one of the companies which had failed to respond, submitted a response to the questionnaire. Though the response was late, we did not consider it untimely, since the lateness was unavoidable, therefore, we used the response to calculate a new margin. For the other exporters the margins are the same as those in the preliminary results.

Written comments were received from the petitioner, Amstar Corporation. Amstar asked that no adjustment be made for the drawback of Canadian import duty paid on the importation of raw sugar from Cuba. The product imported into the U.S. was not produced with Cuban sugar; however, a drawback claim is allowable against the exported product on the basis that the exported product substitutes for the sugar imported from Cuba. This adjustment was made since it is required by section 204 of the Antidumping Act of 1921. Amstar argued for a deduction for the cost of segregating raw sugar by country of origin, an operation necessary to insure that no Cuban-origin sugar is exported to the United States. As in the fair value investigation, this deduction was not made, since it was determined to be an administrative expense properly allocable to all sales and not directly related to the sales in question. Finally, Amstar argued for an adjustment for a difference in packing costs, due to the possibility that "one-way" pallets were used for export sales, whereas returnable pallets were used in home market sales. In this case there is no evidence that the packing costs varied between the two markets for this period.

Final Results of the Review

As a result of our comparision of the United States price to foreign market value, we determine that the following margins exist:

Canadian exporter	Margin (United States dollars per pound)
Atlantic Sugar, Ltd.	[1]0.0223
B. C. Sugar	[1].010105
F. W. Jones & Son, Ltd.	.00306
Redpath Sugars, Ltd.	.0345
St. Lawrence Sugar, Ltd.	.0345

[1] No shipments during current period.

The Department shall determine, and the U.S. Customs Service shall assess, duties on all entries made during the time period involved. The Department will issue appraisement instructions separately on each exporter directly to the Customs Service.

Further, as required by § 353.48(b) of the Commerce Regulations, a cash deposit based upon the margins above shall be required on all shipments entered, or withdrawn from warehouse, for consumption on or after the date of publication of these final results. This requirement shall remain in effect until publication of the final results of the next administrative review. The Department intends to conduct the next administative review by the end of April, 1982.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act of 1930 (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

B. Waring Partridge III,

Acting Deputy Assistant Secretary for Import Administration.

May 19, 1981.

BILLING CODE 3510-25-M

Minority Business Development Agency

Financial Assistance Application Announcement

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: The Minority Business Development Agency (MBDA) announces that it is soliciting applications under its General Business Services Program (GBS) to operate one project for a 12 month period beginning August 31, 1981 in the Washington, D.C. SMSA: The cost of the project is estimated to be $374,000. The Project I.D. No. is 03-10-80011-01.

CLOSING DATE: June 22, 1981.

ADDRESS: Washington Regional Office, Minority Business Development Agency, U.S. Department of Commerce, 1730 K Street, N.W., Suite 420, Washington, D.C. 20006.

FOR FURTHER INFORMATION CONTACT: Vincent S. Martin, Grant/Cooperative Agreement Specialist, telephone 202/634-7883.

SUPPLEMENTARY INFORMATION:

A. Scope and Purpose of this Announcement. Executive Order 11625 authorizes MBDA to fund projects which will provide technical and management assistance to eligible clients in areas related to the establishment and operation of businesses. The General Business Services Program (GBS) is specifically designed to assist those minority businesses that have the highest potential for success. In order to accomplish this, MBDA offers competitive grants to consulting firms (either non-profit or for profit) which must be capable of providing such services as the preparation of business plans, financial packaging, industrial management assistance, personnel management services, marketing planning, and a broad range of other business services excluding legal services.

B. Eligible Applicants. Educational institutions, state or local governments, federally recognized Indian tribes, and other for-profit and non-profit organizations are eligible to apply for a grant under this announcement.

C. Evaluation Process. All proposals received as a result of this announcement will be evaluated by a MBDA review panel.

D. Evaluation Criteria. The awarding of MBDA grants is discretionary. Generally projects are supported in order of merit to the extent permitted by available funds. Evaluation of proposals will employ the following criteria:

1. *Capability of Firm:*

A. Experience in providing management consulting services and other technical assistance to businesses, at the level and of the nature described in the work requirements.

B. Internal resources available to the project (e.g., administrative, technical, capability statement, business references).

2. *Staffing Capability:*

A. Staffing Pattern (who is accountable to whom, for what).

B. Experience of key personnel in providing management consulting services that are at the level and the nature described in the work requirements. (Submit resume.) (Project manager must be designated.)

C. Qualification standards for selection of other project staff (what criteria will be used for assignment to this project).

D. Duties of each project position.

3. *Credentials:*

A. Submit examples of work: specimen packages acceptable (Business Plans).

B. Unique abilities or resources of the applicant which provide leverage for clients.

C. Discussion of area knowledge: include demographics, ethnic makeup of minority business, local market conditions, centers of business influence, etc.

4. *Techniques and Methods Proposed to Implement the Work Requirement (Applicant's Work Plan):*

Proposed procedures: (how, when and where work will be done and by whom), this section should follow the outline of

the work requirement and will be part of the award.

5. *Costs:* Provide explanation of all proposed costs by line item.

E. Disposition of Proposals. Notification of awards will be made by the award officer. Organizations whose proposals are unsuccessful will be so advised by the awards officer.

F. Proposal Instructions and Forms. Questions concerning the preceding information, copies of application forms, and applicable regulations can be obtained at the above address.

Nothing in this solicitation shall be construed as committing MBDA to divide available funds among all qualified applicants.

Space furnishings and office equipment will be provided in a government determined location at no cost to the applicant.

A Pre-Application conference to assist all interested applicants will be held at the following address on Monday, June 8, 1981 at 10:00 A.M., U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Room 6802, Washington, D.C. 20230.

Dated: May 18, 1981.

Luis G. Encinias,

Regional Director.

[FR Doc. 81-15339 Filed 5-21-81; 8:45 am]

BILLING CODE 3510-21-M

National Oceanic and Atmospheric Administration

S. Jonathan Stern; Receipt of Application for Permit

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant: a. Name: Mr. S. Jonathan Stern (P281).

b. Address: 635 Wakerobin Lane, San Rafael, California 94903.

2. Type of Permit: Scientific Research.

3. Name and Number of Animals: Minke whale (Balaenoptera acutorostrata); unspecified.

4. Type of Take: Individual minke whales may be inadvertently harassed during the course of conducting observational activities, including photography and underwater sound recordings.

5. Location of Activity: Waters of the San Juan Islands, Washington.

6. Period of Activity: 5 years.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, on or before June 22, 1981. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.;

Regional Director, National Marine Fisheries Service, Northerwest Region, 1700 Westlake Avenue, North, Seattle, Washington 98109; and

Regional Director, National Marine Fisheries Service, Southerwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: May 18, 1981.

Richard B. Roe,

Acting Director, Office of Marine Mammals and Endangered Species, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1981; Additions

AGENCY: Committee for Purchase From the Blind and Other Severely Handicapped.

ACTION: Addition to procurement list.

SUMMARY: This action adds to Procurement List 1981 services to be provided by workships for the blind and other severely handicapped.

EFFECTIVE DATE: May 22, 1981.

ADDRESS: Committee for Purchase From the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher (703) 557-1145.

SUPPLEMENTARY INFORMATION: On March 13, 1981, March 27, 1981, and January 30, 1981, the Committee for Purchase From the Blind and Other Severely Handicapped published notice (46 FR 16701, 46 FR 19017, and 46 FR 9982) of proposed additions to Procurement List 1981, Novembr 12, 1980 (45 FR 74836).

After consideration of the relevant matter presented, the Committee has determined that the services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48c, 85 Stat. 77.

Accordingly, the following services are hereby added to Procurement List 1981:

SIC 0782

Lawn Maintenance, Area 11 (Chapel and Child Care Area), Naval Weapons Station, Yorktown, Virginia

SIC 7369

Commissary Shelf Stocking and Custodial Service, Little Rock Air Force Base, Jacksonville, Arkansas

SIC 7349

Janitorial Service, Federal Building, 100 West Capitol Street, Jackson, Mississippi

SIC 7699

Pallet Repair, Naval Supply Center, Norfolk, Virginia

C. W. Fletcher,

Executive Director.

BILLING CODE 6820-33-M

Procurement List 1981; Deletions

AGENCY: Committee for Purchase From the Blind and Other Severely Handicapped.

ACTION: Deletions from procurement list.

SUMMARY: This action deletes from Procurement List 1981 commodities produced by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: May 22, 1981.

ADDRESS: Committee for Purchase From the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: On April 3, (and April 10, correction) 1981, the Committee for Purchase From the Blind and Other Severely Handicapped published notices (46 FR 20258 and 46 FR 21407) of proposed deletions from Procurement List 1981, November 12, 1980 (45 FR 74836).

After consideration of the relevant matter presented, the Committee has

determined that the commodities listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 46–48c, 85 Stat. 77.

Accordingly, the following commodities are hereby deleted from Procurement List 1981:

Class 6695

Kit, Spectro Oil Analysis (Ground Equipment), 6695–00–925–2982

Class 7520

Pencil, Mechanical, 7520–00–205–1645, 7520–00–285–5817

C. W. Fletcher,

Executive Director.

BILLING CODE 6820–33–M

COMMODITY FUTURES TRADING COMMISSION

Terms and Conditions of the Medium-Staple Cotton Futures Contract of the Chicago Board of Trade

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of proposed contract market rules.[1]

SUMMARY: The Chicago Board of Trade ("CBT") has applied for designation as a contract market in medium-staple cotton for delivery in units of 50,000 lbs. The Commodity Futures Trading Commission ("Commission") has determined that the proposal is of major economic significance and that, accordingly, publication of the proposal is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATE: Comments must be received on or before July 21, 1981.

ADDRESS: Interested persons should submit their views and comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581. Reference should be made to CBT Medium-Staple Cotton Futures Contract.

FOR FURTHER INFORMATION CONTACT: George L. Garrow, Jr., Esq., Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581, (202) 254–8955; or Blake Imel, Deputy Director, Division of Economics and Education, (202) 254–3203.

SUPPLEMENTARY INFORMATION: The terms and conditions of the CBT's proposed medium-staple cotton futures contract are as follows:[1]

Medium-Staple Cotton

Trading Conditions

XX01.00 *Authority*—On or after designation by the Commission as a contract market, trading in cotton may be conducted under such terms and conditions as the Board may prescribe by Regulation.

XX02.01 *Application of Regulations*—Transactions in Medium-Staple Cotton futures shall be subject to the general Rules of the Association as far as applicable and the Regulations contained in this Chapter which are exclusively applicable to trading in Medium-Staple Cotton.

XX04.01 *Unit of Trading*—The unit of trading for Medium-Staple Cotton shall be 50,000 pounds. Bids and offers may be accepted in lots of 50,000 pounds or multiples thereof.

XX05.01 *Months Traded In*—Trading in Medium-Staple Cotton may be conducted in the current month and any subsequent months as determined by the Board or the Cotton Committee.

XX06.01 *Price Basis*—Fluctuations in the price of Medium-Staple Cotton shall be in multiples of 1/100 of a cent per pound.

XX07.01 *Hours of Trading*—The hours of trading for future delivery in Medium-Staple Cotton shall be determined by the Board subject to the provisions of Rule 1007.00.

XX08.01 *Trading Limits*—(See Regulation 1008.01).

XX08.01A *Trading Limits*—(See Regulation 1008.01A).

XX09.01 *Last Day of Trading*—No trades in Medium-Staple Cotton futures deliverable in the current month shall be made during the last seven days of that month. Any contracts remaining open after the last day of trading must be either:

(a) Settled by delivery no later than the fifth business day following the last trading day; or

(b) Liquidated by means of a bona fide exchange of futures for the actual cash commodity, no later than the fifth business day following the last trading day.

XX09.02 *Trading in the Last Seven Business Days of the Deliver Month*—After trading in contracts for future delivery in the current delivery month has ceased according to Regulation XX09.01 of this chapter, outstanding contracts for delivery may be liquidated by means of a bona fide exchange of such current futures for the actual cash commodity.

XX10.01 *Margin Requirements*—Margin requirements shall be determined by the Board by Regulation. (See 431.03)

XX11.01 *Disputes*—All disputes between interested parties may be settled by arbitration as provided in the Rules and Regulations.

XX36.01 *Standards*—Each contract made under these regulations shall be

[1] The text of forms and other notices referenced and included within the Exchange's proposed rules have not been included within this publication. Copies of such forms may be obtained upon request of the Commission's Secretary.

for cotton, basis Strict Low Middling, staple one and one-sixteenth of an inch, micronaire between 3.5 and 4.9. Cotton which is of the following grades:

Good Middling
Strict Middling
Middling Plus
Middling
Strict Low Middling PLus
Strict low Middling
Low Middling Plus
Low Middling
Good Middling Light Spotted
Strict Middling Light Spotted
Middling Light Spotted

and of staple greater than one and one-sixteenth of an inch is deliverable, at the appropriate discount or premium. Cotton which has a micronaire less than 3.5 or greater than 4.9 is not deliverable.

Grade and staple premiums and discounts shall be based on the average commercial differences as reported by the USDA Agricultural Marketing Service for those spot markets designated by the Secretary of Agriculture for medium-staple cotton. Cotton of grade different from Strict-Low Middling, yet within the range of grades specified above, shall be deliverable at the full quoted average discount or premium. Cotton of staple length one and three-thirty seconds of an inch and longer is deliverable at a premium of the difference between the basis price and the average for one and three-thirty seconds of an inch cotton at the designated spot markets.

Each contract shall be for delivery of 50,000 pounds of cotton of the above mentioned deliverable grades, of no more than one percent (500 pounds). Weight and tolerance specifications shall be gross of any deductions which may be applicable.

XX36.02 *Compressed Cotton*—Bales of cotton that are standard compressed, universal compressed or uncompressed are deliverable. The seller of uncompressed cotton must grant the buyer a sum per bale of cotton sufficient to cover the cost of standard or universal density compression at the time and place of delivery. When no standard cost is applicable, or can be agreed upon, the deliverer shall grant the buyer ten dollars ($10.00) for each uncompressed bale of cotton delivered.

XX36.03 *Over-Aged Cotton*—Cotton that has been certified at a regular warehouse, shall be subject to the following age penalties: three pounds per bale per month for the seventh through twelfth month; four pounds per bale per month for the thirteenth through the eighteenth month; five pounds per bale per month for the nineteenth through twenty-fourth month, and six pounds per bale per month for the twenty-fifth and each month thereafter. The above mentioned allowances shall apply to all months, or fraction thereof, following cotton certification. The price per pound allowed shall be the net average price.

XX36.04 *Monthly Weight Allowance*—At the time of delivery, the seller shall grant the buyer a weight allowance of one-half pound per month, or fraction thereof per bale beyond the day the cotton was last weighed. This is in addition to over-aged cotton (see XX36.03).

XX36.05 *Untenderable Bales*—In addition to bales of cotton which are not of the micronaire, staple and grade characteristics detailed in XX36.01, the following bales of cotton shall not be deliverable: bales reduced in grade for any reason; bales of reginned cotton, gin-cut cotton, or of perished staple; bales that are repacked, false-packed, mixed packed, or water-packed; bales that have been on fire; bales weighing under 352 pounds net or over 675 pounds net; damaged or unmerchantable bales as determined by the Registrar's Office or its appointed agents; bales of high density compressed cotton or of cotton which has previously been pressed to high density; and bales with sisal bagging.

XX36.06 *IRS Provisions*—All standards and provisions of the United States Cotton Futures Act, as specified in the Internal Revenue Code of 1954 (revised 1976), shall apply to all cotton traded and delivered according to this contract.

XX36.07 *Raingrown Cotton*—Raingrown cotton is deliverable at the same price as non-raingrown cotton, but must be so identified.

XX37.01 *Official Inspectors*—Supervision of the inspecting, weighing, and sampling of cotton shall be the responsibility of the Registrar's Office or its agents.

XX38.01 *Inspection*—All cotton tenderable under this contract must have been classified by the U.S. Board of Cotton Examiners, under the auspices and according to the standards of the U.S. Department of Agriculture.

In conjunction with the deliveries of the warehouse receipts and bale classifications, the seller must deliver to the buyer within two business days following delivery of the warehouse receipts, a duplicate sample of each bale delivered (the original having been used for official certification). Each duplicate sample shall not weigh less than four ounces and must be delivered to the receiver or his agent at the point of storage of the cotton. If necessary, the Registrar's Office, or its agents, shall perform the duties of receiving, checking and delivering duplicate samples according to fees established by said office.

Any and all initial costs and fees of sampling and classification shall be borne by the seller and shall not be the responsibility of the buyer. For each duplicate sample missing or weighing less than four ounces, the seller shall pay the buyer four dollars ($4.00).

Cotton samples, to be valid, must be drawn under the supervision of the Registrar's Office or its appointed agents.

XX38.02 *Deliverer's Classification*—If the seller has not received the U.S. Board of Cotton Examiners' classification at the time he presents his delivery notice to the Clearing Corporation, and he has a receipt indicating that the appropriate samples were properly submitted to the above mentioned Board of Cotton Examiners, he may submit is own, estimated classification to the buyer at the time of delivery pending issuance of the Board of Cotton Examiners' classification.

If the seller does present his own classification, he shall receive a pro forma payment of eighty percent based on the classification he presented to the buyer in lieu of the Board of Cotton Examiners' classification. Upon receipt of the Board of Cotton Examiners classification the seller shall promptly present a corrected invoice to the buyer, whereupon the buyer shall have one business day to present the necessary payment due to the seller, allowance being made for any difference in the reported classification.

If after receipt of the Board of Cotton Examiners' classification the total of certificated bales of cotton does not meet the specified weight tolerance, the seller shall pay the buyer a minimum penalty of $150.00 for each 100 pounds, or fraction thereof, of cotton which is below the stated weight tolerance. At this time, any discrepancies between monies paid by the buyer and monies due the buyer shall also be settled.

XX39.01 *Weighing*—Upon entering a regular warehouse, cotton to be certificated shall be weighed, exclusive of tare and any samples drawn, under the supervision of the Registrar's Office or its duly appointed agents. Such weight as well as the date of weighing, shall be recorded on the warehouse receipt and shall form the basis from which any and all weight allowances detailed in Section XX36 of this Chapter shall be calculated. Cotton that is reweighed must be done so under the supervision of the Registrar's Office or its agents to remain certificated. The warehouse receipt must record the date and results of the last supervised

weighing of each bale covered by the receipt.

XX41.01 *Delivery Points*—Medium-Staple Cotton located in regular warehouses at the following points may be delivered in satisfaction of the futures contracts: Galveston, Texas; Greenville, South Carolina; Houston, Texas; Memphis, Tennessee; Bakersfield and Fresno, California; and Phoenix, Arizona. The aforementioned delivery points are bounded by their respective switching districts.

XX41.02 Western Delivery Differentials—Tenderable cotton grown in the San Joaquin Valley of California, of an approved strain of the Acala Cotton Board (SJV), and located in regular warehouses at Phoenix, Bakersfield, and Fresno may be delivered in satisfaction of the futures contracts at the full contract price. All other tenderable western growth cotton located in regular warehouses at Phoenix, Bakersfield and Fresno may be delivered in satisfaction of the futures contract at a discount of two (2) cents per pound under the contract price.

XX42.01 *Delivery of Cotton by Warehouse Receipts*—Delivery of Medium-Staple Cotton shall be made by the delivery of registered warehouse receipts issued by warehousemen against stocks in warehouses which have been declared regular by the Board. The Board by Regulation may prescribe the conditions upon which warehouses and warehousemen may become regular except that in the case of federally licensed warehouses and warehousemen, the Board may impose only such reasonable requirements as to location, accessability and suitability as may be imposed on other regular warehouses and warehousemen.

XX43.01 *Registration of Warehouse Receipts*—Warehouse receipts, in order to be eligible for delivery, must be registered with the Offical Registrar appointed by the Board, must not be more than one year old, and must not have an expiration date in the month in which they are delivered. Warehouse receipts which have been registered with the Registrar's Office shall immediately lose their registration status if they are used in satisfaction of contract obligations at another exchange.

XX43.02 *Reissuance of Warehouse Receipts*—Every Medium-Staple Cotton receipt must be returned to the warehouseman or his agent for reissuance prior to its becoming one year old. At such time accrued storage charges shall be paid and the warehouseman shall be obligated to provide the owner with a new and duly registered receipt. It is not necessary that the cotton be resampled and reclassified to effect reissuance of a warehouse receipt.

XX44.01 *Receipt Format*—Only warehouse receipts approved by the U.S. Department of Agriculture shall be valid.

XX45.01 *Insurance*—Whether or not the holder of the receipts chooses to have insurance for bales of cotton prior to delivery of the receipts, he must have adequate and full coverage against fire, tornado and other contingencies provided for in the standard form of "extended coverage" endorsements or policies for all bales of cotton delivered until noon of the business day following delivery of the receipts.

XX46.01 *Date of Delivery*—Delivery of Medium-Staple Cotton Certificates may be made by the seller upon any permissible delivery day of the delivery month.

XX47.00 *Delivery Notice*—(See 1047.00)

XX47.01 *Delivery Notices*—Notice of intention to deliver shall be in the following form:

* * * * *

The following summary of all bales to be delivered in accordance with the Rules and Regulations, shall accompany the delivery notice:

* * * * *

The following complete listing of all bales to be delivered in accordance with the Rules and Regulations, shall accompany the delivery notice:

* * * * *

XX48.00 *Method of Delivery*—(See 1048.00—

XX49.01 *Time of Delivery*—As prescribed by the U.S. Internal Revenue Code of 1954 (revised 1976), delivery is a six day process commencing with the presentation of a delivery notice to the Clearing House. Notice of intention to delivery may be made to the Clearing House until 8:00 p.m. on the position day. The last position day of the delivery month shall be the last trading day of the month, seven business days prior to the end of the delivery month. No deliveries shall be made during the last two business days of the month and all deliveries shall have been complete by such time.

Intention day shall be the next business day immediately following the position day. By 8:30 a.m. of the intention day, the Clearing House shall assign the oldest long position the responsibility for taking delivery of the cotton described by the delivery notice. By 4:00 p.m. of the intention day, the seller responsible for delivery shall have presented a delivery invoice, according to the procedures described in XX49.03 of this Chapter, to the Clearing House.

A copy of each delivery notice submitted to the Clearing House must also be sent promptly to the Commodity Futures Trading Commission.

XX49.02 *Buyer's Report of Eligibility to Receive Delivery*—(See 1049.02).

XX49.03 *Sellers' Invoices to Buyers*—Upon determining the buyers obligated to accept deliveries tendered by issuers of delivery notices, the Clearing House shall promptly furnish each issuer the names of the buyers obligated to accept delivery from him and a description of each commodity tendered by him which was assigned by the Clearing House to each such buyer. Thereupon, sellers (issuers of delivery notices) shall prepare invoices addressed to their assigned buyers describing the documents to be delivered to each such buyer and, in the case of deliveries under Rule 1041.00, the information required in said Rule. Such invoices shall show the amount which buyers must pay to sellers in settlement of the actual deliveries, based on the delivery prices established by the Clearing House for that purpose adjusted for applicable premiums, discounts, storage charges, quantity variations and other items for which provision is made in these Rules and Regulations relating to contracts, and shall be in the form set forth hereunder. Such invoices shall be delivered to the Clearing House by 4:00 p.m. on the day of intention. Upon receipt of such invoices, the Clearing House shall promptly make them available to buyers to whom they are addressed, by placing them in buyers' mail boxes provided for that purpose in the Clearing House.

Invoices for delivery of Medium-Staple Cotton in satisfaction of contract obligations shall use the settlement price established for the position day and shall be of the following form:

* * * * * * *

In addition to the above form, the seller shall deliver to the buyer a copy of the listing of each and every bale, and their characteristics, provided with the notice of intention to deliver (see Section XX47.01).

XX49.04 *Payment—(See 1049.04).*

XX50.00 *Duties of Members*—(See 1050.00).

XX51.01 *Office Deliveries Prohibited*—(See 1051.01).

XX54.00 *Failure to Accept Delivery*—(See 1054.00).

XX56.01 *Storage Charges*—No warehouse receipts covering cotton in regular store shall be valid for delivery on futures contracts unless the storage charges on the cotton have been paid up

V 46 / 99 9 MY 22 81 JMI

to and including the 18th day of the preceding month, and such payment endorsed on the warehouse receipt. Unpaid accumulated storage charges at the posted rate applicable to the warehouse where the cotton is stored shall be allowed and credited to the buyer by the seller to and including date of delivery. Further, no warehouse receipt shall be valid for delivery if the receipt has expired prior to delivery or has an expiration date in the month into which it is delivered.

XX58.01 *Loading Orders*—The owner of one or more contract(s) sets of certificated warehouse receipts issued by a regular warehouse, who desire to have the cotton shipped, shall pay storage charges due on the warehouse receipts through the day following the business day on which he intends to file loading orders. The owner of the warehouse receipts shall submit the receipts to the Registrar for cancellation, and surrender the cancelled receipts to the warehouse, along with written loading orders, and a declaration whether shipment is to be by rail or by truck. Loading orders filed after 3:30 p.m. Chicago time shall be considered dated the following business day.

Regularity of Warehouses

XX81.01 *Regularity of Warehouses*—Persons operating cotton warehouses who desires to have such warehouses made regular for the delivery of cotton under the Rules and Regulations shall make application for a Declaration of Regularity on a form prescribed by the Board for a term expiring the next succeeding June 30. Regularity shall be effective 30 days after all terms and conditions have been met and notice to that effect has been posted on the bulletin board of the Association.

Applications for renewal of regularity shall be made prior to June 15 in each year for the year beginning July 1 and shall be on the same form.

(1) All warehouses making application to become regular for delivery of Medium-Staple Cotton shall be federally approved in accordance with Title 7, Section 101 of the U.S. Code. All such provisions and restrictions applicable under said law shall also apply to warehouses desiring to become regular for delivery of Medium-Staple Cotton.

(2) Such warehouse shall be connected by railroad tracks with one or more interstate railway lines.

(3) The proprietor or manager of such warehouse shall be in good financial standing and credit. No warehouse shall be declared regular until the person operating the same files a bond with sufficient sureties in such sum and subject to such conditions as the Board may require.

(4) Such warehouse shall be provided with modern improvements and appliances for the convenient and expeditious receiving, handling and shipping of bales of cotton in large quantity.

(5) The proprietor or manager of such warehouse shall honestly and fully cooperate with the system of registration of warehouse receipts as established by law, and furnish to the Registrar all needed information to enable him to keep a correct record and account of all cotton, together with the quality characteristics thereof, received and delivered by them daily and of that remaining in store at close of each week.

(6) The proprietor or manager of such warehouse shall promptly, by the proper publication, advise the trade and the public of any damage to bales of cotton held in store by it, whenever such damage shall occur to an extent that will render it unwilling to purchase and withdraw from store, at its own cost, all, such damaged bales of cotton.

(7) The Board shall be assured that the operator or manager of the warehouse will agree to conform to Regulations of this Chapter with regards to delivery procedures and receipt format.

(8) The proprietor of manager of such warehouse shall accord every facility to any duly authorized committee, for the examination of its books and records, for the purpose of ascertaining the stocks of all bales of cotton which may be on hand at any time. Such examination and verification shall be made at least twice each year, by the Warehouse, Weighing and Custodian Committee or any other duly authorized committee to be appointed by the Chairman of the Board, which committee shall have the authority to employ experts to determine the number of cotton bales in store.

(9) The proprietor or manager of a regular warehouse shall guarantee that all bales of cotton received in and shipped out of such wardhouse shall be weighed and sampled under the supervision of the Registrar's Office or its duly appointed agents.

(10) No warehouse shall be deemed suitable to be declared regular if its location, accessibility, tariffs, insurance rates, or other qualifications shall depart from uniformity to the extent that its receipts, if tendered in satisfaction of futures contracts, will unduly depress the values of futures contracts or impair the efficacy of futures trading in this market, or if the warehouseman operating such warehouses engaged in unethical or inequitable practicies, or if, being a federally licensed warehouse, fails to comply with the federal statute, rules or regulations, and state statues, rules and regulations whenever appropriate.

All warehousemen are and shall be and remain subject to the Rules, Regulations and Rulings of the Board of Trade of the City of Chicago on all subjects and in all areas with respect to which the U.S. Department of Agriculture does not assert jurisdiction pursuant to the U.S. Warehouse Act, as amended.

(11) All warehousemen shall inload and outload all cotton consecutively without giving preference to the cotton owned by him over the cotton of others, and without giving preference to one depositor over another. He shall inload all cotton consecutively in the order in which they arrive at his warehouse, pursuant to inloading orders previously given so far as its capacity for bales of cotton permits. He shall outload all cotton in the order in which suitable transportation is made available at his warehouse by the holder of the warehouse receipt, pursuant to bona fide outloading orders previously furnished to him.

All warehousemen shall keep adequate permanent records showing compliance with the requirements of this Regulation. Such records shall at all times be open for inspeaction by the designated official or officials of the contract market.

(12) The operator of a regular warehouse shall limit the amount of certificated cotton to an amount which can be shipped within a thirty (30) day period. Each warehouse will report to the exchange its thirty day shipping capacity of cotton.

(13) The maximum load-out charge per bale of cotton which has been tendered in satisfaction of the Board of Trade futures contracts shall be $5.00 per bale. This price shall include picking out by tag number, removing from storage, delivery to warehouse platform, and loading according to custom into railroad car, truck, van or container.

XX82.01 *Insurance*—As regards insurance of bales of cotton, the warehouseman shall be subject to the provisions and requirements of Section 101.23(a) of Title 7 of the U.S. Code, which states: When requested in writing by the depositor of cotton in a licensed warehouse, or by the holder of the receipt covering such cotton, to insure such cotton against loss or damage by fire, lightning, and other risks, each licensed warehouseman shall secure in his own name such insurance under reporting forms of policies which

automatically attach for the full value of such cotton, including daily changes of value through market fluctuations and changes in the quantity of such product from day to day, as soon as such cotton is placed in his legal custody, and he shall continue such insurance in effect so long as the cotton remains in his legal custody. Such insurance shall be covered by lawful policies issued by one or more insurance companies. Each warehouseman insuring cotton under the provisions of this section shall submit such reports to underwriters as may be required under the terms of such policies, and copies of such reports shall be submitted to the Department as it may require. If the warehouseman is unable to procure insurance to the extent requested, he shall, orally or by telegraph or by telephone, and at this own expense, immediately notify the perosn making the request of such fact. When insurance is not carried in the warehouseman's name, the receipt shall show that the cotton is not insured by the warehouseman. Nothing in this section shall be construed to prevent a licensed warehouseman from adopting a rule that he will insure all cotton stored in his warehouse, but if he elects to insure he shall accomplish such insurance through policies as above specified.

The charge for insurance on bales of cotton delivered in satisfaction of futures contracts, payable by the holder of the necessary receipts, shall be limited to a maximum of $1.00 per $100.00 evaluation annually for fire, tornado and other contingencies provided for in the standard form of "extended coverage" endorsements or policies. Any charges for said insurance in excess of this amount shall be paid by the warehouseman.

XX82.02 *Tagging Cotton*—The warehouseman upon issuance of a receipt for any bale of cotton, shall attach a durable and easily visible numbered tag for identification purposes. The warehouseman shall record the location of all bales of cotton according to tag numbers.

XX82.03 *Arrangement of Stored Cotton*—Bales of cotton which are excessively wet or which have been damaged by fire shall not be stored next to undamaged certificated bales of cotton.

The warehouseman shall handle and store cotton so as to prevent any damage which might occur because of moisture, fire, or other such hazards.

XX82.04 *Sampling*—All sampling and weighing of cotton shall be done by persons in the employ of the warehouseman, under the supervision of the Registrar's Office or its duly appointed agents.

XX83.01 *Loading Schedule*—Warehouseman shall adhere to the following schedule in providing for the loading and departure of cotton shipments against cancelled certificated cotton receipts:

(1) By 4:00 p.m. on the fifteenth business day following the day on which loading orders are filed, all loading orders filed up to a maximum of 30% of the total number of certificated receipts outstanding and those yet unshipped against any prior loading orders.

(2) By 4:00 p.m. on the eighth business day following the completion of shipments against the first 30% of a warehouseman's total certificated receipts outstanding and those yet unshipped against prior loading orders, additional loading orders which cumulatively exceed 30% up to a maximum of 70% of a warehouseman's total number of certificated receipts outstanding and those yet unshipped against prior loading orders.

(3) By 4:00 p.m. on the seventh business day following the completion of shipments against the first 70% of a warehouseman's total certificated receipts outstanding and those yet unshipped against prior loading orders, additional loading orders which cumulatively exceed 70% of a warehouseman's total number of certificated receipts outstanding and those yet unshipped against prior loading orders.

(4) Where several loading orders are filed on the same business day, the warehouseman shall endeavor, to the maximum practical extent, to accord equitable treatment to all such loading orders when complying with the foregoing schedule.

The Warehouseman's obligation under this paragraph shall be:

(1) in the case of rail delivery, to have the cotton loaded on track ready for railroad pickup;

(2) in the case of truck delivery, to specify shipping interval so that the last day of such interval adheres to the foregoing schedule.

XX84.01 *Revocation of Regularity*—Any regular warehouse may be declared by the Board to be irregular at any time if it does not comply with the conditions above set forth. If the designation of a warehouse as regular shall be revoked by the Board, the Board shall announce such revocation on the bulletin board and also the period of time, if any, during which the receipts issued by such house shall thereafter be deliverable in satisfaction of futures contracts under the Rules and Regulations.

XX85.01 *Application for Declaration of Regularity*—All applications by operators of warehouses for a declaration of regularity under Regulation XX81.01 of this Chapter shall be on the following form:

In conjunction with the proposed futures contract, the Exchange also submits the following rule changes:

Regulation 1008.01—Trading Limits

Regulation XX08.01—*Trading Limits* of the proposed Medium-Staple Cotton futures contract refers to existing Regulation 1008.01 in which trading and variable limits for Chicago Board of Trade commodity future markets are specified. The following two additions to Regulation 1008.01 will provide trading limits and a definition of the crop year for variable limits for the Medium-Staple Cotton futures contract. These two additions should be reviewed along with the Medium-Staple Cotton futures contract and we request that they be approved to become effective when the Exchange receives designation as a contract market for Medium-Staple Cotton.

—Amend Regulation 1008.01—Trading Limits by inserting: Medium-Staple Cotton, 2 cents per pound; (3)—$1,000 ($1500)

—Amend Regulation 1008.01(E) by inserting: Medium-Staple Cotton. All contract months from August through July with at least two open contract months.

* * * * *

Other materials submitted by the CBT in support of its application for contract market designation may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR Part 145, as amended at 45 FR 26953–4 (April 22, 1980)), except to the extent they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9. Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Acts Compliance staff of the Office of the Secretariat at the Commission's headquarters, in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitted written data, views or arguments on the terms and conditions of the proposed futures contract, or with respect to other materials submitted by the CBT in support of its application for contract market designation, should send such comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581, by [sixty days after publication]. Such comment letters will be publicly available except to the

extent they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9.

Issued in Washington, D.C., on May 19, 1981.

Jane K. Stuckey,

Secretary of the Commission.

BILLING CODE 6351-01-M

CONSUMER PRODUCT SAFETY COMMISSION

Toxicological Advisory Board; Meeting

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of meeting: Toxicological Advisory Board.

SUMMARY: This notice announces a meeting of the Toxicological Advisory Board on Tuesday, June 16, 1981 from 8:30 a.m. to 5:00 p.m. and Wednesday, June 17, 1981 from 8:30 a.m. to 2:00 p.m. The meeting, which is open to the public, will be held in Room 456 at 5401 Westbard Avenue, Bethesda, Maryland.

FOR FURTHER INFORMATION, CONTACT: Barbara Rosenfeld, Director, Office of Public Participation, Office of the Secretary, Suite 300, 1111 18th Street, N.W., Washington, D.C. 20207, (202) 634-7700.

SUPPLEMENTARY INFORMATION: The Toxicological Advisory Board is a nine-member advisory committee which advises the Commission on precautionary labeling for acutely toxic household substances and on instructions for first aid treatment labeling. In addition, the Board reviews labeling requirements that have been issued under the Federal Hazardous Substances Act and recommends revisions it considers appropriate. The Toxicological Advisory Board was created on November 10, 1978, under the authority of Section 10 of the 1978 CPSC Authorization Act (Pub. L. 95-631).

The Toxicological Advisory Board will continue its review of the CPSC Labeling Guide on June 16 and 17, 1981. The Board will be reviewing caustic chemical substances as well as some chemicals previously deferred for review because of significant potential for systemic toxicity. On Wednesday, June 17, representatives from the Environmental Protection Agency will discuss EPA's labeling governing pesticide products.

For a complete list of topics to be discussed or for information on the schedule, please call the number listed above.

The two-day meeting is open to the public; however, space is limited. Persons who wish to make oral or written presentations to the Toxicological Advisory Board should notify the Office of the Secretary (see address above) by Friday, June 5, 1981.

The notification should list the name of the individual who will make the presentation, the person, company, group or industry on whose behalf the presentation will be made, the subject matter, and the appropriate time requested. Time permitting, these presentations and other statements from the audience to members of the Board may be allowed by the presiding officer. Requesters will be informed of the decision before the meeting.

Dated: May 19, 1981.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355-01-M

DEPARTMENT OF DEFENSE

Department of the Army

Armed Forces Epidemiological Board; Open Meeting

1. In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463) announcement is made of the following committee meeting:

Name of Committee: Armed Forces Epidemiological Board
Date of Meeting: June 11-12, 1981
Time: 0900-1700 June 11; 0830-1400 June 12
Place: Conference Room 3092, Walter Reed Army Institute of Research, Walter Reed Army Medical Center, Washington, DC

Proposed Agenda: NASA's Occupational Medicine and Environmental Health & Safety Information System, AFEB subcommittee reports, Army over 40 medical screen, Chemical Warfare, Schistosomiasis prophylaxis, review of the WHO policy on Post-Smallpox Eradication and Armed Forces Preventive Medicine Officers' reports.

2. This meeting will be open to the public, but limited by space accommodations. Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. Interested persons wishing to participate should advise the Executive Secretary, DASG-AFEB, Room 2D455 Pentagon, Washington, DC 20310.

Dated: May 12, 1981.

Charles W. Halverson,

Capt., MSC, USN, Executive Secretary.

BILLING CODE 3710-08-M

DEPARTMENT OF ENERGY

Designation of Off-Limits Area

AGENCY: Department of Energy.

ACTION: Designation of Rocky Flats Plant site as Off-Limits Area in accordance with 10 CFR Part 860.

SUMMARY: The Department of Energy hereby designates the Rocky Flats Plant site an off-limits area in accordance with 10 CFR Part 860, making it a Federal crime under 42 U.S.C. 2278a for unauthorized persons to enter into or upon the Rocky Flats Plant site. If unauthorized entry into or upon the plant site is into an area enclosed by a fence, wall, roof, or other standard barrier, conviction for such unauthorized entry may result in a fine of not more than $5,000 or imprisonment for not more that one year or both. If unauthorized entry into or upon the plant site is into area not enclosed by a fence, wall, roof, for other standard barrier, conviction for such unauthorized entry may result in a fine of not more than $1,000.

On January 5, 1981, the United States Court of Appeals for the Tenth Circuit in *United States* v. *Jonathan Seward, et al.*, Nos. 79-1711 through 79-1728, 79-1745, 79-1749, 79-1750, 79-1754, 79-1757, 79-1777 through 79-1790, 79-1795, 79-1800, 79-1802 through 17-1804, 79-1809, 79-1811, 79-1812, 71-1815 through 79-1819, 79-1822, through 79-1835, 79-1848 through 79-1855, 79-1857, 79-1858, 79-1860, 79-1861, 79-1931, 79-1932, 79-1934, 79-1936 through 79-1945, and 79-2037, issued a decision invalidating eighty-six trespass convictions on the ground that the Department of Energy's designation of boundaries at the Rocky Flats Plant site published in the **Federal Register** on April 13, 1979 did not comply with the provisions of the Administrative Procedure Act, 5 U.S.C. 551, et seq. Pending any review of the decisions of the Court, the Department of Energy, in deference to the Court, is publishing this designation in accordance with the procedural requirements of 5 U.S.C. 551, et seq. and 42 U.S.C. et seq.

EFFECTIVE: May 22, 1981.

FOR FURTHER INFORMATION CONTACT: JoAnn Williams (202) 252-6975.

SUPPLEMENTARY INFORMATION: On February 18, the Department of Energy published in the **Federal Register** (46 FR 12775) a proposed designation of the Rocky Flats Site as an off-limits area. Interested persons were invited to submit written comments. No comments were received.

In accordance with section 501(c)(1) of the Department of Energy Organization

Act. DOE has determined that these regulations present no substantial issue of fact or law, and are unlikely to have a substantial impact on the economy of large numbers of individuals or businesses. Accordingly, no public hearing is required.

DOE has determined that initial and final regulatory flexibility analyses required by Section 603 and 604 of the Regulatory Flexibility Act need not be prepared for these regulations since they would not exert a significant economic impact on a substantial number of small entities.

Since this document is unlikely to have any significant effect on the environment, DOE has determined that the provisions of section 7(a)(2) of the Federal Energy Administration Act, as amended, requiring that proposals having such effect be submitted to the Environmental Protection Agency for review and comment, do not apply.

DOE has determined that these regulations are not "major rules" as defined in Section 1(b) of Executive Order 12291.

DOE has determined that these regulations are necessary to assure adequate protection of a vital national security facility and that "good cause" within the meaning of 5 U.S.C. 553(d)(3) exists, therefore, for making them effective upon publication.

The Department of Energy, pursuant to Section 299 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2278a), Section 104 of the Energy Reorganization Act of 1974 (42 U.S.C. 5814), as implemented by 10 CFR Part 860 published in the **Federal Register** on July 9, 1975 (40 FR 28789, 28790), and Section 301 of the Department of Energy Organization Act (42 U.S.C. 7151), hereby designates the Rocky Flats Plant Site as on off-limits area and prohibits the unauthorized entry and the unauthorized introduction of weapons or dangerous materials, as provided in 10 CFR 860.3 and 860.4, into or upon the Rocky Flats Plant site of the Department of Energy, such site being the tracts of land located in Jefferson and in Boulder Counties, Colorado, the aforesaid tracts being more particularly described as follows:

1. A tract of land primarily in Jefferson County, Colorado, with a small tract of Boulder County, Colorado, being contained in part or all of Section 1 through 4 and 9 through 15, Township 2 South, Range 70 West, Jefferson County, and Section 35 Township 1 South, Range 70 West, Boulder County, being described more particularly as follows:

Beginning at the West ¼ corner of Section 15, Township 2 South, Range 6 West 6 PM, Jefferson County, thence South along the West line of the SW¼ of said Section 15 S. 00°12'53" E. for 2656.90 feet; Thence S. 89°56'47" E. for 2659.72 feet, Thence N. 89°27'20" E. for 2706.57 feet; Thence N. 89°57'26" E. for 5258.00 feet; Thence S. 89°45'01" E. for 2657.68 feet; Thence S. 89°29'40" E. for 2647.70 feet; Thence N. 00°19'16" W. for 2666.68 feet; Thence N. 00°17'51" W. for 2499.30 feet; Thence N. 89°26'47" E. for 50.00 feet; Thence N. 00°17'51" W. for 125.00 feet; Thence N. 00°20'43" W. for 2687.19 feet; Thence N. 00°03'12" E. for 2627.80 feet; Thence S. 89°41'19" W. for 66.50 feet; Thence N. 00°21'24" W. for 2629.19 feet; Thence N. 00°28'02" W. for 1210.57 feet; Thence along the Southerly right-of-way of Colorado State Highway 128 for a distance of 14,709.42 feet to a point on the north line of Section 3, a distance of 755.73 feet from the North ¼ corner of Section 3. Thence S. 89°34'50" W. for 1852.97 feet; Thence S. 89°58'03" W. for 2675.28 feet; Thence N. 89°56'23" W. for 1335.90 feet; Thence S. 00°31'12" E. for 2601.34 feet; Thence S. 00°41'29" E. for 2624.66 feet; Thence S. 00° for 02'15" E. for 5348.28 feet; Thence N. 88°26'46" E. for 1306.99 feet; Thence N. 88°27'16" E. for 2640.02 feet; Thence S. 00°12'41" E. for 2701.13 feet to point of beginning. The following parcel of land is excepted from the plant site:

Beginning at a point N. 89°02'53" E. 42.70 feet East of the Northeast corner of the SE¼ of Section 12, thence S. 00°33'54" W. for 585.15 feet; thence N. 89°26'06" W. for 50.00 feet to the true point of beginning of the excepted parcel; thence S. 88°02'53" W. for 70.00 feet. Thence S. 01°57'07" E. for 140.00 feet, thence N. 38°41'29" E. for 112.00 feet, thence N. 00°26'58" W. for 55.00 feet to point of beginning.

2. A perpetual and assignable easement and right-of-way for the location, construction, operation, maintenance, and patrol of an access road in, on, over, and across the land described below, including, but not limited to the right to enclose the land with a fence and the right to construct and maintain on said land a guard house or station house:

A tract of land in Section 9, Township 2 South, Range 70 West, of the 6th P.M., Jefferson County, Colorado, which adjoins the Plant and which is described as follows:

Beginning at the SW corner of Section 9, proceed N. 00°03'26" W. for 200.00 feet; thence N. 88°26'46" E. for 1306.99 feet; thence S. 00°02'15" E. for 200.00 feet; thence S. 88°26'46" W. for 1306.99 feet to point of beginning.

3. Three perpetual and assignable easements and rights-of-way (referred to hereinafter as Tract 14–E, Tract 12–E, and Tract 6–E) in, on, over, and across the lands described below, for the location, construction, operation, and maintenance of a water pipeline and a railroad spur track, subject to easements and rights of way reserved:

a. Tract 14–E is a tract of land which adjoins both the Plant and Tract 12–E and is described more particularly as follows:

A tract of land 100 feet in width, situated in Section 16, Township 2, South Range 70 West of the 6th Principal Meridian, Jefferson County, Colorado, being more particularly described as follows: Beginning at a point on the South line of said Section 16, said point being North 89°30' East, 1236.70 feet from the Southwest corner of said Section 16; thence, from said point of beginning, North 03°42' East, 455.40 feet; thence along a 00°59'28" curve to the right, 353.14 feet; thence North 07°12' East, 2514.30 feet; thence along a 08°19'54" curve to the left, 194.26 feet; thence North 05°06' West, 771.30 feet; thence along a 07°28'40" curve to the right, 1138.71 feet; thence North 80°03' East, 1813.20 feet to a point on the North line of said Section 16, said point being South 88°13'30" West 1256.10 feet from the Northeast corner of said Section 16; thence North 88°13'30" East, along the North line of said Section 16, 703.30 feet; thence South 80°03' West, 2509.30 feet; thence along an 8 36'04" curve to the left, 989.99 feet; thence South 05°06' East, 771.30 feet; thence along a 05°42'04" curve to the right, 215.75 feet; thence South 07°12' West, 2514.30 feet; thence along a 01°00'32" curve to the left, 346.92 feet; thence South 03°42' West, 448.00 feet, to the South line of said Section 16; thence South 89°30' West, along the South line of said Section 16, 100.30 feet to the point of beginning.

b. Tract 12–E is a tract of land which adjoins both Tract 14–E and Tract 6–E and which is described more particularly as follows:

A strip of land 100 feet in width situated in the N½ MW¼ and the SW¼ NW¼ of Section 21, T.2 S., R. 70 W., Sixth Principal Meridian, Jefferson County, Colorado, said strip being more particularly described as follows:

Beginning at a point on the South line of the SW¼ NW¼ of Section 21 T.2 S., R.70 W., Sixth Principal Meridian, Jefferson County, Colorado, which bears North 89°22'10" East, 1050.1 feet from the West 1/4 corner of said section 21; thence North 03°42' East, 2661.40 feet to a point on the North line of said Section 21, which point bears North 89°30' East 1236.7 feet from the NW corner of said Section 21; thence North 89°30' East along said North line of Section 21 a distance of 100.30 feet; thence South 03°42' West, 266120 feet to a point on the South line of the SW¼ NW¼ of said Section 21; thence South 89°22'10" West, 100.30 feet to the point of beginning.

c. Tract 6–E is a tract of land, which adjoins both Tract 12–E and the Denver & Rio Grande Western Railroad main line and is described more particularly as follows:

A tract of land situated in the North Half of the Southeast Quarter of Section 20 and the Northwest Quarter of the southwest Quarter of Section 21, Township 2 South, Range 70 West of the Sixth Principal Meridian, Jefferson County, Colorado, more particularly described as follows: Beginning at a point on the West line of said Section which bears South 00°25' East, 823.10 feet from the West quarter-corner of said Section; thence South 82°53' East 28.70 feet; thence Northeasterly along curve to the left, tangent to the last recited course and having a radius of 905.37 feet, for a distance of 1474.40 feet to a point on the North line of the Northwest Quarter of the Southwest Quarter of said Section 21 which bears North 89°22'10" East, 1050.10 feet from the West quarter-corner of said Section

21; thence North 89°22'10" East, along the North line of the Northwest Quarter of the Southwest Quarter of said Section 21, 100.30 feet; thence South 03°42' West, 5.80 feet; thence Southwesterly along a curve to the right, tangent to the last recited course and having a radius of 1005.37 feet, for a distance of 1490.00 feet to a point on the North right-of-way line of the main line tract of the Denver & Rio Grande Western Railroad Company; thence Northwesterly, along the said North right-of-way line, 1687.00 feet; thence North 89°59' East, 393.00 feet; thence Easterly along a curve to the right, tangent to the last recited course and having a radius of 1482.69 feet and a central angle of 07°08', for a distance of 184.50 feet; thence South 82°53' East, 935.30 feet to the point of beginning.

Notices stating the pertinent prohibitions of 10 CFR 860.3 and 860.4 will be posted at all entrances of all said tracts and at intervals along its perimeters as provided in 10 CFR 860.6.

Dated at Washington, D.C., this 10th day of April 1981.

James W. Culpepper,

Acting Assistant Secretary for Defense Programs.

BILLING CODE 6450-01-M

Economic Regulatory Administration

B. A. Wales; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Action taken on Consent Order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces notice of filing a Petition for the Implementation of Special Refund Procedures for refunds received pursuant to a Consent Order.

DATE: Petition submitted to the Office of Hearings and Appeals: May 13, 1981.

FOR FURTHER INFORMATION CONTACT: Crude Producers Branch, Attn.: John Marks, Office of Enforcment, Room 5002, 2000 M Street, N.W., Washington, D.C. 20461, Telephone Number (202) 653-3517.

SUPPLEMENTARY INFORMATION: On Novembr 26, 1979, the Office of Enforcement of the ERA published notification in the **Federal Register** that it executed a Consent Order with B. A. Wales d/b/a/ J & C Drilling Company, (BAW) of Corpus Christi, Texas on July 25, 1979, 44 FR 67496 (1979). Interested persons were invited to submit comments concerning the terms, conditions or procedural aspects of the Consent Order. In addition, persons who believe they have a claim to all or a portion of the refund of overcharges paid by BAW pursuant to the Consent Order were requested to submit notice of their claims to the ERA.

Although interested persons were invited to submit comments regarding the Consent Order to the DOE, no comments were received. The Consent Order, therefore, was not modified.

Pursuant to the Consent Order, BAW is refunding the sum of $350,000 by certified checks made payable to the United States Department of Energy in eight quarterly installments. All such funds received by DOE have been placed into a suitable account pending determination of their proper distribution.

The following persons submitted claims to the ERA:

Defense Logistics Agency
Tesoro Petroleum Corporation

ACTION TAKEN: The ERA is unable to identify readily the persons entitled to receive the $350,000 or to ascertain the amounts of refunds that such persons are entitled to receive. Therefore, the ERA has petitioned the Office of Hearings and Appeals (OHA) on May 13, 1981 to implement Special Refund Procedures pursuant to 10 CFR Part 205, Subpart V, 10 CFR 205.280 *et seq.* to determine the identity of persons entitled to the refunds and the amounts owing to each of them. Persons who believe they are entitled to all or a portion of the refunds should comply with the procedures of 10 CFR Part 205, Subpart V.

Issued in Washington, D.C., on the 18th day of May 1981.

Robert D. Gerring,

Director, Program Operations Division.

[FR Doc. 81-15287 Filed 5-21-81; 8:45 am]

BILLING CODE 6450-01-M

Curtis Hankamer; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of action taken and opportunity for comment on Consent Order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces action taken to execute a Consent Order and provides an opportunity for public comment on the Consent Order and on potential claims against the refunds deposited in an escrow account established pursuant to the Consent Order.

EFFECTIVE DATE: May 1, 1981.

COMMENTS BY: On or before June 22, 1981.

ADDRESS: Send comments to: Wayne I. Tucker, Southwest District Manager, Economic Regulatory Administration, Department of Energy, P.O. Box 35228, Dallas, Texas 75235, Phone: 214/767-7745.

FOR FURTHER INFORMATION CONTACT: Wayne I. Tucker, Southwest District Manager, Economic Regulatory Administration, Department of Energy, P.O. Box 35228, Dallas, Texas 75235, Phone: 214/767-7745.

SUPPLEMENTARY INFORMATION: On May 1, 1981, the Office of Enforcement of the ERA executed a Consent Order with Curtis Hankamer of Houston, Texas. Under 10 CFR 205.199J(b) a Consent Order which involves a sum of less than $500,000 in the aggregate excluding penalties and interest, becomes effective upon its execution. Because the DOE and Curtis Hankamer wish to expeditiously resolve this matter as agreed and to avoid delay in the payment of refunds, the DOE has determined that it is in the public interest to make the Consent Order with Curtis Hankamer effective as of the date of its execution by the DOE and Hankamer.

I. The Consent Order

Curtis Hankamer is a firm engaged in the production of crude oil and was subject to the Mandatory Petroleum Price and Allocation Regulations at 10 CFR Parts 210, 211, and 212. To resolve certain civil actions which could be brought by the Office of Enforcement of the Economic Regulatory Administration as a result of its audit of Hankamer the Office of Enforcement, ERA and Hankamer entered into a Consent Order, the significant terms of which are as follows:

1. During the period September 1, 1973 through January 27, 1981, Hankamer allegedly sold crude oil above the allowable prices specified at 10 CFR Part 212, Subpart D.

2. Hankamer and the DOE have agreed to a settlement of $410,000. This amount will be refunded by Hankamer on or before June 1, 1981. The negotiated settlement was determined to be in the public interest as well as the best interest of the DOE and Hankamer.

3. This Consent Order constitutes neither an admission by Hankamer that ERA regulations have been violated nor a finding by the ERA that Hankamer has violated ERA regulations.

4. The provisions of 10 CFR 205.199J, including the publication of this Notice, are applicable to the Consent Order.

II. Disposition of Refunded Overcharges

In this Consent Order, Hankamer agrees to refund in full settlement of any civil liability with respect to actions which might be brought by the Office of Enforcement, ERA arising out of the transactions specified in I.1. above, the sum of $410,000 in the manner specified in I.2. above. Refunded overcharges will be in the form of certified checks made payable to the United States Department of Energy and will be delivered to the Assistant Administrator for Enforcement, ERA. The funds will remain in a suitable account pending the determination of their proper disposition.

The DOE intends to distribute the refund amounts in a just and equitable manner in accordance with applicable laws and regulations. Accordingly, distribution of such refunded overcharges requires that only those "persons" (as defined at 10 CFR 205.2) who actually suffered a loss as a result of the transactions described in the Consent Order receive appropriate refunds. Because of the petroleum industry's complex marketing system, it is likely that overcharges have either been passed through as higher prices to subsequent purchasers or offset through devices such as the Old Oil Allocation (Entitlements) Program, 10 CFR 211.67. In fact, the adverse effects of the overcharges may have become so diffused that it is a practical impossibility to identify specific, adversely affected persons, in which case disposition of the refunds will be made in the general public interest by an appropriate means such a payment to the Treasury of the United States pursuant to 10 CFR 205.199I(a).

III. Submission of Written Comments

A. *Potential Claimants:* Interested persons who believe that they have a claim to all or a portion of the refund amount should provide written notification of the claim to the ERA at this time. Proof of claims is not being required. Written notification of the ERA at this time is requested primarily for the purpose of identifying valid potential claims to the refund amount. After potential claims are identified, procedures for the making of proof of claims may be established. Failure by a person to provide written notification of a potential claim within the comment period for this Notice may result in the DOE irrevocably disbursing the funds to other claimants or to the general public interest.

B. *Other Comments:* The ERA invites interested persons to comment on the terms, conditions, or procedural aspects of this Consent Order. You should send your comments or written notification of a claim to Wayne I. Tucker, Southwest District Manager, Economic Regulatory Administration, Department of Energy, P.O. Box 35228, Dallas, Texas 75235. You may obtain a free copy of this Consent Order by writing to the same address or by calling 214/767–7745.

You should identify your comments or written notification of a claim on the outside of your envelope and on the documents you submit with the designation "Comments on the Curtis Hankamer Consent Order". We will consider all comments we receive by 4:30 p.m., local time, June 22, 1981. You should identify any information or data which, in your opinion, is confidential and submit it in accordance with the procedures in 10 CFR 205.9(f).

Issued in Dallas, Texas on the 14th day of May, 1981.

Wayne I. Tucker,

Southwest District Manager, Economic Regulatory Administration.

BILLING CODE 6450–01–M

Perry Gas Processors, Inc.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Action Taken on Consent Order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces notice of filing a Petition for the Implementation of Special Refund Procedures for refunds received pursuant to a Consent Order.

DATE: Petition submitted to the Office of Hearings and Appeals: May 13, 1981.

FOR FURTHER INFORMATION CONTACT: Charles L. Croxton, Program Manager for Natural Gas Liquids, Program Operations Division, Office of Enforcement, 2000 M Street, N.W., Room 5204, Washington, D.C. 20461 (202) 653–3541.

SUPPLEMENTARY INFORMATION: On September 11, 1979, the Office of Enforcement of the ERA published notification in the **Federal Register** that it executed a Consent Order with Perry Gas Processors, Inc. (PGP) of Odessa, Texas on August 13, 1979, 44 FR 52863 (1979). Interested persons were invited to submit comments concerning the terms, conditions, or procedural aspects of the Consent Order. In addition, persons who believe they have a claim to all or a portion of the refund of overcharges paid by Perry pursuant to the Consent Order were requested to submit notice of their claims to the ERA.

Although interested persons were invited to submit comments regarding the Consent Order to the DOE, no comments were received. The Consent Order, therefore, was issued as signed.

Pursuant to the Consent Order, Perry refunded the sum of $38,000 by certified check made payable to the United States Department of Energy dated September 12, 1979. This sum has been received by DOE and has been placed into a suitable account pending determination of its proper distribution.

The following person submitted a claim to the ERA: Tesoro Petroleum Corporation.

ACTION TAKEN: The ERA is unable readily to identify the persons entitled to receive the $38,000 or to ascertain the amounts of refunds that such persons are entitled to receive. Therefore, the ERA has petitioned the Office of Hearings and Appeals (OHA) on May 13, 1981 to implement Special Refund Procedures pursuant to 10 CFR Part 205, Subpart V, 10 CFR 205.280 *et seq.* to determine the identity of persons entitled to the refunds and the amounts owing to each of them. Persons who believe they are entitled to all or a portion of the refunds should comply with the procedures of 10 CFR Part 205, Subpart V.

Issued in Washington, D.C. on the 18th day of May 1981.

Robert D. Gerring,

Director, Program Operations Division.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces notice of filing a Petition for the Implementation of Special Refund Procedures for refunds received pursuant to a Consent Order.

DATE: Petition submitted to the Office of Hearings and Appeals: May 13, 1981.

FOR FURTHER INFORMATION CONTACT: Charles L. Croxton, Program Manager for Natural Gas Liquids, Program Operations Division, Office of Enforcement, 2000 M Street, NW., Room 5204, Washington, D.C. 20461 (202) 653–3541.

SUPPLEMENTARY INFORMATION: On March 21, 1980, the Office of Enforcement of the ERA published notification in the **Federal Register** that it executed a Consent Order with Worldwide Energy Corporation (Worldwide) of Denver, Colorado on February 26, 1980, 45 FR 18430 (1980). Interested persons were invited to submit comments concerning the terms, conditions, or procedural aspects of the Consent Order. In addition, persons who believe they have a claim to all or a portion of the refund of overcharges paid by Worldwide pursuant to the Consent Order were requested to submit notice of their claims to the ERA.

Although interested persons were invited to submit comments regarding the Consent Order to the DOE, no comments were received. The Consent Order, therefore, was issued as signed.

Pursuant to the Consent Order, Worldwide refunded the sum of $49,400 by certified check made payable to the United States Department of Energy within 30 days of the effective date of the Consent Order. This sum was received by DOE and has been placed into a suitable account pending determination of its proper distribution.

The ERA received no claims to the refunds.

ACTION TAKEN: The ERA is unable to identify readily the persons entitled to receive the $49,400 or to ascertain the amounts of refunds that such persons are entitled to receive. The ERA, therefore, has petitioned the Office of Hearings and Appeals (OHA) on May 13, 1981 to implement Special Refund Procedures pursuant to 10 CFR Part 205, Subpart V, 10 CFR 205.280 *et seq.* to determine the identity of persons entitled to the refunds and the amounts owing to each of them. Persons who believe they are entitled to all or a portion of the refunds should comply with the procedures of 10 CFR Part 205, Subpart V.

Issued in Washington, D.C. on the 18th day of May, 1981.

Robert Gerring,

Director, Program Operations Division.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. CP81-314-000]

Clay Basin Storage Co.; Application

May 15, 1981.

Take notice that on May 1, 1981, Clay Basin Storage Company (Applicant), 100 Broadway, New York City, New York 10005, filed in Docket No. CP81-314-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the continued sale of natural gas for resale and the exchange of natural gas for the implementation of the proposed extended Clay Basin Interim Storage Arrangements through October 31, 1982, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant requests a limited term certificate authorizing: (1) the continued sale of natural gas to certain of EL Paso Natural Gas Company's (El Paso) east-of-California (EOC) distributor customers, Arizona Public Service Company (APS), Southern Union Company (Southern Union) and Southwest Gas Corporation (Southwest), (2) the continued sale of natural gas from time to time to El Paso for use by El Paso to replace compressor fuel usage and lost or unaccounted for volumes in the physical transportation of Applicant's gas through El Paso's interstate pipeline facilities, (3) the continued utilization of the Clay Basin Arrangements to store a portion of the payback gas entitled to Southwest under Opinion No. 800-B, and (4) the continued exchange of Applicant's gas stored in the Clay Basin storage field for equivalent quantities to be delivered by Northwest Pipeline Corporation (Northwest) to El Paso in the San Juan Basin area for Applicant's account.

Applicant states that in Docket No. RP72-6, *et al.*, it was authorized to (1) sell natural gas to the El Paso EOC distributor customers, (2) sell natural gas from time to time to El Paso for use in replacing compressor fuel usage and lost or unaccounted for gas volumes associated with the physical transportation of Applicant's natural gas through El Paso's interstate pipeline facilities, and (3) effectuate the exchange of natural gas stored for its account by Mountain Fuel Resources, Inc. (Resources) in Resources' Clay Basin storage field in Daggett County, Utah, for equivalent quantities delivered by Northwest to El Paso in the San Juan Basin area for Applicant's account, all for a period through September 30, 1981.

Applicant indicates that it, El Paso, the EOC distributor customers, Northwest, Mountain Fuel Suply Company (Mountain Fuel), and Resources have agreed to an extension of the Clay Basin Arrangements whereby protection can continue to be afforded to the Priority 1 and 2 requirements of certain of El Paso's EOC customers and, further, whereby the quantities of Opinion No. 800-B payback gas may continue to be preserved for Southwest through October 31, 1982. It is shown that as of May 1, 1981, Applicant's natural gas inventory stored in the Clay Basin storage field is approximately 19,288,715 Mcf, of which 1,760,970 Mcf is attributable to Southwest's remaining Opinion No. 800-B payback gas and the balance, 17,527,745 Mcf, is attributable to volumes preserved for the protection of El Paso's EOC Priority 1 and 2 requirements. Applicant has been advised by El Paso that the volumes currently in place in the Clay Basin storage field are projected to be in excess of the forecasted deficiency in supply to serve fully its EOC category II customers' Priority 1 and 2 requirements during the 1981-82 winter season. Therefore, El Paso does not at this time anticipate making additional quantities of natural gas available for purchase by Applicant for storage in the Clay Basin storage field. Accordingly, the amendments to the presently authorized Clay Basin Arrangements required to extend such arrangements would primarily provide for (1) the continued transportation and sale of the volumes currently stored in the Clay Basin storage field and (2) the disposition of any volumes of natural gas which may be remaining in such after the 1981-82 winter season.

Applicant states that as compensation for the storage service under the proposed extended Clay Basin Arrangements, Resources would charge Applicant a monthly rate through April 30, 1982, comprised of (1) a commodity charge of $0.0100 for each Mcf of natural gas withdrawn from the Clay Basin storage field by Resources and delivered to Northwest for the account of Applicant during each billing month, (2) a demand charge equal to Applicant's proportionate share of Resources' monthly cost-of-service to be calculated in accordance with paragraph V-2(b) of the Clay Basin interim storage service Rate Schedule S-2, as amended, and (3) a pass-through charge equal to Applicant's proportionate share of Northwest's carrying costs applicable to the cushion gas owned by Northwest and used by Applicant to support its working gas volumes in the Clay Basin storage field, to be calculated in accordance with paragraph V-2(c) of the Clay Basin interim storage service Rate Schedule S-2, as amended. Resources would not bill Applicant after April 30, 1982. It is indicated that all charges applicable to the services rendered by Northwest and Resources for Applicant and, in addition, all other charges

incurred by Applicant as a result of its participation in the extended Clay Basin Arrangements, would continue to be billed to El Paso each month in accordance with the provisions of article VI, Section 6.2 of the interim storage agreement, as amended. Further, Applicant states that such extended arrangements contemplate that the holding of natural gas inventories by Applicant would be financed primarily, as in the past, by use of existing working capital and/or by borrowing under the credit agreement of July 6, 1977, as amended between Applicant and The Chase Manhattan Bank (N.A.). Additionally, Applicant states that as part of the negotiated extension of the Clay Basin Arrangements, the costs associated with the operation of the Clay Basin storage field would now be shared three ways among Applicant, Northwest and Resources.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 26, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Section 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-15328 Filed 5-21-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. ER78-517]

Connecticut Light & Power Co.; Filing

May 15, 1981.

Take notice that on May 5, 1981, Connecticut Light & Power Company submitted for filing a compliance filing pursuant to Commission Opinion Nos. 114 and 114-A issued February 19, 1981 and April 20, 1981, in the above-referenced proceeding.

Any person desiring to be heard or to protest this filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, on or before June 2, 1981. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this submittal are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. SA81-38-000]

Gleason Works; Application Treated as a Request for Adjustment Under the NGPA

May 15, 1981.

Take notice that on January 28, 1981, Gleason Works, Machine Division, 100 University Avenue, Rochester, New York 14692 (Applicant) submitted a letter to Federal Energy Regulatory Commission (Commission) concerning certain incremental pricing surcharges applicable to its boiler fuel use of natural gas. In response to the Commission staff inquiry in connection with this matter, Applicant submitted a second letter dated April 7, 1981.

In this correspondence Applicant states that it would qualify for a small boiler exemption from incremental pricing but for the fact that its boiler fuel use of natural gas during the billing period October 16–November 17, 1980, exceeded the 300 Mcf per day cutoff. Applicant notes that its gas usage during this period was abnormally high due to the temporary inoperability of its coal-fired boilers, and that the facility's gas usage during all other months of operation to date has not exceeded an average of 300 Mcf per day. Applicant requests that it be considered a small boiler facility eligible for exemption from incremental pricing.

Applicant's letters shall be treated as an application for an adjustment from the provisions of 18 CFR 282.203(b), which section governs exemptions for certain small boiler fuel facilities under section 206(d) of the Natural Gas Policy Act of 1978 (NGPA), 15 U.S.C. 3301, *et seq.*

The procedures applicable to the conduct of this adjustment proceeding are found in 18 CFR 1.41. Any person desiring to participate in this proceeding shall file a petition to intervene in accordance with § 1.41(e). All petitions to intervene must be filed on or before June 8, 1981.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. ER81-457-000]

Louisiana Power & Light Co.; Filing

May 18, 1981.

The filing Company submits the following:

Take notice that on May 12, 1981, Louisiana Power & Light Company (LP&L) tendered for filing an unexecuted Electric System Interconnection Agreement dated May 12, 1981 with the City of Winnfield, Louisiana (City) which provides service schedules for Emergency Service, Reserve Capacity, Supplemental Power, Surplus Power, Economy Power, and Transmission Service. LP&L further states that the proposed agreement and schedules A, B, C, D, E, F, and F-I, are the same as accepted for filing in FERC Docket No. ER76-162 with the City of Ruston (Rate Schedule FERC No. 54), in Docket No. ER76-868 with the Town of Rayville (Rate Schedule FERC No. 58), in Docket No. ER76-867 with the Town of Homer (Rate Schedule FERC No. 57), in Docket No. ER77-405 with the Town of Jonesboro (Rate Schedule FERC No. 59), in Docket No. ER77-404 with the City of Monroe (Rate Schedule FERC No. 60), in Docket No. ER79-366 with the City of Minden (Rate Schedule FERC No. 63).

LP&L requests that the Agreement become effective may 15, 1981, the date of expiration of FERC Rate Schedule No. 26, and that the notice requirements of the Regulations be waived as to this filing.

LP&L stated that a copy of this filing was mailed to the City of Winnfield, Louisiana and the Louisiana Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, DC 20426 in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 8, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-85-M

[Docket No. ER81-458-000]

Montana Power & Light Co.; Filing

May 18, 1981.

The filing Company submits the following:

Take notice that Montana Power & Light Company (Montana) on May 12, 1981, tendered for filing in accordance with Section 35 of the Commission's Regulations, a Letter Agreement with Puget Sound Power & Light Company (Puget). Montana states that these Letter Agreements provide for the sale of firm energy between Montana and Puget.

Montana indicates that the proposed Letter Agreements increased revenues from jurisdictional sales by $535,360.10, based upon energy delivered from February 28, 1980, through April 30, 1980. Montana states that the rate for firm energy under these Letter Agreements was negotiated.

An effective date of February 28, 1980 is proposed and waiver of the Commission's requirements is therefore requested.

In addition, Montana also tendered for filing a Notice of Cancellation of an Agreement for the sale of firm energy between Montana and Puget. Montana states that the agreement has expired on its own terms and has not been renewed.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 8, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER81-459-000]

Montana Power & Light Co.; Filing

May 18, 1981.

The filing Company submits the following:

Take notice that Montana Power & Light Company (Montana) on May 12, 1981, tendered for filing in accordance with Section 35 of the Commission's regulations, a Letter Agreement with the Washington Water Power Company (Washington). Montana states that this Letter Agreement provides for the sale of firm energy between Montana and Washington.

Montana indicates that the proposed Letter Agreement increased revenues from jurisdictional sales by $1,578,391.50, based upon energy delivered from September 3, 1980 through December 30, 1980. Montana states that the rate for firm energy under this Letter Agreement was negotiated.

An effective date of September 3, 1980, is proposed and waiver of the Commission's requirements is therefore requested.

In addition, Montana also tendered for filing a Notice of Cancellation of an Agreement for the sale of firm energy between Montana and Washington. Montana states that the agreement has expired as of its own terms and has not been renewed.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Reulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 8, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file

with the Commission and are available for public inspection.

BILLING CODE 6450-85-M

Western Area Power Administration

Parker-Davis Project; Order Confirming and Approving an Extension of Power and Transmission Rates on an Interim Basis

AGENCY: Western Area Power Administration, DOE.

ACTION: Notice of an extension of power and transmission rates on an interim basis—Parker-Davis Project.

SUMMARY: Notice is given of Rate Order No. WAPA-6 of the Assistant Secretary for Conservation and Renewable Energy extending wholesale power and transmission service rates on an interim basis for power marketed by the Western Area Power Administration (Western) from the Parker-Davis Project, Arizona, California, and Nevada.

ADDRESS: For futher information contact:

Mr. Robert A. Olsen, Area Manager, Boulder City Area Office, Western Area Power Administration, Department of Energy, P.O. Box 200 Boulder City, NV 89005, (702) 293-8115;

Mr. Conrad Miller, Chief, Rates and Statistics Branch, Western Area Power Administration, Department of Energy, P.O. Box 3402, Golden, CO 80401, (303) 231-1535;

Mr. James A. Braxdale, Office of Power Marketing Coordination, Department of Energy, Mail Code 3353, Federal Building, Washington, DC 20461, (202) 633-8338

SUPPLEMENTARY INFORMATION: By Delegation Order No. 0204-33, effective January 1, 1979 (43 FR 60636, December 28, 1978), the Secretary of Energy delegated to the Assistant Secretary for Resource Applications the authority to develop power and transmission rates, acting by and through the Administrator, and to confirm, approve, and place in effect such rates on an interim basis, and to the Federal Energy Regulatory Commission (FERC) the authority to confirm and approve on a final basis or to disapprove rates developed by the Assistant Secretary under the delegation. Due to a Department of Energy organizational realignment, delegation Order No. 0244-33 was amended, effective March 19, 1981, to transfer the authority of the Assistant Secretary for Resource Applications to the Assistant Secretary for Conservation and Renewable Energy.

Pursuant to the delegation order, the Assistant Secretary for Resource Applications issued on May 15, 1980, Rate Order No. WAPA-3 (45 FR 34046, May 21, 1980) confirming and approving on an interim basis, effective the first day of the first full billing period beginning on or after June 16, 1980, Rate Schedules PD-F1, PD-T1, PD-T2, and PD-T3 for wholesale power and transmission service marketed by Western from the Parker-Davis Project. The rates are to remain in effect for a period of 12 months unless the period is extended or until the FERC confirms and aproves them, or substitute rates, on a final basis. The rates were submitted to the FERC for confirmation and approval on a final basis on May 15, 1980.

The FERC has not yet acted on the rates. The purpose of Rate Order No. WAPA-6 is to extend the power and transmission rates for another 12 months (through June 30, 1982) unless further extended or until the FERC confirms and approves them, or substitute rates, on a final basis.

Issued in Washington, D.C., May 14, 1981.

Frank De George,

Acting Assistant Secretary, Conservation and Renewable Energy.

In the matter of: Western Area Power Administration—Parker-Davis Project Power Rates, Rate Order No. WAPA-6.

Order Confirming and Approving an Extension of Power and Transmission Rates on an Interim Basis

May 14, 1981.

Pursuant to section 302(a) of the Department of Energy Organization Act, 42 U.S.C. 7152(a), the power marketing functions of the Secretary of the Interior under the Reclamation Act of 1902, 43 U.S.C. 372, *et seq.*, as amended and supplemented by subsequent enactments, particularly by section 9(c) of the Reclamation Project Act of 1939, 43 U.S.C. 485h(c), and acts specifically applicable to the Parker-Davis Project, for the Water and Power Resources Service (formerly the Bureau of Reclamation) were transferred to and vested in the Secretary of Energy. By Delegation Order No. 0204-33, effective January 1, 1979, 43 60636 (December 28, 1978), the Secretary of Energy delegated to the Assistant Secretary for Resource Applications the authority to develop power and transmission rates, acting by and through the Administrator, and to confirm, approve, and place in effect such rates on an interim basis, and delegated to the Federal Energy Regulatory Commission (FERC) the authority to confirm and approve on a final basis or to disapprove rates developed by the Assistant Secretary under the delegation. Due to a Department of Energy organizational realignment, delegation Order No. 0244-33 was amended, effective March 19, 1981, to transfer the authority of the Assistant Secretary for Resource Applications to the Assistant Secretary for Conservation and Renewable Energy. This rate order is issued pursuant to the delegation to the Assistant Secretary for Conservation and Renewable Energy.

Background

Pursuant to Delegation Order No. 0204-33, on May 15, 1980, the Assistant Secretary for Resource Applications issued Rate Order No. WAPA-3 (45 FR 34046, May 21, 1980) confirming and approving on an interim basis, effective the first day of the first full billing period beginning on or after June 16, 1980, Rate Schedules PD-F1, PD-T1, PD-T2, and

PD–T3 for wholesale power and transmission service marketed by the Western Area Power Administration's (Western) Parker-Davis Project. The rate order stated that the rates "* * * shall remain in effect on an interim basis for a period of 12 months unless such period is extended, or until the FERC confirms and approves these or substitute rates, on a final basis, whichever occurs first." The rate schedules were submitted to the FERC for confirmation and approval on a final basis by the Assistant Secretary for Resource Applications' letter of May 15, 1980.

Discussion

In as much as the FERC is not expected to complete its confirmation and approval of the Parker-Davis Project power and transmission rates by June 30, 1981, a further extension of the interim rates is necessary.

Order

In view of the foregoing and pursuant to the authority delegated to me by the Secretary of Energy, I hereby confirm and approve on an interim basis, effective the first day of the first full billing period beginning on or after June 16, 1981, an extension of existing Rate Schedule PD–F1, PD–T1, PD–T2, and PD–T3. These rates shall remain in effect through June 30, 1982, unless extended, or until the FERC confirms and approves them, or substitute rates, on a final basis.

Issued in Washington, D.C., May 14, 1981.

Frank DeGeorge,

Acting Assistant Secretary, Conservation and Renewable Energy.

Rate Schedule PD–F1

(Supersedes Rate Schedule LC–F2), Parker-Davis Project, Arizona-California-Nevada; Schedule of Rates for Wholesale Firm Power Service

Effective:

The first day of the first full billing period beginning on or after June 16, 1980.

Available:

In the area served by the Parker-Davis Project.

Applicable:

To wholesale power customers for general electric service supplied through one meter at one point of delivery.

Character and Conditions of Service:

Three-phase alternating current at sixty (60) Hertz, delivered and metered at the voltages and points of delivery specified in the service contract.

Monthly Rate:

CAPACITY CHARGE: $1.82 per kilowatt of billing demand.

ENERGY CHARGE: 4.15 mills per kilowatthour for each kilowatthour scheduled and/or delivered, not to exceed the delivery obligation under the electric service contract.

BILLING DEMAND: The billing demand will be the greater of (1) the highest 30-minute integrated demand established during the month up to, but not in excess of, the delivery obligation under the power sales contract, or (2) the contract rate of delivery.

Eilling for Unauthorized Overruns:

For each billing period in which there is a contract violation involving an unauthorized overrun of the contractual firm power and/or energy obligations, such overrun shall be billed at ten (10) times the above rates.

Adustments:

For transformer Losses:

If delivery is made at transmission voltage but metered on the low-voltage side of the transformer, the meter readings will be increased two (2) percent to compensate for transformer losses.

For Power Factor:

None. The customer will normally be required to maintain a power factor at the point of delivery of between 95 percent lagging and 95 percent leading.

Rate Schedule PD-T1—Parker-Davis Project, Arizona-California-Nevada; Schedule of Rates for Firm Transmission Service

Effective:

The first day of the first full billing period beginning on or after June 16, 1980.

Available:

In the area served by the Parker-Davis Project.

Applicable:

To firm transmission service customers where power and energy are supplied to the Parker-Davis system at points of interconnection with other systems and transmitted and delivered, less losses, to points of delivery on the Parker-Davis system specified in the service contract.

Character and Conditions of Service:

Transmission service for three-phase alternating current at sixty (60) Hertz, delivered and metered at the voltages and points of delivery specified in the service contract.

Rate:

Transmission Service Charge: $6.80 per kilowatt per year for each kilowatt contracted for at the point of delivery as specified in the service contract; payable monthly at the rate of $0.567 per kilowatt.

Adjustments:

For Reactive Power:

None. There shall be no entitlement to transfer of reactive kilovolt-amperes at delivery points, except when such transfers may be mutually agreed upon by Contractor and Contracting Officer or their authorized representatives.

For Losses:

Power and energy losses incurred in connection with the transmission and delivery of power and energy under this rate schedule shall be supplied by the customer in accordance with the service contract.

Rate Schedule PD–T2—Parker-Davis Project, Arizona-California-Nevada; Schedule of Rates for Transmission Service of Colorado River Storage Project (CRSP) Power and Energy

Effective:

The first day of the first full billing period beginning on or after June 16, 1980.

Available:

In the area served by the Parker-Davis Project.

Applicable:

To Colorado River Storage Project (CRSP) Southern Division customers where such power and energy are supplied to the Parker-Davis system by CRSP at points of interconnection with the CRSP system and for transmission and delivery, less losses, to Southern Division customers at points of delivery on the Parker-Davis system specified in the service contract.

Character and Conditions of Service:

Transmission capacity for three-phase alternating current at sixty (60) Hertz, delivered and metered at the voltages and points of delivery specified in the service contract.

Rate:

Transmission Service Charge: $3.67 per kilowatt of the maximum allowable rate of delivery made available at each point of delivery during each season as specified in the service contract, payable monthly at the rate of $0.612 per kilowatt.

Adjustments:

For Reactive Power:

None. There shall be no entitlement to transfer of reactive kilovoltamperes at delivery points, except when such transfers may be mutually agreed upon by Contractor and Contracting Officer or their authorized representatives.

For Losses:

Power and energy losses incurred in connection with the transmission and delivery of power and energy under this rate schedule shall be supplied by the customer in accordance with the service contract.

Rate Schedule PD–T3—Parker-Davis Project, Arizona-California-Nevada; Schedule of Rates for Nonfirm Transmission Service

Effective:

The first day of the first full billing period beginning on or after June 16, 1980.

Available:

In the area served by the Parker-Davis Project.

Applicable:

To nonfirm transmission service customers where power and energy are supplied to the Parker-Davis system at points of interconnection with other systems and transmitted and delivered subject to the availability of transmission capacity, less losses, to points of delivery on th Parker-Davis system specified in the service contract.

Character and Conditions of Service:

Transmission service on an intermittent basis for three-phase alternating current at

sixty (60) Hertz, delivered and metered at the voltages and points of delivery specified in the service contract.

Rate:

Transmission Service Charge: 1.3 mills per kilowatthour for each kilowatthour scheduled; payable monthly.

Adjustments:

For Reactive Power:

None. There shall be no entitlement to transfer of reactive kilovoltamperes at delivery points, except when such transfers may be mutually agreed upon by Contractor and Contracting Officer or their authorized representatives.

For Losses:

Power and energy losses incurred in connection with the transmission and delivery of power and energy under this rate schedule shall be supplied by the customer in accordance with the service contract.

ENVIRONMENTAL PROTECTION AGENCY

[OPP-30192A; PH-FRL-1834-4]

Abbott Laboratories; Approval of Application to Conditionally Register a Pesticide Product Containing a New Active Ingredient

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Abbott Laboratories, Chemical and Agricultural Products Division, has received approval of an application to conditionally register the pesticide product DEVINE™, containing 0.8 percent of the new active ingredient 3.2×10^8 Live Chlamydospores of *Phytophthora palmivora* MWV per pint.

FOR FURTHER INFORMATION CONTACT: Richard F. Mountfort, Product Manager (PM) 23, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm.412D, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202 (703-557-7070).

SUPPLEMENTARY INFORMATION: EPA issued a notice that published in the **Federal Register** of November 18, 1980 (45 FR 76242) that Abbott Laboratories, Chemical and Agricultural Products Div., 14th and Sheridan Rd., Chicago, IL 60064, had submitted an application to conditionally register the pesticide product DEVINE™, which contains 0.8 percent of the active ingredient 3.2×10^8 Live Chlamydospores of *Phytophthora palmivora* MWV per pint. The application proposed that the mycoherbicide be registered for general use to control *Morrenia odorata*, strangler or milkweed vine in citrus groves.

This application was approved March 25, 1981 and the product was assigned EPA registration No. 275-39.

A copy of the label and list of data references used to support registration are available for public inspection in the office of the product manager. The data and other scientific information used to support registration, except for the material specifically protected by section 10 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (92 Stat. 819; 7 U.S.C. 136) will be available for public inspection in the Information Services Branch, Rm. EB-35, 202-426-8850 in accordance with section 3(c)(2) of FIFRA. Request for data must be made in accordance with the provisions of Freedom of Information Act and must be addressed to the Freedom Information Office (A-101), 401 M St., SW., Washington, D.C. 20460.

Such requests should: (1) identify the product by name and registration number and (2) specify the data or information desired.

(Sec. 3(c)(5), 92 Stat. 824, (7 U.S.C. 136))

Dated: May 14, 1981.

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

BILLING CODE 6560-32-M

[OPP-50478A; PH-FRL-1833-1]

Abbott Laboratories; Extension of Experimental Use Permit; Amendment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Abbott Laboratories has been issued an extension of an experimental use permit. Such permits are in accordance with, and subject to, the procedural requirements of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

FOR FURTHER INFORMATION CONTACT: Franklin D. R. Gee, Product Manager (PM) 17, Registration Division (TS-767C), Office of Pesticide Programs, Rm. 401, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202 (703-557-7028).

SUPPLEMENTARY INFORMATION: EPA issued a notice that published in the **Federal Register** of May 9, 1980 (45 FR 30684) that Abbott Laboratories, Chicago, IL 60064, has been issued an experimental use permit (275-EUP-23) for use of 1,000 pounds of the insecticide *Bacillus thuringiensis* Berliner, var *israelensis* 4.5×10^9 IU/lb on intermittently flooded pastures, irrigation ditches, sewage lagoons, rice paddies, roadside ditches, natural marshes, estuarine areas, and running streams to evaluate control of mosquito larvae and blackfly larvae.

The program was authorized only in the States of Alabama, Arkansas, California, Delware, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Maine, Maryland, Massachusetts, New Jersey, New York, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Texas, and Virginia.

Abbott Laboratories submitted an amendment to the EUP along with a request for an extension.

The experimental use permit is extended for use of 3,700 pounds of the insecticide *Bacillus thuringiensis* Berliner, var *israelensis* 4.5×10^9 IU/lb on intermittently flooded pastures, irrigation ditches, sewage lagoons, rice paddies, roadside ditches, natural marshes, estuarine areas, and running streams to evaluate control of mosquito larvae and blackfly larvae. A total of 1,850 acres are now involved. The program is authorized in the additional States of Arizona, Colorado, Connecticut, Kansas, Michigan, Minnesota, Mississippi, Montana, Nebraska, New Hampshire, New Mexico, North Dakota, Oklahoma, South Dakota, Vermont, West Virginia, and Wisconsin. This experimental use program is effective from April 4, 1981 to April 4, 1982.

Persons wishing to review this experimental use permit are referred to the product manager. Inquiries concerning this permit should be directed to the person cited above. It is suggested that interested persons call before visiting the EPA Headquarters office, so that the appropriate file may be made available for inspection purposes from 8:00 a.m. to 4:00 p.m., Monday through Friday, excluding legal holidays.

(Sec. 5, 92 Stat. 819, as amended, (7 U.S.C. 136))

Dated: May 13, 1981.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-32-M

[PP 7G1998/T296; PH-FRL-1835-5]

Abbott Laboratories; Renewal of Temporary Exemption From Requirement of Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: A temporary exemption from the requirement of a tolerance has been renewed for residues of mycocaracide *Hirsutella thompsonii* on citrus fruits and small fruits.

DATE: This temporary exemption from the requirement of a tolerance expires March 9, 1982.

FOR FURTHER INFORMATION CONTACT: Franklin D. R. Gee, Product Manager (PM) 17, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 401, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202 (703-557-7028).

SUPPLEMENTARY INFORMATION: EPA issued a notice that published in the **Federal Register** of April 22, 1980 (45 FR 27005), that a temporary exemption from the requirement of a tolerance had been renewed for residues of the mycocaracide *Hirsutella thompsonii* on citrus fruits and small fruits. This exemption (PP 7G1998) was requested by Abbott Laboratories, Chemicals & Agricultural Products Div., North Chicago, IL 60064.

Abbott Laboratories has requested a renewal of the temporary exemption from the requirement of a tolerance to permit the continued marketing of the above raw agricultural commodity when treated in accordance with the experimental use permit (275-EUP-20) which is being renewed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material have been evaluated and it has been determined that the temporary exemption will protect the public health. Therefore, the temporary exemption from the requirement of a tolerance is renewed on the condition that the pesticide be used in accordance with the experimental use permit with the following provisions:

1. The amount of the pesticide to be used will not exceed the amount authorized in the experimental use permit.

2. Abbott Laboratories will immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company will also keep records of production, distribution, and performance, and on request make these records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This temporary exemption from the requirement of a tolerance expires March 9, 1982. Residues remaining in or on the raw agricultural commodity after the expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary exemption from the requirement of a tolerance. This temporary exemption from requirement of a tolerance may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicates that such revocation is necessary to protect the public health.

As required by Executive Order 12291, EPA has determined that this temporary tolerance is not a "Major" rule and therefore does not require a Regulatory Impact Analysis. In addition, the Office of Management and Budget (OMB) has exempted this temporary tolerance from the OMB review requirement of Executive Order 12291, pursuant to section 8(b) of that Order.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have significant economic impact on a substantial number of small entities. A certification statement to this effect published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(j), 68 Stat. 516, (21 U.S.C. 346a(j)))

Dated: May 13, 1981.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

[FR Doc. 81-15370 Filed 5-21-81; 8:45 am]

BILLING CODE 6560-32-M

[PP 8G2129/T289; PH-FRL-1834-2]

Bendiocarb; Renewal of Temporary Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Temporary tolerances have been renewed for residues of insecticide bendiocarb (2,2-dimethyl-1,3-benzodioxol-4-ol methylcarbamate), and its metabolites (2,2-dimethyl-1,3-benzodioxol-4-ol), and *N*-hydroxymethyl bendiocarb in or on the raw agricultural commodities corn (grain, fodder, and forage) at 0.05 part per million (ppm), in milk at 0.05 ppm, in fat, meat, and meat byproducts (except kidneys) of cattle, goats, hogs, horses, poultry, and sheep at 0.05 ppm, in kidneys of cattle, goats, hogs, horses, poultry, and sheep at 0.1 ppm and in eggs at 0.05 ppm.

DATE: These temporary tolerances expire January 27, 1982.

FOR FURTHER INFORMATION CONTACT: Jay S. Ellenberger, Product Manager (PM) 12, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 400 CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202 (703-557-7024).

SUPPLEMENTARY INFORMATION: EPA issued a notice published in the **Federal Register** of July 25, 1980 (45 FR 49671) that temporary tolerances had been established for residues of the insecticide bendiocarb (2,2-dimethyl-1,3-benzodioxol-4-ol) and its metabolites 2,2-dimethyl-1,3- benzodioxol and *N*-hydroxymethyl bendiocarb in or on the following raw agricultural commodities: corn (grain, fodder, forage) at 0.05 ppm; milk, eggs, and the meat, fat, and meat byproducts (except kidneys) of cattle, goats, hogs, horses, poultry, and sheep at 0.05 ppm, in kidneys of cattle, goats, hogs, horses, poultry, and sheep at 0.05 ppm.

Fisons Inc., has requested a renewal of the temporary tolerance to permit the continued marketing of the above raw agricultural commodity when treated in accordance with the experimental use permit (10065-EUP-14) which is being renewed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material has been evaluated and it has been determined that the temporary tolerances will protect the public health. Therefore, the temporary tolerances are renewed on the condition that the pesticide be used in accordance with the experimental use permit with the following provisions:

1. The amount of the pesticide to be used will not exceed the amount authorized in the experimental use permit.

2. Fisons Inc., will immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company will also keep records of production, distribution, and performance, and on request make these records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These temporary tolerances expire January 27, 1982. Residues remaining in or on the raw agricultural commodities after the expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerances. These temporary tolerances may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicates that such revocation is necessary to protect the public health.

As required by Executive Order 1291, EPA has determined that this temporary tolerance regulation is not a "Major" rule and therefore does not require a Regulatory Impact Analysis. In addition, the Office of Management and Budget (OMB) has exempted this temporary tolerance from the OMB review requirement of Executive Order 12291, pursuant to section 8(b) of that Order.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA)..

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Section 5(d)(2) requires EPA to publish in the **Federal Register** certain information about each PMN within 5 working days after receipt. This notice announces receipt of five PMN's and provides a summary of each.

DATE: Written comments by:

PMN 81-187, June 14, 1981.
PMN 81-189, June 21, 1981.
PMN 81-191, June 16, 1981.
PMN 81-200 and 81-201, June 23, 1981.

ADDRESS: Written comments to: Document Control Officer (TS-793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-401, 401 M St., SW., Washington, DC 20460 (202-426-2610).

FOR FURTHER INFORMATION CONTACT:

For PMN number	Notice manager	Telephone	Room number
81-187, 81-200 and 81-201	George Bagley.	(202-426-2601)	E-210.
81-189	Kathleen Ehrensberger.	(202-755-1150)	E-335.
81-191	Mary Cushmac.	(202-382-2277)	E-229.

Mail address of notice managers: Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

SUPPLEMENTARY INFORMATION: Section 5(a)(1) of TSCA (90 Stat. 2012 (15 U.S.C. 20604)), requires any person who intends to manufacture or import a new chemical substance to submit a PMN to EPA at least 90 days before manufacture or import commences. A "new" chemical substance is any substance that is not on the Inventory of existing substances compiled by EPA under section 8(b) of TSCA. EPA first published the Initial Inventory on June 1, 1979. Notices of availability of the Initial Inventory were publised in the **Federal Register** of May 15, 1979 (44 FR 28558—nitial) and July 29, 1980 (45 FR 50544—Revised). The requirement to submit a PMN for new chemical substances manufactured or imported for commercial purposes became effective on July 1, 1979.

EPA has proposed premanufacture notification rules and forms in the **Federal Register** issues of January 10, 1979 (44 FR 2242) and October 6, 1979 (44 FR 59764). These regulations, however, are not yet in effect. Interested persons should consult the Agency's Interim Policy published in the **Federal Register** of May 15, 1979 (44 FR 28564) for guidance concerning premanufacture notification requirements prior to the effective date of these rules and forms. In particular, see page 28567 of the Interim Policy.

A PMN must include the information listed in section 5(d)(1) of TSCA. Under section 5(d)(2), EPA must publish in the **Federal Register** nonconfidential information on the identity and uses of the substance, as well as a description of any test data submitted under section 5(b). In addition, EPA has decided to publish a description of any test data submitted with the PMN and EPA will publish the identify of the submitter unless this information is claimed confidential.

Publication of the section 5(d)(2) notice is subject to section 14 concerning disclosure of confidential information. A company can claim confidentiality for any information submitted as part of a PMN. If the company claims confidentiality for the specific chemical identity or use(s) of the chemical, EPA encourages the submitter to provide a generic use description, a nonconfidential description of the potential exposures from use, and a generic name for the chemical. EPA will publish the generic name, the generic use, and the potential exposure descriptions in the **Federal Register.**

If no generic use description or generic name is provided, EPA will develop one and after providing due notice to the submitter, will publish an amended **Federal Register** notice. EPA immediately will review confidentiality claims for chemical identity, chemical use, the identity of the submitter, and for health and safety studies. If EPA determines that portions of this information are not entitled to confidential treatment, the Agency will publish an amended notice and will place the information in the public file, after notifying the submitter and complying with other applicable procedures.

After receipt, EPA has 90 days to review a PMN under section 5(a)(1). The section 5(d)(2) **Federal Register** notice indicates the date when the review period ends for each PMN. Under section 5(c), EPA may, for good cause, extend the review period for up to an additional 90 days. If EPA determines that an extension is necessary, it will publish a notice in the **Federal Register.**

Once the review period ends, the submitter may manufacture the substance unless EPA has imposed restrictions. When the submitter begins to manufacture the substance, he must report to EPA, and the Agency will add the substance to the Inventory. After the substance is added to the Inventory, any company may manufacture it without providing EPA notice under section 5(a)(1)(A).

Therefore, under the Toxic Substances Control Act, summaries of the data taken from the PMN is published herein.

Interested persons may, on or before the dates shown under "DATES",

submit to the Document Control Officer (TS–793), Management Support Division, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E–401, 401 M St., SW., Washington, DC 20460, written comments regarding these notices. Three copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the document control number "[OPTS–51260]" and the specific PMN number. Comments received may be seen in Rm. E–106 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

(Sec. 5, 90 Stat. 2012 (15 U.S.C. 2604))

Dated: May 14, 1981.

Edward A. Klein,

Director, Chemical Control Division.

PMN 81–187

The following information is taken from data submitted by the manufacturer in the PMN.

Close of Review Period. July 14, 1981.

Manufacturer's Identity. Claimed confidential business information.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Cycloaliphatic polyester modified with a polyether glycol.

Use. The manufacturer states that the PMN substance will be used by processors to produce formed articles for use by commercial or individual consumers.

Production Estimates. Claimed confidential business information.

Physical/Chemical Properties

Melting point—>190°C.
Solubilities:
Form—Solid pellets.
Density—1.12.
Water—<0.1.
Octanol—<0.1.

Environmental Test Data. The manufacturer states that the chemical oxygen demand (COD) test showed incomplete digestion (1.6 g/g). Secondary waste treatment compatibility study in a saturated solution of less than 1 ppm (assumed concentration) showed no effects on the microbiological carbon metabolism. A study to determine the acute effects on five aquatic species in a saturated solution of less than 1 ppm (total organic carbon concentration) showed no effects on the give aquatic species.

Toxicity Data

Acute oral LD_{50} (rats)—>3,000 mg/kg.
Acute dermal LD_{50}—>1,000 mg/kg.
Skin irritation—Slight.
Repeated 10-day skin application—No exacerbation of the irritative response.
Skin sensitization potential—None.
Eye irritation—Slight.
Repeated 2-week feeding study (rats) of 1.0 and 0.1% in diet—Hematology: Normal. Clinical chemistry: Normal. Necropsy: Normal organ weights. Pathology: No gross or histopathologic changes due to compound were observed. Target organ: None identified.

Exposure. The submitter states that 32 manufacturing and processing workers could have skin and inhalation exposure to the new chemical for 7 to 8 hr/da, 10 to 100 da/yr, at a potential maximum concentration of 1 mg/m³.

Environmental Release/Disposal. The manufacturer states that there is no anticipated release of the new substance into the land or water, and negligible amounts will be released into the air. Any waste generated will be incinerated in an approved facility; flue gasses will be passed through a scrubber, and scrubber water and ash quench water will be discharged into a wastewater treatment system.

PMN 81–189

The following information is taken from data submitted by the manufacturer in the PMN.

Close of Review Period. July 21, 1981.

Manufacturer's Identity. Claimed confidential business information. Organizational description provided:
Manufacturing site—Middle Atlantic U.S.
Standard Industrial Classification Code—285; e.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Unsaturated polyester.

Use. Claimed confidential business information. Generic use information provided: The submitter states that the PMN substance will be used in an open use that will release more than 50 but less than 5,000 kg per year into the environment with potential skin and eye exposure to both chemical and nonchemical industry employees and to consumers as part of an article.

Production Estimates

	Kilograms per year	
	Minimum	Maximum
1st year	601,000	800,000
2d year	800,000	1,000,000
3d year	1,000,000	1,204,500

Physical/Chemical Properties

Percent total solids—92.8.
Acid value—4.7.
Viscosity—310 cps.
Color value (Gardner)—2.
Flash point—230° F.

Toxicity Data. No data were submitted.

Exposure. The manufacturer states that at five sites, 152 manufacturing and processing workers will have potential skin and eye exposure to the new chemical for 4 to 6 hr/da, 4 to 154 da/yr, during filling of mixing equipment and shipment containers, sampling for quality control, filtering, and cleaning. At the site of a typical user, workers have potential skin and eye exposure.

Environmental Release/Disposal. The manufacturer states that at five sites, less than 100 kg/yr of the new chemical will be released into the air and water and up to 4,010 kg/yr into the land. Vapors are passed through a scrubber; sludge from distilled cleaning solvents is incinerated. At the site of a typical user, less than 20 kg/yr will be released into the air and water and from 10 to 100 kg/yr into the land.

PMN 81–191

The following information is taken from data submitted by the manufacturer in the PMN.

Close of Review Period. July 16, 1981.

Manufacturer's Identity. Claimed confidential business information. Organizational description provided:
Annual sales—In excess of $500,000,000.
Manufacturing site—East-North Central U.S.
Standard Industrial Classification Code—285.

Specific Chemical Identity. Acrylic acid, bisphenol *A*-epichlorohydrin resin, ethyl, acrylate, methyl methacrylate, polyvinyl butyral resin, and styrene polymer.

Use. The manufacturer states that the PMN substance will be used in an industrial use as an intermediate in metal coating formulation.

Production Estimates

	Kilograms per year	
	Minimum	Maximum
1st year	500	5,000
2d year	5,000	50,000
3d year	50,000	150,000

Physical/Chemical Properties

Neat polymer:
Molecular weight—100,000 wt. av. (by G.P.C.).
Viscosity—Semi-solid.
Solubility—Esters, ketones, glycol ethers, aromatics.
Aqueous solution of polymer:
Total nonvolatiles—34.5%.

Viscosity—150 cps.
Flash point—130° F.
Weight/gallon—8.7 lbs.
pH—7.2.

Toxicity Data. No data were submitted.

Exposure. The manufacturer states that five manufacturing, processing, and disposal workers could have skin exposure to the new chemical for 1 to 3 hr/da, 30 to 63 da/yr, at an average concentration of 0 to 1 mg/m³ and a peak concentration of 1 to 10 mg/m³ during tank filling and filtering processes and while transferring the new substance. At a site not controlled by the submitter, three disposal workers could have skin exposure for 1 hr/da, 30 da/yr, at an average concentration of 0 to 1 mg/m³ and a peak concentration of 1 to 10 mg/m³ during drum cleaning and reconditioning.

Environmental Release/Disposal. The manufacturer states that none of the PMN substance is anticipated to be released into the air and water and less than 10 kg/yr into the land. Filter cartridges and filter bags will be loaded in approved drums and removed to an approved landfill.

PMN 81-200

The following information is taken from data submitted by the manufacturer in the PMN.

Close of Review Period. July 23, 1981.

Manufacturer's Identity. Claimed confidential business information.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Trisubstitutedbenzene.

Use. Claimed confidential business information. Generic use information provided: The manufacturer states that the PMN substance will be used as a minor component in an industrial formulation with minimal potential for human contact.

Production Estimates

	Kilograms per year	
	Minimum	Maximum
1st Year	50	100
2d Year	100	300
3d Year	300	500

Physical/Chemical Properties

Solubilities:
Water—<0.1%.
Octanol—<0.1%.
Melting point—Decomposes above 124° C.

Toxicity Data.

Acute oral LD_{50}—>3,000 mg/kg.
Acute dermal LD_{50}—>1,000 mg/kg.
Skin irritation—Slight.
Skin sensitization potential—Low.
Eye irritation—Slight.

Exposure. The submitter states that eight manufacturing and processing workers will have skin and inhalation exposure for 1 hr/da, 4 da/yr, at an average concentration of 0 to 1 mg/m³ and a peak concentration of 1 to 10 mg/m³ during transfer and cleaning operations. A maximum of 100 industrial customers would have daily skin exposure.

Environmental Release/Disposal. The manufacturer states that negligible amounts of the new substance will be released into the air and none into the land and water. Emissions vapors are passed through a scrubber; wastewater and combustible solid wastes are collected for incineration and eventual discharge into a wastewater treatment system.

PMN 81-201

The following information is taken from data submitted by the manufacturer in the PMN.

Close of Review Period. July 23, 1981.

Manufacturer's Identity. Claimed confidential business information. Generic name provided: Polymer of substituted acrylic acid derivative and substituted styrene.

Use. Claimed confidential business information. Generic use information provided: The manufacturer states that the PMN substance will be used as a very minor component in a commercial formulation with minimal potential for human exposure.

Production Estimates

	Kilograms per year	
	Minimum	Maximum
1st year	100	300
2d year	150	500
3d year	200	700

Physical/Chemical Properties

Solubilities:
Water—<0.1%.
Octanol—<0.1%.
Glass transition temperature—138°C.

Environmental Test Data

Acute effects on six aquatic species—A test solution with a nominal concentration of 100 ppm showed no effects on the six species tested.

Toxicity Data

Acute oral LD_{50}—>3,000 mg/kg.
Acute dermal LD_{50}—>1,000 mg/kg.
Skin irritation—Slight.
Skin sensitization potential—None.

Exposure. The submitter states that three manufacturing workers will have skin and inhalation exposure during transfer operations for 1.5 hr/da, 14 da/yr, at an average concentration of 1 to 10 mg/m³ and a peak concentration of 10 to 100 mg/³. Twelve processing workers will also have skin and inhalation exposure during transfer operations for 2 hr/da, 80 da/yr, at an average concentration of 0 to 1 mg/m³ and a peak concentration of 10 to 100 mg/m³. A maximum of 300 commercial consumers would have daily skin exposure.

Environmental Release/Disposal. The manufacturer states that there will be negligible amounts of the new substance released into the air and none into the land and water. Emissions vapors are passed through a scrubber; wastewater and combustible solid wastes are collected for incineration and eventual discharge into a wastewater treatment system.

BILLING CODE 6560-31-M

[PP 4G1511/T311; PH-FRL-1834-3]

Collectotrichum Gloeosporioides; Renewal of Temporary Exemption From Requirement of a Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: A temporary exemption from the requirement of a tolerance for residues of mycoherbicide *Colletotrichum gloeosporioides* f. sp. *aeschynomene* in or on rice and soybeans (when used as an herbicide to control northern jointvetch *Aeschynomene virginica)* and f. sp. *jusseaeae* to control winged waterprimrose *(Jussiaea decurrens)* in or on rice when used as a mycoherbicide.

DATE: This temporary exemption from the requirement of a tolerance expires October 1, 1982.

FOR FURTHER INFORMATION CONTACT: Richard F. Mountfort, Product Manager (PM) 23, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 412D, CM No. 2, 1921 Jefferson Davis Highway, Arlington, VA 22202 (703-557-7070).

SUPPLEMENTARY INFORMATION: EPA issued a notice that published in the **Federal Register** of June 10, 1976 (41 FR 23435), that a temporary exemption from the requirement of a tolerance has been established for residues of the

mycoherbicide *Colletotrichum gloeosporioides* f. sp. *aeschynomene* in or on rice and soybeans and f. sp. *jusseaeae* in or on rice in reponse to pesticide petition (PP 4G1511). This temporary exemption from the requirement of a tolerance was requested by the University of Arkansas, Fayetteville, AR 72701.

The University of Arkansas has requested a renewal of the temporary tolerance to permit the continued marketing of the above raw agricultural commodities when treated in accordance with the experimental use permit (34487–EUP–1) which is being renewed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material have been evaluated and it has been determined that the temporary tolerance exemption will protect the public health. Therefore, the temporary exemption is renewed on the condition that the pesticide be used in accordance with the experimental use permit with the following provisions:

1. The amount of the pesticide to be used will not exceed the amount authorized in the experimental use permit.

2. The University of Arkansas will immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The university will also keep records of production, distribution, and performance, and on request make these records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This temporary exemption from the requirement of a tolerance expires October 1, 1982. Residues remaining in or on the raw agricultural commodities after the expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary exemption from a requirement of a tolerance. This temporary exemption from the requirement of a tolerance may be revoked if the experimental use permit is revoked or if any scientific data or experience with this petition indicates that such revocation is necessary to protect the public health.

As required by Executive Order 12291, EPA has determined that this temporary tolerance regulation is not a "Major" rule and therefore does not require a Regulatory Impact Analysis. In addition, the Office of Management and Budget (OMB) has exempted this temporary tolerance from the OMB review requirement of Executive Order 12291, pursuant to section 8(b) of that Order.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (36 FR 24950).

(Sec. 408(j), 68 Stat. 516, (21 U.S.C. 346a(J)))

Dated: May 13, 1981.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

[OPP–50512A; PH–FRL–1835–4]

Elanco Products Co.; Extension of Experimental use Permit; Amendment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice amends an experimental use permit that published in the Federal Register or January 12, 1981 (45 FR 2715), for Elanco Products Co.

FOR FURTHER INFORMATION CONTACT: Richard F. Mountfort, Product Manager (PM) 23, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 412D, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202 (703–557–7070).

SUPPLEMENTARY INFORMATION: EPA issued a notice that published in the Federal Register of January 12, 1981 (45 FR 2715) that Elanco Products Co., P.O. Box 1750, Indianapolis, IN 46206. received an extension of an experimental use permit (1471–EUP–63). The experimental use permit allows the use of 1,343 gallons of the product containing the active ingredient ethalfluralin [*N-[ethyl-N*-(2-methyl-2-propenyl]-2,-6-dinitro-4-(trifluoromethyl) benzenamine] on seed and pod vegetables, forage legumes, and peanuts to evaluate control of weeds. A total of 2,579 acres are involved. This program is authorized only in the States of Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming, and Utah.

The permit (1471–EUP–63) is amended to include the raw agricultural commodity growing cucurbits. A total of 1,003 acres are involved, and 557 gallons of the product will be used. The experimental use permit is effective from April 16, 1981, to April 16, 1982.

(Sec. 5, 92 Stat. 819, as amended; (7 U.S.C. 136))

Dated: May 13, 1981.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

FMC Corp.; Filing of Feed Additive Petition; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice corrects a feed additive petition for the combined residues of the insecticide carbofuran in or on soybean soapstock, which appeared in the Federal Register of April 25, 1980 (45 FR 27984).

FOR FURTHER INFORMATION CONTACT: Jay S. Ellenberger, Product Manager (PM) 12, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 400, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202 (703–557–7025).

SUPPLEMENTARY INFORMATION: EPA issued a notice that published in the Federal Register of April 25, 1980 (45 FR 27984) that FMC Corp., 2000 Market St., Philadelphia, PA 19103 had submitted a feed additive petition proposing that 21 CFR Part 561 be amended by establishing a tolerance for the combined residues of the insecticide carbofuran (2,3-dihydro-2,2-dimethyl-7-benzofuranyl-*N*-methylcarbamate) and its carbamate metabolite 2,3-dihydro-2,2-dimethyl-3-hydroxy-7-benxofuranyl-*N*-methylcarbamate, and the phenolic metabolites 2,3-dihydro-2,2-dimethyl-3-oxo-7-benzofurandiol in free fatty acids derived from the animal feed soybean soapstock at 6 ppm.

In the 3rd paragraph, 3rd line the petition number appeared in correctly as

"FAP OH5241", the number is corrected to read "FAP OH5297."

Dated: May 13, 1981.

BILLING CODE 6560-32-M

[EN-8-FRL 1831-7]

General National Pollutant Discharge Elimination System; Permit for Confined Animal Feeding Operations in South Dakota

AGENCY: Environmental Protection Agency (EPA), Region VIII.

ACTION: Notice of intent.

SUMMARY: Region VIII of the EPA is hereby giving notice of its tentative determination to issue a general National Pollutant Discharge Elimination System (NPDES) permit for certain confined animal feeding operations (feedlots) in the State of South Dakota. The general permit will establish effluent requirements, prohibitions, Best Management Practices (BMPs), and other conditions for wastewaters generated from these feedlots. The general feedlot permit will eventually replace essentially all individually-issued NPDES feedlot permits in the State of South Dakota.

DATE: Public comment on this proposal must be on or before June 22, 1981.

ADDRESS: Public comments should be sent to: Mr. Roger E. Frenette (8E-WE), Chief, Water and Hazardous Waste Enforcement Branch, Enforcement Division, 1860 Lincoln Street, Suite 103, Denver, Colorado 80295.

FOR FURTHER INFORMATION CONTACT: Mr. Marshall Fischer, Region VIII, at the above-listed address or telephone (303) 837-4901 or FTS 327-4901. Copies of the proposed permit and Statement of Basis will be provided upon request.

SUPPLEMENTARY INFORMATION:

A. Background

Section 301(a) of the Clean Water Act (CWA) provides that the discharge of pollutants is unlawful except in accordance with an NPDES permit. Under EPA's regulations (40 CFR 122.59), EPA may issue a single, general permit to a category of point sources within the same geographic area if the regulated sources:

(1) Are involved in the same or substantially similar operation;

(2) Generate and discharge the same types of waste;

(3) Require the same permit effluent limitations and/or operating conditions;

(4) Require similar monitoring requirements; and,

(5) In the opinion of the Director of the NPDES permit program, are more appropriately controlled under a general permit than an individual permit.

As in the case of any individual permits issued under the NPDES program, violations of any condition of a general permit constitutes a violation of the CWA enforceable under Section 309 of the CWA.

Any owner or operator authorized by the general permit may be excluded from the general permit by applying for an individual permit. Criteria and procedures for such exclusion are published under 40 CFR 122.59(b) of the regulations and, therefore, need not be printed here.

B. South Dakota Feedlots

South Dakota is a non-NPDES State which means that EPA is the NPDES permit-issuing authority. EPA currently has approximately 85 individual feedlot NPDES permits issued within the State. Each of these permits currently contain (or would upon reissuance) the same prohibition against any discharge of process-generated water (including contaminated storm runoff) except in the event of a 25-year, 24-hour storm. The 25-year, 24-hour precipitation event is the U.S. Department of Agriculture, Soil Conservation Service's storm retention design criteria for BMPs for feedlots and is Regional Best Conventional Pollutant Control Technology (BCT).

The general permit's conditions are, therefore, no more restrictive than the individual permits it will replace. The general permit may be applicable to more facilities than had previously been covered under individual permits. However, since these newly-covered facilities are subject to statutory requirements, their coverage under the general permit does not subject them to any further responsibility under the CWA, but rather clarifies such responsibilities.

C. Economic Impact

EPA has reviewed the effect of Executive Order 12291 on this proposed general permit and has determined the proposal not to be *major* under that order. The proposed permit will:

(1) Result in substantial elimination of regulated facility paperwork by reducing or waiving permit applications and reducing routine reporting.

(2) Clarify existing requirements which are currently in effect and support other existing State and Federal agency management requirements.

(3) Provide for a shift of Federal, State, and local agency resources from administrative activities to surveillance/assistance activities for the regulated sources.

Roger L. Williams,

Regional Administrator, Region VIII.

Subject: Environmental Protection Agency General National Pollutant Discharge Elimination System Permit for Confined Animal Feeding Operations in South Dakota

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. section 605(b), I hereby certify that the proposed general permit, when issued, will not have a significant impact on a substantial number of small entities. This action imposes no new requirements and streamlines the existing administrative burden on regulated sources.

Dated: May 15, 1981.

Walter C. Barber, Jr.,

Acting Administrator.

Interagency Toxic Substances Data Committee; Rescheduling of Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The June 2, 1981 meeting of the Interagency Toxic Substances Data Committee has been rescheduled to a later date.

DATE: The meeting will be held on June 16, 1981.

FOR FURTHER INFORMATION CONTACT: Nan Fremont (TS-777), Executive Secretary, Interagency Toxic Substances Data Committee, Office of Pesticides and Toxic Substances, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, (202-755-8040).

SUPPLEMENTARY INFORMATION: The regular meetings of the Interagency Toxic Substances Data Committee take place on the first Tuesday of alternate months at 9:30 a.m. and are open to the public. The meetings are held in: Rm. 2010, New Executive Office Building, 17th St. and Pennsylvania Ave., N.W., Washington, DC 20006.

The June meeting has been rescheduled to June 16, 1981. The next meeting of the Interagency Toxic Substances Data Committee will take place on August 4, 1981.

Dated: May 15, 1981.

Nan Fremont,

Executive Secretary, Interagency Toxic Substances Data Committee.

Longview Fibre Co.; Issuance of PSD Permit

Notice is hereby given that on April 27, 1981, the Environmental Protection Agency (EPA) issued a Prevention of Significant Deterioration (PSD) permit to Longview Fibre Company for approval to modify the pulp and paper mill facilities at Longview, Washington.

This permit has been issued under EPA's Prevention of Significant Air Quality Deterioration (40 CFR Part 52.21) regulations.

Under section 307(b)(1) of the Clean Air Act, judical review of the PSD Permit is available *only* by the filing of a petition for review in the Ninth Circuit Court of Appeals within 60 days of today. Under section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may *not* be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

Copies of the permit are available for public inspection upon request at the following location: EPA, Region 10, 1200 Sixth Avenue, Seattle, Washington 98101.

Dated: May 12, 1981.

Donald P. Dubois,

Regional Administrator.

N-(2,6-Dimethylphenyl)-N-(Methoxacetyl) Alanine Methyl Ester; Renewal of Temporary Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: A temporary tolerance has been renewed for residues of the fungicide *N*-(2,6-dimethylphenyl)-*N*-(methoxyacetyl) alanine methyl ester in or on the raw agricultural commodity potatoes at 0.05 part per million (ppm).

DATE: This temporary tolerance expires January 20, 1983.

FOR FURTHER INFORMATION CONTACT: Henry M. Jacoby, Product Manager (PM) 21, Registration Division (TS-767C). Office of Pesticide Programs, Environmental Protection Agency, Rm. 418, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-7060).

SUPPLEMENTARY INFORMATION: EPA issued a notice that published in the **Federal Register** of June 15, 1979 (44 FR 34692), that a temporary tolerance had been established for residues of the fungicide *N*-(2,6-dimethylphenyl)-*N*-(methoxyacetyl) alanine methyl ester in or on the raw agricultural commodity potatoes at 0.05 ppm. This tolerance was requested (PP 8G2121) by Ciba-Geigy Corp., Agricultural Div., P.O. Box 11422, Greensboro, NC 27409.

Ciba-Geigy Corp. has requested a renewal of the temporary tolerance to permit the continued marketing of the above raw agricultrual commodity when treated in accordance with the experimental use permit (100-EUP-1) which is being renewed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material have been evaluated and it has been determined that the temporary tolerance will protect the public health. Therefore, the temporary tolerance will be renewed on the condition that the pesticide be used in accordance with the experimental use permit with the following provisions:

1. The amount of the pesticide to be used will not exceed the amount authorized in the experimental use permit.

2. Ciba-Geigy Corp. will immediately notify the EPA of any findings from the experimental use that have a bearing on sefety. The company will also keep records of production, distribution, and performance, and on request make these records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This temporary tolerance expires January 20, 1983. Residues remaining in or on the raw agricultural commodity after the expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerance. This temporary tolerance may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicates that such revocation is necessary to protect the public health.

As required by Executive Order 12291, EPA has determined that this temporary tolerance is not a "Major" rule and therefore does not require a Regulatory Impact Analysis. In addition, the Office of Management and Budget (OMB) has exempted this temporary tolerance from the OMB review requirement of Executive Order 12291, pursuant to section 8(b) of that Order.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

Availability of Environmental Impact Statements

AGENCY: Office of Federal Activities (A-104), EPA.

PURPOSE: This notice lists the Environmental Impact Statements (EISS) which have been officially filed with the EPA and distributed to federal agencies and interested groups, organizations and individuals for review pursuant to the Council on Environmental Quality's regulations (40 CFR Part 1506.9) during the week of May 11, 1981 to May 15, 1981.

REVIEW PERIODS: The 45-day review period for Draft EISs' listed in this notice is calculated from May 22, 1981 and will end on July 6, 1981. The 30-day review period for Final EISs' as calculated from May 22, 1981 will end on June 22, 1981.

EIS AVAILABILITY: To obtain a copy of an EIS listed in this notice you should contact the federal agency which prepared the EIS. If a federal agency does not have the EIS available upon request you may contact the Office of Federal Activities, EPA, for further information. Copies of EISs' previously filed with EPA or CEQ which are no longer available from the originating agency are available with charge from the following source: Information Resources Press, 1700 North Moore Street, Arlington, Virginia 22209, (703) 558-8270.

FOR FURTHER INFORMATION CONTACT: Kathi L. Wilson, Office of Federal Activities, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 245-3006.

Design and Construction of Wastewater Treatment Facilities, Town of Kingston, Plymouth County, Mass.; Intent To Prepare an Environmental Impact Statement

AGENCY: Environmental Impact Office, Region I, EPA.

ACTION: Notice of Intent to Prepare a Draft Environmental Impact Statement (EIS).

PURPOSE: In accordance with Section 102(2)(c) of the National Environmental Policy Act, the EPA has indentified a need to prepare an EIS, and therefore publishes this Notice of Intent pursuant to 40 CFR 1501.7.

FOR FURTHER INFORMATION CONTACT: Kenneth H. Wood, Environmental Impact Office, U.S. Environmental Protection Agency, John F. Kennedy Federal Building, Room 2203, Boston, MA 02203; Telephone: (Commerical) 617-223-3190, (FTS) 8-223-3190.

SUMMARY:

1. Description of Proposed Action

The EPA action would be approval of a facilities plan and the issuance of grant monies pursuant to Section 201 of the Clean Water Act (Pub. L. 95-217) for the design and construction of wastewater treatment facilities for the Town of Kingston, Plymouth County, Massachusetts. The EIS will be prepared concurrently with the facilities plan update, and all practicable alternatives will be considered.

2. Public and Private Participation in the EIS Process

A full-scale public participation program will be developed which will encourage participation by all interested Federal, State and local Agencies as well as interested private citizens and organizations.

3. Scoping

For the purpose of determining the concerns and interest of both private parties and public agencies, scoping meetings will be held, first for local interests, in Kingston, on Wednesday, May 27, 8:00 p.m. at the Faunce School. A second meeting, for State and Federal agencies, will be on May 28 at 2:00 p.m., in Room 307 at the JFK Federal Building, Boston. This process will assure that all signficant issues are addressed in either the Facility Plan or the EIS.

4. Timing

It is expected that the Draft EIS will be distributed for public review and comment in the Summer of 1982.

5. Requests for Copies of the Draft EIS

For inclusion on the distribution list for the Draft EIS and other related public notices, all parties may indicate their interest by submitting names and addresses to the project officer (above) or the Public Participation Coordinator at Kingston Town Hall.

Dated: May 19, 1981.

William N. Hedeman, Jr.,

Director, Office of Federal Activities (A-104).

BILLING CODE 6560-37-M

FEDERAL COMMUNICATIONS COMMISSION

Procedures and Practices of Mobile Services Division; Public Meeting

May 13, 1981.

The Mobile Services Division (MSD), Common Carrier Bureau will hold a public meeting on Monday, June 22, 1981, in Room 856, 1919 M Street, NW, Washington, DC 20554, starting at 10:00 A.M. The purpose of the meeting is to afford members of the mobile services community an opportunity to discuss with Commission staff the Division's procedures and practices, particularly focusing on changes that have occurred during the past year.

The agenda for the meeting is outlined below.

I. Review of Changes During Preceding Year. Some examples are:
- —return of defective applications
- —limited basis for Special Temporary Authority
- —height/power waiver requests
- —requirement for traffic load studies

It should be kept in mind that some issues may not be open for discussion because the matter is restricted by the Commission's *Ex Parte* rules.

II. Status of Pending Rulemakings. Some examples are:
- —900 MHz paging, General Docket 80-183
- —35 MHz paging, CC 80-189
- —Review of Part 22 Rules, CC 80-57
- —Cellular, CC 79-318
- —Regulatory Policy and Procedures, CC 20870

III. Internal Procedures of the MSD

IV. Industry Recommendations for Elimination of Rules

V. Current Issues and Miscellaneous Items

VI. Further Periodic Meetings

We do not propose that other matters of substance be excluded from discussion. If members of the public intend to raise other matters, advance notice to John Buscemi would be appreciated. This will assist the staff in preparing in advance a complete answer to any questions. If there are further

questions, please call John Buscemi, (202) 632–6450.

Federal Communications Commission.

William J. Tricarico,

Secretary.

[FR Doc. 81–15313 Filed 5–21–81; 8:45 am]

BILLING CODE 6712–01–M

FEDERAL PREVAILING RATE ADVISORY COMMITTEE

Open Committee Meetings

Pursuant to the provisions of section 10 of the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given that meetings of the Federal Prevailing Rate Advisory Committee will be held on:

Thursday, June 4, 1981
Thursday, June 18, 1981
Thursday, June 25, 1981

These meetings will convene at 10 a.m., and will be held in Room 5A06A, Office of Personnel Management Building, 1900 E Street, NW., Washington, D.C.

The Federal Prevailing Rate Advisory Committee is composed of a Chairman, representatives of five labor unions holding exclusive bargaining rights for Federal blue-collar employees, and representatives of five Federal agencies. Entitlement to membership of the Committee is provided for in 5 U.S.C. 5347.

The Committee's primary responsibility is to review the prevailing rate system and other matters pertinent to the establishment of prevailing rates under subchapter IV, chapter 53, 5 U.S.C., as amended, and from time to time advise the Office of Personnel Management thereon.

These scheduled meetings will convene in open session with both labor and management representatives attending. During the meeting either the labor members or the management members may caucus separately with the Chairman to devise strategy and formulate positions. Premature disclosure of the matters discussed in these caucuses would impair to an unacceptable degree the ability of the Committee to reach a consensus on the matters being considered and disrupt substantially the disposition of its business. Therefore, these caucuses will be closed to the public on the basis of a determination made by the Director of the Office of Personnel Management under the provisions of Section 10(d) of the Federal Advisory Committee Act (Pub. L. 92–463) and 5 U.S.C., section 552b(c)(9)(B). These caucuses may, depending on the issues involved, constitute a substantial portion of the meeting.

Annually, the Committee publishes for the Office of Personnel Management, the President, and Congress a comprehensive report of pay issues discussed, concluded recommendations thereon, and related activities. These reports are also available to the public, upon written request to the Committee Secretary.

Members of the public are invited to submit material in writing to the Chairman concerning Federal Wage System pay matters felt to be deserving of the Committee's attention. Additional information concerning these meetings may be obtained by contacting the Committee Secretary, Federal Prevailing Rate Advisory Committee, Room 1340, 1900 E Street, NW, Washington, D.C. 20415 (202–632–9710).

May 13, 1981.

Jerome H. Ross,

Chairman, Federal Prevailing Rate Advisory Committee.

[FR Doc. 81–15318 Filed 5–21–81; 8:45 am]

BILLING CODE 6325–01–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA 639–DR]

Alabama; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This is a Notice of the Presidential declaration of a major disaster for the State of Alabama (FEMA–639–DR), dated May 14, 1981, and related determinations.

DATED: May 14, 1981.

FOR FURTHER INFORMATION CONTACT: Sewall H. E. Johnson, Disaster Response and Recovery, Federal Emergency Management Agency, Washington, D.C. 20472 (202) 634–7800.

Notice: Pursuant to the authority vested in the Director of the Federal Emergency Management Agency by the President under Executive Order 12148 effective July 15, 1979, and delegated to me by the Director under Federal Emergency Management Agency Delegation of Authority, and by virtue of the Act of May 22, 1974, entitled "Disaster Relief Act of 1974" (88 Stat. 143); notice is hereby given that, in a letter of May 14, 1981, the President declared a major disaster as follows:

I have determined that the damage in certain areas of the State of Alabama resulting from severe storms and flooding during May 5–6, 1981, is of sufficient severity and magnitude to warrant a major disaster declaration under Pub. L. 93–288. I therefore declare that such a major disaster exists in the State of Alabama.

In order to provide Federal assistance, you are hereby authorized to allocate, from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses. Consistent with the requirement that Federal assistance be supplemental, the Federal funds under Pub. L. 93–288 will be limited to 75 percent of all eligible public assistance in designated areas except for technical assistance which will be funded at 100 percent.

I expect State and local governments to undertake effective hazard mitigation activities with respect to this major disaster. Federal agencies will cooperate to the maximum extent possible by providing technical assistance.

The time period prescribed for the implementation of Section 313(a), Priority to Certain Applications for Public Facility and Public Housing assistance, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of Federal Emergency Management Agency under Executive Order 12148, and delegated to me by the Director under Federal Emergency Management Agency Delegation of Authority, I hereby appoint Mr. Thomas P. Credle of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared major disaster.

I do hereby determine the following area of the State of Alabama to have been affected adversely by this declared major disaster:

Mobile County for Individual Assistance and Public Assistance.

(Catalog of Federal Domestic Assistance No. 83.300, Disaster Assistance.)

Thomas R. Casey,

Acting Associate Director, Disaster Response and Recovery, Federal Emergency Management Agency.

[FR Doc. 81–15337 Filed 5–21–81; 8:45 am]

BILLING CODE 6718–02–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

Federal Activities for Alcohol Abuse and Alcoholism Interagency Committee; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5

U.S.C. Appendix I), announcement is made of the following national advisory body scheduled to assemble during the month of June 1981.

Interagency Committee on Federal Activities for Alcohol Abuse and Alcoholism

June 23; 9:30 a.m.—Open
Conference Room 703A, Hubert H. Humphrey Building
200 Independence Avenue, SW., Washington, D.C. 20201
Contact: Mr. Lee Towle, Room 16C–03, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–2593

Purpose. The Interagency Committee on Federal Activities for Alcohol Abuse and Alcoholism: (1) Evaluate the adequacy and technical soundness of all Federal programs and activities which relate to alcohol abuse and alcoholism, and provides for the communication and exchange of information necessary to maintain the coordination and effectiveness of such programs and activities, and (2) seeks to coordinate the efforts undertaken to deal with alcohol abuse and alcoholism in carrying out Federal health, welfare, rehabilitation, highway safety, law enforcement, and economic opportunity laws.

Agenda. The meeting will consist of a discussion of working group activities, Interagency Committee operations, and reports on agency activities.

Substantive program information may be obtained from the contact person listed above, Mr. Towle, who will also furnish, upon request, summaries of the meeting and a roster of Committee members.

Dated: May 19, 1981.

Elizabeth A. Connolly,

Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

[FR Doc. 81–15378 Filed 5–21–81; 8:45 am]

BILLING CODE 4110–88–M

Food and Drug Administration

Radiological Health and Safety Advisory Committee; Request for Nominations of Voting Members

AGENCY: The Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) requests nominations for membership on the Technical Electronic Product Radiation Safety Committee (TEPRSSC). One vacancy will exist on September 1, 1981, and five additional vacancies will occur on December 31, 1981.

DATE: Nominations must be received by July 21, 1981.

ADDRESS: Nomination must be submitted to the Bureau of Radiological Health (HFX–460), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Zory R. Glaser, Executive Secretary, TEPRSSC, at the address shown above, 301–443–3429.

SUPPLEMENTARY INFORMATION: The Secretary of Health and Human Services, and by delegation, the Commissioner of Food and Drugs, and the Director of the Bureau of Radiological Health, are charged with the administration of those portions of the Public Health Service Act that are designed to protect the public health from hazardous radiation emissions from electronic products.

The Technical Electronic Product Radiation Safety Standards Committee (TEPRSSC), established by the Secretary under section 358(f)(1)(A) of the Radiation Control for Health and Safety Act of 1968 (42 U.S.C. 263f (f)(1)(A)), which amended the Public Health Service Act, must be consulted before the Secretary prescribes any performance standard for electronic product radiation safety.

Nominations, Due Date, and Accompanying Information

All interested persons are invited to nominate qualified candidates for consideration as members of this Committee. Nominations must be received by July 21, 1981, and be accompanied by a curriculum vitae that states where the nominee may be contacted and provide detailed evidence of the nominee's qualifications, including current employment and professional affiliations. Nominations must also state that the person nominated is aware of the nomination, is interested in becoming involved in the effort, and appears to have no conflict of interest. Potential candidates will be asked by the Food and Drug Administration to provide detailed information concerning financial holdings, consultancies, and research grants, or contracts, to permit evaluation of possible sources of conflict of interest.

FDA has a special interest in ensuring that women, minority groups, and the handicapped are adequately represented on advisory committees, and therefore extends particular encouragement for the nominations of appropriately qualified female, minority, and handicapped candidates. FDA also welcomes the nomination of technically qualified individuals to represent the consumer perspective on issues before the Committee.

Further information on requirements of eligibility for membership on the Committee is provided below, under the Committee description.

In a notice published in the Federal Register of February 27, 1979 (44 FR 11123), the Commissioner requested nominations of qualified persons to replace members of TEPRSSC whose terms expired in 1979. There were no vacancies in 1980. Eligible individuals nominated in response to that earlier Federal Register publication who did not receive committee appointments will be reconsidered for a period of 2 years after nomination, along with those newly nominated for the vacancies. The following are names and affiliations of the members of TEPRSSC, including those appointed as a result of the February 27, 1979, request for nominations.

Present members of TEPRSSC are (dates shown are December 31 of the year in which their appointments expire):

1. Public sector: Dr. Wende W. Logan (1983), Consultant in Radiology, Rochester, NY; Ms. Mary E. Moore (1983), Associate Radiological Physicist, Cooper Medical Center, Camden, NJ; Dr. Valerie A. Brookeman (1982), Professor, Radiology Department, University of Florida College of Medicine, Gainesville, FL; Dr. Edwin L. Carstensen (1981), Professor, Department of Electrical Engineering, University of Rochester, NY; and Mr. Kenneth R. Edwards (1981), Director, Skill Improvement Training, International Brotherhood of Electrical Workers, Washington, DC.

2. Industrial sector: Mr. Cazamer L. Crouch (1983), Director of Research, Illuminating Engineering Research Institute, New York, NY; Dr. William R. Ingles (1983), Director of Radiological Services, American Medical International, Inc., Beverly Hills CA; Mr. Howard W. Johnson (1982), Staff Vice President, Product Safety, RCA Corp., Cherry Hill, NJ; Mr. Gerald A. Richardson (1982), Technical Director, Irex Medical Systems Corp., Upper Saddle River, NJ; and Mr. Stanley D. Savic (1981), Director, Product Evaluation and Compliance, Zenith Radio Corp., Glenview, IL.

3. Government: Ms. Goldie B. Watkins (1983), Deputy Commissioner for Prevention and Special Health Programs, New York State Health Department, New York, NY; Mr. Charles M. Hardin (Chairperson), (1981), Executive Secretary, The Conference of Radiation Control Program Directors; Mr. Elmer H. Eisenhower (1981), Chief, Office of Radiation Measurement, Center for Radiation Research, National Bureau of Standards, Washington, DC; Mr. Gerald S. Parker (1982), Assistant

Commissioner, Department of Public Health, State of Massachusetts, Boston; and Colonel Thomas L. Pitchford, M.S.C., U.S.A., (1982), Radiological Hygiene Consultant, U.S. Army Health Services Command, Fort Sam Houston, San Antonio, TX.

Since its inception in 1969, TEPRSSC has provided valuable technical and scientific advice to the Bureau of Radiological Health, FDA, on the development of electronic product radiation safety performance standards. Thus far, regulatory performance standards have been issued under 21 CFR Chapter I, Subchapter J, for television receivers, cold cathode gas discharge tubes, microwave ovens, diagnostic x-ray systems and their major components, cabinet x-ray equipment (including x-ray baggage inspection devices for use at airports and similar facilities), laser products, sunlamp products (for skin-tanning purposes), high-intensity mercury vapor discharge lamps, and ultrasound therapy equipment. The Committee meets approximately once each year and occasionally also reviews documents transmitted by mail.

Under section 358(f) of the Radiation Control for Health and Safety Act of 1968, members will be appointed by the Commissioner after consultation with public and private agencies concerned with the technical aspect of electronic product radiation safety. Each member shall be technically qualified by training and experience in one or more fields of science or engineering applicable to electronic product radiation safety. As required by that act, the Committee is composed of 15 members selected as follows:

1. Five from governmental agencies, including State and Federal governments;
2. Five from the affected industry, after consultation with industry representatives; and
3. Five from the general public, one of which shall be a representative of organized labor. The representative of organized labor also must be technically qualified by education or experience in one or more fields of electronic product radiation safety.

Effective December 31, 1981, two members from industry, two members from the public sector, and one member from the governmental sector will complete their terms. In addition, one member from the governmental sector is planning to retire from the military, and will assume a position at a university. This individual also will be replaced.

Nominations are solicited of individuals qualified in electronic product radiation safety to fill these vacancies for a 4-year term. Nominations are invited from labor, industry, public, consumer, government, trade, and professional organizations, and should be submitted with accompanying curriculum vitae and other pertinent information.

Dated: May 13, 1981.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 81-15002 Filed 5-21-81; 8:45 am]

BILLING CODE 4110-03-M

Health Care Financing Administration

Medicare Program; Ambulatory Surgical Centers

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice and request for comment.

SUMMARY: HCFA is seeking specific information and suggestions for coverage and reimbursement under Medicare of certain surgical procedures that may be performed in ambulatory surgical centers. The information is needed to assist in the development of policies necessary to implement section 934 of the Omnibus Reconciliation Act (Pub. L. 96-499, December 5, 1980). That section, in part, provides new authority for payment under Medicare for procedures performed in these centers.

DATE: To assure consideration, comments should be received by June 22, 1981.

ADDRESS: Address comments in writing to: Administrator, Department of Health and Human Services, Health Care Financing Administration, P.O. Box 17073, Baltimore, Maryland 21235.

If you prefer, you may deliver your comments to Room 309-G Hubert H. Humphrey Building, 200 Independence Ave., S.W., Washington, D.C., or to Room 789, East High Rise Building, 6401 Security Boulevard, Baltimore, Maryland, 21235.

In commenting, please refer to BPP-135-GN. Agencies and organizations are requested to submit comments in duplicate.

Comments will be available for public inspection, beginning approximately two weeks after publication, in Room 309-G of the Department's office at 200 Independence Ave., S.W., Washington, D.C., 20201 on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (202-245-7890).

FOR FURTHER INFORMATION CONTACT:

Donald Young, M.D. (Coverage) 301-594-9690;

Bernard Truffer (Reimbursement) 301-597-1369.

SUPPLEMENTARY INFORMATION:

Background

When reimbursement is made for surgical procedures performed in a hospital setting, whether furnished on an inpatient or outpatient basis, Medicare law currently permits hospital facility costs to be paid for in accordance with Medicare reasonable cost principles. The physician's professional services are reimbursed at 80 percent of the reasonable charge. However, Medicare law limits reimbursement for surgical procedures performed outside the hospital setting; that is, those performed in ambulatory surgical centers (ASCs) not affiliated with a hospital, or in physicians' offices. Coverage and reimbursement for services provided by the facility or the additional costs a physician incurs in staffing and maintaining an area appropriate for surgical procedures has not been permitted. Medicare, of course, pays 80 percent of the reasonable charge for physicians' services in these settings.

This limited reimbursement sometimes has resulted in patients being admitted to hospitals for surgery which may have been performed safely and less expensively in these other settings. A demonstration project conducted by HCFA indicated that (based on a proportional mix of surgical procedures performed in both ASCs and hospitals) the costs for surgical procedures performed in an ambulatory surgical setting were 55.3 percent less than when the procedures were performed on an inpatient basis and 18 percent less than when performed in a hospital outpatient setting.

Section 934 of the Omnibus Reconciliation Act (Pub. L. 96-499) amends Medicare law by authorizing reimbrusement for services provided by ASCs when a particular procedure is performed and by increasing reimbursement for physicians' professional services in some cases. The legislation also provides reimbursement for staffing and other costs for surgical procedures performed in physicians' offices; however, this notice does not address that part of the provision. We will consider that portion separately at a later date.

Legislation

Coverage. Section 934 amended section 1832(a)(2) of the Social Security Act to authorize Medicare coverage for facility services furnished in connection with certain surgical procedures performed in an ASC. The Secretary of

Health and Human Services must develop, in consultation with the National Professional Standards Review Council and national medical organizations, a list of those procedures that may be covered under this provision. The procedures on the list would be only those which are often performed on an inpatient basis but which can, consistent with accepted medical practice, be done on an outpatient basis in an ambulatory surgical facility. (We recognize, of course, that for individuals with certain medical conditions a procedure on the list may be safely performed only on an inpatient basis. In those cases we will pay for the surgery on an inpatient basis in the usual way.)

However, the list would not include procedures that have customarily been performed on an outpatient basis in locations that have less elaborate surgical facilities than those found in ambulatory surgical centers; for example, physicians' offices. Congress emphasized that services covered under this provision should be furnished where they can be done appropriately, safely, and less expensively.

Reimbursement. Section 934 of Pub. L. 96–499 distinguishes between payment for facility services furnished by an ASC and payment for physicians' professional services. For facility services furnished by an ASC in connection with a covered surgical procedure, Medicare will pay a prospectively determined overhead rate for each procedure that takes into account the costs incurred by ASCs generally in providing such services, and assure that the payment is substantially less than would have been paid had the procedure been performed on an inpatient basis in a hospital. The overhead amount may be adjusted by the secretary to take account of varying conditions such as geographic locality. The ASC must accept assignment of all Medicare claims; that is, accept Medicare's reimbursement as payment in full for services, as a condition of payment under this provision. Medicare payment will then be made at 100 percent of the overhead rate per procedure. For physicians' professional services, Medicare will pay 100 percent of the reasonable charge for a surgical procedure if the physician performing the procedure accepts assignment of the claim. If assignment is not accepted, the usual rules governing Medicare payments to the physician would prevail.

Request for Information

As indicated by the discussion above, this provision of the legislation grants the Secretary considerable flexibility regarding the types of surgical procedures that may be covered when performed in ASCs, and the rates that may be paid to ASCs for providing services in connection with those procedures. Because of this flexibility, we are requesting information and suggestions from interested persons or groups, professional organizations, specialty societies and surgical facilities to assist us in formulating appropriate policy that is both consistent with the intent of Congress and responsive to the concerns of the public and the health care facilities and practitioners involved.

With respect to the development of lists of covered surgical procedures, we would appreciate information and suggestions on the following:

1. Broad, generally accepted criteria for determining what surgical procedures, now done on an inpatient basis, may be safely performed in ambulatory surgical facilities.

2. Broad, generally accepted criteria for distinguishing those surgical procedures which may be performed in ASCs from those which may be performed in less elaborate surgical facilities.

3. Facility characteristics or capabilities necessary to perform such surgical procedures safely in an ambulatory surgical center (for example, full-scale operating room, recovery room, infection control).

4. Professional services necessary to perform such procedures safely in ambulatory surgical facilities (for example, anesthesia services, nursing services).

5. Specific surgical procedures now done on an inpatient basis which can safely be done in an ambulatory surgical facility.

In developing rates of payment to ASCs for covered surgical procedures, we would appreciate information and suggestions on the following:

1. Services that are included in an ASC's usual charge for a particular procedure. What services, if any, are billed at additional charges?

2. The most feasible mechanism to relate costs incurred by a facility to a particular procedure. Would operating room time, facility charges, or some other mechanism be appropriate for this purpose?

3. Provisions that are made for anesthesia. Is anesthesia provided by facility staff (anesthesiologist or nonphysician anesthetists) or under arrangements? How are such services billed? Are payments made by the facility to an anesthesiologist for "stand-by" coverage?

4. The manner in which third-party payors reimburse the ASC for facility services.

We also encourage ambulatory surgical facilities to submit copies of charge schedules and cost information (income and expense statements, tax returns or other documentation). We would like to use this information as background data in developing reimbursement rates because this provision of the legislation does not explicitly require an ongoing audit of individual financial records. In fact, the legislation amended section 1833 of the Social Security Act to provide that reimbursement should be on the basis of the Secretary's estimate of a fair fee which takes into account the costs incurred by such centers generally. Therefore, in considering how to estimate a fair cost-related fee for surgical overhead costs, we are seeking reliable cost information from potential participants.

We are allowing 30 days for response and will consider all comments in formulating our policy. We plan to issue regulations for implementing section 934 of the legislation as promptly as possible.

Dated: May 18, 1981.

Carolyne K. Davis,

Administrator, Health Care Financing Administration.

[FR Doc. 81-15338 Filed 5-21-81; 8:45 am]

BILLING CODE 4110-35-M

National Institutes of Health

Advisory Committee to the Director, National Institutes of Health; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Advisory Committee to the Director, NIH, on June 8–9, 1981, at the National Institutes of Health, Bethesda, Maryland. The meeting will take place from 8:30 a.m. to 5:30 p.m. on June 8, and from 8:30 a.m. to 12:30 p.m. on June 9, in Building 31, Conference Room 10, C Wing. The entire meeting will be open to the public.

The meeting will be devoted to an examination of (1) costs of biomedical research, and (2) cooperative research relationships among Government, industry, and universities. The Committee has been examining these issues in meetings held over the past several months. Two working groups under the aegis of the Advisory Committee have been established to assist the Committee. In the area of biomedical research costs, presentations will be made on Federal procurement

and assistance concepts, the Federal Grants and Cooperative Agreement Act of 1977, and university profiles on indirect cost allocations. Presentations will also include an examination of various alternatives to the present system of allocating direct and indirect costs for research grants. The second part of the meeting will be devoted to Government-industry relationships with discussion of Federal agency patent policies and the policy issues for the NIH grants and contracts system posed by the implementation of the Patent and Trademark Law Amendments (Pub. L. 96–517).

The second day will focus on a case model of a biomedical research invention—hybridomas—and relevant policy issues pertaining to the allocation and use of patent rights in university settings and the impact of commingling Government and industry funds in university-based laboratories.

The Executive Secretary, Joseph G. Perpich, M.D., J.D., National Institutes of Health, Building 1, Room 137, Bethesda, Maryland 20205, 301–496–3152, will furnish summaries of the meeting, rosters of Committee members and guests, and substantive program information.

Dated: May 12, 1981.

Thomas E. Malone,

Deputy Director, National Institutes of Health.

[FR Doc. 81–15294 Filed 5–21–81; 8:45 am]

BILLING CODE 4110–08–M

Biomedical Library Review Committee and the Subcommittee for the Review of Medical Library Resource Improvement Grant Applications; Meetings

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Biomedical Library Review Committee on June 10–11, 1981, convening each day at 8:30 a.m. in the Board Room of the National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland, to adjournment on June 11, and the meeting of the Subcommittee for the Review of Medical Library Resource Improvement Grant Applications on June 12 from 9:00 a.m. to approximately 12:00 noon in the 5th floor Conference Room of the Lister Hill Center Building, 8600 Rockville Pike, Bethesda, Maryland.

The meeting on June 10 will be open to the public from 8:30 to 11:00 a.m. for the discussion of administrative reports and program developments. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Section 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code, and Section 10(d) of Pub. L. 92–463, the regular meeting and the subcommittee meeting will be closed to the public for the review, discussion, and evaluation of individual grant applications, as follows: June 10 from 11:00 a.m. to 5:00 p.m., June 11 from 8:30 a.m. to adjournment; and June 12 for the subcommittee meeting from 9:00 a.m. to 12:00 noon. These applications and the discussion could reveal confidential trade secrets or commercial property, such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dr. Roger W. Dahlen, Executive Secretary of the Committee, and Chief, Division of Biomedical Information Support, Extramural Programs, National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland 20209, telephone number: 301–496–4191, will provide summaries of the meeting, rosters of the committee members, and other information pertaining to the meeting.

(Catalog of Federal Domestic Assistance Program No. 13.879—Medical Library Assistance, National Institutes of Health)

Note.—NIH programs are not covered by OMB Circular A–95 because they fit the description of "programs not considered appropriate" in section 8(b)(4) and (5) of that Circular.

Dated: May 12, 1981.

Thomas E. Malone,

Deputy Director, National Institutes of Health.

[FR Doc. 81–15295 Filed 5–21–81; 8:45 am]

BILLING CODE 4110–08–M

Board of Scientific Counselors, Division of Cancer Treatment; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, DCT, National Cancer Institute, June 11–12, 1981, in the Lobby Room, the Holiday Inn, 5520 Wisconsin Avenue, Bethesda, Maryland. This meeting will be open to the public on June 11, 1981, from 8:30 a.m. until 4:00 p.m., and again on June 12, 1981, from 8:30 a.m. until adjournment, to review program plans, contract recompetitions and budget for the DCT program. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Section 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on June 11, 1981, from 4:00 p.m. to 5:30 p.m., for the review, discussion and evaluation of individual programs and projects conducted by the National Institutes of Health, including consideration of personnel qualifications and performance, the competence of individual investigators, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, the Committee Management Officer, National Cancer Institute, Building 31, Room 10A–06, National Institutes of Health, Bethesda, Maryland 20205 (301/496–5708) will provide summaries of the meeting and rosters of committee members, upon request.

Dr. Saul A. Schepartz, Acting Director, Division of Cancer Treatment, National Cancer Institute, Building 31, Room 3A–52, National Institutes of Health, Bethesda, Maryland 20205 (301–496–4291) will furnish substantive program information.

Dated: May 12, 1981.

Thomas E. Malone,

Deputy Director, National Institutes of Health.

[FR Doc. 81–15296 Filed 5–21–81; 8:45 am]

BILLING CODE 4110–08–M

Board of Scientific Counselors, National Eye Institute; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Eye Institute, June 8 and 9, 1981, Building 31, Room 6A–35, National Institutes of Health, Bethesda, Maryland.

This meeting will be open to the public on June 8 from 8:30 a.m. until approximately 2:30 p.m. for general remarks by the Institute's Scientific Director on matters concerning the intramural programs of the National Eye Institute. Attendance by the public will be limited to space available.

In accordance with provisions set forth in section 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on June 8 from approximately 2:30 p.m. until adjournment and the entire day on June 9 for review, discussion, and evaluation of individual projects conducted by the Clinical Branch, NEI. This evaluation and discussion could reveal personal information concerning individuals associated with the projects, including consideration of personnel qualifications and performance, and the competence of individual investigators, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Consequently, this

meeting is concerned with matters except from mandatory disclosure.

Ms. Mary Carter, Committee Management Officer, National Eye Institute, Building 31, Room 6A–04, National Institutes of Health, Bethesda, Maryland 20205 (301) 496–4903, will provide summaries of the meeting and rosters of committee members.

Substantive program information may be obtained from Dr. Jin Kinoshita, Scientific Director, National Eye Institute, Building 6, Room 222–A, National Institutes of Health, Bethesda, Maryland 20205 (telephone 301/496–3552).

Dated: May 12, 1981.

Thomas E. Malone,

Deputy Director, National Institutes of Health.

BILLING CODE 4110–08–M

Board of Scientific Counselors, National Institute of Child Health and Human Development; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute of Child Health and Human Development, June 24, 1981, in Building 31, Room 2A–52. This meeting will be open to the public from 8:30 a.m. to 3:00 p.m. on June 24 for the review of the Child and Family Research Branch of the Intramural Research Program. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in section 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92–463, the meeting will be closed to the public from 3:00 p.m. to adjournment on June 24 for the review, discussion, and evaluation of individual programs and projects conducted by the National Institutes of Health, NICHD, including consideration of personnel qualifications and performance, and the competence of individual investigators, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Marjorie Neff, Committee Management Officer, NICHD, Landow Building, Room 6C08, National Institutes of Health, Bethesda, Maryland, Area Code 301, 496–1485, will provide a summary of the meeting and a roster of Board members. Dr. James Sidbury, Scientific Director, NICHD, Building 31, Room 2A–50, National Institutes of Health, Bethesda, Maryland, Area Code 301, 496–2133, will furnish substantive program information.

Note.—NIH programs are not covered by OMB Circular A–95 because they fit the description of "programs not considered appropriate" in section 8(b)(4) of that Circular.

Dated: May 12, 1981.

Thomas E. Malone,

Deputy Director, National Institutes of Health.

BILLING CODE 4110–08–M

Cancer Clinical Investigation Review Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Cancer Clinical Investigation Review Committee, National Cancer Institute, June 22–23, 1981, Building 31C, Conference Room 6, National Institutes of Health, Bethesda, Maryland 20205. This meeting will be open to the public on June 22, from 8:30 a.m. to 11:00 a.m., to review administrative details and for a Mini-symposium on "The Role of Surgical Oncology in Cooperative Clinical Studies." Attendance by the public will be limited to space available.

In accordance with provisions set forth in section 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on June 22, from 11:00 a.m. to 5:00 p.m., and on June 23 from 8:30 a.m. to adjourment, for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commerical property such as patentable material and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20205 (301/496–5708) will provide summaries of the meeting and rosters of committee members, upon request.

Dr. Dorothy K. Macfarlane, Executive Secretary, National Cancer Institute, Westwood Building, Room 819, National Institutes of Health, Bethesda, Maryland 20205 (301–496–7481) will furnish substantive program information.

BILLING CODE 4110-08-M

General Research Support Review Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the General Research Support Review Committee, Division of Research Resources, June 25–26, 1981 at the National Institutes of Health. The meeting will be held in Conference Room 9, Building 31, 9000 Rockville Pike, Bethesda, Maryland 20205.

This meeting will be open to the public from 9:00 a.m. to approximately 1:30 p.m. on June 25, 1981, to discuss policy matters relating to the Minority Biomedical Support Program. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on June 25, 1981, from approximately 1:30 p.m. to 5:00 p.m. and on June 26 from 8:30 a.m. to adjournment for the review, discussion and evaluation of individual grant applications submitted to the Minority Biomedical Support Program. These applications and discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. James Augustine, Information Officer, Division of Research Resources, National Institutes of Health, Building 31, Room 5B13, Bethesda, Maryland 20205, telephone (301) 496–5545, will provide summaries of the meeting and rosters of committee members. Dr. Sidney A. McNairy, Executive Secretary

of the General Research Support Review Committee, Building 31, Room 5B29, Bethesda, Maryland 20205, telephone (301) 496–6743 will furnish substantive program information.

(Catalog of Federal Domestic Assistance Programs No. 13.375, Minority Biomedical Support Program, National Institutes of Health)

Note.—NIH programs are not covered by OMB Circular A–95 because they fit the description of "programs not considered appropriate" in section 8(b) (4) and (5) of that Circular.

BILLING CODE 4110–08–M

Maternal and Child Health Research Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Maternal and Child Health Research Committee, National Institute of Child Health and Human Development, on June 23–24, 1981, in the Landow Building, Conference Room A, National Institutes of Health, Bethesda, Maryland.

This meeting will be open to the public on June 23, from 9:00 a.m. to 10:30 a.m. to discuss items relative to the Committee's activities including announcements by the Director, Deputy Director, Associate Director for Scientific Review and Chiefs of the Human Learning and Behavior and the Clinical Nutrition and Early Development Branches and the Executive Secretary of the Committee. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Title 5, U.S. Code 552b(c)(4) and 552b(c)(6) and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on June 23 from 10:30 a.m. to adjournment on June 24 for the review, discussion and evaluation of individual grant applications.

The applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal property.

Mrs. Marjorie Neff, Committee Management Officer, NICHD, Landow Building, Room 6C08, National Institutes of Health, Bethesda, Maryland, Area Code 301, 496–1485, will provide a summary of the meeting and a roster of committee members. Dr. Jane Showacre, Executive Secretary, Maternal and Child Health Research Committee, NICHD, Landow Building, Room 6C03, National Institutes of Health, Bethesda, Maryland, Area Code 301, 496–1696, will furnish substantive program information.

BILLING CODE 4110–08–M

National Advisory Eye Council and the Vision Research Program Planning Subcommittee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the National Advisory Eye Council, National Eye Institute, June 1, 2, and 3, 1981, Bethesda, Maryland.

The National Advisory Eye Council's standing subcommittee, the Vision Research Program Planning Subcommittee, will meet at 7:00 p.m., Sunday, May 31, 1981, in the Bethesda Marriott Hotel, 2 Pooks Hill Road, Bethesda, Maryland, for a final review of the reports of the five program planning panels, to review the priorities recommended by those panels, and to discuss Volume I of the program planning document, which is the overview and summary report. Attendance by the public will be limited to space available.

The full National Advisory Eye Council will meet June 1, 2, and 3, 1981, Building 31, Conference Room 8, National Institutes of Health, Bethesda, Maryland. This meeting will be open to the public from 9:00 a.m. until approximately 3:00 p.m. on Monday, June 1, for opening remarks by the Director, National Eye Institute, for discussions of the final drafts of the reports of the Council's five program planning panels, and for discussions of procedural matters and presentations by the extramural staff of the National Eye Institute. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public from approximately 3:00 p.m. for the

remainder of the day on Monday, June 1, and all day on Tuesday and Wednesday, June 2 and 3, for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidentail trade secrets or commercial property such as patentable materials, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Mary Carter, Committee Management Officer, National Eye Institute, Building 31, Room 6A–04, National Institutes of Health, Bethesda, Maryland 20205 (301) 496–4903, will provide summaries of meetings and rosters of committee members.

Dr. Ronald G. Geller, Associate Director for Extramural and Collaborative Programs, National Eye Institute, Building 31, Room 6A–04, National Institutes of Health, Bethesda, Maryland 20205 (301) 496–4903, will furnish substantive program information.

BILLING CODE 4110-08-M

Vision Research Program Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Vision Research Program Committee, National Eye Institute, June 25, 1981, Building 31, C Wing, Conference Room 8, National Institutes of Health, Bethesda, Maryland.

This meeting will be open to the public on Thursday, June 25, from 8:30 a.m. to 9:30 a.m. for opening remarks and discussion of program guidelines. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public from 9:30 a.m. on June 25 until adjournment for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Ms. Mary Carter, Committee Management Officer, National Eye Institute, Building 31, Room 6A–04, National Institutes of Health, Bethesda, Maryland 20205 (301) 496–4903, will provide summaries of the meeting and rosters of committee members.

Dr. Catherine Henley, Review and Special Projects Officer, Extramural and Collaborative Programs, National Eye Institute, Building 31, Room 6A–04, National Institutes of Health, Bethesda, Maryland 20205 (301) 496–5561, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program Nos. 13.867, Retinal and Choroidal Diseases Research; 13.868, Corneal Diseases Research; 13.869, Cataract Research; 13.870, Glaucoma Research; and 13.871, Sensory and Motor Disorders of Visual Research; National Institutes of Health)

Note.—NIH programs are not covered by OMB Circular A–95 because they fit the description of "programs not considered appropriate" in Section 8(b)(4) and (5) of that Circular.

Dated: May 12, 1981.

Thomas E. Malone,

Deputy Director, National Institutes of Health.

BILLING CODE 4110-08-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Environmental Quality

[Docket No. NI–51]

Planned Development for Butterfield, Kane, and Du Page Counties, Ill., Intended Environmental Impact Statement

The Department of Housing and Urban Development gives notice that an Environmental Impact Statement (EIS) is intended to be prepared for the following project under HUD programs as described in the appendix to this Notice: Planned Development for Butterfield, Kane and Du Page Counties, Illinois. This Notice is required by the Council on Environmental Quality under its rules (40 CFR Part 1500).

Interested individuals, governmental agencies, and private organizations are invited to submit information and comments concerning the project to the specific person or address indicated in the appropriate part of the appendix below.

Particularly solicited is information on reports or other environmental studies planned or completed in the project area, issues and data which the EIS should consider, recommended mitigating measures and alternatives, and major issues associated with the proposed project. Federal agencies having jurisdiction by law, special expertise or other special interests should report their interests and indicate their readiness to aid the EIS effort as a "cooperating agency."

Each Notice shall be effective for one year. If one year after the publication of a Notice in the **Federal Register** a Draft EIS has not been filed on a project, then the Notice for that project shall be cancelled. If a Draft EIS is expected more than one year after the publication of the Notice in the **Federal Register**, then a new and updated Notice of Intent will be published.

Issued at Washington, D.C., May 12, 1981.

Francis G. Haas,

Deputy Director, Office of Environmental Quality.

Appendix—EIS on Butterfield, Cities of Warrenville and Aurora, Counties of Kane and Du Page, Illinois

The U.S. Department of Housing and Urban Development (HUD) Area Office in Chicago, Illinois intends to prepare an Environmental Impact Statement on the project described below and solicits information and comments for consideration in the EIS.

Description: Butterfield consists of approximately 1,400 contiguous acres located in an area bounded generally by Butterfield Road on north, Molitor Road on the south, the Illinois Prairie Path on the west, and Route 59 on the east. The overall planned development district involves several developers and, as presented to the City of Aurora, will be developed over a twenty year period. The overall development will include 10,400 units expected to generate an additional population of 28,000 as well as business and industrial land uses. Construction has begun and is continuing on the project using private funds. A portion of Butterfield being developed by Horizon Development corporation has been approved by the Veterans Administration (Master Panel #3359). The proposed federal action is to make available FHA mortgage insurance for individual home buyers under Sections 203(b), 234(c), and 245 of the National Housing Act of 1934.

Need: An EIS is being prepared because the overall project exceeds the threshold level for EIS's established by HUD (1,200 for Du Page County and 800 for Kane County) and its Departmental Procedure for Protection and Enhancement of Environmental Quality (24 CFR Part 50). The plan description is based on the Butterfield Planned Development District documents on file with the city of Aurora. The draft EIS is expected to be completed and distributed in the Summer of 1982. HUD will review any requests for an "early start" which would enable FHA participation in the development prior to completion of the EIS under the procedure outlined in 24 CFR 50.21(h). Such participation would be limited to under 200 units total.

Alternatives Perceived: Alternatives that will be studied for this particular site include: (1) No federal action, (2) open space, (3) project as proposed, (4) less intense zoning.

Scoping: Response to this notice will assist in identifying data sources and Significant environmental issues which the EIS should address.

Comments: Comments should be sent on or before June 12, 1981, to the Environmental Office, HUD, 1 North Dearborn Street, Chicago, Illinois 60602.

[FR Doc. 81-15378 Filed 5-21-81; 8:45 am]

BILLING CODE 4210-01-M

[Docket No. NI-52]

West Marion C. D. Project, Marion, N.C.; Intended Environmental Impact Statement

The Department of Housing and Urban Development gives notice that an Environmental Impact Statement (EIS) is intended to be prepared for the following project under HUD programs as described in the appendix to this Notice: West Marion C. D. Project, Marion, North Carolina. This Notice is required by the Council on Environmental Quality under its rules (40 CFR Part 1500).

Interested individuals, governmental agencies, and private organizations are invited to submit information and comments concerning the project to the specific person or address indicated in the appropriate part of the appendix.

Particularly solicited is information on reports or other environmental studies planned or completed in the project area, issues and data which the EIS should consider, recommended mitigating measures and alternatives, and major issues associated with the proposed project. Federal agencies having jurisdiction by law, special expertise or other special interests should report their interests and indicate their readiness to aid the EIS effort as a "cooperating agency."

Each Notice shall be effective for one year. If one year after the publication of a Notice in the **Federal Register** a Draft EIS has not been filed on a project, then the Notice for that project shall be cancelled. If a Draft EIS is expected more than one year after the publication of the Notice in the **Federal Register**, then a new and updated Notice of Intent will be published.

Issued at Washington, D.C., May 11, 1981.

Francis G. Haas,

Deputy Director, Office of Environmental Quality.

Notice of Intent to File Environmental Impact Statement

West Marion C. D. Project, Marion, North Carolina

The Community Development Department in Marion, North Carolina, intends to prepare an Environmental Impact Statement on a Single Purpose Community Development Block Grant Project described below, and requests information and comments for consideration in the Environmental Impact Statement.

Description: The West Marion Community Development Project, funded by a Small Cities Block Grant from HUD, is designed to address the neighborhood revitalization needs of a designated target area located in E. D. 111-11. The purpose of this project is to remove the blighted conditions in the neighborhood which also include specific public facilities improvements. Existing plans projects the rehabilitation of 45 single family dwellings; the installation of 3,350 linear feet of twelve-inch water line and 5,125 linear feet of six-inch water line; improvements to approximately 2,900 linear feet of existing and proposed streets; the demolition of 8 dilapidated structures; the acquisition of necessary right-of-way; and limited relocation activities. The City has projected that these activities should be completed by the first quarter of 1982.

Need: An Environmental Impact Statement is proposed due to HUD threshold requirements for waterline projects cited in the environmental regulations, 24 CFR 58.25 (a)(1) and (c). The EIS will also address the impact on community services, water resources and potential growth that may occur as a result of this project.

Alternatives: At this time, the City alternatives include: no project; accept project as proposed; accept project with conditions; or modifications of the project.

Scoping: This notice is part of the process used for scoping the West Marion Community Development Block Grant Project Environmental Impact Statement. Responses will help determine significant environmental issues and identify data which the EIS should address, and will help identify cooperating agencies. The date for the scoping meeting has not been set. Interested parties should contact the agency below to be notified of the scoping meeting date.

Comments: Comments should be forwarded on or before June 12, 1981, to Richard N. Hicks; Community Development Director; City of Marion, P. O. Drawer 700; Marion, North Carolina 28752 (or call (704) 652-5823).

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Endangered and Threatened Species Permit; Receipt of Application

Applicant: Commander Naval Forces, Caribbean

The applicant requests a permit to take hawksbill *(Eretmochelys imbricata)*, leatherback *(Dermochelys coriacea)*, green *(Chelonia mydas)* and loggerhead *(Caretta caretta)* sea turtles in Puerto Rico for the purpose of enhancement of survival. The project includes beach surveys and protection of hatchlings.

Humane care and treatment during transport has been indicated by the applicant.

Documents and other information submitted with this application are available to the public during normal business hours in Room 601, 1000 N. Glebe Road, Arlington, Virginia, or by writing to the U.S. Fish and Wildlife Service, Federal Wildlife Permit Office, P.O. Box 3654, Arlington, VA 22203.

This application has been assigned file number PRT 2-7837. Interested persons may comment on this application on or before June 22, 1981 by submitting written data, views, or arguments to the Director at the above address. Please refer to the file number when submitting comments.

Dated: May 15, 1981.

Larry LaRochelle,

Acting Chief, Branch of Permits, Federal Wildlife Permit Office, Fish and Wildlife Service.

BILLING CODE 4310-55-M

Endangered Species Permit; Receipt of Applications

The applicants listed below wish to conduct various activities with Endangered Species:

Applicant: Richard L. Thompson, U.S. Fish and Wildlife Service, Tallahassee, FL, PRT 2-7883

The applicant requests a permit to capture, handle, band, tag, mark, and release red-cockaded woodpeckers *(Picoides borealis)* in Florida and Georgia for scientific purposes.

Applicant: Steven Colyer Foster, Karnes City, TX, PRT 2-7949

The applicant requests a permit to capture and release for scientific purposes the following species in southern Texas: black-footed ferret *(Mustela nigripes)*, jaguarundi *(Felis yagouaroundi cacomitii)*, Margay *(F. wiedii)* and ocelot *(F. pardalis)*.

Applicant: Andies Critters & Varmints, Modesto, CA

The applicant requests an amendment to PRT 2-7878 to include authorization to purchase in interstate commerce for enhancement or propagation two more cheetahs *(Acinonyx jubatus)*. The total number of cheetahs to be purchased is five.

Humane care and treatment during transport, if applicable, has been indicated by the applicants.

Documents and other information submitted with these applications are available to the public during normal business hours in Room 601, 1000 N. Glebe Road, Arlington, Virginia, or by writing to the Director, U.S. Fish and Wildlife Service, WPO, P.O. Box 3654, Arlington, VA 22203.

Interested persons may comment on these applications on or before June 22, 1981, by submitting written data, views, or arguments to the Director at the above address.

Dated: May 14, 1981.

Larry LaRochelle,

Acting Chief, Permit Branch, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service.

Bureau of Land Management

California; Willow Creek Grazing Management Plan; Intent To Prepare an Environmental Impact Statement and Conduct Scoping Meetings

Department of the Interior, Bureau of Land Management, Susanville District, California, will prepare an Environmental Impact Statement on alternative grazing management plans for 297,079 acres of public land in the Willow Creek Planning Unit in Lassen County, California. The statement will analyze anticipated environmental consequences which would result from the implementation of the alternative grazing plans proposed by the Eagle Lake Area Manager. These alternative plans will incorporate variations in location, seasonal use, and intensity of livestock grazing and amount of range improvements. The final statement is scheduled for completion by September 30, 1982.

Two public meetings will be held to review the alternative grazing plans and the manner in which they were developed, and to scope resulting anticipated environmental consequences and related public concerns. The meetings will be held Wednesday, June 24, 1981, at 10:00 a.m. and 7:00 p.m. at the U.S. Forest Service Engineering Services Building Conference Room, 1800 Main Street, Susanville, California.

Further information on the Willow Creek Grazing Environmental Impact Statement may be obtained from Mark Morse, Eagle Lake Area Manager, Bureau of Land Management, 705 Hall Street, Susanville, California 96130, telephone 916-257-5381.

Dated: April 20, 1981.

James B. Ruch,

State Director.

BILLING CODE 4310-84-M

INTERSTATE COMMERCE COMMISSION

[No. AB-6 (Sub-No. 90)]

Burlington Northern Inc.—Abandonment—Between Cooper Spur and Shubert, NE; Findings

Notice is hereby given pursuant to 49 U.S.C. 10903 that by a decision entered May 14, 1981, a finding, which is administratively final, was made by the Commission, Review Board Number 2, that the public convenience and necessity permit the abandonment by Burlington Northern Inc. (BN), of its rail line between Cooper Spur (milepost 26.52) and Shubert (milepost 11.32), a distance of 9.3 miles in Richardson and Nemaha Counties, NE, subject to the

conditions for the protection of employees developed in *Oregon Short Line R. Co.-Abandonment-Goshen*, 360 I.C.C. 91 (1979). A certificate of abandonment will be issued to BN based on the noted finding of abandonment, unless within 15 days from the date of publication the Commission further finds that:

(1) a financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued. The offer must be filed with the Commission and served concurrently on the applicant, with copies to Ms. Ellen Hanson, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this notice; and

(2) it is likely that such proferred assistance would (a) cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed. An offeror may request the Commission to set conditions and amount of compensation within 30 days after an offer has been made. If no agreement is reached within 30 days of an offer, and no request is made to the Commission to set conditions or amount of compensation, a certificate of abandonment will be issued no later than 50 days after notice is published. upon notification to the Commission of the execution of an assistance or acquisition agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extension or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in 49 U.S.C. 10905 (as amended by the Staggers Rail Act of 1980, Pub. L. 96–448, effective October 1, 1980). All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced decision.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

[Docket No. AB–6 (Sub-No. 92)]

Burlington, Northern, Inc.—Abandonment—Between Hill City and Keystone, in Pennington County, SD; Findings

Notice is hereby given pursuant to 49 U.S.C. 10903, that by an administratively final certificate and decision decided by the Commission, Review Board Number 1 on May 14, 1981, finding that public convenience and necessity permit Burlington Northern, Inc. (BN), to abandon 8.85 miles of railroad between Hill City and Keystone, in Pennington County, SD. The abandonment is subject to the following conditions: (1) the employee protective conditions in *Oregon Short Line R. Co. Abandonment—Goshen*, 360 I.C.C. 91 (1979), and (2) the condition that BN keep intact all of the right of way underlying the track, including all the bridges and culverts, for a period of 120 days from the decided date of this certificate and decision to permit any State or local government agency or other interested party to negotiate the acquisition for public use of all or any portion of the right of way. The certificate and decision authorizing abandonment is being served on BN concurrently with publication of this notice, and will become effective 30 days thereafter, unless the Commission further finds that:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable rail service to be continued. The offer must be filed with the Commission and served concurrently on applicant, with copies to Ms. Ellen Hanson, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this Notice and;

(2) It is likely that such proffered assistance would:

(a) cover the difference between revenues which are attributable to the line of railroad and the avoidable cost of providing rail service on the line, together with a reasonable return on the value of the line, or (b) cover the acquisition cost of all or any portion of the line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed. An offeror may request the Commission to set conditions and amount of compensation within 30 days after an offer is made. If no agreement is reached within 30 days of an offer and no request is made for the Commission to set conditions or amount of compensation, a certificate of abandonment will be issued no later than 50 days after this notice is published. When the Commission is notified that an assistance or acquisition or operating agreement is executed, it will postpone the issuance of the certificate for the period of time the agreement (including any extensions or modifications) is in effect.

Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in 49 U.S.C. 10905 (as amended by the Staggers Rail Act of 1980, Pub. L. 96–448, effective October 1, 1980). All interested persons are advised to follow the instructions contained in the statute as well as the instructions contained in the Commission's decision in this proceeding.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 81–15380 Filed 5–21–81; 8:45 am]

BILLING CODE 7035–01–M

[Docket No. AB–1 (Sub-No. 81)F]

Chicago and North Western Transportation Company—Abandonment—Between Mallard and Terril, IA; Findings

Notice is hereby given pursuant to 49 U.S.C. 10903 that by a certificate and decision decided April 28, 1981, a finding was made by the Commission, Review Board Number 3, stating that the present and future public convenience and necessity permit the abandonment by the Chicago and North Western Transportation Company of a segment of its line from milepost 182.5 near Terril, IA to milepost 197.0 near Spencer, IA, and from milepost 210.2 near Ruthven, IA to milepost 227.9 near Mallard, IA; and abandonment of operations over the tracks of the Chicago, Milwaukee, St. Paul and Pacific Railroad from milepost 204.1 near Spencer to milepost 216.5 near Ruthven, a total distance of 44.6 miles in Palo Alto, Clay and Dickinson Counties, IA subject to the conditions for the protection of employees discussed in *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979).

A certificate of public convenience and necessity (served with the decision) will be issued to the Chicago and North Western Transportation Company based on the above described finding of abandonment 30 days after publication of this notice. However, issuance will be delayed if: (1) an appeal is filed and considered; or (2) within 15 days from

the date of publication the Commission further finds that:

(a) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued. The offer must be filed with the Commission and served concurrently on the applicant, with copies to Ms. Ellen Hanson, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from the publication of this Notice; and

(b) It is likely that such proffered assistance would:

(i) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(ii) Cover the acquisition cost of all or any portion of such line of railroad.

An offer may request the Commission to set conditions and amount of compensation within 30 days after an offer is made. If no agreement is reached within 30 days of an offer, and no request is made on the Commission to set conditions or amount of compensation, a certificate of abandonment will be issued no later than 50 days after notice is published. Upon notification to the Commission of the execution of an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extension or modifications) is in effect. Information and procedure regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in 49 U.S.C. 10905 (as amended by the Staggers Rail Act of 1980, Pub. L. 96-448 effective October 1, 1980). All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced decision.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 29570]

Detroit, Toledo and Ironton Railroad—Trackage Rights—Between Washington Court House and Greggs, OH—Exemption

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Exemption.

SUMMARY: On January 30, 1981, the Detroit, Toledo and Ironton Railroad Company (DT&I) filed a petition under 49 U.S.C. 10505 seeking exemption of a proposed trackage rights agreement from the requirements of 49 U.S.C. 11343–11347. The agreement grants trackage rights to DT&I over lines of the Baltimore and Ohio Railroad Company (B&O) and the Chesapeake and Ohio Railway Company (C&O). We conclude that the proposal involves a relocation of a railroad line without disruption of service to shippers, a transaction which has already been exempted from our regulation under 49 CFR 1111.5(c)(5).

DATE: This transaction may be consummated as of the date of this publication in the **Federal Register.**

FOR FURTHER INFORMATION CONTACT: Ernest B. Abbott, (202) 275–3002, or Ellen D. Hanson, (202) 275–7245.

SUPPLEMENTAL INFORMATION: DT&I owns and operates a rail line between Springfield and Ironton, OH. A portion of this line extends between Washington Court House and Greggs, OH, via Trifton, Waverly, and Summit Hill, OH. Between Thrifton and Waverly (M.P. 249.2 and M.P. 282), DT&I has only one public siding, located at Bainbridge. The only activity at Bainbridge is to load company ties. No industries are located in this territory. The line north of Summit Hill between M.P. 264 and M.P. 271 curves up to 16 degrees and has grades as high as 2.1 percent. The line south of Sumit Hill between M.P. 271 and M.P. 282 drops 510 feet in 11 miles. DT&I has experienced serius operating difficulties and incurred significant expense because of the severe grades and curves on this line.

B&O and C&O, subsidiaries of CSX Corporation (CSX) maintain a line between Washington Court House and Greggs via Chillicothe, OH, which roughly parallels the DT&I line between these points. The CSX line is essentially a flat water level route which allows for a far more efficient and economical rail operation than that provided by the present DT&I route.

DT&I seeks to relocate its operations between Washington Court House and Greggs to the CSX line under a trackage rights agreement negotiated in accordance with our decision in Finance Docket No. 28905 (Sub-No. 1), *CSX Corporation-Control-Chessie System and Seaboard Coast Line* 363 I.C.C. 518 (1980). The agreement authorizes DT&I operations over approximately 60 miles of CSX track. Use of the CSX line will eliminate any need for DT&I to continue its operations between Thrifton and Waverly, and DT&I contemplates abandoning this 33.2 mile segment of line.

Discussion

In Ex Parte No. 282 (Sub-No. 3), *Railroad Consolidation Procedures*, 363 I.C.C. 363, 45 FR 62991 (September 23, 1980), we exempted certain classes of rail consolidation transactions from our regulation. 49 CFR 1111.5(c). We found that our prior review and approval of these classes of transactions (1) is not necessary to carry out the national transportation policy of 49 U.S.C. 10101, (2) would be an unreasonable burden on interstate commerce, and (3) would serve little or no useful purpose.[1] Enumerated among these exempt transactions is item (5), "joint projects involving the relocation of a line of railroad which does not disrupt service to shippers."

From the facts presented it is apparent that DT&I is seeking, by means of the proposed trackage rights agreement with CSX, to relocate its line between Washington Court House and Greggs, and that this joint-project will not disrupt service to shippers. The relocation contemplated accords with the express language of section 1111.5(c)(5) of our regulations, and is consistent with the reasoning, purpose, and intent of the exemption.

We conclude that the proposed transaction falls within the exemption of section 1111.5(c)(5). See *Southern Pac. Transp. Co. and St. L. SW. Ry. Co.—Exemption*, 363 I.C.C. 848 (1981). This finding may broaden, for purposes of section 1111.5(c)(5), the traditional meaning of a "rail relocation" because it involves the substitution of trackage rights for a perpetual right to operate over a line held in fee simple. *Compare Southern Pac. Transp. Co., supra* at 851. In contrast to most trackage rights agreements, however, the trackage rights involved here are not terminable at the owner's option, and run for a term of 30 years (renewable for 30 years) thus providing some assurance of DT&I's ability to continue service. Moreover, a broadening of the applicability of the section 1111.5(c)(5) exemption comports with the Congressional policy underlying the recent amendment of 49 U.S.C. 11344 by the Staggers Rail Act of

[1] The basis for the promulgation of this rule lies in our exemption authority at 49 U.S.C. 10505. Section 10505, as since amended by the Staggers Rail Act of 1980 [Pub. L. No. 96-448, 94 Stat. 1895 (1980)], provides for us to use this exemption authority when we find that (1) our regulation is not necessary to carry out the rail transportation policy of 49 U.S.C. 10101a; and (2) either (A) the transaction or service is of limited scope, or (B) our regulation is not needed to protect shippers from the abuse of market power.

V 46 / 99 MAY 22 81 UMI

1980 (Pub. L. No. 96-448, 94 Stat. 1895).[2] In the future, railroads involved in transactions of this type need only comply with the notice requirements contained in 49 CFR 1111.4(g).

On February 13, 1981, DT&I filed a motion in this proceeding for expedited action and waiver of 30 day notice period. Included in th emotion was a request that the proposed abandonment between Thrifton and Waverly be included within the proposed exemption authorization. The facts presently available are insufficient to allow for an exemption determination in this notice with regard to the proposed abandonment. In particular, no information has been provided as to the effect which the abandonment proposal will have on operations and service over the retained portion of the line between Thrifton and Washington Court House.

In granting an exemption, we may not relieve a carrier of its obligation to protect the interests of employees as required by 49 U.S.C. Subtitle IV. (See 49 U.S.C. 10505(g)(2) as amended by section 213 of the Staggers Rail Act of 1980, Pub. L. No. 96-448, October 14, 1980). Although DT&I has agreed to assume the responsibilities for the protection of employees required in *Oregon Short Line R. Co.-Abandonment Goshen*, 360 I.C.C. 91 (1979), the proper labor protection conditions to impose in trackage rights transactions are those contained in *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified by *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980). Accordingly, the latter employee protective provisions will be imposed here as a condition to the exercise of this exemption.

We find that the proposed railroad relocation is one which comes within the meaning of 49 CFR 1111.5(c)(5) and, therefore, that the related (trackage rights) transaction is exempt from our regulation. This decision will not significantly effect energy conservation or the quality of the human environment. This decision will not operate to relieve any rail carrier from an obligation to protect the interests of employees as required by 49 U.S.C. Subtitle IV.

It is ordered:

(1) The petition for exemption will be treated as a notice of exemption pursuant to 49 CFR 1111.4(g).

(2) Notice of our action shall be given to the general public by delivery of a copy of this decision to the Director, **Federal Register**, for publication.

(3) This decision shall be effective upon the date of publication.

Decided: May 12, 1981.

By the Commission, Acting Chairman Alexis, Commissioners Gresham, Clapp, Trantum, and Gilliam. Commissioner Clapp concurred.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

---

[2] Section 11344(d) now provides, that we "shall" approve any transaction "which does not involve the merger or control of at least two class I railroads . . . unless [we find]—

(1) as a result of the transaction, there is likely to be substantial lessening of competition, creation of a monopoly, or restraint of trade in freight surface transportation in any region of the United States; and

(2) the anticompetitive effects of the transaction outweigh the public interest in meeting significant transportation needs."

Thus, under this section, we are required to approve a proposed trackage rights agreement whenever the agreement would not likely have a significant adverse competitive impact.

Finance Applications; Decision-Notice

The following applications, filed on or after July 3, 1980, seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directely related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by Special Rule 240 of the Commission's Rules of Practice (49 CFR 1100.240). See Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. 11244 and 11349*, 363 ICC 740 (1981). These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the **Federal Register**. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 242 of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.241. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1100.241(d).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

Dated: May 18, 1981.

By the Commission, Review Board Number 3, Members Krock, Joyce, and Dowell.

MC-F-14622, filed April 24, 1981. OTTUMWA TRANSIT LINES, INC. (Ottumwa) (1414 W. Second Street, Ottumwa, IA 52501)—purchase (portion)—AMERICAN BUSLINES, INC., d.b.a. AMERICAN TRAILWAYS (American) (1500 Jackson Street, Dallas, TX 75201). Representative: Lawrence E. Lindeman, 425 13th Street, NW, Suite 1032, Washington, DC 20004. Ottumwa seeks authority to purchase a portion of the interstate operating rights and property of American. Kenneth Lenz, Floyd Palmer, and Richard Twait are the majority stockholders of Ottumwa.

Floyd Palmer joins in this application as a party in control of Ottumwa and seeks authority to acquire control of said rights and property through the transaction. As a condition to the approval and authorization of this transaction, Kenneth Lenz and Richard Twait must also join in this application as persons in control of Ottumwa. Ottumwa is purchasing that portion of American's Certificate No. MC–2890 (Sub-No. 18) which authorizes the transportation of *passengers and their baggage, and express and newspapers* in the same vehicle with passengers, between Knoxville, IA, and Peoria, IL: from Knoxville over IA Hwy 5 to junction U.S. Hwy 34, then over US Hwy 34 to Galesburg, IL, then over IL Hwy 97 to junction IL Hwy 8, then over IL Hwy 8 to Peoria (also from junction IL Hwys 8 and 78 over IL Hwy 78 to junction IL Hwy 116, then over IL Hwy 116 to Peoria) and return over the same route, serving all intermediate points, restricted against service in the transportation of passengers and their baggage, and express, mail, and newspapers in the same vehicle with passengers originating at or received through interchange at Galesburg, IL, and destined to either Keokuk, IA, or Quincy IL, and originating at or receive through interchange at either Keokuk or Quincy and destined to Galesburg; and Deviation No. 83, which authorizes the transportation of *passengers and their baggage, and express and newspapers* in the same vehicle with passengers, between Galesburg, IL and Peoria, IL, over Interstate Hwy 74. Ottumwa is authorized to operate as a motor common carrier under MC–145632 and sub-numbers thereunder.

Note 1.—American is selling Route Nos. 9 and 13 and a portion of Route No. 2 from its Sub-No. 18. Route No. 2 authorizes service between Chicago, IL, and Denver, CO. American is selling that portion of Route 2 between Galesburg, IL, and Albia, IA, over US Hwy 34. American is retaining that portion of Route 2:(a) between Chicago, IL, and Galesburg, IL, and (b) between Albia, IA, and Denver, CO.

Note 2.—In conjunction with this application, Ottumwa filed an extension application, Docket No. MC–145632 (Sub-No. 4), published in this same **Federal Register** issue.

Note. 3.—Application for TA has been filed.

Condition: Authorization and approval of this transaction is conditioned upon the prior receipt by the Commission of an affadavit signed by Kenneth Lenz and Richard Twait, stating that they are persons in control of Ottumwa through stock ownership, and they join in this application as persons in control.

Decision-Notice

The following operating rights applications, filed on or after July 3, 1980, are filed in connection with pending finance applications under 49 U.S.C. 10926, 11343 or 11344. The applications are governed by Special Rule 252 of the Commission's General Rules of Practice (49 CFR 1100.252).

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. Persons submitting protests to applications filed in connection with pending finance applications are requested to indicate across the front page of all documents and letters submitted that the involved proceeding is directly related to a finance application and the finance docket number should be provided. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. However, the Commission may have modified the application to conform to the Commission's policy of simplifying grants of operating authority.

Findings: With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each applicant has demonstrated that its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests in the form of verified statements as to the finance application *or* to the following operating rights applications directly related thereto filed within 45 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except where the application involves duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice by effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Dated: May 18, 1981.

By the Commission, Review Board Number 3, Members Krock, Joyce, and Dowell.

MC 145632 (Sub-4), filed May 7, 1981. Applicant: OTTUMWA TRANSIT LINES, INC.—extension, 1414 W. Second Street, Ottumwa, IA 52501. Representative: Lawrence E. Lindeman, 425 13th Street NW., Suite 1032, Washington, DC 20004. Transporting *passengers and their baggage, and express and newspapers*, in the same vehicle with passengers, between Knoxville and Des Moines, IA: from Knoxville over IA Hwy 92 to junction IA Hwy 5, then over IA Hwy 5 to junction IA Hwy 46, then over IA Hwy 46 to Des Moines, and return over the same route.

Note.—The purpose of this extension application is to enable applicant to provide service between Des Moines and Peoria. The application was filed in conjunction with MC–F–14622, published in this same **Federal Register** issue.

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by Special Rule of the Commission's Rules of Practice, see 49 CFR 1100.251. Special Rule 251 was published in the **Federal Register** of December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00

Amendments to the request for authority are not allowed. Some of the

applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

BILLING CODE 7035–01–M

[Volume No. OP1–149]

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Decided: May 18, 1981.

The following applications, filed on or after February 9, 1981, are governed by

Special Rule 251 of the Commission's Rules of Practice, see 49 CFR 1100.251. Special Rule 251 was published in the **Federal Register** on December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. Applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulation. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later become unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

Missouri Pacific Railroad Co.; Amended System Diagram Map

Notice is hereby given that, pursuant to the requirements contained in Title 49 of the Code of Federal Regulations, Part 1121.23, that the Missouri Pacific Railroad Company and its subsidiaries, has file with the Commission its amended color-coded system diagram map in docket No. AB 3 (SDM). The Commission on May 6, 1981, received a certificate of publication as required by said regulation which is considered the effective date on which the system diagram map was filed.

Color-coded copies of the map have been served on the Governor of each state in which the railroad operates and the Public Service Commission or similar agency and the State designated agency. Copies of the map may also be requested from the railroad at a nominal charge. The maps also may be examined at the office of the Commission, Section of Dockets, by requesting docket No. AB 3 (SDM).

Agatha L. Mergenovich,
Secretary.

*AB 3 (SDM) includes all Missouri Pacific Railroad Co. subsidiaries: Chicago Heights Terminal Transfer Company, Doniphan, Kensett and Searcy Railway, AB 25, Weatherford Mineral Wells & Northwestern.

[Volume No. OPY-3-073]

Motor Carriers; Permanent Authority Decision; Decision-Notice

Decided: May 15, 1981.

The following applications, filed on or after July 3, 1980, seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by Special Rule 240 of the Commission's Rules of Practice (49 CFR 1100.240). See Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. 11344 and 11349*, 363 I.C.C. 740 (1981). These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the **Federal Register**. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 242 of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.241. A copy of an application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1100.241(d).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each

applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

By the Commission, Review Board Number 2. Members Carleton, Fisher and Williams.

Agatha L. Mergenovich,

Secretary.

MC–F–14628, filed April 30, 1981. B. HAROLD WILLIAMSON (1107 Brookside Dr., Wilson, NC, 27893), BOBBY R. WILLIAMSON (Route 2, Wilson, NC, 27893), and WILLIAM R. WILLIAMSON (1001 Wolf Trap Rd., Wilson, NC, 27893) (WWW)—continuance in control—WILLIAMSON DISTRIBUTORS, INC. (WD)—initial common carrier (Corner Thorne & Raston Sts., P.O. Box 3489, Wilson, NC, 27893). Representative: Peter A. Greene 1920 N St., N.W., Suite 700, Washington, DC, 20036) (202) 331–8800. WWW, a non-carrier, seeks authority to continue in control of WD, upon the institution of operations, in interstate or foreign commerce. WWW, sole shareholder of WD, seeks authority to acquire control of said rights and property through the transaction. WWW also controls Williamson Truck Lines, Inc., (WTL). WTL holds motor common authority in Docket MC–124896 and various sub numbers thereunder to transport (1) food and related products; (2) fertilizer and fertilizer materials; (3) glass jars; (4) petroleum products in containers; (5) commodities dealt in by lawn and garden centers; (6) paper, paper articles and polyethylene articles; (7) baskets and hampers; (8) plastic and rubber ariticles; and (9) tires and tubes between various points in the U.S. Conditions: (1) Approval and authorization of this transaction is conditioned upon the prior receipt by the Commission of an affadavit signed by B. Harold Williamson, Bobby R. Williamson and William R. Williamson stating that they are the persons in control of transferree and that they join in this application. (2) In order to eliminate the holding of duplicating authority by commonly controlled carriers, approval and authorization of this transaction is conditioned upon the prior cancellation of MC–124896 Sub 55 and Sub 98.

Note.—WD has filed as a directly related application its initial common carrier application. This application, docket No. MC–153214 is published in the same Federal Register issue.

BILLING CODE 7035–01–M

[Volume No. OPY–3–074]

Motor Carriers; Permanent Authority Decision; Decision-Notice

Decided: May 15, 1981.

The following operating rights applications, filed on or after July 3, 1980, are filed in connection with pending finance applications under 49 U.S.C. 10926, 11343 or 11344. The applications are governed by Special Rule 252 of the Commission's General Rules of Practice (49 CFR 1100.252).

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. Persons submitting protests to applications filed in connection with pending finance applications are requested to indicate across the front page of all documents and letters submitted that the involved proceeding is directly related to a finance application and the finance docket number should be provided. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. However, the Commission may have modified the application to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each applicant has demonstrated that its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests in the form of verified statements as to the finance application *or* to the following operating rights applications directly related thereto filed within 45 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except where the application involves duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board Number 2, Members Carleton, Fisher and Williams.

Agatha L. Mergenovich,

Secretary.

MC 153214, filed April 30, 1981. Applicant: WILLIAMSON DISTRIBUTORS, INC., Corner Thorne and Ralston Sts., P.O. Box 3489, Wilson, NC 27893. Representative: Peter A. Greene, 1920 N St., NW., Suite 700, Washington, D.C. 20036, (202) 331–8000. Transporting (1) *lumber and wood products;* (2) *pulp, paper, and related products;* and (3) *metal products,* between those points in the U.S. in and

east of LA, AR, MO, IA and MN, and ports of entry on the International Boundary Line between the U.S. and Canada at Buffalo and Champlain, NY. Restriction: The authority granted herein shall not be severable by sale or otherwise from the authority held by the motor carriers listed in MC–F–14628, which is published concurrently herewith.

Note.—This application is directly related to MC–F–14628, published in the same Federal Register issue.

BILLING CODE 7035–01–M

[Volume No. OPY5–66]

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Decided: May 15, 1981.

The following applications, filed on or after Frebruary 9, 1981, are governed by Special Rule 251 of the Commission's Rules of Practice, see 49 CFR 1100.251. Special Rule 251 was published in the Federal Register on December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the Federal Register issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. Applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulation. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later become unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board No. 3, Members Krock, Joyce and Dowell.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

MC 14878 (Sub-4), filed May 5, 1981. Applicant: WANDELL & LOWE TRANSFER & STORAGE COMPANY, d.b.a. AMERICAN-WANDELL MOVING SERVICE, INC., 4225 Sinton Rd., P.O. Box 7206, Colorado Springs, CO 80933. Representative: Robert J. Gallagher, 1000 Connecticut Ave., NW., Suite 1200, Washington, DC 20036, 202–463–6044. To operate, in interstate or foreign commerce, as a *broker* of *general commodities* (except household goods), between points in the U.S.

MC 136899 (Sub-55), filed May 8, 1981. Applicant: HIGGINS TRANSPORTATION, LTD., P.O. Box 637, Richland Center, WI 53581. Representative: Wayne W. Wilson, 150 East Gilman St., Madison, WI 53703, 608–256–7444. Transporting, for or on behalf of the United States Government, *general commodities* (except used household goods, hazardous or secret materials, and sensitive weapons and munitions), between points in the U.S.

MC 139018 (Sub-1), filed April 3, 1981. Applicant: GUNTE BROTHERS, INC., 19060 Frager Rd., Kent, WA 98031. Representative: Henry C. Winters, 525 Evergreen Bldg., Renton, WA 98055, (206) 235–4730. Transporting for or on behalf of the United States Government, *general commodities* (except used household goods, hazardous or secret materials, and sensitive weapons and munitions), between points in the U.S.

MC 143059 (Sub-177), filed May 8, 1981. Applicant: MERCER TRANSPORTATION CO., P.O. Box 35610, Louisville, KY 40232. Representative: Kenneth W. Kilgore, (same address as applicant), 502–584–2301. Transportating *general commodities* between Cameron City, KS, Drew, Rome, Doddsville, Blaine, and Isola, MS, Paris and Paris Crossing, IN, Chilesburg and Barlow, KY, Curtis and Murdock, FL, Ursa, IL, Grandfield, OK, and Burkburnett, Crandall, Poynor, Gallatin, Reklaw, and Cushing, TX, on the one hand, and, on the other, points in the U.S.

Note.—The purpose of this application is to substitute motor carrier service for completely abandoned rail service.

BILLING CODE 7035-01-M

[Volume No. 85]

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

Decided: May 18, 1981.

The following restriction removal applications, filed after December 28,

1980, are governed by 49 CFR 1137. Part 1137 was published in the **Federal Register** of December 31, 1980, at 45 FR 86747.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1137.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Restriction Removal Board, Members Sporn, Alspaugh, and Shaffer.

Agatha L. Mergenovich,

Secretary.

MC 3252 (Sub-117)X, filed April 29, 1981. Applicant: MERRILL TRANSPORT CO., 1037 Forest Avenue, Portland, ME 04104. Representative: Francis E. Barrett, Jr., 10 Industrial Park Road, Hingham, MA 02043. Applicant seeks to remove restrictions in its Sub-Nos. 4, 35, 37, 38, 39, 41, 46, 55, 56, 61, 66, 68, 72, 77, 78, 79, 81, 85, 89, 92, 93, 94, 97, 106F, 109F, 110F, 111F, and 113F certificates to (A) broaden the commodity description in each certificate to "commodities in bulk" from petroleum products, and other various bulk commodities such as ashphalt, salt, fish oil, waste chemicals, latex, ore, acid, and scrap metal; (B) remove exceptions of certain acids, chemicals, gas and asphalt, and also remove the "in tank" and "in dump" vehicle restrictions, wherever they appear; (C) expand named ports of entry on the US.-Canada boundary line in ME to authorize all entry points in ME in Sub-No. 89, and delete the phrase "in foreign commerce only," in Sub-Nos. 56 and 89; (D) remove the restriction limiting traffic to that having a prior movement by rail, in Sub-No. 77; (E) change one-way service to authorize radial service generally between points in the northeastern States; and (F) expand the plantsite and towns to authorize city or county-wide authority, as follows: Sub-No. 4, Cumberland County, ME (Portland and South Portland, ME), Androscoggin County, ME (Auburn, ME), Providence County, RI (East Providence, RI), Middlesex County, MA (Everett, MA), Washington and Essex Counties, NY (Fort Edward, Whitehall, and Montcalm Landing, about 2 miles south of Ticonderoga, NY), Suffolk, Norfolk and Middlesex Counties, MA (Boston, East Braintree, Braintree, Weymouth, Revere, Everett, Chelsea, Quincy, and East Boston, MA), Rockingham County, NH (Newington and Portsmouth, NH), Somerset County, ME (Jackman, ME), Providence, RI (East Providence, RI), Coos County, NH (Mt. Washington, NH), Chittenden County, VT (Burlington, VT), Androscoggin, Cumberland and Sagadahoc Counties, ME (Lewiston, Yarmouth, and Woolwich, ME), Aroostook County, ME (Presque Isle, ME), Coos County, NH (Colebrook and Errol, NH), and Washington County, ME (plantsite, Eastport, ME); Sub-No. 35, Berkshire County, MA (Adams, MA); Sub-No. 38, Albany and Rennselaer Counties, NY (Albany and Rennselaer, NY); Sub-No. 41, Waldo County, ME (Searsport, ME) and Coos County, NH (Berlin, NH); Sub-Nos. 46, 55, and 93, Rockingham County, NH (Portsmouth, NH); Sub-No. 61, Bennington County, VT (Shaftsbury and Bennington, VT) and Waldo and Penobscot Counties, ME (Searsport and Orrington, ME); Sub-No. 66, Chittenden County, VT (Williston and Burlington, VT), New Haven County, CT (Meriden, CT), Bergen County, NJ (Carlstadt, NJ), Waldo, Cumberland and Hancock Counties, ME (Searsport, Portland, and Bucksport, ME); Sub-Nos. 56 and 97, Penobscot County, ME (Orrington, ME); Sub-Nos. 68, 78, 81, and 92, Cumberland County, ME (Portland, ME); Sub-No. 72, Franklin County, VT (Swanton, VT) and Franklin County, ME (Jay, ME); Sub-No. 77, Bennington County, VT (Bennington, VT), Rennselaer County, NY (Petersburg and Johnsville, NY), Berkshire County, MA (Williamstown, MA), and Cumberland County, ME (Portland, ME); Sub-Nos. 78 and 109, Albany County, NY (Albany, NY); Sub-No. 81, Washington and Essex Counties, NY (Fort Ann and Westport, NY) and Chittenden County, VT (Burlington, VT); Sub-No. 79, Clinton County, NY (Plattsburgh, NY); Sub-No. 85, Hancock and Waldo Counties, ME (Blue Hill, Bucksport, and Searsport, ME), and Essex County, NY (Ticonderoga, NY); Sub-No. 89, Aroostook and Washington Counties, ME (Houlton, Vanceboro, and Calais, ME); Sub-No. 92, Orange County, NY (Middletown, NY) and Philadelphia and Berks Counties, PA (Philadelphia and Reading, PA); Sub-No. 110, Waldo County, ME (Searsport, ME); and Sub-No. 113, Chittenden County, VT (Burlington, VT).

MC 30837 (Sub-502)X, filed May 6, 1981. Applicant: KENOSHA AUTO TRANSPORT CORP., 4314 39th Avenue, Kenosha, WI 53142. Representative: Richard C. McGinnis, 711 Washington Building, Washington, D.C. 20005. Applicant seeks to remove restrictions from Sheet No. 24 of its lead certificate to (1) broaden the commodity description from utility rental trailers designed to be drawn by passenger automobiles to "commodities which because of their size or weight require special equipment" and (2) eliminate the restriction to transportation in secondary movements, in truckaway service.

MC 38400 (Sub-8)X, filed January 30, 1981, previously noticed in the FR of February 12, 1981, republished as follows: Applicant: HITCHCOCK BROS., INC., P.O. Box 212, Canaan, CT 06018. Representative: C. Frank Hitchcock (same as above). Applicant seeks to remove restrictions in its Sub-No. 8X certificate to broaden existing authority to serve points in NY within 25 miles of the CT–NY and MA–NY State Lines to "Albany, Columbia, Dutchess, Greene, Nassau, Orange, Putnam, Rensselaer, Rockland, Saratoga, Suffolk, Ulster, Washington, and Westchester Counties, NY and New York, NY." Following a recent Commission decision declaring this type of broadening to be reasonable, the Board has decided to renotice this portion of the original application.

MC 46797 (Sub-7)X, filed May 8, 1981. Applicant: PHILLIPS TRUCK LINE, INC., 785 East Street, Memphis, TN 38126. Representative: Edward G. Grogon, Esq., Twentieth Floor, First Tennessee Building, Memphis, TN 38103. Applicant seeks to remove restrictions in its lead certificate to allow service at all intermediate points on the regular route portion of its certificate, between (a) Memphis, TN and Europa, MS, and (b) Memphis, TN and Calhoun City, MS.

MC 87966 (Sub-21)X, filed May 7, 1981. Applicant: ELEVELD CHICAGO FURNITURE SERVICE, INC., 9630 South 76th Avenue, Hickory Hills, IL 60457. Representative: Terry G. Fewell, P.O. Box 4403, Chicago, IL 60680. Applicant seeks to remove restrictions in its lead certificate and Sub-Nos. 7, 14, 16, 17, 18, and authority acquired in MC–F–14318F (No. MC–15735 Sub-No. 27), to (1)

broaden its commodity descriptions: in the lead, from household goods, new furniture, furniture frames, store and bar furniture, fixtures and equipment, to "new furniture, furniture frames, furniture, fixtures, and equipment"; in all of the above-named authority except Sub-No. 14 and MC–F–14318F, from uncrated new furniture, new furniture, store and office fixtures, new store, restaurant, and bar furniture, uncrated, to "furniture and fixtures"; in Sub-No. 14, from store and office fixtures, and supplies and materials used in the installation thereof (except commodities in bulk), to "furniture and fixtures, and supplies and materials used in the installation thereof"; in Sub-Nos. 17 and 18, from store, restaurant, and bar fixtures and equipment, uncrated, to "furniture and fixtures, and equipment"; and in MC–F–14318F, from furniture, furnishings, appliances, store and office fixtures, kitchen fixtures and equipment, and institutional fixtures and equipment, all new and uncrated, to "furniture, furnishings, appliances, fixtures, and equipment, all new"; and (2) remove the AK and HI exceptions wherever they appear.

MC 95876 (Sub-400)X, filed May 6, 1981. Applicant: ANDERSON TRUCKING SERVICE, INC., 203 Cooper Ave. No., St. Cloud, MN 56301. Representative: Stephen F. Grinnell, 1600 TCF Tower, Minneapolis, MN 55402. Applicant seeks to remove restrictions in its Sub-Nos. 9, 72, 89, 199 and 312F certificates to (1) broaden the commodity description (a) in part 1 of Sub-No. 9, from general commodities (with the usual exceptions and livestock), to "general commodities (except classes A and B explosives)", and in part 2, from contractors' and construction equipment, materials and supplies, heavy machinery, transformers, generators, tanks, boilers, smokestacks, power plant equipment, electrical equipment, portable houses and garages, and commodities requiring specialized handling or rigging because of size or weight, to "machinery; metal products; transportation equipment; clay, concrete, glass or stone products; petroleum, natural gas and their products; lumber and wood products, and building materials"; (b) in Sub-No. 72, from tanks, food preparation and serving equipment, transfer and storage containers, food display and showcase equipment, hoppers, materials handling equipment (except self-propelled), and accessories, parts, materials and supplies, to "metal products and machinery," (c) in Sub-No. 89, from manufactured art stone, lumber, shingles, new furniture, built-up wood, doors, sash, woodwork, veneer, tin plate, materials and supplies used in the manufacture of furniture and woodwork, household goods, machinery (except tractors and agricultural machinery), and building materials, to "clay, concrete, glass or stone products; lumber and wood products; furniture and fixtures; metal products; machinery; household goods, and building materials"; (d) in Sub-No. 199, from contractors' and construction equipment, materials and supplies, (except commodities in bulk), cement, machinery, transformers, generators, tanks, boilers, smokestacks, telephone poles, power plant equipment, electrical equipment, and commodities which because of size or weight require the use of special equipment or special handling, to "machinery, metal products, clay, concrete, glass or stone products; petroleum, natural gas and their products; lumber and wood products, and building materials", and (e) in Sub-No. 321F, from iron and steel articles, fabricated metal articles, pumps, heaters, pressure vessels, pollution control equipment, windmills, drilling equipment, parts, accessories and materials, equipment and supplies (except commodities in bulk), to "metal products, machinery, pollution control equipment, and windmills"; (2) replace existing city-wide authority with country-wide authority: in part 1 of Sub-No. 9, Hennepin, Ramsey, Anoka, Washington, Dakota, Scott and Carver Counties, MN and Pierce and St. Croix Counties, WI (for Minneapolis-St. Paul, St. Louis Park, Hopkins, Robbinsdale, Columbia Heights, Golden Valley, Fort Snelling, McCarrons's Lake, Richfield, New Brighton, Morningside, Fridley, Edina, Rose Township, Veteran's Hospital, Brownsdale, North St. Paul, South St. Paul, Invergrove, St. Paul Park, Mendota, State Fair Grounds, Brooklyn Center and Redrock, MN); in Sub-No. 72, Benton, Sherburne and Stearns Counties, MN (for St. Cloud), and in Sub-No. 89, Shawano, Outagamie, Brown, Calumet, Winnebago, Fond du Lac, Green Lake, Waushara, Portage, Waupaca, Marathon, Menomonie and Oconto Counties, WI (for New London, WI and points within 35 miles thereof); (3) in Sub-Nos. 72, 89, and 321F, eliminate restrictions against the transportation of bulk commodities, tractors, agricultural machinery, self-propelled articles, and traffic moving to or from AK and HI; and (4) authorize radial authority in place of existing one-way authority in Sub-No. 72, between Benton, Sherburne and Stearns Counties, MN, and, points in the US; in Sub-No. 89 between 13 counties in WI, and, points in IL, MN, MI, and IN.

MC 110325 (Sub-174)X, filed April 13, 1981, previously noticed in the **Federal Register** of May 1, 1981, republished as corrected this issue. Applicant: TRANSCON LINES, P.O. Box 92220, Los Angeles, CA 90009. Representative: Jerome Biniasz (same address as above). Applicant seeks to remove restrictions in its Sub-Nos. 8, 14, 15, 18, 21, 22, 25, 28 and 30 certificates which authorize service in AL, AR, AZ, CA, GA, KS, MO, MS, NM, OK, TN and TX, to (1) remove all exceptions in its regular-route, general commodity authority except "Classes A and B explosives;" (2) remove territorial restrictions which limit service to some intermediate points, no intermediate points, or intermediate points in one direction to authorize service at all intermediate points; (3) remove the restriction in Sub-No. 18, which restricts service on a described regular route against the transportation of traffic originated at or destined to points in AZ, CA and NM; (4) remove the restriction in Sub-No. 21, which allows, no service at St. Louis, MO on traffic originating at, destined to, or interlined at Dallas, TX; (5) delete facilities limitation from off-route points in Sub-Nos. 15, and 22; (6) broaden commodity descriptions in irregular route authority: (a) Sub-No. 15, roofing, building paper, insulating material, nails and asphalt, to "ores and minerals, lumber and wood products, pulp, paper and related products, petroleum or coal products, rubber and plastic products, clay, concrete or stone products, metal products (b) Sub-No. 22, groceries, produce, cotton seed, cotton seed meal, cotton seed hulls, seed, feed, farm implements, agricultural commodities and livestock, to "food and related products, metal products and machinery" (c) Sub-No. 25, "soap and soap products" to "chemicals and related products"; (7) in Sub-Nos. 15 and 25, replace Kansas City, MO with Johnson, Leavenworth and Wyandotte Counties, KS and Cass, Clay, and Jackson and Platte Counties, MO; (8) to broaden its off-route point descriptions to county-wide authority: (a) in Sub-No. 25, from points within 30 miles of Oklahoma City, OK to "Logan, Lincoln, Oklahoma, Pottawatomie, Cleveland, McClain, Grady, Canadian, Caddo, Kingfisher, and Payne Counties, OK"; (b) in Sub-No. 25, from points within 30 miles of Los Angeles, CA to "Los Angeles, Orange, San Bernardino, and Ventura Counties, CA"; (c) in Sub-No. 28, routes 1–3, from points within 5 miles of named highways to "Alameda, Contra Costa, San Francisco, San

Mateo, and Sata Clara Counties, CA"; (d) in Sub-No. 15, sheet 2, paragraph 7, from Alma, OK to "Stephens County, OK"; (e) in Sub-No. 15, sheet 3, paragraph 2, from Buffalo and Neodosha, KS to "Wilson County, KS"; (f) in Sub-No. 25, from Bartlesville, Collinsville, and Nowata, OK to "Nowata, Osage, Rogers, Tulsa, and Washington Counties, OK"; (g) in Sub-No. 30, from plantsites near Fort Worth, TX to "Parker and Tarrant Counties, TX"; (h) in Sub-No. 22, from points within 25 miles of Red Bay, AL to "Colbert, Franklin and Marion Counties, AL, and from points within 70 miles of Tupelo, MS to "Alcorn, Benton, Calhoun, Chickasaw, Clay, Grenada, Itawamba, Lafayette, Lee, Lowndes, Marshall, Monroe, Oktibbeha, Pontotoc, Prentiss, Tate, Tippah, Tishomingo, Union, and Yalobusha Counties, MS"; (9) authorize radial movements in place of existing one-way authority between Kansas City, MO and named counties or points in OK and KS in Sub-Nos. 15 and 25, and (10) remove all exceptions in its Sub-No. 15 irregular route, to authorize "general commodities except classes A and B explosives".

MC 118612 (Sub-14)X, filed May 11, 1981. Applicant: COLUMBIA TRUCKING, INC., 700—131st Place, Hammond, IN 46320. Representative: Richard A. Kerwin, 180 North LaSalle Street, Chicago, IL 60601. Applicant seeks to remove restrictions from its Sub-Nos. 9F, 10 and 12 certificates to: (1) broaden the commodity description from asphalt and tar in Sub-No. 9F and hot asphalt in Sub-No. 10 to "petroleum or coal products"; (2) remove the "in bulk, in tank vehicles" restrictions in Sub-No. 10; (3) remove the facilities limitation in Sub-No. 9F; (4) replace Summit, IL with Cook°County, IL, in Sub-No. 10; and, (5) expand its one-way authority to radial authority in Sub-No. 9F, between IN, and, Waukegan, IL; in Sub-No. 10, between Cook County, IL, and, IN, IA, WI, MN, OH, MI, and MO; and in Sub-No. 12, between La Porte County, IN, and IL.

MC 118811 (Sub-19)X, filed May 4, 1981. Applicant: LAWRENCE McKENZIE TRUCKING SERVICE, INC., Route 5, Box 111, Winchester, KY 40391. Representative: William L. Willis, Suite 708 McClure Building, Frankfort, KY 40601. Applicant seeks to remove restrictions in its lead and Sub-Nos. 3, 13F and 15F certificates to (1) broaden the commodity descriptions in the lead from lumber to "lumber and wood products"; in Sub-No. 3 from lumber to "lumber and wood products"; in Sub-No. 13F from scrap metal to "metal products"; and in Sub-No. 15F from lard cans, shower stalls, furnaces and stoves, and parts, accessories and supplies to "building materials and metal products" (2) authorize radial service between specified points mainly in the eastern and central portions of the U.S.; (3) remove facilities limitations in Sub-No. 3, and 15F; (4) replace city-wide authority with county-wide authority as follows: Winchester with Clark County, KY in Sub-No. 3; Lexington with Fayette County, KY in Sub-No. 13F; and Louisville with Jefferson County, KY in Sub-No. 15F; and (5) delete the exception of (a) Erie, Jamestown, Lawrence Park, North East and Wesleyville PA and (b) the following OH Cities or points; Delaware, Hamilton, Lebanon, Lodi, Hansfield, Massillon, Middletown, Washington Court House, Wright-Patterson Field, and Xenia, in Sub-No. 3.

MC 123415 (Sub-22)X, filed May 4, 1981. Applicant: JAMES STUFFO, INC., Cinnaminson Industrial Park, 2301 Garry Rd. (P.O. Box 45), Cinnaminson, NJ 08077. Representative: Raymond A. Thistle, Jr., Five Cottman Ct., Homestead Rd. & Cottman St., Jenkintown, PA 19046. Applicant seeks to remove restrictions in its lead and Sub-Nos. 4, 5, 6, 10, 12, 14 and 16 certificates to (A) broaden the commodity descriptions as follows: (a) in the lead and Sub-No. 6, from colored wall finishes in powdered form exterior Portland cement stuccos, building materials (except lumber, structural steel, sand, gravel and crushed stone), roofing materials and insulating board, waterproofing compounds, dry flooring cement compounds, roofing materials, sand, stone, brick, and tools, supplies and equipment used in installing or applying the described commodities (except commodities in bulk, in tank or hopper type vehicles) to "building materials"; (b) in the lead and Sub-Nos. 4, 5, and 16, from metal windows, metal window sections, and metal doors (uncrated), parts and fittings, aluminum extrusions (uncrated) when moving with shipments of metal windows, metal window sections, metal doors (uncrated), sample metal windows, sample metal window sections and sample metal doors (crated), aluminum extrusions (some portions uncrated), building construction sections, to "metal products"; (c) in the lead from clay sewer pipe (uncrated), flue lining, drain tile and sewer pipe, to "clay, concrete, glass or stone products"; (d) in the lead from waste materials, cotton waste, scrap or waste paper, old mattresses and rags, scrap iron and steel, scrap tin plate, scrap tin cans, to "waste or scrap materials not identified by industry producing"; (e) in the lead and Sub-No. 14, from, paper and paper products, and paper mill supplies and paper boxes, to "pulp, paper and related products"; (f) in lead docket, from plastic pipe and fittings for plastic pipe, to "rubber and plastic products"; (g) in Sub-No. 10, from illuminated signs and component parts thereof to "advertising products and materials"; (h) in Sub-No. 12, from pallets to "packaging and material carrying devises"; and (i) in Sub-No. 14, from drug, medicinal and toilet preparations, in paper boxes and the same commodities on return (except liquid commodities in bulk), to "health and personal care products and materials"; (B) remove all restrictions on commodities, such as "except liquid commodities in bulk", "crated", "uncrated", etc.; (C) delete facilities limitations in each certificate; (D) replace city-wide with county-wide authority wherever the following appear in each certificate: Bogota, East Rutherford, Little Ferry, Ridgefield Park with Bergen County, NJ; Elizabeth, Elizabeth Port, Garwood with Union County, NJ; Manville with Somerset County, NJ; Old Bridge, New Brunswick with Middlesex County, NJ; Whippany with Morris County, NJ; Camden, Delair, Gloucester with Camden County, NJ; Trenton with Mercer County, NJ; Newark with Essex County, NJ; Edge Moor with New Castle County, DE; Urichsville and Midvale with Tuscarawas County, OH; Carrollton with Carroll County, OH; Freehold with Monmouth County, NJ; and Lancaster with Lancaster County, PA; and (E) authorize radial service where only one-way authority exists between points in specified States located mainly throughout the eastern and central portion of the U.S.

MC 124170 (Sub-164)X, filed May 7, 1981. Applicant: FROSTWAYS, INC., 3000 Chrysler Service Drive, Detroit, MI 48207. Representative: William J. Boyd, P.C., 2021 Midwest Road, Suite 205, Oak Brook, IL 60521. Applicant seeks to remove restrictions in its Sub-Nos. 79, 99F and 100F certificates to (1) eliminate the facilities limitation in Sub-No. 99F; (2) change one-way to radial authority between (a) Detroit, MI, and, points in ME, MA, CT, RI, VT, NY, NJ, PA, OH, MD, DE, VA, WV, FL, GA, MS, AL, LA, NC, SC, TN, KY, IN, WI, IL and DC in Sub-No. 79; (b) points in the U.S., and, Detroit, MI, in Sub-No. 99F; and (c) Detroit, MI, and, points in AZ, AR, CA, CO, ID, IA, KS, MN, MO, MT, NE, NV, NM, ND, OK, OR, SD, TX, UT, WA, and WY, in Sub-No. 100F; and (3) remove the "except commodities in bulk" restriction in Sub-No. 100F.

MC 126960 (Sub-9)X, filed May 1, 1981. Applicant: EASTMAN TRANSPORT, INC., P.O. 1186, Fort Bragg, CA 95437. Representative: Lawrence V. Smart, Jr., 419 NW 23rd Ave., Portland, OR 97210. Applicant seeks to remove restrictions in its Sub-Nos. 2 and 7 certificates to: (1) broaden the commodity description in Sub-Nos. 2 and 7, from lumber to "lumber and wood products"; and also in Sub-No. 2, broaden mineral ores and concentrates, ore, ore and ore concentrates to "ores and minerals"; cottonseed meal, crumbles and pellets to "food and related products"; and fertilizer to"chemicals and related products"; (2) expand Grants Pass, OR, to Josephine County, OR, Phoenix, AZ; Phoenix, AZ, to Miricopa County, AZ; Tucson, AZ, to Pima County, AZ; and Merlin, OR, to Josephine County, OR, wherever they appear in Sub-No. 2; (3) remove the restriction against service from the Palo Alto Mining site and the J. R. Holman Mine site in Sub-No. 2; (4) eliminate the exception of wood chips from the commodity description lumber and wood products and forest products in Sub-No. 2; eliminate the "except in bulk restriction" in Sub-No. 2; and (5) expand its one-way authority to radial authority between named counties in OR, and, named counties CA in Sub-Nos. 2 and 7 and between named counties in OR, and, points in NV; and between named counties in OR, and, named counties in AZ, in Sub-No. 2.

MC 134730 (Sub-29)X, filed May 7, 1981. Applicant: METALS TRANSPORT, INC., 528 South 108th Street, West Allis, WI 53214. Representative: M. H. Dawes (same address as above). Applicant seeks to remove restrictions in its Sub-Nos. 20F, 21F, 22F, 23F, 24F, 25F, 26F, 27F, and 28F permits to (1) authorize service between points in the U.S., under continuing contract(s) with named shippers; and (2) broaden the commodity descriptions to (a) "metal products and waste or scrap materials" from non-ferrous metals and scrap metals, in Sub-Nos. 20F, 22F, and 26F; (b) "non-metallic minerals, metal products, and machinery, material, equipment and supplies" from heat processing equipment, accessories, and materials, equipment and supplies, in Sub-Nos. 21F, 23F, and 28F; (c) "forest products, lumber and wood products, pulp, paper and related products, building materials and metal products" from forest products, lumber, millwork, building supplies and hardware, in Sub-No. 24F; (d) "metal products and materials, equipment and supplies" from fabricated metal products and iron and steel articles, and materials, equipment, and supplies, in Sub-No. 25F; and (e) "machinery and metal products" from waste water treatment equipment and parts for waste water treatment equipment, in Sub-No. 27F.

MC 145402 (Sub-11)X, filed May 4, 1981. Applicant: LAKE LINE EXPRESS, INC., P.O. Box 1021, Appleton, WI 54912. Representative: Richard A. Westley, 4506 Regent Street, Suite 100, Madison, WI 53705. Applicant seeks to remove restrictions in its Sub-No. 2F certificate to (1) remove all exceptions from its general commodity authority except classes A and B explosives; (2) allow service at all intermediate points between Milwaukee, WI and Kalamazoo, MI, Buffalo and Grand Rapids, MI, Grand Rapids, MI and junction Interstate Hwys. 94 and 196, Tomahawk and Milwaukee, WI, Green Bay and Milwaukee, WI, Antigo and Appleton, WI, Wausau and Green Bay, WI, Manitowoc and Stevens Point, WI, and, Manitowoc and Fond du Lac, WI; (3) allow service at all off-route points in St. Joseph County, MI in place of points in part of the county; (4) eliminate all restrictions limiting service at specific points for purpose of joinder or interchange only; (5) remove the originating at and destined restriction; and (6) eliminate the restriction requiring that "service may only be provided between points in WI, on the one hand, and points in MI on the other hand."

MC 146269 (Sub-4)X, filed May 12, 1981. Applicant: WALDORF TRANSPORTATION CO., INC., P.O. Box 1470, La Plata, MD 20646. Representative: Daniel B. Johnson, 4304 East-West Highway, Washington, DC 20014. Applicant seeks to remove restrictions in its Sub-Nos. 2F and 3F certificates to (1) broaden the commodity description from (a) malt beverages to "food and related products", in Sub-No. 2F; and (b) cloth, cotton fibre, synthetic fibre, and unfinished piece goods to "textile mill products", in Sub-No. 3F; (2) change its one-way authority to radial authority between Philadelphia, PA and Baltimore, MD, and specified points in VA, in Sub-No. 2F; and (3) replace North Dighton with Bristol County, MA, in Sub-No. 3F.

MC 146274 (Sub-1)X, filed May 8, 1981. Applicant: JACKSON TRANSPORTATION, INC., P.O. Box 410–C, Clayton, IN 46240. Representative: Donald W. Smith, P.O. Box 40248, Indianapolis, IN 46240. Applicant seeks to remove restrictions in its lead permit, which authorizes the transportation of printed matter, to broaden the territorial description to "between points in the U.S.," under continuing contract(s) with a named shipper.

MC 146782 (Sub-52)X, filed May 4, 1981. Applicant: ROBERTS CARRIER CORPORATION, 300 First Avenue, South, Nashville, TN 37201. Representative: Stephen L. Edwards, 806 Nashville Bank & Trust Building, Nashville, TN 37201. Applicant seeks to remove restrictions in its Sub-Nos. 9F, 10F, 12F, 13F, 15, 17, 18, 19F, 20F, 25F, 26, 27F, 29F, 30, 31F, 32F, 33 and 36 certificates to (1) broaden the commodity description from (a) aluminum articles, iron and steel articles, wire, rod, wire and rod articles, fencing materials, zinc articles, aluminum sheet and foil, aluminum ingots, tubing and welded steel tubing to "metal products" in Sub-Nos. 9F, 10F, 11F, 12F, 13F, 15, 17, 18, 19F, 20F, 26F, 27F, 29F, 30, 31F, 32F, 33 and 36; (b) construction adhesives and paint to "building materials" in Sub-No. 25F; (2) broaden the territorial descriptions to county-wide authority by (a) substituting: Cook County, IL, for a plantsite at Chicago, IL, in Sub-No. 9F; Putnam County, IL, Lake County, IN, Mahoning County, OH, Beaver County, PA and Allegheny County, PA, for plantsites at Hennepin, IL, Indiana Harbor, IN, Youngstown, OH, Aliquippa and Pittsburgh, PA, in Sub-No. 10F; Hancock County, WV, and Jefferson County, OH, for plantsites at Weirton, WV, and Steubenville, OH, in Sub-No. 12F; Carroll County, TN, for a plantsite at Hungtingdon, TN, in Sub-No. 13F; Jackson County, AR, and Roane County, TN, for plantsites at Newport, AR, and Harriman, TN, in Sub-No. 15; Beaver County, PA, and Stark County, OH, for plantsites at Beaver Falls, Koppel and Ambridge, PA, and Alliance, OH, in Sub-No. 18; Richland County, OH, for a plantsite at Shelby, OH, in Sub-No. 19F; Davidson County, TN, for plantsites at Nashville, TN, in Sub-Nos. 20F, 25F and 31F; Georgetown County, SC, for plantsite at Georgetown, SC, in Sub-No. 26; Whitside County, IL for plantsites at Sterling and Rock Falls, IL, in Sub-No. 29F; Bradley County, TN, for a plantsite at Cleveland, TN, in Sub-No. 30; and Surry County, NC for a plantsite at Mount Airy, NC, in Sub-No. 32F; and (b) deleting the "originating at and/or destined to" restrictions wherever they appear in each certificate and (3) substitute radial authority for one-way authority in Sub-Nos. 9F, 10F, 11F, 15, 19F, 26 and 29F, between specified points located mainly in the eastern and central portion of the U.S.

MC 147169 (Sub-2)X, filed May 4, 1981. Applicant: SERVICEWAY MOTOR

FREIGHT, INC., P.O. Box 243, Alcoa, TN 37701. Representative: J. Greg Hardeman, 618 United American Bank Bldg., Nashville, TN 37219. Applicant seeks to remove restrictions in its authority in its lead certificate No. MC-147169 F and Sub-Nos. 1F and certificates No. MC-145274 Sub-Nos. 4F, and 6F to (1) broaden the commodity description from carbonated beverages and carbonated beverage containers to "food and related products, rubber and plastic products, clay, concrete, glass or stone products, and metal products" in the lead; in Sub-No. 1F from carbonated beverages and materials and supplies used in the manufacture and distribution of carbonated beverages to "food and related products, and material and supplies used in its manufacture and distribution"; in Sub-No. 2F, part (1) from containers and container ends to "rubber and plastic products, clay, concrete, glass or stone products, and metal products"; in Sub-No. 4F, part (1) iron containers and steel containers and metal can ends to "metal products"; in Sub-No. 6F, part (1) from ground clay, crude clay and floor sweeping compounds to "chemicals and related products, and clay, concrete, glass or stone products"; (2) remove the facilities limitations in Sub-Nos. 2F and 6F; (3) substitute counties for named cities as follows: in Sub-Nos. 1F and 2F Shelby County (for Collierville), TN; in Sub-No. 4F, Lee County (for Bishopville), SC; in Sub-No. 6F, Hardeman County (for Middleton), TN; (4) remove the "in bulk" restrictions in Sub-No. 6F, and the "in bulk, in tank vehicles" restriction in Sub-Nos. 2F and 4F.

MC 147553 (Sub-13)X, filed May 11, 1981. Applicant: DENNIS MOSS AND GARY MOSS, d.b.a. MOTOR WEST, P.O. Box 1405, Caldwell, ID 83605. Representative: Timothy R. Stivers, P.O. Box 1576, Boise, ID 83701. Applicant seeks to remove restrictions in its Sub-No. 7 certificate to (1) broaden the commodity description to "such commodities as are dealt in by grocery and food business houses and beverages", from beverages, (2) expand its one-way authority to radial authority between points in CA, OR, and WA, and, points in ID. Applicant's ability to tack authorities will be governed by rules set forth at 49 CFR Part 1042.10(b).

MC 148512 (Sub-6)X, filed April 30, 1981. Applicant: WESTERN TANK LINE, INC., 2222 North 11th Street, Omaha, NE 68110. Representative: Donald L. Stern, Suite 610, 7171 Mercy Road, Omaha, NE 68106. Applicant seeks to remove restrictions in No. MC-148512 Sub-Nos. 2F, 3F, 4, and 5 certificates and authorities acquired in MC-F-14215F, issued in No. MC-119400 and Sub-Nos. 1, 2, 3, 6, 10, 12, 14, and 16, to (1) change various bulk commodity descriptions such as anhydrous ammonia MC-119400 (Sub-Nos. 3, 6, 8, and 14); fertilizer, insecticides, fungicides, and herbicides MC-119400 (Sub-No. 1); fertilizer and fertilizer ingredients MC-119400 (Sub-No. 10); chemicals, fertilizers and fertilizer materials MC-119400 (Sub-No. 2); asphalt emulsion MC-148512 (Sub-No. 3); liquified petroleum gas MC-148512 (Sub-No. 2); acids and chemicals MC-148512 (Sub-No. 4); liquid fertilizer solutions MC-119400 (Sub-Nos. 12 and 16); refined petroleum products (Base Docket MC-119400); and liquid commodities in bulk MC-148512 (Sub-No. 5) to read "commodities in bulk", (2) remove "in tank vehicles" restrictions in MC-119400 (Sub-Nos. 6 and 12) and MC-148512 (Sub-Nos. 2 and 3); (3) eliminate facilities limitations in MC-119400 (Sub-Nos. 1, 2, 6, 10, 14 and 16); (4) authorize radial service between points located throughout the U.S. and (5) replace city-wide authority with county-wide authority wherever they appear in each certificate as follows: Alton with Sioux County, IA; Naper with Boyd County, NE; Spalding with Greeley County, NE; Rogers and Schuyler with Colfax County, NE; Arkansas City with Cowley County, KS; El Dorado with Butler County, KS, Conway and McPherson with McPherson County, KS; Arlington and Blair, with Washington County, NE; Air Park West, Lincoln with Lancaster County, NE; Borger with Hutchinson County, TX; Greenwood with Cass County, NE; Whiting with Monona County, IA; Early with Sac County, IA; Garner with Hancock County, IA; Doniphan with Hall County, NE; Clay Center with Clay County, KS; and Falls City with Richardson County, NE

MC 148846 (Sub-4)X, filed May 8, 1981. Applicant: JETWAL, INC., P.O. Box 512, Sterling, CO 80751. Representative: Jack B. Wolfe, Suite 665, 1600 Sherman St., Denver, CO 80203. Applicant seeks to remove restrictions in its Sub-No. 3F certificate to (1) broaden the commodity descriptions from molasses and condensed steffens filtrate, in tank vehicles, liquid feed supplement, liquid feed ingredients, and liquid fertilizer in tank vehicles, to "commodities in bulk"; (2) remove facilities limitations at Sterling and Johnstown, CO and replace with Logan and Weld Counties, CO; and (3) replace its one-way authorities with radial authorities, between Logan and Weld Counties, CO, and points in SD, NE, KS, IA, WY, MT, OK, and TX.

BILLING CODE 7035-01-M

[Ex Parte No. 311]

Expedited Procedures for Recovery of Fuel Costs

Decided: May 19, 1981.

In our recent decisions, an 18.5-percent surcharge was authorized on all owner-operator traffic, and on all truckload traffic whether or not owner-operators were employed. We ordered that all owner-operators were to receive compensation at this level.

The weekly figure set forth in the appendix for transportation performed by owner-operators and for truckload traffic is 18.4-percent. Accordingly, we are authorizing that the surcharge for this traffic remain at 18.5-percent. All owner-operators are to receive compensation at this level.

No change is authorized on the 3.2-percent surcharge on less-than-truckload (LTL) traffic performed by carriers not using owner-operators, the 2.1-percent surcharge for United Parcel Service, or the 6.9-percent surcharge for the bus carriers.

Notice shall be given to the general public by mailing a copy of this decision to the Governor of each State and to the Public Utilities Commission or Boards of each State having jurisdiction over transportation, by depositing a copy in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., for public inspection and by delivering a copy to the Director, Office of the Federal Register for publication therein.

It is ordered:

This decision shall become effective Friday 12:01 a.m., May 22, 1981.

By the Commission, Acting Chairman Alexis, Commissioners Gresham, Clapp, Trantum, and Gilliam. Acting Chairman Alexis and Commissioner Gilliam were absent and did not participate.

Agatha L. Mergenovich,

Secretary.

Appendix—*Fuel Surcharge*

Base, date and price per gallon (including tax)	
January 1, 1979	63.5¢
Date of current price measurement and price per gallon (including tax)	
May 18, 1981	132.7¢

	Transportation performed by—			
	Owner-operators [1]	Other [2]	Bus carriers	UPS
	(1)	(2)	(3)	(4)
Average percent fuel expenses (including taxes) of total revenue	16.9	2.9	6.3	3.3
Percent surcharge developed	18.4	3.2	6.9	[3] 2.9
Percent surcharge allowed	18.5	3.2	6.9	[4] 2.1

[1] Apply to all truckload rated traffic.
[2] Including less-than-truckload traffic.
[3] The percentage surcharge developed for UPS is calculated by applying 81 percent of the percentage increase in the current price per gallon over the base price per gallon to UPS average percent of fuel expense to revenue figure as of January 1, 1979 (3.3 percent).
[4] The developed surcharge is reduced 0.8 percent to reflect fuel-related increases already included in UPS rates.

BILLING CODE 7035-01-M

Finance Applications; Decision-Notice

The following applications, filed on or after July 3, 1980, seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by Special Rule 240 of the Commission's Rules of Practice (49 CFR 1100.240). See Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. 11344 and 11349*, 363 I.C.C. 740 (1981). These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the **Federal Register**. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 242 of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.241. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1100.241(d).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

Dated: May 19, 1981.

By the Commission, Krock, Joyce, and Dowell.

MC-F-14624F, filed April 28, 1981. GRAND ISLAND MOVING & STORAGE CO., INC. (GIMS) (P.O. Box 2122, Grand Island, NE 68801)—PURCHASE (PORTION)—CONLEY TRUCK LINE, INC. (Conley) (P.O. Box 1761, Grand Island, NE 68801). Representative: Brian K. Ridenour, P.O. Box 82028, 1200 N Street, 500 The Atrium, Lincoln, NE 68501. GIMS seeks authority to purchase a portion of the interstate operating rights of Conley. James D. Pirnie, who controls GIMS through 92% of stock ownership, seeks authority to acquire control of said rights through the transaction. GIMS is purchasing a portion of Conley's authority which is contained in Certificate No. MC-18080, which authorizes the transportation of *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, and commodities requiring special equipment), between Council Bluffs, IA, and Arnold, NE, as follows, serving the intermediate and off-route points of Omaha, Lincoln, Hastings, Glenwood Park, and Kearney, NE, and those on NE Hwy 40 between Glenwood Park and Arnold, and the off-route point of Grand Island, NE, (1) from Council Bluffs over U.S. Hwy 6 to Lincoln, NE, then over NE Hwy 2 via Woodlawn, NE, to junction U.S. Hwy 34, then over U.S. Hwy 34 to junction U.S. Hwy 281, then over U.S. Hwy 281 to Hastings, NE, then over U.S. Hwy 6 to Minden, NE, then over NE Hwy 10 to junction NE Hwy L-50A (formerly NE Hwy 410), then over NE Hwy L-50A to junction NE Hwy 44, then over NE Hwy 44 to Kearney, NE, then over NE Hwy 30 to Gothenburg, NE, then over NE Hwy 47 to junction NE Hwy 40, then over NE Hwy 40 to Arnold, and return over the same route; (2) from Council Bluffs to Kearney as specified above, then over NE Hwy 10 to Glenwood Park, NE, and then over NE Hwy 40 to Arnold, and return over the same route; (3) from Council Bluffs over U.S. Hwy 6 to Omaha, then over NE Hwy 92 to Arnold, and return over the same route, and (4) from Council Bluffs over U.S. Hwy 6 to Omaha, then over U.S. Hwy 275 to junction U.S. Hwy 30, then over U.S. Hwy 30 to junction NE Hwy 92, then over NE Hwy 92 to Arnold, and return over the same route. GIMS is authorized to operate as a common carrier over regular and irregular routes in the continental United States pursuant to certificates authorized in MC-135283 and sub-numbers thereunder.

MC-F-14623, filed April 24, 1981. WINTZ TRANSPORTATION CO. (Wintz) (1706 American National Bank Bldg., St. Paul, MN 55101)—PURCHASE—MODERN TRUCK LINES, INC. (Modern) (7845 Hall St., St. Louis, MO 63147). Representative: Brian K. Ridenour, P.O. Box 82028, 1200 N St., 500 The Atrium, Lincoln, NE 68501. Wintz seeks authority to purchase the interstate operating rights of Modern. George L. Wintz, Jr., the sole stockholder of Wintz, seeks authority to acquire control of said rights through the transaction. Wintz is purchasing those rights contained in Modern's certificate in MC-115169 and sub-numbers thereunder, which authorize the transportation of: General commodities, except those of unusual value, Classes A and B explosives, livestock,

household goods as defined by the Commission, commodities in bulk, and those requiring special equipment. Between points within one mile of Paducah, KY, not including Paducah, on the one hand, and, on the other, points in Kentucky on KY Highway 286, not including Wickliffe, KY. *General commodities*, except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, between St. Louis, MO, on the one hand, and, on the other, points in Ballard County, KY. *General commodities*, except those of unusual value, household goods as defined by the Commission, and commodities requiring special equipment, between Paducah, KY, Memphis, TN, Cairo, IL, and points in Illinois within five miles of Cairo, IL, and points in TN located on U.S. Highway 51, on the one hand, and on the other, points in Kentucky within 35 miles of La Center, KY, excluding La Center and those in said area on or within one mile of U.S. Highways 45, 51, and 60. Between East St. Louis, IL and points in Illinois within 25 miles thereof, on the one hand, and, on the other, La Center, KY, and points in Kentucky within 35 miles of La Center, other than those on or within one mile of U.S. Highways 45, 51 and 60. *Cheese, feed, roofing materials, wire-fencing, lard cans,* and *packinghouse products and by-products*, including *fresh meats*, from East St. Louis, IL, to points in Ballard and McCracken Counties, KY, with no transportation for compensation on return except as otherwise authorized. *Livestock*, between points in Ballard and McCracken Counties, KY, on the one hand, and, on the other, East St. Louis, IL. Wintz holds no permanent authority from the Commission. However, it is operating under temporary authority issued in MC–F–14417F and MC–F–14329, transporting specified commodities in described areas involving the States of Arizona, New Mexico, Colorado, Nebraska, Iowa, Minnesota, Wisconsin, Illinois, Missouri, Kansas, South Dakota, Indiana, Kentucky, Michigan, Ohio, California, Nevada and Utah. Wintz is affiliated with Wintz Motor Freight, Inc., which is authorized to operate as a motor contract carrier, over irregular routes, in the States of Arizona, California, Colorado, Iowa, Illinois, Indiana, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota and Wisconsin, pursuant to authority granted in MC–144822, MC–F–13360, MC–F–13362, MC–F–13998F, and MC–F–13999F.

Note.—Application for TA has been filed.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

[Docket No. AB–55 (Sub-No. 49F)]

Seaboard Coast Line Railroad Co.—Abandonment—In the City of Belton, Anderson County, SC; Findings

Notice is hereby given pursuant to 49 U.S.C. 10903 that by a Certificate and Decision decided May 15, 1981, a finding, which is administratively final, was made by the Commission, Review Board Number 3, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in *Oregon Short Line R. Co.—Abandonment Goshen*, 360 I.C.C. 91 (1979), the present and future public convenience and necessity permit the abandonment by the Seaboard Coast Line Railroad Company of a portion of a line of railroad known as the Belton Subdivision extending from railroad milepost AKM–0.0 to milepost AKM–2.0, a distance of 2.0 miles, in the City of Belton, Anderson County, SC. A certificate of public convenience and necessity permitting abandonment was issued to the Seaboard Coast Line Railroad Company. Since no investigation was instituted, the requirement of § 1121.38(b) of the regulations that publication of notice of abandonment decisions in the **Federal Register** be made only after such a decision becomes administratively final was waived.

Upon receipt by the carrier of an actual offer of financial assistance, the carrier shall make available to the offeror the records, accounts, appraisals, working papers, and other documents used in preparing Exhibit I (§ 1121.45 of the regulations). Such documents shall be made available during regular business hours at a time and place mutually agreeable to the parties.

The offer be filed with Commission and served concurrently on SCL, with copies to Ms. Ellen Hanson, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this Notice. The offer, as filed, shall contain information required pursuant to § 1121.38(b)(2) and (3) of the regulations. If no such offer is received, the certificate of public convenience and necessity authorizing abandonment shall become effective 30 days from the service date of the certificate.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-101]

Certain Hot Air Corn Poppers and Components Thereof; Investigation

AGENCY: International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on April 16, 1981, and amended April 30, 1981, and on May 13, 1981 under section 337 of the Tariff Act of 1930 (19 U.S.C. section 1337), on behalf of Wear-Ever Aluminum, Inc., 1089 Eastern Avenue, Chillicothe, Ohio 45601. The complaint alleges unfair methods of competition and unfair acts in the importation of certain hot air corn poppers into the United States, or in their sale, by reason of the alleged infringment by said hot air corn poppers of claims 1, 2, 3, and 5 of U.S. Letters Patent 4,178,843. The complaint further alleges that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

The complainant requests that, after full investigation, the Commission issue an order excluding the articles in question from entry into the United States for the term of the patent, except under license.

AUTHORITY: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930 and in § 210.12 of the Commission's Rules of Practice and Procedure.

SCOPE OF THE INVESTIGATION: Having considered the complaint, the U.S. International Trade Commission, on May 13, 1981, ordered that—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, an investigation be instituted to determine whether there is a violation of subsection (a) of section 337 in the unauthorized importation of certain hot air corn poppers and components thereof into the United States, or in their sale, by reason of the alleged infringement by said hot air corn poppers of claims 1, 2, 3, or 5 of U.S. Letters Patent 4,178,843, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States;

(2) For the purpose of this investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is—Wear-Ever Aluminum, Inc., 1089 Eastern Avenue, Chillicothe, Ohio 45601.

(b) The respondents are the following persons, alleged to be in violation of section 337, and are parties upon whom the complaint is to be served:

Yamada Electric Industries, Ltd., 1-30-1 Yahiro, Sumida-Kv, Tokyo, Japan 131
Chiap Hua, 30-32 Kung Zip Street, Kwai Chung N.T., Hong Kong
The West Bend Company, Inc., 400 W. Washington Street, West Bend, Wis. 53095
Sunbeam Corporation, 4600 W. Roosevelt Road, Chicago, Ill. 60650
Maxim Associates Corporation, 9131 Queens Boulevard, Elmhurst, N.Y. 11373
The Stop & Shop Companies, Inc., 393 D Street, Boston Mass. 02101
K-Mart Corporation, 3100 W. Big Beaver Road, Troy, Mich. 48084.

(c) John Milo Bryant, Unfair Import Investigations Division, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, shall be the Commission investigative attorney, a party to this investigation; and

(3) For the investigation so instituted, Donald K. Duvall, Chief Administrative Law Judge, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, shall designate the presiding officer.

The phrase "and components thereof" has been added to paragraph (1) above on the basis of informal investigatory activities by the Commission which revealed that hot air corn poppers of the type alleged to infringe claims 1, 2, 3, and 5 of U.S. Letters Patent 4,178,843 can be imported in component parts as well as entirely assembled units.

Responses must be submitted by the named respondents in accordance with § 210.21 of the Commission's Rules of Practice and Procedure (19 CFR 210.21). Pursuant to §§ 201.16(d) and 210.21(b) of the rules, such responses will be considered by the Commission if received not later than June 11, 1981. Extensions of time for submitting a response will not be granted unless good and sufficient cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the presiding officer and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both a recommended determination and a final determination containing such findings.

The complaint, except for any confidential information contained therein, is available for inspection during official working hours (8:45 a.m. to 5:15 p.m.) in the office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202-523-0161.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-98]

Certain Screw Jacks and Components Thereof; Amendment of Notice of Investigation and Designation of the Investigation as "More Complicated"

AGENCY: International Trade Commission.

ACTION: Amendment of compliant to include an allegation of infringement of an additional patent and designation of the investigation as "more complicated."

SUMMARY: On May 18, 1981, the Commission determined to amend the notice of investigation to include infringement of U.S. Letters Patent 3,977,267 by respondents Seeburn Metal Products, Ltd., and General Motors Corp., as an alleged unfair act or unfair method of competition within the meaning of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337).

On April 13, 1981, complainant Auto Specialties Manufacturing Co. Filed a motion to amend the complaint and notice of investigation to include U.S. Letters Patent 3,977,267. The motion was opposed by respondents Seeburn Metal Products, Ltd., and General Motors Corp.

The original complaint in this investigation, which was instituted on

February 11, 1981, alleged that screw jacks made by Seeburn infringed U.S. Letters Patent 3,862,577 (the '577 patent) because of a pinion gear contained in the imported screw jacks. The '267 patent, which the complainant now wishes to add allegedly covers another component of the screw jacks, the bottom gear.

On May 1, 1981, the Commission Administration Law Judge, Judge Saxon, recommended that the Commission amend the notice to add the '267 patent and also delcare this investigation "more complicated."

The Commission's Action and Order, and Memorandum Opionion in this matter is available for public inspection in the Office of the Secreary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

FOR FURTHER INFORMATION CONTACT:

Jeffrey Neeley, Esq., Office of the General Counsel, U.S. International Trade Commission, 701 E street NW., Washington, D.C. 20436, telephone 202–523–0359.

Issued: May 19, 1981.

By order of the Commission.

BILLING CODE 7020–02–M

[Investigation No. 701–TA–68 (Final)]

Leather Wearing Apparel From Uruguay

Determination

On the basis of the record [1] developed in Investigation No. 701–TA–68 (Final), the Commission unanimously determines, pursuant to section 705(b)(1) of the Tariff Act of 1930 (19 U.S.C. 1671d(b)(1)), that an industry in the United States is threatened with material injury by reason of imports from Uruguay of leather wearing apparel, provided for in item 791.76 of the Tariff Schedules of the United States, which the Department of Commerce has found to be subsidized by the Government of Uruguay. The Commission further determines, pursuant to section 705(b)(4) of the Tariff Act, that material injury would not have been found but for the suspension of liquidation of entries of the subject merchandise.

[1] The record is defined in § 207.2(j) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(j)).

Background

The Commission instituted this investigation effective December 12, 1980, following a preliminary determination by the Department of Commerce that bounties or grants are being provided by the Government of Uruguay with respect to the production or export of leather wearing apparel imported into the United States. Notice of the institution of the Commission's investigation and of the public hearing to be held in connection therewith was duly given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C., and by publishing the notice in the **Federal Register** on January 7, 1981 (46 FR 1848). The hearing was held in Washington, D.C., on March 26, 1981, and all persons who requested the opportunity were permitted to appear in person or by counsel.

Views of the Commission

On the basis of the record developed in investigation No. 701–TA–68 (Final), we determine that an industry in the United States is threatened with material injury by reason of imports from Uruguay of leather wearing apparel,[2] which the Department of Commerce has found to be subsidized by the Government of Uruguay.

The Domestic Industry

In general, the domestic industry is defined as consisting of all domestic producers of a like product or those producers whose total output of the like product constitutes a major portion of domestic production of that product.[3] A like product is a product which is like or in the absence of like, most similar in characteristics and uses to the imported product which is the subject of the investigation.[4] Three sets of like products exist in this investigation—(1) men's and boy's leather coats and jackets, (2) women's and girl's leather coats and jackets, and (3) leather wearing aparel "other than coats and jackets."

Ninety percent of the imported articles subject to this investigation are leather coats and jackets. Also included, but imported in smaller quantities, are leather vests, pants, and shorts. All of these imported articles can be divided into categories which differentiate them on the basis of sex of the wearer and/or the way in which they are worn, i.e., outerwear or non-outerwear. These items are distinguishable from other imported apparel items in that they are all made primarily of leather. Articles of apparel, substantially the same as the imported articles, are produced by numerous firms in the United States.

Evidence gathered during this investigation demonstrates that the purchase of leather wearing apparel tends to be, fundamentally, a fashion decision. In other words, the decision to buy leather wearing apparel tends to be based on style, rather than on utilitarian value. Inherent characteristics of leather such as texture, prestige, durability, smell, and color are among the factors that make the decision to buy leather a style choice. Thus, a wool garment or a vinyl garment will not easily suffice when an article of leather wearing apparel is desired.

The method of manufacturing leather wearing apparel is an important consideration in helping us to understand the nature of the industry. From the record, it is clear that it is a very simple matter to switch from the production of men's leather wearing apparel to the production of women's leather wearing apparel. The same is true for children's wear and for the production of pants vs. vests, jackets vs. coats, etc. Once the investment is made in machines for manufacturing leather apparel, there are no changes that have to be made to produce a particular type of garment nor are there employees who have to be retrained. This is the case because the method of producing leather wearing apparel is a simple one using hand-cut materials which are sewn together from a pattern. For example, when fashion dictates, a women's wear manufacturer can switch production in order to concentrate on men's apparel or production of coats and jackets can be switched to production of vests and pants. The basic change in producing any of these products is the length of the material and the style of the cut.

Of the firms responding to Commission questionnaires, twelve produce men's and boy's coats and jackets, five produce women's and girl's coats and jackets, and five produce leather wearing apparel for both sexes. All leather wearing apparel producers make at least one of the like products in this investigation, and each of these producers is included in the definition of the domestic industry.

The data available from domestic producers distinguish between male and female garments in terms of shipments, unshipped orders, and production. However, producers' data do not break down profit/loss figures and employment for production of male and

[2] The leather wearing apparel under investigation is provided for in item 791.76 of the Tariff Schedules of the United States.

[3] Section 771(4)(A) of the Tariff Act of 1930.

[4] Section 771(10).

female coats and jackets or other garments.

Section 771(4)(D) makes provision for circumstances in which the production process or producer's profits cannot be separately identified for like products, by providing for analysis of the narrowest product line containing the like product. In this case, the lack of available data regarding men's and women's garments in terms of profit/loss and the identity of the production process lead us to the conclusion that the narrowest group of products for analysis is all leather wearing apparel. Therefore our determination in this case is based upon an examination of the impact of these imports on all leather wearing apparel production.

Condition of the U.S. industry

Although the period covered by the present investigation was 1978–1980, past investigations by the Commission [5] have documented the decline of the domestic leather wearing apparel industry since the mid-1970's, a decline so severe that the Commission determined in January 1980 that the industry had suffered "serious injury."[6] Since that time, key indicators of health for this industry—profitability and employment—show further deterioration. The ratio of net operating profit to net sales, already very low in 1978 at 3.1 percent, fell to 1.2 percent in 1980. Employment declined 22 percent since 1978 and average hours worked per week fell to 33 hours.

Other data show that the industry's decline has slowed since 1978 and that in some areas—notably the women's segment—there has been some improvement. The quantity of producer's shipments increased 4 percent from 1978 to 1980, though the value of such shipments declined by 5 percent.[7] Unfilled orders of women's apparel have been trending upward since 1979. Though capacity and capacity utilization are difficult to assess in this fluid industry, we note that capacity has risen since 1978 but utilization of capacity has dropped and is now at a low level, at just over 50 percent.

We view the information pointing to improvement or stabilization in the industry in the light of industry conditions in 1978. During the period 1975–1978, many smaller producers, primarily in the women's segment, switched to the production of other items, became importers, or liquidated their businesses. It is from this shrunken base that "stabilization" or "improvement" of the industry has taken place. With such low profitability and continued declining employment, the industry has not moved far above the troubled position in which we found it in January 1980.

However, the current state of the domestic industry cannot be attributed to subsidized imports of leather wearing apparel from Uruguay. Imports from Uruguay have decreased 81 percent by quantity and 76 percent by value from 1978 to 1980. The share of imports from Uruguay in apparent U.S. consumption also fell off dramatically during this period—from 8.4 percent to 2.8 percent, a decline of 67 percent. Although price comparisons of Uruguayan and U.S.-made leather wearing apparel at both the wholesale and retail levels showed some evidence of underselling, domestic producers could not provide the Commission with evidence of sales lost by them to imports of leather wearing apparel from Uruguay.

The domestic leather wearing apparel industry is clearly susceptible to import-related injury, but for the timeframe covered by this investigation, the causal link necessary for an affirmative finding of present injury was absent.

Threat of Material Injury by Reason of Subsidized Imports

As the Senate Finance Committee report on the Trade Agreements Act of 1979 makes clear, an affirmative finding on the question of threat of material injury "must be based upon information showing that the threat is real and injury is imminent, not a mere supposition or conjecture."[8] The report of the Committee on Ways and Means of the House of Representatives advises that in terms of possible threat of material injury,

> demonstratable trends—for example, the rate of increase of the subsidized or dumped exports to the U.S. market, capacity in the exporting country to generate exports, the likelihood that such exports will be directed to the U.S. market taking into account the availability of other export markets, and the nature of the subsidy in question (i.e., is the subsidy the sort that is likely to generate exports to the United States) will be important.[9]

We have focused on these four factors in making our determination.

The rate of increase of subsidized exports.—The period 1975 to 1978 saw U.S. imports from Uruguay increase in value by 305 percent, as that country rose to third largest foreign supplier of leather wearing apparel in 1977 and fourth largest in 1978.[10] In 1978, a countervailing duty investigation on imports of leather wearing apparel from Uruguay by the Commission resulted in a unanimous affirmative determination.[11] Data for the period 1975 to 1978 demonstrated the capability of Uruguayan producers, aided by subsidies, to increase rapidly their export of these articles to the United States at competitive prices.

It is this data on Uruguay's exports to the United States in 1975–1978 which we consider most relevant for assessing Uruguay's future performance in the U.S. market. The most recent period, 1979–1980, and especially the period following the reinstatement of subsidies by the Government of Uruguay on April 16, 1980, is not helpful in analyzing export trends because it represents a highly aberrational market situation. As a general proposition, the methodology employed would be to compare export trends from Uruguay when subsidies were *not* in effect (calendar year 1979 and January–March 1980) with export trends since the reinstatement of subsidies on April 16, 1980, and further, to compare such trends with those of other major foreign suppliers of leather wearing apparel to the U.S. market. But such an approach does not take account of the important external factors that affected the level of Uruguay's exports in 1980. Most notably, pending actions of the U.S. government throughout the year raised uncertainty as to access to the U.S. market for leather wearing apparel.[12] Because of these pending actions and the weak demand for leather wearing apparel, 1980 was not an opportune time for Uruguayan producers to gear up for exports to the

[10] Report, p. A–10.

[11] U.S. International Trade Commission Publication 883, *Leather Wearing Apparel from Uruguay*, April 1978. Chairman Alberger and Commissioner Bedell voted in the affirmative in that investigation. Vice Chairman Calhoun and Commissioner Stern were not members of the Commission at that time.

[12] On January 24, 1980, the Commission unanimously determined that an industry in the United States was being injured by the importation of leather coats and jackets for men and boys and women and girls and recommended relief. On March 24, 1980, the Presidnet denied import relief. In late July 1980, Congress attempted to override the President's decision to deny import relief. Although the Senate Committee on Finance voted to override on August 21, 1980, the attempt was defeated on September 10, 1980, when the House Subcommittee on Trade of the Ways and Means Committee rejected the resolution by a vote of 10 to 9.

United States as they did in 1975–1978. In fact, uncertainty of market access and the demand situation affected export trends from all countries in 1980. Comparisons between Uruguayan performance in the U.S. market with or without subsidies in place—no matter which time periods are utilized [13]—are simply not appropriate given the effects of external factors on import performance in the U.S. leather wearing apparel market in 1980. Export data for Uruguay from 1975 to 1978 show rapid increases in exports and U.S. market penetration when Uruguayan manufacturers/exporters enjoyed both subsidies and unrestricted access to the U.S. market. Assuming that Uruguay's export capability and interest in exporting to the United States have not changed since the 1975–1978 period, it is Uruguay's performance in that period that we would expect to see repeated if U.S. government actions were not on the horizon and the market picked up as is expected in the fall of 1981. The Commission recognizes that such increased quantities of imports threaten injury to the domestic industry in its present weak condition.

Capacity in Uruguay to generate exports.—Data on present production and capacity of the Uruguayan leather wearing apparel industry are unavailable. In lieu of such data, respondents suggested that exports could approximate production, since over 90 percent of production in Uruguay is exported.[14] As noted above, analysis of Uruguay's past export performance shows imports of leather wearing apparel from Uruguay increased 305 percent from 1975 to 1978, as Uruguay rose from seventh largest foreign supplier of those items to fourth largest. Imports from Uruguay declined in both 1979 and 1980, but that country remains the seventh largest foreign supplier overall and the second largest supplier of women's leather coats and jackets to the United States.[15] As exports to the U.S. market waned in 1978–1980, exports to other markets increased somewhat, but total exports have dropped from 1978 to 1980.[16]

Although exports, and, presumably, productive capacity of leather wearing apparel facilities in Uruguay declined from the 1.3 million units produced for export in 1977, we note that idle productive capacity in this industry does not represent significant fixed costs for maintenance, disruption of production runs, or even long-term underutilization of labor, as it might in more capital intensive, technologically-oriented industries.[17] The production of leather wearing apparel in Uruguay, or in any country, is a relatively simple 2-step process of hand-cutting and sewing leather using inexpensive sewing machines.[18] In addition, the production of leather wearing apparel is a labor intensive process which does not require highly skilled production workers.[19] Finally, Uruguay possesses a large indigenous supply of hides and skins. Leather comprises at least 50 percent of the cost of production of the garment.[20] Although labor and other inputs into the cost of production in Uruguay are trending upward, the price of hides and skins has followed world prices downward, rather than Uruguay's general high inflation rate.

In sum, the past export performance of the Uruguayan leather wearing apparel industry, coupled with low barriers to entry (i.e., a simple production process, and an abundance of the principal raw material in that country), all point to the continued capability of the industry to increase exports rapidly to the United States.

Likelihood exports will be directed to the United States—A related question is whether Uruguayan manufacturers/exporters would focus on the United States as a major market for export sales given favorable conditions. An examination of data on total Uruguayan exports during 1977–1980 shows exports to the United States declining and exports to countries other than the United States increasing as a share of total exports.[21] The data also show an ability of Uruguayan exporters to shift markets rapidly in response to favorable market conditions as well as to the status of the Uruguayan export incentives.[22] The ability to shift markets with relative ease, coupled with such factors as the relatively low tariff and non-tariff barriers on leather wearing apparel products maintained by the United States,[23] the size of the U.S. market, desirability of the U.S. dollar as a reserve currency, and established market contacts, all point to the continued desirability of the United States as a major export market for the Uruguayan leather wearing apparel industry.

The nature of the subsidy.—Section 771(7)(E)(i) of the Tariff Act of 1930 states:

> Nature of Subsidy.—In determining whether there is a threat of material injury, the Commission shall consider such information as may be presented to it by the administering authority as to the nature of the subsidy (particularly as to whether the subsidy is an export subsidy inconsistent with the Agreement) provided by a foreign country and the effects likely to be caused by the subsidy.

Those subsidies that are "inconsistent with the Agreement" within the meaning of section 771(7)(E) are found in the Illustrative List of Export Subsidies attached as an annex to the Code on Subsidies/Countervailing Measures. In this investigation two of the three subsidies determined by Commerce to exist are among those prohibited by the Illustrative List. The subsidies found by the Commerce Department were the reintegro program, a tax exemption program, and a noncollection of social security taxes.

Under the reintegro program, the Government of Uruguay grants tax certificates to exports as a fixed percentage of the f.o.b. value of the exported item. These certificates are transferable and may be applied against obligations of both direct and indirect taxes. The reintegro program is inconsistent with the agreement in that it constitutes a subsidy described by items (a) and (e) of the Illustrative List. Item (a) prohibits—

> The provision by governments of direct subsidies to a firm or an industry contingent upon export performance.

Item (e) forbids—

> The full or partial exemption, remission, or deferral specifically related to exports, of direct taxes or social welfare changes paid or payable by industrial or commercial enterprises.

---

[13] The precise choice of time periods was debated at the Commission's hearing and in written submissions. Any conclusions that may be drawn from an analysis of month-to-month data for 1980 must rest on problematical assumptions concerning the timing and response of Uruguayan manufacturers/exporters to the reinstatement of subsidies, and most importantly, does not take into account the external factors noted in the text above. In any case, use of month-to-month import data is of questionable value here because such data of the Commerce Department and the Customs Service are subject to reporting inconsistencies. Examination of actual import entries from Uruguay for 1980 reveal that as much as 40 percent of the entries reported to have entered the U.S. in any one month actually entred in other months. (See Report, pp. A–33–35 and prehearing statement of petitioner, pp. 12–16, and table 6; post-hearing statement of respondents, pp. 1–4, and tables 1 and 2.)

[20] Transcript of the hearing, p. 201.

[21] Report, p. A–36.

[22] Ibid. Table 16, p. A–36, shows Uruguayan exports to countries other than the United States decreased from 41 percent of total exports in 1977 to 12 percent in 1978, but then increased, up to 45 percent of total exports, in 1979.

[23] Report, p. A–40.

The tax exemption program exempts from taxation a fraction of the value-added portion of a company's export income, after expenses and before taxes. The tax exemption is also of the type described in item (e).

The Congress considered the export subsidies found on the Illustrative List to be more likely to threaten material injury than domestically-oriented subsidy programs. The threat from the Illustrative-List subsidies is greater than from purely domestic subsidies because they are directed specifically at the export market. In this case, the subsidies that were reimposed had previously been offset with regard to the U.S. market. Thus, not only are the renewed subsidies directed at the export market, but specifically at the U.S. market.

Conclusion

Information gathered in this investigation as to all four demonstrable trends suggested by the Congress supports our affirmative finding of threat of material injury to the U.S. industry by reason of subsidized imports of leather wearing apparel from Uruguay.

Additional Finding Under Section 705(b)(4)(B)

Section 705(b)(4)(B) of the Tariff Act of 1930 states:

> If the final determination of the Commission is that there is no material injury but that there is threat of material injury, then its determination shall also include a finding as to whether material injury by reason of imports of the merchandise with respect to which the administering authority has made an affirmative determination under subsection (a) would have been found but for any suspension of liquidation of entries of that merchandise.

The effect of an affirmative finding that material injury would have been found but for the suspension of liquidation of duties is found in section 706(b)(2), which states that the entries of the merchandise subject to suspension of liquidation would then be subject to countervailing duties. If the Commission finds in the negative, countervailing duties are not imposed for the period of suspension of liquidation.

We have found that there would have been no present injury by reason of subsidized imports from Uruguay even if suspension of liquidation had not occurred. Liquidation in the present case was suspended from December 17, 1980, to February 27, 1981. The data show that the value of imports from Uruguay entering the United States from mid-December 1980 through January 1981 was actually higher than in the corresponding period of 1979–1980, but substantially lower than in 1977–1978 or 1978–1979. Although it may be argued that the 1980–1981 figures would have been even higher had suspension of liquidation not taken place, no credible evidence has been produced to persuade us of that. More imports might well have come in, but we do not believe they would have been in sufficient quantity to trigger a finding of present material injury by reason of such imports.

Issued: May 13, 1981.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

Advisory Committee on Construction Safety and Health; Meeting

Notice is hereby given that the Advisory Committee on Construction Safety and Health, established under Section 107(e)(1) of the Contract Work Hours and Safety Standards Act (40 U.S.C. 333) and Section 7(b) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 656) will meet on June 10–12, 1981 in Room N5437, Frances Perkins Department of Labor Building, Washington, D.C. 20210. The meeting is open to the public and will begin at 9:00 a.m.

The agenda for this meeting will include a discussion of OSHA–MSHA jurisdiction related to construction, a review of accident statistics in the construction industry, a discussion of labor-management committees, a discussion of employee access to medical records in the construction industry, a reveiw of OSHA activities, a discussion of proposed OSHA program directives that are relevant to the construction industry, and a general discussion of construction safety and health matters.

Written data, reviews or arguments may be submitted, preferably with 20 copies, to the Division of Consumer Affairs. Any such submissions received prior to the meeting will be provided to the members of the Committee and will be included in the record of the meeting.

Anyone wishing to make an oral presentation should notify the Division of Consumer Affairs before the meeting. The request should state the amount of time desired, the capacity in which the person will appear, and a brief outline of the content of the presentation.

Oral presentations will be scheduled at the discretion of the chairman depending on the extent to which time permits. Communications may be mailed to: Ken Hunt, Committee Management Officer, Office of Information and Consumer Affairs, OSHA, U.S. Department of Labor, Third Street and Constitution Avenue, N.W., Room N3635, Washington, D.C. 20210, phone (202) 523–8024.

Materials provided to members of the Committee are available for inspection and copying at the above address.

Signed at Washington, D.C. this 15th day of May, 1981.

Thorne G. Auchter,

Assistant Secretary of Labor.

BILLING CODE 4510-26-M

Office of Pension and Welfare Benefit Programs

Proposed Class Exemption for Life Insurance Company Discretionary Asset Management; Hearing

By notice published in the **Federal Register** on December 30, 1980 (45 FR 85849), the Department of Labor (the Department) proposed a class exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 and from certain taxes imposed by the Internal Revenue Code of 1954 for discretionary asset management services performed by life insurance companies.

A hearing on the proposed class exemption has been requested. Accordingly, a public hearing will be held on June 19, 1981 beginning at 9:00 a.m. in Room N5437A and B of the Department of Labor Building, 200 Constitution Avenue, NW., Washington, D.C. Any interested person who wishes to be assured of the opportunity to present oral comments at the hearing should submit by 3:30 p.m., June 15, 1981: (1) a written request to be heard, and (2) an outline (preferably five copies) of the topics to be discussed, indicating the time to be allocated to each topic. The request to be heard and accompanying outline should be submitted to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216, Attention: Discretionary Asset Management Hearing. Individuals who do not file written comments regarding the proposed class exemption may nonetheless request to make oral comments at the hearing.

The Department will prepare an agenda indicating the order of

presentation of oral comments and the time allotted to each person making oral comments. Information about the agenda may be obtained on or after June 17, 1981 by telephoning William A. Schmidt, Plan Benefits Security Division, Office of the Solicitor, (202) 523-9592 (not a toll free number). Individuals not listed in the agenda will be allowed to make oral comments at the hearing to the extent time permits. Those individuals who make oral comments should be prepared to answer questions regarding their comments.

A written record of the hearing will be made.

Signed at Washington, D.C., this 15th day of May 1981.

Ian D. Lanoff,

Administrator, Pension and Welfare Benefit Programs, Labor-Management Services Administration, Department of Labor.

BILLING CODE 4510-29-M

Office of the Secretary

[Secretary of Labor's Order 1-81]

Delegation of Authority—Employment Standards Programs

May 15, 1981.

1. *Purpose.* To delegate authority and assign responsibility to the Deputy Under Secretary for Employment Standards.

2. *Background.* Heretofore authority for carrying out activities in connection with the administration of employment standards programs had been delegated to an Assistant Secretary for Employment Standards. A Deputy Under Secretary for Employment Standards position has been established to replace the Assistant Secretary for Employment Standards position. Consistent with that decision it is appropriate to delegate authority previously vested in the Assistant Secretary to the Deputy Under Secretary. That is accomplished by this Order.

3. *Delegation of Authority and Assignment of Responsibility.* The Deputy Under Secretary for Employment Standards is hereby delegated authority and assigned responsibility previously delegated to the Assistant Secretary for Employment Standards for carrying out the employment standards policies, programs, and activities of the Department of Labor. Until specifically modified or canceled by the Deputy Under Secretary, any authority redelegated by the Assistant Secretary remains in effect.

4. *Effective Date.* This Order is effective retroactive to April 28, 1981, and remains in effect until the various Orders that delegate authority to the Assistant Secretary are amended, superseded or canceled.

Raymond J. Donovan,

Secretary of Labor.

BILLING CODE 4510-23-M

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for worker adjustment assistance issued during the period May 11-15, 1981.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met.

(1) that a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) that sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determination

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-9319; General Steel Industries, Inc., National Roll Div., Avonmore, PA

TA-W-9373; Universal Prototype, Inc., Fraser, MI

TA-W-9390; Oakland Tool and Mfg. Co., Fraser, MI

TA-W-9318; U.S. Steel Corp., Homestead Works, Homestead, PA, Rankin, PA, and Saxonburg, PA

TA-W-9785; Luxaire, Inc., Elyria, OH

TA-W-9995; American Gage and Mfg. Co., Wauseon, OH

TA-W-9772; Joseph Love, Inc., College Point, NY

TA-W-9749; SGL Modern Creative, Sculpta Div., Elmwood Park, NJ

TA-W-9472; Alma Plastics Co., Polymid Plant, Linwood, MI

TA-W-9419; A.P. Parts Corp., Questor Shock Absorber Systems Div., Dyersburg, TN

TA-W-9339; General Steel Industries, Inc., Simplicity Engineering Co. Div., Durand, MI

TA-W-9304; Goodyear Tire and Rubber Co., Topeka, KS

TA-W-9303; G&L Mfg. Co. Inc., Boston, MA

TA-W-9003; Orbit Tool and Die Corporation, Springfield, NJ

TA-W-9001; Federal-Mogul Corp., St. Johns, MI

TA-W-9990; Northern Die and Mold Co., Inc., Bay City, MI

TA-W-9683; Redall Industries, Yale, MI

TA-W-9640; Snow Screw Products, Inc., Marlette, MI

TA-W-9508; American Cyanamid Co., Organic Chemicals Div., Bound Brook, NJ

TA-W-9428; Acheson Colloids Co., Div. of Acheson Industries, Inc., Port Huron, MI

TA-W-10,500; Plas-Tech, Inc., Warren, MI

TA-W-10,467; Lexington Metal Products Co., Lexington, TN

TA-W-10,276; Hancock Products, Inc., Detroit, MI

TA-W-9023; B.F. Goodrich Co., Port Neches, TX

TA-W-9453; Zollner Corp., Fort Wayne, IN

TA-W-10,022 & 10,460; Briggs and Stratton Corp., Lock and Key Division, Glendale, WI and Perry, GA

TA-W-10,023; D.A.B. Industries, Inc., Bellefontaine, OH

TA-W-11,476; TRW, Inc., Electronic Components Div., Chicago, IL

TA-W-10,287; Industrial Metals Corporation, Centerville, TN

TA-W-12; Universal Steel, Inc., Kokomo, IN

Investigation revealed that criterion (3) has not been met. Aggregate U.S. imports of iron and steel scrap are negligible

TA-W-10,400; International Harvester Co., Truck Div., Fort Wayne, IN

Investigation revealed that criterion (3) has not been met. Aggregate imports of heavy trucks, utility vehicles, four wheel drive pick-up trucks and truck station wagons did not contribute importantly to worker separations at the firm.

TA-W-10,353; International Harvester Co., Truck Div., Shadyside, OH

Investigation revealed that criterion (3) has not been met.

TA-W-10,242; International Harvester Co., Component Div., Indianapolis, IN

Investigation revealed that criterion (3) has not been met.

TA–W–9544; Bethlehem Steel Corp., Vernon, CA

Investigation revealed that criterion (3) has not been met. With respect to carbon and alloy steel bars, a survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

With respect to rebars, the investigation revealed that U.S. imports did not increase as required for certification.

TA–W–8986; Union Railroad Co., East Pittsburgh, PA

Investigation revealed that the Union Railroad Co. dose not produce an article as required under Section 223 of the Act.

TA–W–9396; A & F Leathers, Inc., Boston, MA

Investigation revealed that criterion (3) has not been met. Aggregate U.S. imports of leather coats and jackets did not increase as required for certification.

TA–W–9292, 9308, and 9769; Bessemer and Lake Erie Railroad Co., Pittsburgh, PA

Investigation revealed that criterion (3) has not been met. The Bessemer and Lake Erie Railroad Co. does not produce an article within the meaning of Section 223 of the Act.

TA–W–10,316; Lewiston Forest Products, Lewiston, MI

Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm. Furthermore, U.S. imports of wooden pallets are negligible.

TA–W–9522 and 10,978; Firestone Steel Products Co., Henderson, KY and Riverview (Wyandotte), MI

Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm. Furthermore, company imports decreased absolutely from fiscal year 1979 to fiscal year 1980 and U.S. imports decreased absolutely and relatively from 1978 to 1979 and decreased absolutely from 1979 to 1980.

TA–W–11,557; U.S. Steel Corporation, Pittsburgh Steel Service Center, Pittsburgh, PA

Investigation revealed that criterion (3) has not been met. An insignificant portion of the total volume of steel handled by the Pittsburgh Steel Service Center originates at U.S. Steel facilities whose workers are currently certified as eligible to apply for adjustment assistance benefits.

TA–W–12,082 and 12,083; American Hoist & Derrick Co., Steelcasting Div. and Industrial Brownhoist Div., Bay City, MI

Investigation revealed that criterion (3) has not been met. Aggregate U.S. imports of cranes did not increase as required for certification.

TA–W–12,170; Pacific-Columbia Mills, Richland Plant, Columbia, SC

Investigation revealed that criterion (3) has not been met. Aggregate U.S. imports of finished fabric did not increase as required for certification.

TA–W–11,831 and 12, 514; Chrysler Corp., Export-Import Div., Brownstown, MI and Detroit, MI

Investigation revealed that criterion (3) has not been met. The two facilities were more closely integrated into foreign productin than domestic production of automobiles and trucks during the 1978–1980 period.

TA–W–8948; Robert Lewis, Inc., West Long Branch, NJ

Investigation revealed that criterion (3) has not been met. Aggregate U.S. imports of leather coats and jackets decreased each year from 1978 through 1980.

TA–W–11,516; Sharon Steel Corp., Brainard Strapping Div., Warren, MI

Investigation revealed that criterion (3) has not been met. With respect to steel strapping, a survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm. With respect to galvanized steel sheet, which includes coils, U.S. imports did not incease as required for certification.

TA–W–9538–9543 and 9546–9552; Duplan Corporation, Rochester Button Division, Rochester, NY, Wellsville, NY, South Boston, VA, Mckenney, VA, Kenbridge, VA, New York (519 8th Ave.), NY, New York (1290 Ave. of the Americas), NY, Atlanta, GA, Pikesville, MD, Charlotte, NC, Chicago, IL, Los Angeles, CA, and Bala-Cynwyd, PA

Investigation revealed that criterion (3) has not been met. The aggregate U.S. imports of buttons declined in 1980 compared to 1979 and a survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

Affirmative Determinations

TA–W–9644; Clothing Factory, Inc., Tamaqua, PA

A Certification was issued covering all workers separated on or after May 14, 1979 and on or before September 15, 1979.

TA–W–9660; Unelco Electronics Corporation, Columbia, MD

A Certification was issued covering all workers of the firm separated on or after July 14, 1979.

I hereby certify that the aforementioned determinations were issued during the period May 11–15, 1981. Copies of the determinations are available for inspection in Room S–5314, U.S. Department of Labor, 200 Constitution Ave., NW, Washington, D.C. 20210 during normal working hours or will be mailed to persons who write to the above address.

Dated: May 19, 1981.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 81–15410 Filed 5–21–81; 8:45 am]

BILLING CODE 4510–28–M

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to Section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject

matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 1, 1981.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 1, 1981.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 18th day of May 1981.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-28-M

Procedures for Internal Handling of Complaints of Judicial Misconduct; Establishment of Advisory Committee

AGENCY: Office of Administrative Law Judges, Office of the Secretary, Labor.

ACTION: Notice of Establishment of Advisory Committee.

SUMMARY: Notice is given of the establishment of Advisory Committee to which the Chief Administrative Law Judge may refer complaints of judicial misconduct on the part of Department of Labor Adminstrative Law Judges.

EFFECTIVE DATE: May 22, 1981.

FOR FURTHER INFORMATION CONTACT: Associate Chief Judge Everette E. Thomas, Office of Administrative Law Judges, U.S. Department of Labor, 1111 20th Street, N.W., Washington, D.C. 20036, (202) 653-5057.

Procedures For Internal Handling of Complaints of Judicial Misconduct

Purpose and Scope

Advisory committees are established to conduct informal inquires and to consider and recommend appropriate action regarding complaints of judicial misconduct.

Procedures

All references to "the Advisory Committee" or "the Committee" in the protocol that follows shall apply to the (headquarters) Advisory Committee and the Regional Advisory Committees.

1. On receipt of one or more written complaints of judicial misconduct on the part of any DOL Administrative Law Judge, the Chief Judge, in his discretion, may refer such complaint(s) for limited informal inquiry to an Advisory Committee of three (3) members appointed by him for the particular inquiry from a panel of six judges elected for a term of one year by the corps of DOL Administrative Law Judges. The affected judge shall have the right to object to any one or more members of the Committee, in which case such member(s) shall be replaced by one or more judges elected by the Chief Judge from the elected panel.

Judges in the San Francisco and New Orleans Offices shall elect a panel of three (3) judges from their respective offices from whom the Chief Judge shall, in appropriate circumstances and in the manner described above, appoint two (2) judges to serve as a Regional Advisory Committee to function with respect to complaints of judicial misconduct on the part of Administrative Law Judges in those offices.

Complaints of judicial misconduct on the part of any Administrative Law Judges in regional or satellite offices other than San Francisco and New Orleans shall be referred, as appropriate, to the (headquarters) Advisory Committee.

2. Only those written complaints from parties or their representatives alleging judicial misconduct shall be referred to the Advisory Committee. Such complaints shall be referred in their original form without comment.

3. The function of the Committee shall be advisory only. Its inquiry and report in each instance shall be confined to the specific matter referred to it and shall contain no evaluation of the performance, competence, or qualifications of the affected judge.

4. A recommendation by the Committee that no further action be taken will be adopted by the Chief Judge unless he finds that exceptional circumstances warrant another course of action.

5. In making inquiry, the Committee shall be limited to discussion of the matter with the affected judge and to examination of relevant transcripts and other documents on file with the agency, unless the affected judge requests or permits the Committee to make contact with any one or more third parties.

6. Referrals to the Committee, the proceedings and deliberations of the Committee, and its advice, shall be confidential. A copy of the Committee's report and recommendations to the Chief Judge shall be furnished concurrently to the affected judge; no other copies shall be made or retained by the Committee or any of its members.

7. No inference shall be drawn from the refusal of any judge to discuss any allegations of misconduct with the Advisory Committee.

8. No Associate Chief Judge and no Deputy Chief Judge shall be eligible to serve on any Advisory Committee.

Notice of proposed rule making has not been published in the **Federal Register** as the procedure established herein is a rule of agency practice [5 U.S.C. 553(b)].

Signed at Washington, D.C. this 18th day of May 1981.

Nahum Litt,

Chief Judge.

Senior Executive Service; Appointment and Reappointment of Members to the Performance Review Board

This Notice amends Department of Labor Notice published in 44 FR 55240, dated September 25, 1979, listing Department of Labor members of the Performance Review Board of the Senior Executive Service.

The following employees are hereby appointed to two-year terms commencing May 1, 1981, as members of the Performance Review Board of the Senior Executive Service:

Janet L. Norwood (Reappointment)
Thorne G. Auchter
Charles E. Pugh (Reappointment)
Thomas J. Shepich
Albert H. Ross
T. James Walker
Alfred M. Zuck (Reappointment)

Janet L. Norwood will serve as Chairperson from May 1, 1981 through April 30, 1982.

For further information contact: Ms. Betty Bolden, Acting Director of Personnel Management, Room C5526, Department of Labor, Frances Perkins Building, Washington, D.C. 20210.

Signed at Washington, D.C. this 13th day of May 1981.

Raymond J. Donovan,

Secretary of Labor.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Inter-Arts Panel (Folk Arts Section); Meeting

Pursuant to section 10 (a) (2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Inter-Arts Panel (Folk Arts Section) to the National Council on the Arts will be held on June 11-12, 1981, from 8:30 a.m.-10:00 p.m., and June 13, 1981, from 9:00 a.m.-5:30 p.m., in room 1422 of the Columbia Plaza Office Complex, 2401 E St., NW., Washington, D.C. 20506

A portion of this meeting will be open to the public on June 13, 1981, from 8:30 a.m.-11:00 a.m. to discuss policy.

The remaining sessions of this meeting on June 11-12, 1981, from 8:30 a.m.-10:00 p.m. and June 13, 1981, from 11:00 a.m.-5:30 p.m. are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the Federal Register of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c) (4), (6) and 9(b) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634-6070.

John H. Clark

Director, Office of Council and Panel Operatons, National Endowment for the Arts.

BILLING CODE 7537-01-M

NATIONAL FOUNDATION FOR THE ARTS AND THE HUMANITIES

Humanities Panel; Meetings

AGENCY: National Endowment for the Humanities.

ACTION: Notice of meetings.

SUMMARY: Pursuant to the provision of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that the following meeting of the Humanities Panel will be held at 806 15th Street, NW., Washington DC 20506:

Date: June 15-16, 1981.
Time: 9:00 a.m. to 5:30 p.m.
Room: 807.
Program: This meeting will review applications submitted for Youth Projects Planning and Pilot Grants, Division of Special Programs, for projects beginning after October 1, 1981.
Date: June 18-19, 1981.
Time: 9:00 a.m. to 5:30 p.m.
Room: 807.
Program: This meeting will review applications submitted for Youth Projects Planning and Pilot Grants, Division of Special Programs, for projects beginning after October 1, 1981.

The proposed meetings are for the purpose of Panel review, discussion, evaluation and recommendation of applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. Because the proposed meetings will consider information that is likely to disclose,

(1) trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and

(3) information the disclosure of which would significantly frustrate implementation of proposed agency action;

Pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that these meetings will be closed to the public pursuant to subsections (c) (4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information about these meetings can be obtained from Mr. Stephen J. McCleary, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, DC 20506, or call (202) 724-0367.

Stephen J. McCleary,

Advisory Committee, Management Officer.

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Environmental Biology, Subcommittee on Long-Term Ecological Research; Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Subcommittee on Long-Term Ecological Research of the Advisory Committee for Environmental Biology.
Date and time: June 15 and 16, 1981; 8:30 a.m. to 5:00 p.m. each day.
Place: Room 338, National Science Foundation, 1800 G St. NW, Washington, D.C. 20550.
Type of meeting: Closed.
Contact person: Dr. James T. Callahan, Associate Program Director, Ecosystem Studies Program, (202) 357-9596, Room 336, National Science Foundation, Washington, D.C. 20550.
Purpose of subcommittee: To provide advice and recommendations concerning support for research in systematic biology.
Agenda: To review and evaluate research proposals and projects as part of the selection process of awards.
Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

Place: Building One Conference Room Main Quad, Stanford University Stanford, California

Date: Friday, June 19, 1981

Time: 10:00 a.m. to 5:00 p.m.

Type of Meeting: Open

Contact Person: Ms. Jeanne Hudson, Executive Secretary of the NSF Advisory Council, National Science Foundation, Room 518, 1800 G Street, N.W., Washington, D.C. 20550. Telephone: 202/357–9433

Purpose of Task Group: The purpose of the Task Group, composed of members of the NSF Advisory Council, is to provide the full Advisory Council with a mechanism to consider numerous issues of interest to the Council that have been assigned by the National Science Foundation.

Summary Minutes: May be obtained from the contact person at above stated address.

Agenda: The Task Group is asked to review current patterns of NSF salary support across scientific and engineering disciplines; to consider whether NSF should change its policy on allowance of faculty salaries; to address the need for and the impact of policies and practices in program areas that differ from NSF-wide

policies and practices; and to suggest ways current NSF policy might be modified.

M. Rebecca Winkler,

Committee Management Coordinator.

May 19, 1981.

BILLING CODE 7555-01-M

NUCLEAR SAFETY OVERSIGHT COMMITTEE

Open Meeting

May 18, 1981.

The Nuclear Safety Oversight Committee (NSOC) will meet on Monday, June 8, 1981 from 9:00 am to 12:30 pm and 2:00 pm to 5:00 pm at the General Services Administration at 18th and F Streets, N.W., in Conference Room 5141 A.

The Committee was established by Executive Order 12202 on March 18, 1980, in response to the recommendations of the President's Commission on the Accident at Three Mile Island (the Kemeny Commission). Generally, the Committee is responsible for monitoring the progress of the utilities and their suppliers, the Nuclear Regulatory Commission, other federal agencies, and state and local authorities in implementing the Kemeny Commission's recommendations and in improving the safety of nuclear power. The Committee will report periodically to the President.

Thus far the Committee has held eight meetings. The Committee has heard testimony and had discussion in a number of areas including:

—The nature of the Committee's responsibilities as set forth in Executive Order 12202;

—The Nuclear Regulatory Commission's (NRC) "Action Plan Developed as a Result of the TMI-2 Accident," designated NUREG-0660 and available through the Document Management Branch, Division of Technical Information and Document Control, NRC, Washington, D.C. 20555;

—The procedure utilized in the federal decision-making process as it relates to nuclear safety, and public and private participation;

—FEMA's Report to the President (June 1980), and procedures for emergency planning;

—The status of generic safety issues; the analysis and evaluation of operational data;

—The NRC budget and allocation of its staff resources to implement the "Action Plan" and how that will affect other NRC functions;

—NRC's inspection and enforcement program;

—Backfitting and standardization of plant design;

—The regulatory relationship between FEMA and NRC;

—Nuclear safety research and training programs;

—Quality control in plant design;

—Labor/management problems, and the union's role in safety programs;

—Human factors in nuclear power safety including training, contol room design, balance of plant, and ANSI standards;

—Action Plan provisions for human factors and training, and certification of operators;

—Release of Iodine-131 as a consequence of nuclear power plan operations;

—Problems of plant releases at nuclear power plants;

—Planning of safety systems and balance of plant;

—Issues concerning the TMI-1 restart hearings and their relationship to the TMI-2 accident;

—Regulatory licensing and scientific and technical uncertainty—the case of hydrogen;

—Panel discussion on nuclear power operator training.

During the next meeting the Committee will receive testimony and, when appropriate, written materials and documents, concerning the following matters:

—The purpose and implications of proposed operating license amendments to the Atomic Energy Act;

—The relationship between operating license procedures and nuclear safety;

—The role of public participation in nuclear power plant licensing.

Testimony on these matters will be received from a number of individuals specifically invited by the Committee.

The meeting will be open to public observation. Written comments or statements may be submitted at anytime before or after the meeting and should be related to the substantive matters identified above. Approximately 40 seats will be available for the public on a first come, first served basis. The Committee meeting will be recorded and the transcript may be examined in the Committee's office at 1133 15th Stree, N.W., Suite 307, Washington, D.C.

For further information contact Margo von Kaenel at (202) 653-8468.

Margo W. von Kaenel,

Executive Assistant.

BILLING CODE 6820-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-313]

Arkansas Power & Light Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 55 to Facility Operating License No. DPR-51, issued to Arkansas Power & Light Company (the licensee), which revised the Technical Specifications (TSs) for operation of Arkansas Nuclear One, Unit 1 (ANO-1) located in Pope County, Arkansas. The amendment is effective as of its date of issuance.

The amendment modifies the ANO-1 TSs to require the ANO-1 purge valves be closed whenever the reactor coolant system temperature is equal to or greater than 200°F. This amendment also updates pages i and ii of the TS Table of Contents.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the licensee's application dated April 2, 1979, as supplemented by letter dated October 31, 1980, (2) Amendment No. 55 to License No. DPR-51, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Arkansas Tech University, Russellville, Arkansas. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 15th day of May 1981.

For the Nuclear Regulatory Commission.

John F. Stolz,

Chief, Operating Reactors Branch No. 4, Division of Licensing.

[FR Doc. 81-15394 Filed 5-21-81; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-295 and 50-304]

Commonwealth Edison Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 64 to Facility Operating License No. DPR-39, and Amendment No. 61 to Facility Operating License No. DPR-48 issued to the Commonwealth Edison Company (the licensee), which revised Technical Specifications for operation of Zion Station, Units 1 and 2 (the facilities) located in Zion, Illinois. The amendments are effective as of the date of issuance.

The amendments revise the Technical Specifications limits for total nuclear peaking factor (F_Q) for Zion Units 1 and 2 under base load and load follow modes of operation. The revised F_Q is 2.17.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated October 22, 1979, as supplemented January 8, 1980, April 10 and May 5, 1981, (2) Amendment Nos. 64 and 61 to License Nos. DPR-39 and DPR-48, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Zion-Benton Public Library District, 2600 Emmaus Avenue, Zion, Illinois 60099. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 11th day of May 1981.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

[FR Doc. 81-15395 Filed 5-21-81; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-254]

Commonwealth Edison Co. and Iowa-Illinois Gas & Electric Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 71 to Facility Operating License DPR-29 issued to Commonwealth Edison Company and Iowa-Illinois Gas and Electric Company, which revised the Technical Specifications for operation of the Quad Cities Nuclear Power Station, Unit No. 1, located in Rock Island County, Illinois. The amendment becomes effective as of the date of issuance.

The amendment extends the MAPLHGR curve for a mixed oxide fuel bundle to 50,000 MWD/ST planar average exposure. This will enable the completion of a high burnup fuel experiment in the present core.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendment.

For further details with respect to this action, see (1) the application for amendment dated November 13, 1980, (2) Amendment No. 71 to License No. DPR-29, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Moline Public Library, 504 17th Street, Moline, Illinois, for Quad Cities Unit No. 1. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 13th day of May 1981.

For the Nuclear Regulatory Commission.

Thomas A. Ippolito,

Chief, Operating Reactors Branch No. 2, Division of Licensing.

[FR Doc. 81-15396 Filed 5-21-81; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-331]

Iowa Electric Light & Power Co., et al.; Issuance of Amendment To Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 68 to Facility Operating License No. DPR-49 issued to Iowa Electric Light and Power Company, Central Iowa Power Cooperative, and Corn Belt Power Cooperative, which revises the Technical Specifications for operation of the Duane Arnold Energy Center, located in Linn County, Iowa. The amendment is effective as of its date of issuance.

This amendment modifies the Technical Specifications to incorporate several corrections of an administrative nature.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated May 11, 1981, (2) Amendment No. 68 to License No. DPR-

BILLING CODE 7590-01-M

[Docket No. 50-220]

Niagara Mohawk Power Corp.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 43 to Facility Operating License No. DPR-63 issued to Niagara Mohawk Power Corporation (the licensee) which revised the Technical Specifications for operation of the Nine Mile Point Nuclear Station, Unit No. 1 (the facility) located in Oswego County, New York. The amendment is effective as of its date of issuance.

The revisions to the Technical Specifications will further ensure control rod drive system operability during plant operation and reflect the modifications to the scram discharge system presently being undertaken.

The applications for the amendment comply with the standards and requirments of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and Commission's rules and regulations in 10 CFR Chapter I which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and the pursuant to 10 CFR 51.5(d)(4) and environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the applications for amendment dated October 15, 1980 and April 1, 1981, (2) Amendment No. 43 to License No. DPR-63, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Penfield Library, State University College at Oswego, New York 13126. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 13th day of May 1981.

For the Nuclear Regulatory Commission.

Thomas A. Ippolito,

Chief, Operating Reactors Branch No. 2, Division of Licensing.

[FR Doc. 81-15398 Filed 5-21-81: 8:45 am]

BILLING CODE 7590-01-M

[Dockets Nos. 50-282 and 50-306]

Northern States Power Co.; Issuance of Amendments to Facility Operating Licenses and Negative Declaration

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 48 and 42 to Facility Operating License Nos. DPR-42 and DPR-60, respectively, issued to Northern States Power Company (the licensee), which revised the Technical Specifications for operation of the Prairie Island Nuclear Generating Plant, Units Nos. 1 and 2 (the facilities) located in Goodhue County, Minnesota. The amendments are effective as of the date of issuance.

The amendments authorize replacement of the existing racks in the spent fuel pool of the facility with borated racks of a design which would provide a maximum of 1582 storage locations. This capacity will be limited to allow the storage of up to 1120 assemblies resulting from normal operation of Units 1 and 2. The modification and subsequent use of the pool permits a total of 1120 fuel assemblies to be stored instead of the previously authorized total of 687 assemblies.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Notice of Consideration of Proposed Modification to Facilities Spent Fuel Storage Pool in connection with this action was published in the **Federal Register** on March 12, 1980 (45 FR 16056).

A Request for Hearing and Petition for Leave to Intervene was filed by the State of Minnesota, by its Minnesota Pollution Control Agency and by its Attorney General (the petitioner) on April 9, 1980. Subsequently the Petitioner requested leave to withdraw its Petition for Leave to Intervene pursuant to a Stipulation duly executed by the Licensee, the NRC staff, and the Petitioner. The Stipulation has been incorporated into these Amendments to the License. Therefore, there being no issue to be heard by the Atomic Safety and Licensing Board, by ORDER dated October 24, 1980, the Board dismissed this proceeding.

The Commission has prepared an environmental impact appraisal of the action being authorized and has concluded that an environmental impact statement for this particular action is not warranted because there will be no environmental impact attributable to the action significantly greater than that which has already been predicted and described in the Commission's Final Environmental Statement for the facility dated May 1973, and the action will not significantly affect the quality of the human environment.

For further details with respect to this action, see (1) the application for amendment dated January 31, 1980, as supplemented June 10, and November 21, 1980, January 14, February 3, March 10, March 31 and April 20, 1981, (2) Amendment Nos. 48 and 42 to License Nos. DPR-42 and DPR-60, (3) the Commission's concurrently issued Safety Evaluation, and (4) the Commission's concurrently issued Environmental Impact Appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Environmental Conservation Library, 300 Nicollet Mall, Minneapolis, Minnesota 55401. A single copy of items (2), (3), and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 13th day of May 1981.

For the Nuclear Regulatory Commission.
Robert A. Clark,
Chief, Operating Reactors Branch No. 3, Division of Licensing.

[FR Doc. 81-15399 Filed 5-21-81; 8:45 am]
BILLING CODE 7590-01-M

[Docket No. 50-344]

Portland General Electric Co., et al.; Issuance of Amendment to Facility Operating License and Negative Declaration

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 62 to Facility Operating License No. NPF-1, issued to Portland General Electric Company, the City of Eugene, Oregon, and Pacific Power and Light Company (the licensees), which revised Technical Specifications for operation of Trojan Nuclear Plant (the facility) located in Columbia County, Oregon. The amendment is effective as of the date of issuance.

The amendment pertains to the Environmental Technical Specifications (Appendix B to the Facility Operating License). The amendment (1) deletes all water quality requirements, (2) allows discontinuation of and cancels the cooling tower plume monitoring program, (3) deletes most of the terrestrial monitoring program, and (4) makes minor revisions to locations of sample collection sites for the radiological monitoring program. The amendment also divides Appendix B Technical Specifications into two parts: Part I—Radiological Environmental Technical Specifications, and Part II—Environmental Protection Plan (Non-radiological) Technical Specifications.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has prepared an Environmental Impact Appraisal for this license amendment relating to the changes in terrestrial monitoring and the deletion of the cooling tower plume study, and has concluded that an environmental impact statement is not warranted because the action will not significantly affect the quality of the human environment. The Commission has determined that the changes to locations of sample collection sites for the radiological monitoring program will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with these changes. The Commission has determined that the deletion of water quality requirements is a ministerial action required as a matter of law and that therefore no environmental impact statement or environmental impact appraisal and negative declaration need be prepared in connection with this action.

For further details with respect to this action, see (1) the application for amendment dated July 22, 1980, as supplemented January 13 and 30, 1981, and October 23, 1979, (2) Amendment No. 62 to License No. NPF-1 and (3) the Commission's related letter and Environmental Impact Appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the local public document room located at the Multnomah County Library, Social Science and Science Department, 801 S.W. 10th Avenue, Portland, Oregon 97205. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 14th day of May, 1981.

For the Nuclear Regulatory Commission.
Robert A. Clark,
Chief, Operating Reactors Branch No. 3, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-286]

Power Authority of the State of New York; Issuance of Amendment To Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 36 to Facility Operating License No. DPR-64, issued to the Power Authority of the State of New York (the licensee), which revised Technical Specifications for operation of the Indian Point Nuclear Generating Unit No. 3 (the facility) located in Buchanan, Westchester County, New York. The amendment is effective as of the date of issuance.

The amendment adds to the Technical Specifications limiting conditions for operation for the valves in the single line from the condensate storage tank.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) that an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated August 11, 1980, (2) Amendment No. 36 to License No. DPR-64, and (3) the Commission's Safety Evaluation dated July 15, 1980. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the White Plains Public Library, 100 Martine Avenue, White Plains, New York. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 8th day of May, 1981.

Virginia Electric and Power Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments No. 28 and No. 9 to Facility Operating License Nos. NPF-4 and NPF-7 issued to the Virginia Electric and Power Company (the licensee) which revised Technical Specifications for operation of the North Anna Power Station, Units No. 1 and No. 2 (the facility) located in Louisa County, Virginia. The amendments are effective within 3 days from the date of issuance.

The amendments revise the channel functional test frequency for Loss of Power Circuitry from 31 days to a bi-monthly interval and require the steam jet air ejector isolation valves to be closed in Modes 1, 2, 3 and 4.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since these amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated July 30, 1980; (2) Amendment No. 28 and No. 9 to Facility Operating Licenses No. NPF-4 and NPF-7 and (3) the Commission's related Safety Evaluation. These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555 and at the Board of Supervisor's Office, Louisa County Courthouse, Louisa, Virginia 23093 and at the Aldermen Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901. A copy of items (2) and (3) may be obtained upon request to the U.S Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 14th day of May, 1981.

OFFICE OF PERSONNEL MANAGEMENT

Intergovernmental Personnel Act Grant Program; Reduced Allocations of Grant Funds for Fiscal Year 1981

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: The Office of Personnel Management (OPM) formally announces reduced allocations of Intergovernmental Personnel Act (IPA) grant funds for fiscal year 1981. Notice is also given that no IPA grant funds are being requested for fiscal year 1982 or succeeding years. As a result, IPA grant operations within OPM will be phased out.

DATES: No further award of IPA grant funds will be made by OPM after September 30, 1981. The completion of all approved IPA grants will be scheduled for the earliest possible date, but no later than May 31, 1982.

ADDRESS: U.S. Office of Personnel Management, Intergovernmental Personnel Programs, P.O. Box 14184, Washington, D.C. 20044.

FOR FURTHER INFORMATION CONTACT: Richard L. Romero, telephone (202) 632-6274.

SUPPLEMENTARY INFORMATION: The official program number and title for this program is 27.012—Intergovernmental Personnel Grants.

Office Of Personnel Management.

Beverly McCain Jones,

Issuance System Manager.

Intergovernmental Personnel Grants

Funding for Fiscal Year 1981 and Subsequent Years

Budget Decisions

The Administration has submitted budget revisions as follows for the Intergovernmental Personnel Act (IPA) grant program:

—Reduction in the fiscal year 1981 request from $20.0 million to $14.4 million.

—Reduction in the fiscal year 1982 request from $20.0 million to zero.

The elimination of the IPA grant program is consistent with the Administration's overall effort to reduce the number of categorical grant programs.

Through the IPA, the Federal Government has assisted, on a matching-fund basis, over 5,000 State and local personnel management and training projects during the last 10 years at a cost of about $160 million. The primary purpose of this Federal involvement has been to demonstrate, through the provision of "seed-money" support, the value to State and local governments of investing in efforts to build or improve merit-based personnel systems. The Administration believes that a 10-year demonstration period is more than adequate and that it is appropriate to eliminate further direct Federal involvement in what is primarily a State and local government responsibility. State and local jurisdictions should now be willing to rely on their own resources for personnel systems improvements and training to the extent they believe such projects are needed and cost effective.

Fiscal Year 1981

As a result of the reduced budget request, the Office of Personnel Management (OPM) has issued revised allocations of grant funds for fiscal year 1981. The IPA requires that 80 percent of available funds be allocated by weighted formula among the States and between State and local government needs. The remaining 20 percent of the funds are awarded by OPM on a discretionary basis. Following are the revised formula allocations:

Intergovernmental Personnel Act Allocations of Fiscal Year 1981

[Formula grant funds]

State	Total State allocation	Minimum share for local government needs [1]
Alabama	$184,000	$92,200
Alaska	65,000	32,500
American Samoa	60,000	.....
Arizona	126,000	68,100
Arkansas	107,000	53,500
California	1,088,000	626,400
Colorado	139,000	70,600
Connecticut	145,000	85,400
Delaware	65,000	32,500
District of Columbia	65,000	.....
Florida	428,000	243,000
Georgia	255,000	127,500
Guam	58,000	.....

Intergovernmental Personnel Act Allocations of Fiscal Year 1981—Continued

(Formula grant funds)

State	Total State allocation	Minimum share for local government needs [1]
Hawaii	65,000	32,500
Idaho	65,000	32,500
Illinois	514,000	257,000
Indiana	259,000	129,500
Iowa	145,000	72,500
Kansas	121,000	60,500
Kentucky	167,000	83,500
Louisiana	210,000	105,000
Maine	65,000	32,500
Maryland	212,000	130,200

Montana	65,000	32,500
Nebraska	82,000	45,500
Nevada	65,000	32,500
New Hampshire	65,000	32,500
New Jersey	363,000	205,600
New Mexico	68,000	34,000
New York	914,000	628,000
North Carolina	281,000	180,200
North Dakota	65,000	32,500
Ohio	496,000	250,000
Oklahoma	148,000	74,000
Oregon	127,000	63,500
Pennsylvania	519,000	259,500
Puerto Rico	175,000	
Rhode Island	65,000	32,500
South Carolina	152,000	76,000
South Dakota	65,000	32,500
Tennessee	218,000	145,300
Texas	656,000	328,000
Utah	67,000	33,500
Vermont	65,000	32,500
Virginia	260,000	150,000
Virgin Islands	65,000	
Washington	188,000	94,000
West Virginia	95,000	47,500
Wisconsin	228,000	134,200
Wyoming	65,000	32,500
Total	11,520,000	6,063,900

[1] Must be at least 50 percent of the State's total allocation.

For the remainder of fiscal year 1981, OPM will be working with State and local governments to make available all funds authorized for award. No further obligation of IPA grant funds will be made by OPM after September 30, 1981.

Fiscal Year 1982

During fiscal year 1982, OPM will be working with IPA grantees to encourage the completion of approved grant-assisted activities and arrange for the prompt closeout of grants. All existing IPA grants will be scheduled for completion as early as possible in the fiscal year, but no later than May 31, 1982. To assure the timely phase out of IPA grant operations, OPM's goal will be to disburse all approved funds to grantees by that date or as soon as possible thereafter.

Positions Which Were Career Reserved During 1980; Amendment

AGENCY: Office of Personnel Management.

ACTION: Notice; amendment.

SUMMARY: This amends the notice published March 3, 1981 listing positions in the Senior Executive Service (SES) that were career reserved in 1980. Publication is required under the Civil Service Reform Act of 1978.

FOR FURTHER INFORMATION CONTACT: Anne A. Andrews, Executive Personnel and Management Development, (202) 632-6820.

SUPPLEMENTARY INFORMATION: Below is a supplementary list of titles of SES positions that were designated career reserved in 1980, whether or not they were still career reserved on December 31, 1980. Section 3132(b)(4) of title 5 U.S.C. requires that the head of each agency publish the list by March 1 of the following year. These positions are in addition to the list OPM published for all agencies which appeared in the Federal Register on Tuesday, March 3, 1981 (46 FR 15018).

Office of Personnel Management.

Beverly McCain Jones,

Issuance System Manager.

Positions That Were Career Reserved During Calendar Year 1980; Amendment

Agencies, Organization, and Career Reserved Positions

Board for International Broadcasting, Foreign Information Officer

Department of Housing & Urban Development, Assistant Secretary for Administration, Director, Mortgage Ins. Accounting Group

National Aeronautics & Space Administration, Resources Management & Administration, Director, Resources Mgt. & Administration

Office of Associate Admr. for Space Science, Asst. Associate Admr. for Advanced Planning

Office of Equal Opportunity Programs, Director, Discrimination Complaints Div.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-17806; File No. SR-BSECC-81-1]

Self-Regulatory Organizations: Boston Stock Exchange Clearing Corporation; Proposed Rule Change; Relating to a Temporary Increase on all Boston Stock Exchange Clearing Corporation Billings to Members

Pursuant to section 19(b) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on May 11, 1981 the Boston Stock Exchange Clearing Corporation filed with the Securities and Exchange Commission the proposed change as described in Item, I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Text of Proposed Rule Change

The Boston Stock Exchange Clearing Corporation will impose a temporary 15% increase on all billings to members effective for the period May 1, 1981 through September 30, 1981.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) *Self-Regulatory Organization's Statement of and Statutory Basis for, the Proposed Rule Change.*

(a) The purpose of the proposed temporary 15% increase on all Clearing Corporation billings to members was necessitated by increased costs in communications, data processing, leasehold and personnel. The 15%, while temporary in nature, would assist the Clearing Corporation to cover expenses and would allow the time required to complete a detailed study of all income and expenses prior to the next fiscal year beginning October 1, 1981.

(b) The proposed rule is consistent with the requirements of the Securities Exchange Act of 1934 and the rules and regulations there under applying to the Boston Stock Exchange Clearing Corporation because it continues the equitable allocation of fees charged to all participants. The proposed rule change will be implemented consistently with the safeguarding of securities and funds in its custody or control or for which it is responsible because it would insure an efficient system for the settlement of trades and the safekeeping of assets.

(B) *Self-Regulatory Organization's Statement on Burden on Competition.*

No burden on competition is perceived by adoption of the proposed temporary increase which was adopted to reflect increased inflation and operational costs while insuring an efficient system for settlement of trades and the safekeeping of assets.

(C) *Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others.*

Comments have neither been solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed change that are filed with the Commission, and all written communications relating to the proposed change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 1100 L Street, NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted on or before June 12, 1981.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 15, 1981.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

SMALL BUSINESS ADMINISTRATION

[License No. 03/03–0138]

TDH Capital Corp.; Application for Approval of Conflict of Interest Transaction

Notice is hereby given that TDH Capital Corporation (TDH), P.O. Box 234/Two Radnor Corporate Center, Radnor, Pennsylvania 19087, a Federal Licensee under the Small Business Investment Act of 1958, as amended (Act), has filed an application with the Small Business Administration (SBA) pursuant to Section 312 of the Act and covered by § 107.3(g) and § 107.1004(b)(1) of the SBA Rules and Regulations, governing Small Business Investment Companies (13 FR 107.1004 (1980)) for approval of conflict of interest transaction falling within the scope of the above Section of the Act and Regulations.

Subject to such approval, TDH proposes to provide funds to Marina Operating Company (MOC) a portfolio concern.

The Proposed financing is brought within the purview of § 107.1004(b)(1) in that officers and directors of the licensee are also stockholders and officers of MOC and therefore considered associates of TDH as defined by § 107.3(g) of the Regulations.

Notice is hereby given that any interested person may, not later than June 1, 1981, submit written comments on the proposed transaction to the Acting Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, NW., Washington, D.C. 20416.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Dated: May 18, 1981.

Peter F. McNeish,

Acting Associate Administrator for Investment.

BILLING CODE 8025–01–M

DEPARTMENT OF STATE

[CM–8/409]

Oceans and International Environmental and Scientific Affairs Advisory Committee; Partially Closed Meeting

The Antarctic Section of the Oceans and International Environmental and Scientific Affairs Advisory Committee will meet at 10 a.m. on Monday, June 15, 1981 in Room 3524 of the Department of State, Washington, D.C.

At this meeting, officers responsible for Antarctic Affairs in the Department of State will discuss key issues and problems involving the Antarctic in the context of current domestic and international development. This session will be open to the public. The public will be admitted to the session to the limits of seating capacity and will be given the opportunity to participate in discussions according to the instructions of the Chairperson.

Access to the Department of State is controlled, so persons wishing to attend the June 15 meeting of the Antarctic Section of the Oceans and International Environmental and Scientific Affairs Advisory Committee should enter the Department through the Diplomatic ("C" Street) Entrance. Department officials will be at the Diplomatic Entrance to escort attendees to Room 3524.

The Oceans and International Environmental and Scientific Affairs Advisory Committee will also meet on Friday, June 12, 1981 in Room 1408, State Department Building, 22nd and "C" Streets, N.W. in sessions which will not be open to the public. These sessions will be devoted to the discussion of classified material under 5 U.S.C. 552 b(c)l and 5 U.S.C. 552 b(c)(9)(B). The disclosure of classified material and revelation of consideration which go into policy development would substantially undermine and frustrate the U.S. position in future negotiations. The purposes of these discussions will be to elicit views concerning the further development of Antarctic mineral resource policies. Other matters and issues relating to the Antarctic which will be considered at the Eleventh Antarctic Treaty Consultative Meeting will also be reviewed. This portion of the meeting will include classified briefings and examination and discussion of classified documents pursuant to Executive Order 12065.

Requests for further information on

the meetings should be directed to Robert A. Monks of OES/OPA, Room 5801, Department of State. He may be reached by telephone on (202) 632–4970.

Dated: May 19, 1981.

Robert Albert Monks,

Executive Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION.

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:40 a.m. on Wednesday, May 20, 1981, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider an application of Heritage Bank, Anaheim, California, for consent to merge, under its charter and title, with California Coastal Bank, San Diego, California, and to establish the sole office of California Coastal Bank as a branch of the resultant bank.

In calling the meeting, the Board of Directors determined, on motion of Chairman Irvine H. Sprague, seconded by Director William M. Isaac (Appointive), concurred in by Director Charles E. Lord (Acting Comptroller of the Currency), that Corporation business required its consideration of the matter on less than seven days' notice to the public; that no earlier notice of the

meeting was practicable; that the public interest did not require consideration of the matter in a meeting open to public observation; and that the meeting was exempt from the open meeting requirements of the "Government in the Sunshine Act" by authority of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) thereof (5 U.S.C. 552b (c)(6), (c)(8), and (c)(9)(A)(ii)).

The meeting took place in the Chairman's Office, Room 6023, of the FDIC Building located at 550 17th Street, N.W., Washington, D.C.

Dated: May 20, 1981.

SECURITIES AND EXCHANGE COMMISSION.

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of May 26, 1981, in Room 825, 500 North Capitol Street, Washington, D.C.

Closed meetings will be held on Tuesday, May 26, 1981, at 10:00 a.m. and on Wednesday, May 27, following the 10:00 a.m. open meeting.

The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meetings. Certain staff members who are responsible for the calendered matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meetings may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4)(8)(9)(A) and (10) and 17 CFR 200.402(a)(4)(8)(9)(i) and (10).

Chairman Shad and Commissioners Loomis, Evans, Friedman, and Thomas determined to hold the aforesaid meetings in closed session.

The subject matter of the closed meeting scheduled for Tuesday, May 26, 1981, at 10:00 a.m., will be:

Opinion
Formal orders of investigation
Settlement of injunctive actions
Litigation matters
Freedom of Information Act appeal
Settlement of administrative proceeding of an enforcement nature
Institution of administrative proceeding of an enforcement nature
Consideration of *amicus* participation

The subject matter of the closed meeting scheduled for Wednesday, May 27, 1981, following the 10:00 a.m. open meeting, will be:

Institution of injunctive actions

The subject matter of the open meeting scheduled for Wednesday, May 27, 1981, at 10:00 a.m., will be:

1. Consideration of whether to grant William F. Crawford, Sr. relief from a bar imposed upon him in connection with a prior administrative proceeding. For further information, please contact Adele Geffen at (202) 272-2947.

2. Consideration of whether to grant Jerry Richman relief from a bar imposed upon him in connection with a prior administrative proceeding. For further information, please contact Adele Geffen at (202) 272-2947.

3. Consideration of whether to grant the appeal of Ms. Wendy Warren from the determination of the Freedom of Information Act Officer denying her access to certain staff documents and the name of an individual contained in a Commission letter responding to the individual's inquiry concerning investors REIT One and Investors REIT Two. For further information, please contact Howard A. Bartnick at (202) 272-2426.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Paul Lowenstein at (202) 272-2468.

May 18, 1981.

Part II

Department of Labor

Wage and Hour Division, Employment Standards Administration

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and Supersedeas Decisions to General Wage Determination Decisions

Modifications and supersedeas decisions to general wage determination decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the modifications and supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing general wage determination decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and supersedeas decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Office of Government Contract Wage Standards, Division of Government Contract Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Determination Decision.

New General Wage Determination Decisions

None.

DECISION NO. MA80-2070 - CONT'D

CLASSIFICATIONS

CLASS I - Shovels, Crawler and Truck Cranes, Derricks, Backhoes, Trenching Machines, Elevating Graders, Belt-type Loaders, Gradalls, Pile Drivers, Concrete Pavers, on site Processing Plant (Engineer in charge), Dragline, Clam Shell, Cableways, Shaft Hoists, Mucking Machines, Front End Loader--5½ yards and over Tower Cranes, Self-propelled Hydraulic Cranes--10 tons and over Dual Pavers, Automatic Grader-Excavator (C.M.I. or equal), Scrapers towing pan or wagon, Tandem Dozers or Push Cats (2 units in tandem), Welder using semi-automatic Welding Machine, Shotcrete Machine, Tunnel Boring Machine, Combination Back Hoe-Loader--3/4 yard hoe or over, Jet Engine Dryer, Tree Shredder, Post Hole Digger, Post Hole Hammer, Post Extractor, Truck Mounted Concrete Pumps with boom, Rotm-Mill.

CLASS II - Rotary Drill (with mounted Compressor), Compressor House (3 to 6 Compressors), Rock and Earth Boring Machines (excluding McCarthy and similar drills), Grader, Front End Loaders--4 yards to 5½ yards, Scraper--21 yards and over (struck load), Forklifts--7 ft. lift and over or 3 ton capacity and over, Sonic Hammer Console, Road Planer, Cal Tracks, Ballast Regulators, Rail Anchor Machines, Switch Tampers.

CLASS III - Bulldozer, Push Cats, Scrapers--up to 21 yards (struck load) self-propelled or Tractor Drawn, Self-powered Asphalt Paver, Front End Loaders--up to 4 yards, Mechanics, Welders, Well Driller, Pumpcrete Machine, Engineer or Fireman on High Pressure Boiler (on job), Self-loading Batch Plant (on job), Well Point Operators, Electric Pumps used in well point system, Tireman, Pumps--16 inches or over total discharge, Compressors (1 or 2) 900 cu. ft. and over, Powered Grease Truck, Tunnel Locomotives and DInkeys, Grout pumps, Hydraulic Jacks (jacking pipe, slif forms, etc.), Boom Truck, self-propelled Hydraulic Cranes--up to 10 ton, Combination Back Hoe-Loader--up to 3/4 yard hoe.

CLASS IIIA - Asphalt Rollers, Self-Powered Rollers and Compactors, Tractor without blade drawing sheeps foot roller, Rubber tire roller, Vibratory roller, or other type of compactors including machines for pulverizing and aerating soil.

CLASS IV - Hoists, Conveyors, Power Rollers and Compactors, Tractor without blade drawing sheeps foot roller, Rubber tire roller, Vibratory roller, or other type of compactors including machines for pulverizing and aerating soil.

DECISION NO. MA80-2070 - CONT'D

CLASSIFICATIONS CONT'D

CLASS V - Compressor (315 cu. ft. to 900 cu. ft., 1 or 2), Pumps--4" to 16" total discharge

CLASS VI - Compressor (up to 315 cu. ft.), Small Mixers with skip, Oiler, Pumps up to 4", Grease Truck Helper on powered Grease Truck, Power Heaters, Welding Machines (when 3 or more welding machines are used, Classification 4 rate shall be paid), A-Frame Trucks, Forklifts--up to 7 ft. lift and up to 3 ton capacity, Hydro Broom, Power Safety Boat.

CLASS VII - Truck Crane Crews

CLASS VIII - Oiler

CLASS IX - Master Mechanic

CLASS X - Boom lengths over 184 feet (including jib)

CLASS XI - Boom lengths over 225 feet (including jib)

DECISION NO. MO81-4034

LABORERS CLASSIFICATION DEFINITIONS ZONES 3 and 4

GROUP 1 - General Labor-Carpenter tenders; salamander tenders; dump man; ticket takers; loading trucks under bins, hoppers, and conveyors; track men; cement handler; dump man on earth fill; georgie buggie man; material batch hopper man; spreader on asphalt machine; material mixer man (except on manholes); coffer dams; riprap pavers-rock, block or brick; signal man; scaffolds over ten feet not self-supported from ground up; skipman on concrete paving; wire mesh setters on concrete paving; all work in connection with sewer, water, gas, gasoline, oil, drainage pipe, conduit pipe, tile and duct lines and all other pipe lines; power tool operator; all work in connection with hydraulic or general dredging operations; form setters, puddlers (paving only); straw blower nozzleman; asphalt plant platform man; chuck tender; crusher feeder; men handling creosote ties or creosote materials; men working with and handling epoxy material; topper of standing trees; feeder man on wood pulverizers, board and willow mat weavers and cable tiers on river work; deck hands; pile dike and revetment work; all laborers working on underground tunnels less than 25 ft. where compressed air is not used; abutment and pier hole men working six (6) ft. or more below ground; men working in coffer dams for bridge piers and footings in the river; barco tamper; jackson or any other similar tamp; cutting torch man; liners, curb, gutters, ditch liners; hot mastic kettleman; hot tar applicator; hand blade operator; mortar men on brick or block manholes; rubbing concrete, air tool operator under 65 lbs.; caulker and lead man; chain or concrete saw under 15 h.p.

GROUP 2 - First Semi-Skill-Vibrator man; asphalt raker; head pipe layer on sewer work; batterboard man on pipe and ditch work; cliff scalers working from bosun's chairs; scaffolds or platforms on dams or power plants over 10 ft. high; air tool operator over 65 lbs.; stringline man on concrete paving; sand blast man

GROUP 3 - Second Semi-Skill-Laser beam man; wagon drill; churn drill; air track drill and all other similar type drills, gunite nozzle man; pressure grout man; screed man on asphalt; concrete saw 15 h.p. and over; grade checker; stringline man on electronic grade control; manhole builder; dynamite man; powder man; welder; tunnel man

DECISION NO. MO81-4034

AREA COVERED BY LABORERS

Zone 1 - Buchanan, Cass and Lafayette Counties

Zone 2 - Andrew, Atchison, Barry, Barton, Bates, Benton, Caldwell, Camden, Carroll, Cedar, Christian, Clinton, Dade, Dallas, Daviess, DeKalb, Douglas, Greene, Gentry, Grundy, Harrison, Henry, Hickory, Holt, Jasper, Johnson, Laclede, Lawrence, Livingston, McDonald, Mercer, Morgan, Newton, Nodaway, Ozark, Pettis, Polk, St. Clair, Saline, Stone, Taney, Vernon, Webster, Wright and Worth Counties.

Zone 3 :

a - Franklin and Jefferson Counties

b - St. Charles County

Zone 4

a - Adair, Audrain, Bollinger, Boone, Butler, Callaway, Cape Girardeau, Carter, Chariton, Clark, Cole, Cooper, Crawford, Dent, Dunklin, Gasconade, Howard, Howell, Iron, Knox, Lewis, Linn, Macon, Madison, Maries, Marion, Miller, Mississippi, Moniteau, Monroe, New Madrid, Oregon, Osage, Pemiscot, Perry, Phelps, Pike, Pulaski, Putnam, Ralls, Randolph, Reynolds, Ripley, St. Francois, Ste. Genevieve, Schuyler, Scotland, Scott, Shannon, Shelby, Stoddard, Sullivan, Texas, Washington and Wayne Counties

b - Lincoln, Montgomery and Warren Counties

CLASSIFICATION DEFINITIONS

POWER EQUIPMENT OPERATORS

Group I - Asphalt paver and spreader; asphalt plant mixer operator; asphalt plant operator; back fillers; backhoe; barber-greene loader; blade-power; boats-power; boilers (2); boring machines; cableways; cherry pickers; chip spreader; concrete ready-mixed plant, portable (job site); concrete mixer paver; crane-overhead; crusher, rock; derricks and derricks cars (power operated); ditching machines; dozers; dredges - any type power; grade-all - similar type; hoist, endless chain-power operated with power travel; loaders; mechanic and welder; mucking machine; orange peels; pumps - material; push cats; scoops; self-propelled rotary drill; shovel, power; side boom; skimmer scoop; testhole machine; throttle man

GROUP II Boilers (1); Brooms - power operated; chip spreader (front man); clef plane operator; compressors (1) 125' or over; concrete saws, self-propelled; crab - power operated; curb finishing machine; firemen on rigs; flex plane; floating machine; form grader; greaser; hoist, endless chain - power operated; hopper - power operated; hydra hammer; lad-a-vator - similar type; rollers; siphons, jets, and jennies, sub-grader; tractors over 50 h.p.; compressors (2) 125' ft. or over not more than 20' apart; compressors-tanden; compressors sigle, truck mounted; elevator; finishing machine

Group III -
(a) Oilers
(b) Fork lift-masonry
(c) Oiler driver
(d) A-frame trucks; fork lift-all types (except masonry); mixers (w/side loaders); pumps (w/well points) dewatering systems, test or pressure pumps; tractors (except when hauling material) less than 50 h.p.

Group IV -
Clamshells, 80 ft. of boom or over (incl. jib); crane or rigs, 80 ft. of boom or over (incl.jib); draglines, 80 ft. of boom or over (incl. jib); pile drivers, 80 ft, of boom or over (incl. jib)

Group V
Hoists-each additional drum over 1 drum

Group VI
Crane or rigs, over 200 ft. of boom

Group VII
Ready Mixed Concrete Plants;
(a) Crane operator
(b) Loader operator & plant man
(c) Conveyor Operator

Group VIII
Master Mechanic

Group IX
Crane-tower or climbing

CLASSIFICATION DEFINITIONS

POWER EQUIPMENT OPERATORS
Group I - Asphalt paver and spreader; asphalt plant console operator; auto grader; backhoe; blade operator, all types; boilers - 2; booster pump on dredge; boring machine (truck or crane mounted); bulldozer operator; clamshell operator; compressor maintenance operator - 2; concrete plant operator, central mix; concrete mixer paver; crane operator; derrick or derrick trucks; ditching machine; dragline operator; dredge engineman; dredge operator; drillcat with compressor mounted on cat; drilling or boring machine, rotary, self-propelled; high loader - fork lift; hoistline engine - 2 active drums; locomotive operator, standard gauge; mechanics and welders; maintenance operator; mucking machine; pile driver operator; pitman crane operator; pump - 2; push cat op.; quad-track; scoop operator - all types; scoops in tandem; self-propelled rotary drill (leroy or equal - not air trac); shovel operator; side discharge spreader; sideboom cats; skimmer scoop operator; slip - form paver (CMI, REX, or equal); throttle man; truck crane; welding machine maintenance operator - 2

CLASSIFICATION DEFINITIONS

POWER EQUIPMENT OPERATORS - (CONT'D)
Group II - A-frame truck, asphalt hot mix silo; asphalt plant fireman, drum or boiler; asphalt plant mixer operator; asphalt plant man; asphalt roller operator; back filler operator; chip spreader; concrete batch plant, dry-power operated; concrete mixer operator, skip loader; concrete pump operator; crusher operator; elevating grader; greaser; hoisting engine - 1 drum; latourneau rooter; multiple compactor; pavement breaker, self-propelled, of the hydrahammer or similar type; power shield; pug mill operator; stump cutting machine; towboat operator tractor operator over 50 h.p.
Group III - Boilers - 1; chip spreader (front man); churn drill operator; compressor maintenance operator - 1; concrete saws, self-propelled; conveyor operator; distributor operator; finishing machine operator; fireman, rig; float operator; form grader operator; pump; pump maintenance operator, other than dredge; roller operator, other than high type asphalt; screening and washing plant operator; self-propelled street broom or sweeper; siphons and jets; sub-grading machine operator; tank car heater operator - combination boiler and booster; tractor, 50 h.p. or less, without attachments; vibrating machine operator, not hand; welding machine maintenance operator -1
Group IV
(a) Oilers
(b) Oiler driver, all types
Group V - Clamshells, 3 yds. capacity or over; crane or rigs, 80 ft. of boom or over (including jib); draglines, 3 yds. capacity or over; piledrivers, 80 ft. of boom or over (including jib); shovels & backhoes, 3 yds. capacity or over
Group VI - Hoists (each additional drum over 1 drum)

Men working in tunnels or shafts (not air shafts or coffer dams) of twenty-five (25) ft or more in length or depth will be paid fifty cents (50¢) per hour above the regular classification.

PAID HOLIDAYS
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F- Christmas Day

FOOTNOTES:
a. 2 paid holidays: C & D
b. $150.00 per year
c. 2 paid holidays: C & D
d. 7 paid holidays A through F, & Day after Thanksgiving
e. Employer contributes 8% of regular hourly rate to vacation pay credit for employee who has worked in business more than 5 years. Employer contributes 6% of regular hourly rate to vacation pay credit for employee who has worked in business less than 5 years.
f. 2 paid holidays: C & D
g. 1 paid holiday: D providing the employee has worked 5 consecutive days before and after the holiday.
h. 3% of gross earnings to SASMI

LABORERS:						
Ashtabula County:						
Stonemason Tenders	$14.60					
Sheeting & Shoring Men; Asphalt Rakers & Tampers; Dumpmen (Batch Truck); Concrete Workers; Building Wreckers; Tool Checkers; Carpenters Tenders; Construction Laborers; All work not mentioned in classifications below to be paid at the rate of Construction Laborers	14.95					
Spreader Box Men (Asphalt); Plasterers or Mortar Mixers; Squeegee man	15.10					
Air & Machine Driven Tool Op.; Industrial Sewer Cleaning; Sewer Pipe Layers; Bottom Men (6' & over); Power Driven Wheelbarrows & Sweepers; Brick Batter & Droppers; Burning & Cutting Torches; Mud Jacking of Floors	15.15					
Stackmen; Swinging Scaffold men	15.25					
Tunnel Laborers	15.35					
Gunnite Ops.	15.45					
Powder Blasters	15.50					
Cuyahoga County:						
Construction; Tenders	13.49	1.70	1.85			
Sewer & Utility; Power Driven Tools & Vibrators	13.64	1.70	1.85

DECISION No. 0181-2025

GROUP A- A-Frames; All Rotary Drills used on Caisson Work for Foundations & Sub-structure Work; Boiler Op. or Compressor Op. when Compressor or Boiler is mounted on Crane (piggyback operation); Boom Trucks; Cableways; Cherry Pickers; Combination Concrete Mixer & Tower; Concrete Pumps; Cranes; Derricks; Draglines; Elevating Grader or Euclid Loader; Floating Equipment; Gradalls; Helicopter Op. (hoisting builders materials); Helicopter Winch Op. (hoisting builders materials); Hoes; Hoisting Engines (two or more drums); Lift Slab or Panel Jack Ops.; Locomotives; Maintenance Engineer (mechanic or welder); Mixer Paving (multiple drum); Mobile Concrete Pumps with Boom; Panelboard (all types on site); Pile Driver; Power Shovels; Side Booms; Slip Form Pavers; Straddle Carriers (building construction site); Tower Derricks; Trench Machines (over 24" wide)

GROUP B- Asphalt Paver; Bulldozer; CMI Type Equipment; Endloaders; Kohlman Type Loaders (dirt loading); Mucking Machines; Power Graders; Power Scoops; Power Scrapers; Push Cats

GROUP C- Air Compressor (pressurizing shafts or tunnels); All Asphalt Rollers; Fork Lifts; Hoist (one drum); House Elevators; Man Lift; Power Boiler (over 15 lbs., pressure); Pump Op. Installing or Operating Well Points or other Types of Dewatering System; Pumps (4" & over discharge); Submersible Pumps (4" & over discharge); Trenchers (24" & under)

GROUP D- Compressors on Building Construction; Conveyors (building material); Gunite Machines; Mixers (cap., more than on bag); Mixers (one bag cap., side loader); Post Driver; Post Hole Digger; Pavement Breaker (hydraulic or cable); Road Widening Trencher; Rollers; Welder Operator

GROUP E- Backfillers and Tampers; Batch Plant; Bar & Joint Installing Machine; Bull Floats; Burlap & Curing Machines; Clefplanes; Concrete Spreading Machines; Crushers; Drum Fireman (asphalt); Farm Type Tractors (pulling attachments); Finishing Machines; Form Trenchers; High Pressure Pumps (over ½" discharge); Hydro Seeders; Self-propelled Power Spreader; Self-propelled Subgrader; Tractors (pulling sheep foot roller or grader); Tire Repairmen; Vibratory Compactors (with Integral power)

GROUP F- Oiler; Light Plant Op.; Power Driven Heaters (oil fired); Power Boilers (less than 15 lbs. pressure); Submersible Pumps (under 4" discharge); Pumps (under 4" discharge); Tenders

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5 (a) (1) (ii)).

POWER EQUIPMENT OPERATORS

Group 1: Auger Machine Operator (post holes, etc.); Batch Bin Weighman, Scissorman or Hopperman; Brakeman; Crusher Oiler; Oiler Utility; Screed Operator; Tractor Operators (Farm, Crawler or wheel type, 60 HSP - drawbar) or less with or without use of power attachments, except for use of Backhoe or Bucket

Group 2: Broom Operators, self-propelled; Cableway Signalman (Bellboy); Concrete Saw (self-propelled); Fireman; Power Loader, belt and bucket type

Group 3: Air Compressor over 315 cu. ft. capacity; Chip Spreader Operator; Form Grader Operator; Joint Machine Operator; Longitudinal Float Operator; Mixer Operator Concrete (under one yard); Roller Operators (self-propelled pneumatic, rubber tired, sheep foot vibratory or combination type); Tire Repairman

Group 4: Pump Operator (all others)

Group 5: Conveyor Belt Operator; Fork Lift and Lumber Stacker; Screening Plant Operator

Group 6: A-Frame Truck; Tractor Operators (farm, crawler or wheel type, over 60 HSP - drawbar) without use of power attachments

Group 7: Oiler, Lead Utility

Group 8: Gunnite and Grout Machine Operator; Mulching Machine Operator; Oil Distributor

Group 9: Front End Loader (up to and including 1½ cu. yds.); Pavement Breakers, Hydro-tamper and similar type machines; Pumps, well points

Group 10: Hoist Operator (one drum)

Group 11: Haulage Motorman and Industrial type Motorman; Motor Patrol Operator (all others); Pump Operator (in tunnels, shafts, raises); Hydro type Cranes (up to 15 tons)

POWER EQUIPMENT OPERATORS (Cont'd)

Group 12: Air Compressor, two or more machines or tunnels, shafts, raises or Plant Operators; Asphalt Plant Operator; Bituminous Laydown Machine Operator; CMI Machine or similar; Concrete Batch Plant; Concrete Finish Machine Operator; Concrete Multi Blade Span Saw (Hunt process or similar); Concrete Spreader and Paver Operator; Crusher Operator; Drilling Machine, integrated (Core, Rotary, Caisson, Diamond); Elevating Grader; Front End Loader (over 1½ cu. yds.); Jumbo Form Operator; Mixer Operator, base course pug mill type; Mixer Bituminous Operator (travel plant); Mixer Operator Concrete (over one yard); Motor Patrol Operator (finish); Mucking Machine Operator (all types); Pneumatic Guns; Pumpcrete Operator; Roller Operator (Tandem steel wheel, three axle or three wheel); Scraper Equipment (all types); Shovels, Draglines, Cranes, Piledrivers, all truck mounted cranes (manufacturers' rating) up to 3½ yds., all attachments; Hydro type cranes (15 tons and over); Shuttle Car Operator; Subgrade Machine Operator (power); Tractor Operator, all with use of power attachments and including Pushcat, Dozer, Tournadozer, etc. (The use of power attachments shall not include disking, pulling of rollers, or similar unskilled actions); Trenching Machine Operator; Wash Plant Operator

Group 13: Welder, Machine Doctor

Group 14: Hoist Operator (two or more drums of shafts or raises); Repairman; Mechanics; Machine Doctors, Welders; Heavy Duty Mechanic, Machine Doctor

Group 15: Cableway Operators; Mixer Dual Drum; Cranes, (Whirley, Gantry, Stiffleg, Overhead traveling)

Group 16; Shovels, Draglines, Cranes, Piledrivers, all truck mounted cranes (manufacturer's rating) 3½ yds. to 7 cu. yds.; all attachments; Wheel Excavator Operator

Group 17: Shovels, Draglines, Cranes, Piledrivers, all truck mounted Cranes, (manufacturer's rating) 7 cu. yds. and over, all attachments

TRUCK DRIVERS	Basic Hourly Rates	Fringe Benefits Payments

Environmental Protection Agency

Eighth Report of the Interagency Testing Committee to the Administrator; Request for Comments Regarding Priority List of Chemicals

V 46 / 99 MAY 22 81 UMI

ENVIRONMENTAL PROTECTION AGENCY

[OPTS 41007; TSH-FRL-1834-6]

Eighth Report of the Interagency Testing Committee to the Administrator; Receipt of Report and Request for Comments Regarding Priority List of Chemicals

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Interagency Testing Committee (ITC), established under section 4(e) of TSCA, transmitted its Eighth Report to the Administrator of EPA on April 24, 1981. This report, which revises and updates the Committee's priority list of chemicals, adds three chemicals to the list for priority consideration by EPA in the promulgation of test rules under section 4(a) of the Act. The Eighth Report is included in this Notice. The Agency invites interested persons to submit written comments on the Report and to participate in a scoping workshop.

DATES: Written comments should be submitted by June 22, 1981. The workshop will be held on July 15, 1981, from 9:00 a.m. to 4:00 p.m. and on July 16, 1981, from 9:00 a.m. to 12:00 p.m. The deadline for registration for the workshop is July 1, 1981. Documentation subsequent to the workshop should be submitted no later than August 17, 1981.

ADDRESSES: Send written submissions to: Document Control Officer (TS–793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E–401, 401 M St., SW., Washington, D.C. 20460.

Submissions should bear the Document Control Number OPTS–41007.

The workshop will be held at : Hospitality House Motor Inn, 2000 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: John B. Ritch, Jr., Director, Industry Assistance Office (TS–799), Office of Toxic Substances, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460, Toll Free: (800–424–9065), In Washington, D.C.: (554–1404), Outside the USA: (Operator-202–554–1404).

SUPPLEMENTARY INFORMATION:

I. Background

Sec. 4(a) of TSCA authorizes the Administrator of EPA to promulgate regulations requiring testing of chemical substances in order to develop data relevant to determining the risks that such chemical substances may present to health and the environment.

Sec. 4(e) of TSCA established an Interagency Testing Committee to make recommendations to the Administrator of EPA of chemical substances for priority consideration for proposing test rules under sec. 4(a). Sec. 4(e) directs the Committee to revise its list of recommendatons every six months as it determines to be necessary. The total number of chemicals designated by the ITC for priority consideration may not exceed 50 at any one time. Within 12 months of the date of designation, EPA must initiate rulemaking to require testing or publish in the **Federal Register** its reasons for not doing so.

The ITC's Eighth Report was received by the Acting Administrator on April 24, 1981, and follows this notice.

II. Written Comments

EPA invites interested persons to submit comments on the ITC's new recommendations. In particular, the Agency would be interested in receiving information concerning additional health and safety data on the subject chemicals. The Agency requests submissions be received no later than June 22, 1981. All submissions received by that date will be considered by the Agency in determining whether to propose test rules in response to the Committee's new recommendations. Submissions should bear the identifying Docket No. OPTS–41007.

III. Scoping Workshop

EPA will conduct a scoping workshop on July 15 and 16, 1981, concerning the ITC's Eighth Report. The purpose of the scoping workshop is to provide an early opportunity for the academic community, labor, industry, environmental groups, and the general public to identify and discuss with EPA issues to be addressed by the agency in responding to the ITC's Eighth Report. In order that the workshop may focus on the issues of greatest concern, it is requested that comments submitted on the ITC Report include suggestions of the issues which should be highlighted in the scoping workshop.

A. Registration and Participation

The scoping workshop will be open to all who wish to attend. Anyone who is interested in participating in or attending the workshop or in receiving subsequent materials on the workshop should contact the Industry Assistance Office (see "For Further Information Contact"). All further information on the scoping workshop will be disseminated through the mail or by telephone contact. Those who are interested in actively participating in the workshop (i.e., making a presentation or participating in the workshop discussion) should inform EPA by registering with the Industry Assistance Office no later than July 1, 1981.

B. Schedule and Agenda

The workshop will consist of three separate, half-day sessions as follows:

Session I—diethylenetriamine—9:00 a.m. to 12:00 p.m. on July 15, 1981;

Session II—hexachloroethane—1:00 p.m. to 4:00 p.m. on July 15, 1981;

Session III—2-chlorotoluene—9:00 a.m. to 12:00 p.m. on July 16, 1981;

Each session will consist of (1) EPA's preliminary views on testing needs and issues, (2) presentations by other workshop participants, (3) question and answer period, (4) discussion of the issues, and (5) summary of major points. A specific agenda will be available 1 week prior to the workshop.

C. Workshop Report

Following the workshop, 4 weeks will be allowed for submission of additional information or documentation for inclusion in the workshop record. A final report on the workshop will be prepared on the basis of minutes taken during the meeting; there will be no recording or verbatim transcript of the workshop proceedings.

The final report of the scoping workshop, together with all written comments and materials submitted in connection with this notice, will be available for inspection under Docket No. OPTS–41007 at the Document Control Office, Rm. E–107, Office of Pesticides and Toxic Substances, Environmental Protection Agency, 401 M St. SW., Washington, D.C. 20460, 8:00 a.m. to 4:00 p.m. weekdays, except legal holidays.

Dated: May 14, 1981.

Edwin H. Clark, II,

Acting Assistant Administrator for Pesticides and Toxic Substances.

Eighth Report of the TSCA Interagency Testing Committee to the Administrator, Environmental Protection Agency

Summary

Section 4 of the Toxic Substances Congrol Act of 1976 (TSCA, Pub. L. 94–469) provides for the testing of chemicals in commerce that may present an unreasonable risk of injury to health or the environment. It also provides for the establishment of a Committee, composed of representatives from eight designated Federal agencies, to recommend chemical substances or mixtures to which the Administrator of

the U.S. Environmental Protection Agency (EPA) should give priority consideration for the promulgation of testing rules. The Committee makes such revisions in the List (the section 4(e) Priority List) as it determines to be necessary and transmits them to the EPA Administrator at least every 6 months.

As a result of its deliberations, the Committee is revising the TSCA section 4(e) Priority List by the addition of three chemicals. The chemicals being added to the List are presented alphabetically, together with the types of testing recommended, as follows:

Chemical and Recommended Studies

2-Chlorotoluene—Health Effects: Carcinogenicity/oncogenicity, mutagenicity, chronic effects, reproductive effects, teratogenicity. Environmental Effects: Chemical fate, bioconcentration, chronic toxicity to fish, chronic toxicity to aquatic invertebrates.

Diethylenetriamine—Health Effects: Chronic effects, reproductive effects, teratogenicity.

Hexachlorethane—Environmental Effects: Chemical fate, terrestrial plant uptake and toxicity, bioaccumulation, microbial toxicity, avian toxicity, toxicity to terrestrial invertebrates, chronic toxicity to fish and aquatic invertebrates.

Each of the new recommendations is being designated by the Committee for action by the EPA within 12 months of the date of this Eighth Report, as stipulated by section 4(e)(1)(B) of TSCA.

Chapter 1. Introduction

1.1 *Background.* The TSCA Interagency Testing Committee (Committee) was established under section 4(e) of the Toxic Substances Control Act of 1976 (TSCA, Public Law 94–469). The specific mandate of the Committee is to identify and recommend to the Administrator of the U.S. Environmental Protection Agency (EPA) chemical substances or mixtures in commerce that should be tested to determine their potential hazard to human health and/or the environment. The Act specifies that the Committee's recommendations shall be in the form of a Priority List, which is to be published in the **Federal Register**. The Committee is directed to make revisions to the List, as it determines to be necessary, and to transmit such revisions to the EPA Administrator at least every 6 months after submission of the Initial List.

The Committee is comprised of representatives from eight statutory member agencies, five liaison agencies, and one national program. The specific representatives and their affiliations are named in the front of this report. The Committee's chemical review procedures and prior recommendations are described in previous reports (Refs. *1* through *8*).

1.2 *Committee's activities during this reporting period.*

The Committee has continued to review chemicals from its second round of scoring and has begun to review those from the third scoring exercise, which are high-production chemicals (in excess of 2 million pounds annually) listed in the TSCA Chemical Substances Inventory (see Ref. *2* for methodology).

The following steps have been taken to expand the Committee's information-gathering activities in developing its recommendations to the EPA for testing.

a. The names and CAS numbers of all 107 chemicals selected in the third round of scoring were published in the **Federal Register**. A public meeting to receive written or verbal comments on these chemicals was held in Washington, D.C. (Ref. *9*).

b. The Committee has asked the public and private sectors to contribute relevant information, particularly unpublished data, on exposure and effects of chemicals selected in the third scoring exercise.

c. The technical support contractor is including summaries of information received from industry in the Hazard Information Reviews of chemicals being prepared for the Committee.

The Committee believes that this process will broaden the data base relied upon for making recommendations to the EPA Administrator.

1.3 *Committee's previous reports.* Seven previous reports to the EPA Administrator have been issued by the Committee and published in the **Federal Register** (Refs. *2* through *8*). Forty-three entries (i.e., chemical substances and categories of chemicals) have been designated for priority consideration by the EPA Administrator. One entry, chloromethane, was subsequently removed (Ref. *8*) after the EPA responded to the Committee's recommendation for testing.

1.4 *The TSCA section 4(e) priority list.* The entries and the dates of their designation by the Committee are presented in Table 1. With the additions from this report, and the deletion of chloromethane under Table 2, 45 entries now appear on the Priority List. The Committee considers each entry to be of equal priority.

Table 1.—*The TSCA Section 4(e) Priority List*

Entry	Date of designation
1. Acetonitrile	April 1979.
2. Acrylamide	April 1978 [1,2]
3. Alkyl epoxides	October 1977 [3]
4. Alkyl phthalates	October 1977 [3].
5. alkyltin compounds	October 1980
6. Aniline and bromo, chloro and/or nitro anilines.	April 1979.
7. Antimony (metal)	April 1979.
8. antimony sulfide	April 1979.
9. antimony trioxide	April 1979.
10. Aryl phosphates	April 1978 [1].
11. Benzidine-based dyes	November 1979.
10. Benzyl butyl phthalate	October 1980.
13. Butyl glycolyl butyl phthalate.	October 1980.
14. Chlorinated benzenes, mono- and di-	October 1977 [3,4]
15. Chlorinated benzenes, tri-, tetra-, and Penta-	October 1978 [4].
16. Chlorinated naphthalenes	April 1978 [1].
17. Chlorinated paraffins	October 1977 [3].
18. 2-Chlorotoluene	April 1981.
19. Cresols	October 1977 [3].
20. Cyclohexanone	April 1979.
21. o-Dianisidine-based dyes	November 1979.
22. Dichloromethane	April 1978 [1].
23. 1,2-dichloropropane	October 1978.
24. Diethylenetriamine	April 1981.
25. Fluoroalkenes	October 1980.
26. Glycidol and its derivatives.	October 1978.
27. Halogenated alkyl epoxides.	April 1978 [1].
28. Hexachloro-1,3-butadiene	October 1977 [1]
29. Hexachlorocyclo- pentadiene.	April 1979.
30. Hexachloroethane	April 1981.
31. Hydroquinone	November 1979.
32. Isophorone	April 1979.
33. Mesityl oxide	April 1979.
34. 4,4'-Methylenedianiline	April 1979.
35. Methyl ethyl ketone	April 1979.
36. Methyl isobutyl ketone	April 1979.
37. Nitrobenzene	October 1977 [3].
38. Phenylenediamines	April 1980.
39. Polychlorinated terphenyls.	April 1978 [1].
40. Pyridine	April 1978 [1].
41. Quinone	November 1979.
42. o-Tolidine-based dyes	November 1979.
43. Toluene	October 1977 [3].
44. 1,1,1-Trichloroethane	April 1978 [1].
45. Xylene	October 1977 [3].

Chapter 2. Recommendations of the Committee

2.1 *Chemical substances designated for action by the EPA Administrator.* As directed by section 4(e)(1)(B) of TSCA, the Committee is adding the following three chemical substances to the section 4(e) Priority List: 2-chlorotoluene, diethylenetriamine, and hexachloroethane. The designation of these entries was determined after considering the factors identified in section 4(e)(1)(A) and other available relevant information, as well as the professional judgment of Committee members.

The studies recommended for these entries and the rationales to support the recommendations are given in section 2.2 of this report. In accordance with section 4(e) of TSCA, the Committee designates these entries for action by the EPA within 12 months of the date of issuance of this Eighth Committee Report.

2.2 *Recommendation and rationales*

2.2.a *2-Chlorotoluene*

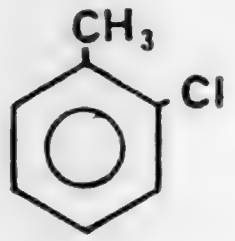
Summary of recommended studies. It is recommended that 2-chlorotoluene be tested for the following:

A. Health Effects:
Carcinogenicity/oncogenicity
Mutagenicity
Chronic effects
Reproductive effects
Teratogenicity

B. Environmental Effects:
Chemical fate studies
Bioconcentration studies
Chronic toxicity to fish
Chronic toxicity to aquatic invertebrates

Physical and Chemical Information

CAS Number: 95–49–8
Structural Formula:



Empirical Formula: C_7H_7Cl
Molecular Weight: 126.59
Melting Point: −37°C
Vapor Pressure: 2.7 mm Hg at 20°C; 5.0 mm Hg at 30°C
Log Octanol/Water Partition Coefficient: 3.42 Description of Chemical: 2-Chlorotoluene is a colorless aromatic, liquid at room temperature (22°C). It has a low solubility in water and is soluble in most organic solvents. Impurities that may be found with this chemical include other chlorotoluenes and toluene.

Rationale for Recommendations

I. *Exposure information*—A. *Production/use/disposal information.* Between 11 and 60 million pounds of 2-chlorotoluene was produced in the

United States in 1977 (EPA, 1980). Mixtures with a high content of this chemical are used in solvent applications such as carriers for reaction mixtures, dye carrier formulations, and sludge solvents, as well as paint and rubber-stripping formulations. These use patterns suggest that human exposures may occur in the workplace as well as in consumer applications.

A threshold limit value (TLV®) of 50 ppm for skin exposure has been established by the American Conference of Governmental Industrial Hygienists (ACGIH) based upon the analogy of this chemical with other chlorinated aromatic compounds such as the chlorinated benzenes (ACGIH, 1980). 2-Chlorotoluene is expected to escape to the atmosphere and/or be discharged to aquatic systems in effluents as a result of solvent usage within chemical plants. Terrestrial nonhuman exposure is expected to be slight.

B. *Chemical fate information.* Little information on the transport or persistence of 2-chlorotoluene has been found. In water, some photolysis is anticipated at the surface and some biodegradation by bacteria and fungi is expected.

II. *Human population studies.* Human monitoring has been carried out in a limited study. Isomers of 2-chlorotoluene were reported in the breath of two of nine people (range 261–338 ng/m³) in Niagara Falls, New York (Pellizzari et al., 1979).

III. *Biological effects of concern to human health*—A. *Toxicokinetic/metabolism studies.* Studies in the rat suggest that 2-chlorotoluene is metabolized and excreted in the urine as several metabolites, most notably as a glucuronide conjugate of a phenolic hydroxylation product of 2-chlorotoluene (Wold and Emmerson, 1974). No unchanged 2-chlorotoluene was present in the urine. These phenolic hydroxylation products may be produced via arene oxide intermediates of the parent compound. These latter intermediates have been associated with certain cellular mechanisms that produce tissue damage (necrosis) and, in some cases, carcinogenicity (Jerina and Daly, 1974).

B. *Short-term (acute) effects.* Little information has been identified concerning the short-term effects of 2-chlorotoluene.

C. *Long-term (subchronic/chronic) effects.* No information has been identified concerning the long-term effects of 2-chlorotoluene either in humans or experimental animals. However, the analog chlorobenzene is being tested for carcinogenicity in a 2-year gavage study by the National Toxicology Program (NTP).

D. *Teratogenicity/reproductive effects studies.* No information has been identified concerning either teratogenic or reproductive effects of 2-chlorotoluene.

E. *Mutagenicity studies.* No information has been identified concerning the mutagenicity of 2-chlorotoluene; however, the analog chlorobenzene has been tested by the NTP in two independent laboratories and found to be negative by both (NTP, 1980).

F. *Rationale for health effects recommendations.* Due to the lack of health-related data and the high human exposure potential within the workplace and in consumer applications, testing of 2-chlorotoluene is recommended for the following health effects: carcinogenicity/oncogenicity, mutagenicity, chronic effects, reproductive effects, and teratogenicity. The bioconcentration factor (see section IV.D.) suggests that delayed chronic toxicity may be of concern and, therefore, testing for chronic effects should be carried out to assess this potential hazard adequately.

IV. *Environmental considerations*—A. *Short-term (acute) effects.* The acute toxicity of 2-chlorotoluene appears to be quite low. The LC_{50} for a freshwater fish, the golden orfe (*Leuciscus idus melantus*), was reported at 78 mg/l (Juhnke and Luedemann, 1978) and the 24-hour LC_{50} for *Daphnia magna* was reported at 74 mg/l (Bringmann and Kuehn, 1977a). No acute toxicity data on terrestrial species have been identified.

B. *Long-term (subchronic/chronic) effects.* No studies on the long-term effects of 2-chlorotoluene have been found for either aquatic or terrestrial species.

C. *Other effects (physiological/behavioral/ecosystem processes).* Toxicity threshold values (from the cell multiplication inhibition and analogous tests) have been reported for bacteria (*Pseudomonas putida*) at 15 mg/l, blue-green algae (*Microcystis aeruginosa*) at 31 mg/l, and green algae (*Scenedesmus quadricauda*) at greater than 100 mg/l (Bringmann and Kuehn, 1977b; 1978).

D. *Bioaccumulation and food-chain transport.* The log of the octanol/water partition coefficient is 3.42, as measured by Leo et al. (1976). Using the method of Veith et al. (1980), the bioconcentration factor (BCF) is calculated to be 234. This potential for 2-chlorotoluene to bioaccumulate may lead to substantial chronic effects and food-chain transport. No information has been identified relating to either of these concerns.

E. *Rationale for specific environmental effects recommendations.* Chemical fate studies are recommended because of the paucity of chemical fate test data on 2-chlorotoluene. No toxicity tests are recommended for terrestrial animals or plants at this time because there is no indication that substantial terrestrial exposure exists. Industrial releases to the atmosphere should result in moderately rapid degradation by photo-oxidation. Bioaccumulation tests and chronic toxicity tests to fish and aquatic invertebrates are recommended because of the substantial aquatic exposure anticipated, the calculated bioconcentration factor, and the consequent potential for effects in aquatic organisms due to chronic exposure.

2.2.b. *DIETHYLENETRIAMINE*

Summary of recommended studies. It is recommended that diethylenetriamine (DETA) be tested for the following:

A. Health Effects:
Chronic effects
Reproductive effects
Teratogenicity

PHYSICAL AND CHEMICAL INFORMATION

CAS Number: 111–40–0
Structural Formula:
$H_2NCH_2CH_2NHCH_2CH_2NH_2$
Empirical Formula: $C_4H_{13}N_3$
Molecular Weight: 103.17
Boiling Point: 206.9 [C at 760 mm Hg
Melting Point: −39 [C
Vapor Pressure: 0.37 mm Hg at 20 [C
Vapor Density: 3.5 (air=1.0)
Log Octanol/Water Partition Coefficient: −1.40 at 20 [C (estimated, Leo et al., 1971)
Description of Chemical: DETA is a strongly alkaline, hygroscopic, viscous, yellow liquid with a mild ammoniacal odor. It is highly soluble in water.

Rationale For Recommendations

I. *Exposure information*—A. *Production/use/disposal information.* The TSCA Inventory reports an aggregate production by five producers in 1977 in excess of 10 million pounds (EPA, 1980). DETA is used in the manufacture of a wide variety of products, including chelating agents, wet strength resins for paper goods, epoxy curing agents, polyamide resins for adhesives and coatings, surfactants in shampoos, fabric softeners, corrosion inhibitors in petroleum production, antirust and dispersal additives for high-quality motor oils and fuels, asphalt emulsifiers, and anti-static agents for synthetic fibers (Kirk-Othmer, 1979). It is also a component of high-energy fuels for rockets and military aircraft (Hawley, 1976). This use pattern indicates that significant exposure may occur in the workplace, and the National Occupational Hazard Survey estimates that 62,000 workers are potentially exposed to DETA (NIOSH, 1980). Release of DETA into the environment may occur during industrial use. A threshold limit value (TLVR) of 1 ppm for skin exposure was established by the American Conference of Governmental Industrial Hygienists based on the acute effects of this compound (ACGIH, 1980).

B. *Chemical fate information.* DETA is biodegradable and, due to its high solubility in water, is unlikely to bioaccumulate (Popp, 1977).

II. *Human population studies.* DETA is a skin, eye, and respiratory tract irritant and produces skin and probably pulmonary sensitization (ACGIH, 1980). Dernehl (1951) reported that certain polyamines induce asthmatic symptoms in man.

III. *Biological effects of concern to human health*—A. *Toxicokinetic/metabolism studies.* No information was found on the absorption, distribution, metabolism, and elimination of DETA in man.

B. *Short-term (acute) effects.* The acute intraperitoneal LD_{50} is 0.071 g/kg in mice and 0.074 g/kg in rats (Hine et al., 1958). When administered orally to male rats the LD_{50} after 14 days was 2.33 g/kg, and when administered percutaneously to rabbits the dermal LD_{50} was 1.09 g/kg (Smyth et al., 1949). No toxic signs were reported in a subacute inhalation study where rats were exposed for 15 days, 6 hours a day, to 130 ppm (Gage, 1970). Undiluted DETA tested in rabbits' eyes caused severe local injury with permanent loss of vision, whereas a 1-percent aqueous solution caused slight, transitory corneal damage and very slight conjunctivitis. The eye treated with a 1-percent solution was normal 2 days after exposure (Dow, 1981).

C. *Long-term (subchronic/chronic) effects.* The lifetime toxicity study in rats conducted by Fujino (1970) was determined to be inconclusive and cannot be used to assess the chronic toxicity of this chemical. However, pathologic changes were noted in the liver and kidney and to a lesser degree in the spleen and adrenal gland in the test animals. The Committee recommends studies to evaluate the chronic toxicity of this compound with particular emphasis on the renal and respiratory systems.

D. *Mutagenicity.* DETA was tested for mutagenicity in the *Salmonella* microbial assay. The TA 1535 and TA 100 tester strains were used, with and without metabolic activation. A direct mutagenic effect, which was not altered by activation, was seen: The authors suspect that activity was due to an alkylating impurity (Hedenstedt, 1978). Other assays using *Salmonella* and *Saccharomyces* organisms were negative with and without metabolic activation (Jagannath and Brusick, 1978).

E. *Teratogenicity and reproductive effects.* Due to the potential for high exposure and the lack of data on teratogenic and reproductive effects, the Committee recommends that appropriate tests be conducted for these effects.

2.2.c. Hexachloroethane

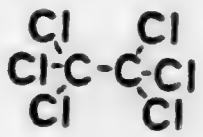
Summary of recommended studies. It is recommended that hexachloroethane (HCE) be tested for the following:

V 46 / 99 MAY 22 81 UMI

a. Environmental Effects: Chemical fate, Terrestrial plant uptake and toxicity, Bioaccumulation, Microbial toxicity, Avian toxicity, Toxicity to terrestrial invertebrates, Chronic toxicity to fish and aquatic invertebrates.

Physical and Chemical Information

CAS Number: 67–72–1.
Structural Formula:



Empirical Formula: C_2Cl_6.
Molecular Weight: 236.7.
Melting Point: Sublimes above 186° C.
Vapor Pressure: 0.4 mm Hg at 20° C.
Specific Gravity: 2.09.
Solubility in Water: 50 mg/1 at 22° C.
Log Octanol/Water partition Coefficient: 3.93.
Description of Chemical: White solid.

Rationale for Recommendations

I. *Exposure information*—A. *Production information.* The public portion of the TSCA Inventory lists six U.S. manufacturers and three importers of HCE in 1977 (EPA, 1981). For those companies on this list that disclosed their figures, the aggregate production and importation was between 4.1 and 41.2 million pounds.

One of the two primary uses of HCE is in the manufacture of smoke bombs and other smoke munitions by the U.S. Army. The military is presently seeking a substitute for HCE and plans to discontinue use of the chemical (McCreesh, 1981). However, a substitute has not been designated at this time. The second primary application is in aluminum foundries, where it is used in degassing magnesium.

A wide variety of additional applications for HCE include: an additive for extreme pressure lubricants; a plasticizer for nitrocellulose; an accelerator for rubber vulcanization; a retarding agent for pharmaceutical fermentation processes; and additive to fire extinguishing fluids; an additive to redue ignitability of combustible liquids; fungicidal and insecticidal components; a component of submarine paints; a fixer in photography and xerography; a softening agent in hair setting and styling; and an ingredient in synthetic diamonds. Past uses that apparently are now discontinued include: an anthelmintic for cattle and sheep; and a moth repellent.

B. *Release and exposure.* It is expected that substantial quantities of HCE would be released to the atmosphere as well as to land and water compartments during use and disposal of HCE-containing materials. Although little information is available on the amount of HCE released to the environment as an intermediate or byproduct waste (hex-wastes), this is likely to be the most significant and persistent source of contamination. For example, HCE is one of a group of coproducts in production of trichloroethylene, perchloroethylene, and carbon tetrachloride. Disposal of hex-wastes is usually through landfill operations or incineration; in one major incineration operation, the exhaust gases are scrubbed with sodium hydroxide solution and this solution is then discharged directly to the environment. Some hex-waste samples have contained as much as 15 percent hexachloroethane. Since millions of pounds of hex-wastes are generated each year, this could result in a substantial release of HCE to the environment. It is relevant to any concern over HCE release from hex-wastes that three carbon tetrachloride plants, one trichloroethylene plant, and three perchlroethylene plants have been recommended to the Environmental Protection Agency as monitoring sites (Mumma and Lawless, 1975).

HCE has been detected in rivers, municipal water supplies, and industrial effluent streams at concentrations from 1 to 40 ppb (EPA, 1979).

C. *Chemical fate information.* The chemical fate of HCE is complicated and not clearly defined.

The ratio of the vapor pressure to solubility in water of HCE indicates the molecule is likely to evaporate from aqueous solutions if it is not sorbed to the hydrosoil. The rate of evaporation would depend upon the amount of agitation and depth of the body of water. Since HCE is heavier than water, it has the tendency to sink to the bottom of rivers, lakes, wells, and streams. Using the method of Kenaga (1980) for predicting the sorption of chemicals in agricultural soil, it is predicted that HCE is likely to be sorbed to hydrophobic materials present in bottom sediments. Any chemical that has been trapped on the bottom of a body of water by sorption is likely to be available for interactions with microorganisms. In the case of perchlorinated compounds, however, the biochemical reaction rates are so slow that the mocroorganisms tend to accumulate the compound without any substantial degradation.

Since HCE also may sublime readily without melting, the potential for atmospheric release from terrestrial sources may be considerable.

II. *Environmental considerations*—A. *Short-term (acute) effects.* Test conducted for the development of the Ambient Water Quality Criteria for Chlorinated Ethanes (EPA, 1980) provide ample evidence that HCE at concentrations below 1 ppm can affect aquatic organisms. The following acute data were reported:

Daphnia, 48-hour LC_{50}=8,070 μg/l.

Midge *(Tanytarsus dissimilis)*, 48-hour LC_{50}=1,700 μg/l.

Mysid shrimp, 96-hour static LC_{50}=940 μg/l.

Fathead minnow, 96-hour flow-through LC_{50}=1,530 μg/l.

Bluegill, 96-hour static LC_{50}=980 μg/l.

Sheepshead minnow, 96-hour static LC_{50}=2,400 μg/l.

Rainbow trout, flow-through LC_{50}=980 μg/l.

Acute toxicity of HCE to mammals was reported by Weeks et al. (1979). The oral LD_{50} for the rat and guinea pig ranged from 4,460 to 7,690 mg/kg and and the dermal LD_{50} for the male rabbit was >32,000 mg/kg.

B. *Long-term (subchronic/chronic) effects.* The no-effect level, based on an embryo-larval test with fathead minnows, was 380 μg/l (EPA, 1980). The lowest measured toxic effect level in this study was 700 μg/l.

Subchronic vapor inhalation toxicity of HCE at 260 ppm was moderate to severe in guinea pigs, rats, and dogs, but minimal in Japanese quail after 6 weeks' exposure. Similar exposure of these species to HCE at 15 ppm showed no detectable toxicity (Weeks et al., 1979).

C. *Other effects (physiological/behavioral/ecosystem processes).* The following 96-hour EC_{50} values for algae exposed to HCE were reported in Ambient Water Quality Criteria for Chlorinated Ethanes (EPA, 1980):

Selenastrum (chlorophyll a)=87,000 μg/l.

Selenastrum (cell no.)=93,200 μg/l.

Skeletonema (chlorophyll a)=8,570 μg/l.

Skeletonema (cell no.)=7,750 μg/l.

Behavioral studies by Weeks et al. (1979) produced no measurable effects on either avoidance performance or spontaneous motor activity in rats at exposures to HCE of up to 6 weeks and 260 ppm.

D. *Bioaccumulation and food-chain transport.* Measured bioconcentration factors are 139 for bluegills (EPA, 1980) and 703 for fatheat minnows (Veith, 1981). This corresponds to total lipid contents in these fishes of 2 percent to 3

percent for the bluegill and about 8 percent for the fathead minnow. However, the fathead minnow is still a rather lean fish as compared with salmonids such as trout, which have lipid contents ranging from about 14 percent to as high as 50 percent. The very high bioconcentration factor expected for trout raises concern for high food-chain residues and consequently a possibility of significant human exposure, as well as latent physiological and reproductive effects in the trout itself that are typical for organochlorines.

E. *Reasons for specific environmental effects recommendations.* Although EPA has designated hexachloroethane as a priority pollutant under the Clean Water Act of 1977, no further studies beyond those reported in the Ambient Water Quality Criteria for Chlorinated Ethanes (EPA, 1980) (primarily acute toxicity studies) are underway or planned at this time. HCE was not among the list of priority pollutants, including 12 of highest concern and 16 of secondary concern, that have been selected for additional aquatic toxicity testing by the Office of Water Regulations and Standards.

Organochlorines in general are notorious for latent forms of toxicity, including reproductive toxicity, neural toxicity, and behavior modifications. Compounds suspected of latent forms of toxicity should not be judged for environmental hazard solely on the basis of acute toxicity tests. For an organochlorine, annual production of 40 million pounds must be considered very high (e.g., most organochlorine pesticides do not approach this level of production).

Chemical fate studies are recommended because of the almost complete absence of these data. The broad spectrum of opportunities for environmental release justify fate studies applicable to all environmental compartments.

Terrestrial plant uptake and toxicity studies are recommended because no information has been found. The likely exposure routes would be through atmospheric release and from irrigation by ground or surface water contaminated by runoff or leachates from landfill sites containing hex-wastes. Additional bioaccumulation studies are recommended. Bioconcentration factors for species in taxonomic groups other than fish should be determined. Benthic species would be preferred because high chronic exposures are more likely in this portion of the aquatic environment.

Microbial toxicity studies are recommended specifically for benthic decomposers since HCE sinks in aquatic systems, is likely to sorb to sediments, and may accumulate there at high concentrations.

The acute toxicity data for the rat, guinea pig, and rabbit suggest a low hazard to mammals from oral and dermal exposure to HCE. Similarly, subchronic vapor inhalation toxicity of HCE to guinea pigs, rats, and dogs is also low. For these reasons, testing is not recommended for mammalian species at this time. However, if latent forms of toxicity are demonstrated in other tests, the need for chronic mammalian testing should be evaluated.

Very few data are available for avian species. A single subchronic vapor inhalation test with Japanese quail showed almost no toxicity from HCE. However other tests, such as dietary and reproductive tests with other species, are needed. Avian toxicity tests are recommended due to the expected diversity of exposure routes and would be particularly appropriate if residues of HCE in the parts-per-billion range are found in food sources such as terrestrial annelids, insects, fish, and plant tissues.

Toxicity tests and residue measurements with terrestrial invertebrates, particularly annelids, are recommended because of their importance in the terrestrial food web.

Chronic toxicity studies with fish and aquatic invertebrates are recommended. In spite of evidence of acute toxicological concern, no full chronic studies with aquatic species have been conducted. The one partial chronic test with the embryo-larval stages of the fathead minnow does not indicate toxicity much greater than the acute toxicity value for this species. The fathead minnow is not a particularly sensitive species, however, and a partial chronic test with this fish is not adequate to assess the possibility of latent toxic effects, especially in species of higher lipid content.

Chronic studies with aquatic invertebrates such as benthic arthropods or polychaetes are particularly appropriate due to the possibility of greater exposure in the benthic environment and their critical role in the aquatic food web.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday).

This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/FSQS		DOT/FAA	USDA/FSQS
DOT/FHWA	USDA/REA		DOT/FHWA	USDA/REA
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/NHTSA	LABOR		DOT/NHTSA	LABOR
DOT/RSPA	HHS/FDA		DOT/RSPA	HHS/FDA
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	
CSA			CSA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.
Comments on this program are still invited.
Comments should be submitted to the

Day-of-the-Week Program Coordinator,
Office of the Federal Register,
National Archives and Records Service,
General Services Administration,
Washington, D.C. 20408.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last Listing May 5, 1981

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.
WHO: The Office of the Federal Register.
WHAT: Free public briefings (approximately 2½ hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and the Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them, as part of the General Services Administration's efforts to encourage public participation in Government actions. There will be no discussion of specific agency regulations.
WHEN: June 12, 1981, at 9 a.m.
WHERE: Office of the Federal Register, Room 9409, 1100 L Street NW., Washington, D.C.
RESERVATIONS: Call King Banks, Workshop Coordinator, 202–523–5235.

Highlights

28314 **Hazardous Waste Land Disposal Facilities** EPA issues supplemental information regarding a reproposal on performance standards applicable to owners and operators of hazardous waste treatment, storage and disposal facilities. (Part V of this issue).

28152 **Foreign Banks** Treasury/FS issues rules designating Federal branches of foreign banks to be Treasury Tax and Loan depositories that are authorized to transact business in the United States by the Comptroller of the Currency.

28308 **Native American Programs** HHS/HDSO announces availability of FY 1982 Financial Assistance for Native American Projects. (Part IV of this issue)

26330 **Farmers—Emergency Loans** USDA/FmHA amends its policies pertaining to insured emergency loans. This action is intended to correct deficiencies and to restore fiscal integrity to the program. (Part VI of this issue)

28224 **Upland Petroleum Leasing—Alaska** Interior/BLM is accepting applications for geophysical exploration permits for oil and gas assessments on certain lands in Alaska.

CONTINUED INSIDE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $75.00 per year, or $45.00 for six months, payable in advance. The charge for individual copies is $1.00 for each issue, or $1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Highlights

28163 **Veterans–Federal Procurement** VA revises rules to provide procedures and controls over the establishment of Qualified Products Lists for convenience/laborsaving foods for use within the VA medical districts.

28160 **Motor Vehicles** EPA revises motor vehicle exhaust emission standards for carbon monoxide for 1981 and 1982 model year light-duty vehicles.

28172 **Customs Bonds** Treasury/Customs proposes revision of the Customs bond structure.

28368-28381 **Foreign Air Carriers** CAB updates rules governing foreign air carrier charter rights. (7 documents) (Part VII of this issue)

28196 **Corn** USDA/Office of the Secretary issues determinations regarding the National program acreages, program allocation factors and payment rules for 1980 corn and sorghum crops.

28274 **Sunshine Act Meetings**

Rules and Regulations

Federal Register
Vol. 46, No. 100
Tuesday, May 26, 1981

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

7 CFR Part 802

Delay Effective Date of Requirement for Change in Mode of Operation

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Affirmation of final rule.

SUMMARY: This action affirms an emergency final rule which delayed until January 1, 1983, for scales installed on or before January 1, 1981, the requirement in § 802.2(r) of the regulations promulgated under the United States Grain Standards Act (7 CFR 802.2(r)) which provided that all grain-weighing automatic hopper scales would be designed so that the mode of operation, and each change in mode of operation, would be indicated on the printed record in a prescribed manner. For scales installed after January 1, 1981, the January 1, 1981, effective date remained unchanged. No comments were received as a result of the emergency final rulemaking and the final rule is made effective without change.

DATE: Effective May 26, 1981.

FOR FURTHER INFORMATION CONTACT: George T. Lipscomb, Director, Weighing Division, USDA, FGIS, Room 3117 Auditors Building, Washington, D.C. 20250; telephone (202) 382–1731.

SUPPLEMENTARY INFORMATION: This action has been issued in conformance with Executive Order 12291, and has been determined to be "not major."

Emergency final rulemaking with a 60-day opportunity for public comment was published in the December 8, 1980, **Federal Register** (45 FR 80985).

The requirement in § 802.2(r) of the regulations under the United States Grain Standards Act (7 CFR 802.2(r)) which provided that effective January 1, 1981, all grain-weighing automatic hopper scales be designed so the mode of operation, and each change in mode of operation, be indicated, on the printed record in a prescribed manner was amended so that, for scales installed on or before January 1, 1981, the effective date would be delayed until January 1, 1983. For scales installed after January 1, 1981, the January 1, 1981 effective date remained the same.

As indicated in a December 8, 1980, **Federal Register** publication, FGIS had received several requests from the trade to delay implementation of the effective date in § 802.2(r) until January 1, 1983, for scales installed on or before January 1, 1981. These requests cited the unavailability of modified equipment or plans for the installation of new weighing equipment as justification for the delay.

No comments were received with respect to the emergency final rulemaking. Accordingly, the final rule amending § 802.2(r) of the regulations will remain effective without change, as published at 45 FR 80985.

(Sec. 9, Pub. L. 94–582, 90 Stat. 2875, (7 U.S.C. 79a))

Done in Washington, D.C., on May 19, 1981.

D. R. Galliart,

Acting Administrator.

BILLING CODE 3410–02–M

Agricultural Marketing Service

7 CFR Part 1068

[Milk Order No. 68]

Milk in the Upper Midwest Marketing Area; Order Suspending Certain Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rule.

SUMMARY: This order suspends a requirement under the Upper Midwest marketing order that handlers make a partial payment for milk received from producers for whom a cooperative association is not collecting payments by the 25th day of the month. Seven regulated handlers, two cooperative associations and a dairy farmer indicated that the suspension would accommodate producers in spacing payments for milk about 15 days apart. The suspension would be for the period May 1981 through April 1982.

DATE: May 26, 1981.

FOR FURTHER INFORMATION CONTACT: Martin J. Dunn, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–7311.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notice of proposed suspension: Issued March 27, 1981; published April 2, 1981 (46 FR 19946).

It has been determined that this action is not a major rule under the criteria set forth in Executive Order 12291.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that this action will not have a significant economic impact on a substantial number of small entities. Such action will permit milk handlers to continue a customary payment practice in the area of having partial and final payments to certain producers spaced about two weeks apart. Otherwise, producer payments would be spaced on an uneven basis, to the dissatisfaction of the producers involved.

This suspension order is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and of the order regulating the handling of milk in the Upper Midwest marketing area.

Notice of proposed rulemaking was published in the **Federal Register** (46 FR 19946) concerning a proposed suspension of certain provisions of the order. Interested persons were afforded opportunity to file written data, views, and arguments thereon. Four comments were received in response to the notice of proposed rulemaking. Also, at a public hearing held April 14–15, 1981, witnesses representing proprietary handlers and a cooperative association testified in support of the suspension pending any amendment resulting from the hearing. This testimony was in connection with a proposal to amend the order concerning the date of partial payment (46 FR 16689). In comments and testimony, a total of seven proprietary handlers, two cooperative associations and a dairy farmer requested continued suspension of the provision.

After consideration of all relevant material, including the proposal in the

notice, the comments received, the record of the public hearing and other available information, it is found and determined that for the months of May 1981 through April 1982 the following provisions of the order do not tend to effectuate the declared policy of the Act:

In § 1068.73, paragraph (a)(4) in its entirety.

Statement of Consideration

The Upper Midwest milk order, which became effective June 1, 1976, initially required a partial payment to producers and cooperative associations on the 25th day of the month for milk received during the first 15 days of the month. Final payment was due, and still is, by the 18th day of the following month. These were the dates provided in the prior order for the Minneapolis-St. Paul area.

Many of the producers who were brought under the merged order, particularly those in Wisconsin, had been accustomed to receiving payments 15 days apart. They preferred such payments to being paid on the 18th and 25th of the month. To accommodate this, the pertinent provisions of the order have been suspended since November 1976 (41 FR 51389, 42 FR 22360, 42 FR 59747, 43 FR 14025, 43 FR 19341, 44 FR 23065 and 45 FR 23405). The suspensions were limited to payments to producers for whom a cooperative was not collecting payments.

Cooperative associations in the market follow the practice of making partial payments to their members about 15 days in advance of the final payment date, and the suspension would give proprietary handlers the opportunity to pay their producers on about the same schedule. Dairy farmers have financial commitments that are due more often than once a month and to meet those commitments dairy farmers should continue receiving two payments each month.

The suspension should be extended for an additional period of 12 months, pending any amendment of the order based on the April 14–15, hearing record. Unless this is done, a significant number of dairy farmers would receive a partial payment for their deliveries during the first 15 days of the current month only one week after receiving a final payment for their deliveries during the previous month. This kind of payment schedule has resulted in producer dissatisfaction, and the suspension action would help maintain orderly marketing.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary, and contrary to the public interest in that the suspension does not require of persons affected substantial or extensive preparation prior to the effective date, and notice of proposed rulemaking was given interested parties and they were afforded opportunity to file written data, views or arguments concerning the suspension. Also, the suspension was considered at a public hearing held April 14–15, 1981, and there was no testimony in opposition.

Therefore, good cause exists for making this order effective upon publication in the **Federal Register**.

It is therefore ordered, That the aforesaid provisions of the order are hereby suspended for the months of May 1981 through April 1982.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: May 28, 1981.

Signed at Washington, D.C., on May 19, 1981.

C. W. McMillan,

Assistant Secretary for Marketing and Transportation Services.

[FR Doc. 81-15520 Filed 5-22-81; 8:45 am]

BILLING CODE 3410-02-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 80-NW-52-AD; Amdt. 39-4121]

Airworthiness Directives: Boeing Model 707/720 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new Airworthiness Directive, (AD) which requires inspection of the wing lower surface skins and adjacent stringers on Boeing Model 707/720 series airplanes. This AD is needed to detect cracks before they develop to a length which would prevent limit loads from being carried and thus seriously compromise the structural capability of the wing lower surfaces.

DATE: Effective date June 29, 1981.

Compliance schedule as prescribed in the body of the AD, unless already accomplished.

ADDRESSES: The applicable service information may be obtained from Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington, 98124. These documents may be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington, 98108.

FOR FURTHER INFORMATION CONTACT: Mr. J. W. Hart, Jr., Airframe Branch, ANW-120S, Seattle Area Aircraft Certification Office, FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108, telephone (206) 767-2516.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an Airworthiness Directive (AD) to require repetitive inspections of the wing lower skin surface for cracks in the stringer/skin between wing stations 265 and 470 and stringers 5 and 7 of the 720 series airplanes was published in the **Federal Register** on November 24, 1980, (45 FR 77450).

The proposal was prompted by an extensive evaluation of the original crack data and the results of the one-time inspection required by AD 80-15-10 (45 FR 49910; July 28, 1980).

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received. The rule with respect to the 720 series, is therefore, adopted as proposed.

In February 1981, following publication of the NPRM, cracking similar to the 720 aircraft was reported for a 707-300C airplane. One operator reported a 2.5 inch long crack in the left wing lower skin and that stringer 7 was completely severed. This failure probably due to fatigue, results in the structure being unable to carry limit loads and potential serious consequences. AD-80-15-10 which was a one-time inspection in the B-720 is superseded by this new, more comprehensive AD.

Since this condition is likely to exist or develop on other 707 airplanes of the same type design, this AD requires an inspection program similar to that required for the 720 series. Further, since a situation exists for the 707 that requires immediate adoption of this regulation, it is found that notice and public procedure for that portion of the regulation are impracticable.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Section 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended as follows:

Boeing: Applies to all 707/720 series airplanes, certificated in all categories.

A. Inspect stringers 5 and 7 and the adjacent lower wing skin from WS 265 through 470 for cracks using the specified methods at the times indicated. Skins/stringers found cracked must be repaired prior to further flight in a manner approved by the Chief, Seattle Area Aircraft Certification Office, FAA Northwest Region.

1. For 720/720B series airplanes: Within 500 landings after the effective date of this Amendment and thereafter at intervals not to

exceed 2,860 landings, conduct a low frequency eddy current inspection of the wing lower surface for cracks in the stringer/skin between wing stations 265 and 470 and stringers 5 and 7 in accordance with Boeing Service Bulletin A3395, Revision 2, dated October 10, 1980, or later FAA approved revisions, or in a manner approved by the Chief, Seattle Area Aircraft Certification Office.

2. For 707 series airplanes: Inspect the wing skins and stringers for cracks using an inspection method approved by the Chief, Seattle Area Aircraft Certification Office, when airplanes reach or are beyond the thresholds noted, or within 500 landings thereafter, whichever is later, unless already accomplished as noted, and repeat the inspection in accordance with the following schedule.

Inspection Schedule

Airplane	Landings			
	Threshold	Within	Unless accomplished within the last	Repetitive intervals
707-100/200	26,000	500	5,500	6,000
707-300/400	21,000	500	4,500	5,000
707-300B	17,000	500	3,700	4,200
707-300C PAX	17,000	500	3,700	4,200
707-300C Cgo	17,000	500	1,600	2,100

B. Airplanes may be flown to a maintenance base for repairs or replacement in accordance with FAR 21.197 and FAR 21.199.

Note.—This supersedes AD 80-15-10 (Amdt. 39-3852; 45 FR 49910, July 28, 1980).

Alternate methods of compliance may be used when approved by the Chief, Seattle Area Aircraft Certification Office, Northwest Region.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1).

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to The Boeing Company, P.O. Box 3707, Seattle, Washington, 98124. These documents also may be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.—The FAA has determined that this document involves a regulation which is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979), and will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act, since it involves few, if any, small entities. A final regulatory evaluation has been prepared for this regulation, has been placed in the regulatory docket, and summarized earlier in this rule. A copy of it may be obtained by contacting the person identified above under the caption "FOR FURTHER INFORMATION CONTACT."

This regulation is a final order of the Administrator as defined by Section 1005 of the Federal Aviation Act of 1958, as amended. As such it is subject to review only by the courts of appeals of the United States or the United States Court of Appeals for the District of Columbia.

Issued in Seattle, Washington, on May 15, 1981.

Charles R. Foster,

Director, Northwest Region.

[FR Doc. 81-15278 Filed 5-22-81; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 81-NW-22-AD; Amdt. No. 39-4122]

Airworthiness Directives: Boeing Model 737 Series Airplanes (Prior to Line No. 316 Plus Line Nos. 323 and 324)

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Final rule.

SUMMARY: This amendment adds an Airworthiness Directive (AD) which requires a one-time visual inspection for cracks on the horizontal stabilizer rear spar attach lugs on Boeing Model 737 series airplanes with 20,000 or more landings. This action is necessary because a cracked center section rear spar upper chord attach lug was found that, if left undetected, could result in the loss of the horizontal stabilizer.

DATE: Effective date June 4, 1981.

ADDRESSES: The service bulletin specified in this Airworthiness Directive may be obtained upon request to Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124, or may be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington, 98108.

FOR FURTHER INFORMATION CONTACT: Mr. Roger Anderson, Airframe Branch, ANW-120S, Seattle Area Aircraft Certification Office, FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108, Telephone (206) 767-2516.

SUPPLEMENTARY INFORMATION: In April 1981, during accomplishment of Boeing Service Bulletin 737-55-1028 on a 737 series airplane with 28,704 landings, one operator detected a cracked center section rear spar upper chord attach lug. The crack was found on the forward face of the aft lug of the clevis extending from the lug hole at the 12 o'clock position. The chord was replaced. Subsequent analysis of the cracked lug indicated fatigue was the cause of cracking. A mandatory one-time inspection is therefore required, since continued operation of an airplane with undetected lug cracks may result in loss of the horizontal stabilizer.

Since this condition is likely to exist or develop on other airplanes of the same type design, an airworthiness directive is being issued which requires inspection and replacement or repair, as necessary, of horizontal stabilizer rear spar attach lugs on certain Boeing Model 737 series airplanes.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

Boeing: Applies to Boeing Model 737 series airplanes, certificated in all categories, prior to line number 316 plus line numbers 323 and 324. To insure continued structural integrity of the horizontal stabilizer, accomplish the following:

A. Unless an equivalent inspection has been accomplished within the last 2,000 landings, upon the accumulation of 20,000 landings or, within the next 200 landings after the effective date of this AD whichever comes later, perform a one-time visual inspection of the horizontal stabilizer rear spar attach lugs for cracks in accordance with Boeing Alert Service Bulletin 737-55A1029 dated April 30, 1981, or later revisions approved by the Chief, Seattle Area Aircraft Certification Office, FAA Northwest Region.

B. Parts found cracked must be replaced or repaired before further flight in a manner approved by the Chief, Seattle Area Aircraft Certification Office, FAA Northwest Region.

C. Airplanes may be flown to a maintenance base for repairs or replacement in accordance with FAR 21.197 and 21.199 with prior approval of the Chief, Seattle Area Aircraft Certification Office, FAA Northwest Region.

This Airworthiness Directive may be revised to require repetitive inspections at a later date.

The manufacturer's specifications and proocedures identified and described in this

directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1).

All persons affected by this directive who have not already received the above specified alert service bulletin from the manufacturer, may obtain copies upon request to Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124, or it may also be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108.

This amendment becomes effective June 4, 1981.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Executive Order 12291. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the person identified above under the caption "FOR FURTHER INFORMATION CONTACT."

This rule is a final order of the Administrator under the Federal Aviation Act of 1958, as amended. As such, it is subject to review only by the courts of appeals of the United States, or the United States Court of Appeals for the District of Columbia.

Issued in Seattle, Washington, on May 15, 1981.

Charles R. Foster,

Director, Northwest Region.

[FR Doc. 81-15275 Filed 5-22-81; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 81-CE-8-AD; Amendment 39-4120]

Airworthiness Directives; Cessna Models 402C and 414A Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to certain Cessna Model 402C and 414A airplanes. The AD requires initial and repetitive inspections of the engine mount support beams at the engine rear mounts for cracks and immediate reinforcement of both engine mount support beams, for the engine involved, if a beam is found cracked. This action will preclude failure of an engine mount support beam and possible separation of the engine from the airplane during flight.

DATES: Effective Date: June 1, 1981.

Compliance: As prescribed in the body of the AD.

ADDRESSES: Cessna Multi-engine Customer Care Service Information Letter ME81-10, dated April 17, 1981, applicable to this AD, may be obtained from Cessna Aircraft Company, Marketing Division, Attention: Customer Service Department, Wichita, Kansas 67201; telephone (316) 685-9111. A copy of Service Information Letter is also contained in the Rules Docket, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106; and Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: Lawrence S. Abbott, Aerospace Engineer, Aircraft Certification Program, Room 238, Terminal Building 2299, Mid-Continent Airport, Wichita, Kansas 67209; Telephone (316) 942-4219.

SUPPLEMENTARY INFORMATION: Engines on Cessna Models 402C and 414A airplanes are secured to the airframe by beams that are cantilevered forward from the wing. There have been reports that cracks have developed at the engine mount rear attach points on the engine beam structure which could, if allowed to propagate, result in separation of the engine from the airplane during flight. Cessna issued Service Information Letter ME81-10 dated April 17, 1981, which specifies initial inspection, within the next 100 hours, of the engine rear mount beam hat section for cracks on airplanes with 500 to 1,000 hours time-in-service, and within 50 hours on airplanes with 1,000 hours or more time-in-service. In both instances, repetitive inspections are to be performed every 200 hours thereafter. If cracking is found in the beam hat section, Cessna Service Kit SK414-17 called out in Cessna Service Information Letter ME81-10 must be installed before further flight.

In addition, the Cessna Service Information Letter requires installation of the Service Kit SK414-17 modification whenever either engine is removed for normal maintenance or overhaul. Accordingly, since the unsafe condition described above is likely to exist or develop in engine mount support beams installed on other airplanes of the same type design, an AD is being issued applicable to certain Cessna Model 402C and 414A airplanes making compliance with only those provisions of Cessna Service Information Letter ME81-10, which specify repetitive inspections and modification if cracks are found, mandatory.

Furthermore, if an engine mount support beam crack exceeds 1¾ inches in length, owners/operators are required by the AD to contact the Aircraft Certification Program, Federal Aviation Administration, Room 238, Terminal Building 2299, Mid-Continent Airport, Wichita, Kansas 67209; Telephone (316) 942-4285, for special repair disposition.

The approved Cessna Modification Kit SK414-17, improves the overall strength of the engine mount support beams. However, fatigue tests are in progress to determine long-term strength of the modification. These test results will determine the need for additional mandatory inspection requirements and/or mandatory installation of the modification kit on all affected airplanes, regardless of whether the engine mount support beams are cracked.

The FAA has determined that there is an immediate need for a regulation to assure safe operation of the affected airplanes. Therefore, notice and public procedure under 5 U.S.C. 553(b) is impracticable and contrary to the public interest and good cause exists for making the amendment effective in less than thirty (30) days after the date of publication in the **Federal Register**.

Adoption of the Amendment

Accordingly, and pursuant to the authority delegated to me by the administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive.

Cessna: Applies to Models 402C (S/N 402C0001 through 402C0468) and 414A (S/N 414A0001 through 414A0646) airplanes with over 500 hours time-in-service, certificated in any category.

Compliance: Required as indicated, unless already accomplished. To ensure structural integrity of the engine mount beams, accomplish the following in accordance with the provisions of Cessna Service Information Letter ME81-10, dated April 17, 1981, as applicable:

(A) On all airplanes with 500 to 1,000 hours time-in-service, within the next 100 hours time-in-service after the effective date of this AD and each 200 hours time-in-service thereafter, clean and visually inspect the engine mount beams at the rear fittings for cracks in the hat section. If cracks 1¾ inches in length or less are found, install Cessna Service Kit SK414-17 before further flight. If cracks in excess of 1¾ inches in length are found, contact the Aircraft Certification Program, Federal Aviation Administration, Room 238, Terminal Building 2299, Mid-Continent Airport, Wichita, Kansas 67209; Telephone (316) 942-4285, for special repair disposition.

(B) On all airplanes with over 1,000 hours time-in-service, within the next 50 hours time-in-service after the effective date of this AD and each 200 hours time-in-service thereafter, clean and visually inspect the engine mount beam at the rear fittings for cracks in the hat section. If cracks 1¾ inches in length or less are found, install Cessna Service Kit SK414–17 before further flight. If cracks in excess of 1¾ inches in length are found, contact the Aircraft Certification Program, Federal Aviation Administration, Room 238, Terminal Building 2299, Mid-Continent Airport, Wichita, Kansas 67209; Telephone (316) 942–4285, for special repair disposition.

(C) After Cessna Service Kit SK414–17 has been installed, the requirements of paragraphs A) and B) of this AD are no longer applicable.

Note.—The approved Cessna Modification Kit improves the overall strength of the engine mount support beams. Fatigue tests are in progress to determine the need for additional mandatory inspection requirements and/or mandatory installation of the modification kit. Upon satisfactory completion of the tests, we plan to consider amending this AD, as warranted, by the outcome of the fatigue tests.

(D) Aircraft may be flown in accordance with Federal Aviation Regulation 21.197 to a location where the provisions of this AD can be accomplished.

(E) Any equivalent method of compliance with this AD must be approved by the Chief, Aircraft Certification Program, Federal Aviation Administration, Room 238, Terminal Building 2299, Mid-Continent Airport, Wichita, Kansas 67209; Telephone (316) 942–4285.

This Amendment becomes effective June 1, 1981.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.89 of the Federal Aviation Regulations (14 CFR Sec. 11.89))

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in the aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

This rule is a final order of the Administrator under the Federal Aviation Act of 1958, as amended. As such, it is subject to review only by the courts of appeals of the United States, or the United States Court of Appeals of the District of Columbia.

Issued in Kansas City, Missouri, on May 15, 1981.

John E. Shaw,

Acting Director, Central Region.

[FR Doc. 81-15530 Filed 5-22-81; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 81-WE-7-AD; Amdt. 39-4117]

Airworthiness Directives; General Dynamics Model 240 Series Airplane

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires inspection, and repair if necessary, of the wing spar structure on General Dynamics Model 240 Series aircraft. This AD is needed because of reports of cracks and corrosion on the center wing to wing outer panel attach fittings which could result in failure of the wing.

DATES: Effective June 1, 1981.

Compliance schedule—As prescribed in the body of the AD unless already accomplished.

ADDRESSES: The applicable service information may be obtained from: General Dynamics, Attention: Larry Hayes, Manager Products Support, Convair Division, P.O. Box 80877, San Diego, California 92138.

Also, a copy of the service information may be reviewed at, or a copy obtained from:

Rules Docket in Room 916, FAA, 800 Independence Avenue SW., Washington, D. C. 20591, or

Rules Docket in Room 6W14, FAA Western Region, 15000 Aviation Boulevard, Hawthorne, California 90261.

FOR FURTHER INFORMATION CONTACT: Jerry Presba, Executive Secretary, Airworthiness Directive, Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, World Way Postal Center, Los Angeles, California 90009. Telephone: (213) 536–6351.

SUPPLEMENTARY INFORMATION: There have been reports of cracks in the wing spar rails and lower TEE rail of Wing Station 15 bulkhead and corrosion of the center wing to wing outer panel attach fittings on General Dynamics Model 240 airplanes. This condition, if not corrected, could result in failure of the wing.

In order to prevent the corrosion or cracking from progressing to an unsafe condition, this AD requires an early initial visual external inspection and subsequent internal, repetitive inspections and repair as necessary.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new Airworthiness Directive:

General Dynamics: Applies to Model 240 Series Airplanes including those modified for turbo-propeller power certificated in all categories, and those equivalent military models submitted for civil certification under type certificate A–793.

Compliance required as indicated, unless already accomplished.

To prevent structural failure of the wing structure, which could result from corrosion and cracking at the wing outer panel/wing center section joint, accomplish the following:

(a) Within 50 hours' time in service or within 30 days from the effective date of this AD, whichever occurs earlier, conduct an external visual inspection of the wing in the area of the spar rails, both upper and lower, front and rear, from ten (10) inches inboard of bulkhead 15(WS323) to ten (10) inches outboard of bulkhead 17(WS346) in accordance with Figure 3 of General Dynamics Service Bulletin No. 57–4A dated February 13, 1973, hereinafter referred to as S.B. No. 57–4A for evidence of internal structural corrosion which may be indicated by some out-of-alignment or bulging of the external surface.

(b) If any indication of surface out-of-alignment, bulging, corrosion, cracks, or failed rivets is found, before further flight conduct an internal inspection in accordance with this AD, paragraph (c).

(c) Within 500 hours' time in service or within 90 days from the effective date of this AD, whichever occurs earlier, conduct an internal visual inspection of the wing in accordance with S.B. 57–4A paragraph 2 including spar rails (upper and lower, front and rear), center wing to outer panel attach fittings, upper and lower bulkhead rails, and associated structure for corrosion and/or cracks from bulkhead 14(WS300) to bulkhead 18(WS361), after cleaning all surfaces in accordance with the procedures shown in S.B. 57–4A Figures 1 through 4. In addition to the visual inspection required above, using a dye penetrant method, inspect for cracks in spar rails and chordwise bulkhead TEE rails, after removal of all dirt, paint and integral

fuel tank sealant, in the following areas at the specified stations.

1. Upper and lower spar rails. Six (6) inches spanwise inboard and outboard of station 15(WS323) and station 17(WS346) on the forward facing surface of the front spar rails and the aft facing surface of the rear spar rails. See AD paragraph (c)(3).

2. Upper and lower chordwise TEE rails. On the inboard facing surfaces at station 15(WS323), and the outboard facing surfaces at station 17(WS346), extending two (2) inches chordwise from the edges of the forward and aft fuel tank corner fittings. See AD paragraph (c)(3).

3. The above dye penetrant inspections at station 17(WS346) are required only for those aircraft with integral fuel tanks installed in the wing outer panels outboard of station 17.

(d) If corrosion or cracking is detected, repair in a manner approved by the Chief, Engineering and Manufacturing Branch, FAA Western Region.

(e) Repeat the inspection required by paragraph (c) of this AD at intervals not to exceed 3000 hours' time in service or one year from the last such inspection, whichever occurs earlier.

(f) Prior to issuance of a Certificate of Airworthiness for military aircraft being converted for civil certification, the applicant shall; and prior to further flight for any aircraft that has been out of service for one (1) year, the operator shall; conduct an internal inspection in accordance with paragraph (c) of this AD.

(g) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections required by this AD.

(h) Alternate inspections, modifications or other actions which provide an equivalent level of safety may be used when approved by the Chief, Engineering and Manufacturing Branch, FAA Western Region.

The manufacturers' specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 553(a)(1). All persons affected by this directive, who have not already received these documents from the manufacturer, may obtain copies upon request to: General Dynamics, Attention: Larry Hayes, Manager Products Support, Convair Division, P.O. Box 80877, San Diego, California 92130.

These documents may also be examined at:

FAA Western Region Office, Room 6W14, 15000 Aviation Boulevard, Hawthorne, California 90261

and at: FAA Headquarters, 800 Independence Avenue SW., Washington, D.C. 20591.

An historical file on this AD, which includes the incorporated material in full, is maintained by the FAA at its headquarters in Washington, D.C. and at FAA Western Region Office.

This amendment becomes effective June 1, 1981.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

Issued in Los Angeles, California on May 13, 1981.

H. C. McClure,

Acting Director, FAA Western Region.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule adds a 700 foot transition area for the Twentynine Palms Airport, Twentynine Palms, California, so as to provide controlled airspace for aircraft executing an instrument approach procedure to the Twentynine Palms Airport utilizing the Twentynine Palms, California VORTAC. The need for the transition area was created when a VOR instrument approach procedure was established for the airport.

EFFECTIVE DATE: June 11, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas W. Binczak, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261; Telephone: (213) 536-6182.

SUPPLEMENTARY INFORMATION:

History

On March 23, 1981, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the transition area for Twentynine Palms, California (46 FR 18050). The addition of this 700 foot transition area will provide continuous controlled airspace for protection of instrument operations at Twentynine Palms Airport. Interested persons were invited to participate in the rulemaking proceeding by submitting comments on the proposal to the FAA. No comments objecting to the proposal were received. This amendment is the same as that proposed in the notice. Section 71.181 was republished in the **Federal Register** on January 2, 1981 (46 FR 540).

The Rule

This amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) alters the transition area at Twentynine Palms, California. This transition area provides protection for instrument operations authorized for Twentynine Palms Airport, increases air traffic safety, and improves flow control procedures.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (46 FR 540) is amended, effective 0901, June 11, 1981, by adding the following:

§ 71.181 [Amended]

Twentynine Palms, California

Preceding "That airspace extending upward from 1200 feet . . ." insert "That airspace extending upward from 700 feet above the surface within a 4-mile radius of Twentynine Palms Airport (latitude 34°07'46" N, longitude 115°58'22" W) and within 4 miles each side of the Twentynine Palms VORTAC 279° (265°M) radials extending from the 4-mile radius area to the VORTAC, and . . ."

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

The FAA has determined that this regulation only involves an established

body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Los Angeles, California on May 14, 1981.

H. C. McClure,

Acting Director, Western Region.

14 CFR Part 71

[Airspace Docket No. 81-AWE-7]

Designation of Federal Airways, Area Low Routes, Controlled Airspace, and Reporting Points; Alteration of Transition Area

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Final rule.

SUMMARY: This rule alters the transition area at Cochise, Arizona, so as to provide additional controlled airspace for aircraft utilizing Instrument Flight Rules (IFR) departure procedures from Tucson International Airport and Davis-Monthan Air Force Base, Tucson, Arizona.

EFFECTIVE DATE: June 11, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas W. Binczak, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261; Telephone: (213) 536-6182.

SUPPLEMENTARY INFORMATION:

History

On March 16, 1981, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the transition area for Cochise, Arizona (46 FR 16901). Redesignation of this transition area will provide controlled airspace for aircraft utilizing IFR departure routes from the Tucson area. Interested persons were invited to participate in the rulemaking proceeding by submitting comments on the proposal to the FAA. No comments objecting to the proposal were received. This amendment is the same as that proposed in the notice. Section 71.181 was republished in the Federal Register on January 2, 1981 (46 FR 540).

The Rule

This amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) alters the transition area at Cochise, Arizona. This transition area provides protection for instrument operations authorized for the Tucson area, increases air traffic safety and improves flow control procedures.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (46 FR 540) is amended and redescribed, effective 0901 GMT, June 11, 1981, as follows:

§ 71.181 [Amended]

Cochise, Arizona

That airspace extending upward from 1200 feet above the surface beginning at latitude 32°22'30" N., longitude 110°00'00" W. latitude 32°22'00" N., longitude 109°57'00" W., latitude 32°15'00" N., longitude 109°27'55" W., latitude 32°10'00" N., longitude 109°37'55" W., latitude 32°08'50" N., longitude 109°23'05" W., latitude 31°54'00" N., longitude 109°25'25" W., latitude 31°57'05" N., longitude 109°55'00" W., latitude 32°07'00" N., longitude 109°54'00" W., latitude 32°07'30" N., longitude 110°00'00" W., to point of beginning.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and CFR 11.69)

The FAA has determined that this document involved a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Los Angeles, California on May 14, 1981.

H. C. McClure,

Acting Director, Western Region.

BILLING CODE 4910-13-M

DEPARTMENT OF LABOR

Office of Pension and Welfare Benefit Programs

29 CFR Part 2530

Rules and Regulations for Minimum Standards for Employee Benefit Plans; Suspension of Benefit Rules—Deferral of Effective Date

AGENCY: Department of Labor.

ACTION: Deferral of effective date of final rule.

SUMMARY: This document defers until July 1, 1981, the effective date of 29 CFR 2530.203-3 *Suspension of pension benefits upon reemployment of retirees.* This regulation had been due to take effect on May 27, 1981. This action is taken in order to permit further analysis of the regulation in accordance with Executive Order 12291.

DATE: The effective date of 29 CFR 2530.203-3 is deferred until July 1, 1981.

FOR FURTHER INFORMATION CONTACT: Jay S. Neuman, Office of the Solicitor, 200 Constitution Avenue NW., Washington, D.C. 20216, Room C-4508; 202-523-8658.

SUPPLEMENTARY INFORMATION: On January 27, 1981, the Department of Labor published in the Federal Register (46 FR 8894) a final regulation under section 203(a)(3)(B) of the Employee Retirement Income Security Act of 1974 (ERISA) governing the circumstances under which it is permissible for a plan to suspend the payment of pension benefits (29 CFR 2530.203-3). As published, this regulation was due to take effect May 27, 1981.

This document announces the Department's decision to defer the effective date of the suspension of benefits regulation. This action is necessary in order to permit reconsideration of this regulation in accordance with Executive Order 12291. Such reconsideration is warranted

because of the many issues involved with respect to this regulation. In addition, the Department has received a number of comments in response to publication of the final rule. The Department is considering whether and to what extent these comments affect its analysis of the costs and benefits involved.

For these reasons, and because this regulation is scheduled to become effective very shortly, the Department finds, pursuant to the Administrative Procedure Act (5 U.S.C. 553(b)), that additional notice and public procedure on this change of effective date would be impracticable, unnecessary and contrary to the public interest.

Accordingly, pursuant to the authority set forth in sections 203(a)(3)(B) and 505 of ERISA, the effective date of 29 CFR 2530.203–3 is hereby deferred until July 1, 1981.

Signed at Washington, D.C., this 21st day of May 1981.

Hilary M. Sheply,

Acting Deputy Assistant Secretary, Labor-Management Services Administration.

BILLING CODE 4510-29-M

DEPARTMENT OF TREASURY

Fiscal Service

31 CFR Parts 202 and 203

Panama Canal Zone and Federal Branches of Foreign Banks

AGENCY: Fiscal Service, Treasury.

ACTION: Final rule.

SUMMARY: This regulation (1) deletes a reference to the Panama Canal Zone and (2) authorizes Federal branches of foreign banks, i.e., foreign banks authorized to transact business in the United States by the Comptroller of the Currency, to be Treasury Tax and Loan (TT&L) depositaries. These changes are necessary (1) to delete a reference to a geographical area that is no longer leased to the United States, and (2) to provide express authority to be TT&L depositaries to foreign banks that are authorized to transact business in the United States by the Comptroller of the Currency. The regulation deletes an obsolete term and explicitly makes foreign banks that are authorized to transact business in the United States by the Comptroller of the Currency eligible to be TT&L depositaries.

EFFECTIVE DATE: June 25, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. John Kilcoyne, Assistant Fiscal Assistant Secretary (Banking), Office of the Fiscal Assistant Secretary, Department of the Treasury, Washington, D.C. 20220, 202–566–2553.

SUPPLEMENTARY INFORMATION:

Classification

The Bureau of Government Financial Operations, Department of Treasury, has determined that this regulation does not require a notice of proposed rulemaking since this matter relates to public contracts, i.e., designation of Treasury Tax and Loan Depositaries. The Bureau of Government Financial Operations, Department of Treasury, also has determined that this regulation is required to implement a statute and affords no substantial element of discretion, and is not significant for purposes of Executive Order 12291.

Authority

To be consistent with section 4(a) of the International Banking Act of 1978, sections of 31 CFR Parts 202 and 203 have been revised to include among eligible institutions to be Treasury Tax and Loan Depositaries every Federal branch of a foreign banking corporation, the establishment of which has been approved by the Comptroller of the Currency.

For the reasons set out in the preamble, 31 CFR Parts 202 and 203 are amended as follows:

PART 202—DEPOSITARIES AND FINANCIAL AGENTS OF THE GOVERNMENT

1. The authority citation for Part 202 is revised to read as follows:

Authority: Sec. 10, Pub. L. 77–603, 56 Stat. 356 (12 U.S.C. 265); sec. 2, Pub. L. 95–147, 91 Stat. 1227 (12 U.S.C. 266,12 U.S.C. 1464(k), 12 U.S.C 1725(d) and 12 U.S.C. 1709(a)); and sec. 4(a), Pub. L. 95–369, 92 Stat. 607 (12 U.S.C. 3101 and 3102).

2. In Part 202, § 202.1 is revised to read as follows:

§ 202.1 Scope of regulations.

The regulations in this part govern the designation of Depositaries and Financial Agents of the Government (hereinafter referred to as depositaries), and their authorization to accept deposits of public money and to perform other services as provided for in sec. 10, Pub. L. 77–603, 56 Stat. 356 (12 U.S.C. 265); sec. 2, Pub. L. 95–147, 91 Stat. 1227 (12 U.S.C. 266, 12 U.S.C. 1464(k), 12 U.S.C. 1725(d) and 12 U.S.C. 1709(a)); and sec. 4(a), Pub. L. 95–369, 92 Stat. 607 (12 U.S.C. 3101 and 3102). Public money includes, without being limited to, revenue and funds of the United States, and any funds the deposit of which is subject to the control or regulation of the United States or any of its officers, agents, or employees. The designation and authorization of Treasury Tax and Loan Depositaries for the receipt of deposits representing payments for certain United States obligations and of internal revenue taxes are governed by the regulations in Part 203 of this chapter.

3. In Part 202, paragraph (a)(4) of § 202.2 is revised to read as follows:

§ 202.2 Designations.

(a) * * *

(4) Banks, savings banks, savings and loan, building and loan, and homestead associations, credit unions created under the laws of any State, the deposits or accounts of which are insured by a State or agency thereof or by a corporation chartered by a State for the sole purpose of insuring deposits or accounts of such financial institutions, every United States branch of a foreign banking corporation authorized by the State in which it is located to transact commercial banking business, and every Federal branch of a foreign banking corporation, the establishment of which has been approved by the Comptroller of the Currency.

* * * * *

4. In Part 202, paragraph (c) of § 202.6 is revised to read as follows:

§ 202.6 Collateral security.

* * * * *

(c) Deposits of Securities. Unless the Secretary of the Treasury provides otherwise, collateral security under this part must be deposited with the Federal Reserve Bank or Branch of the district in which the depositary is located (depositaries located in Puerto Rico and the Virgin Islands will be considered as being located in the New York Federal Reserve district), or with a custodian or custodians within the United States designated by the Federal Reserve Bank, under terms and conditions prescribed by the Federal Reserve Bank. Securities deposited with a Federal Reserve Bank must be accompanied by a letter stating specifically the purpose for which the securities are being deposited.

* * * * *

PART 203—TREASURY TAX AND LOAN DEPOSITARIES

5. In Part 203, paragraph (b)(1)(i)(A) of § 203.3 is revised to read as follows:

§ 203.3 Designation of financial institutions as Treasury tax and loan depositaries.

* * * * *

(b) * * *

(1) * * *

(i) * * *

(A) Every incorporated bank and trust company in the United States, Puerto Rico, the Virgin Islands, every United States branch of a foreign banking corporation authorized by the State in which it is located to transact commercial banking business, and every Federal branch of a foreign banking corporation, the establishment of which has been approved by the Comptroller of the Currency.

* * * * *

Dated: May 20, 1981.

Paul H. Taylor,

Fiscal Assistant Secretary.

[FR Doc. 81-15518 Filed 5-22-81; 8:45 am]

BILLING CODE 4810-85-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Ch. I

[CGD 81-017]

Reorganization of Navigation Rules

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: These regulations reorganize the vessel navigation rules contained in Title 33 by renaming or deleting the headings of Subchapters D, DD, E, and F, and by renumbering the Parts in those Subchapters. No changes are being made to the text of any of the affected regulations. This reorganization is the first step toward revising the Coast Guard's navigation regulations, a task made necessary by the Inland Navigational Rules Act of 1980. The renumbering allows the planned revisions to proceed in a more orderly manner.

EFFECTIVE DATE: This regulation is effective June 25, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. Chris Llana, Project Manager, Office of Marine Environment and Systems, Room 1606, U.S. Coast Guard Headquarters, 2100 Second Street S.W., Washington, D.C. 20593, (202) 426-4958.

SUPPLEMENTARY INFORMATION: The Inland Navigational Rules Act of 1980 (Pub. L. 96-591, December 24, 1980) consolidates and modernizes the four basic sets of navigation rules presently in effect (International, Inland, Great Lakes, and Western Rivers). The effective date for the new Inland Rules is December 24, 1981, except for the Great Lakes. The effective date for the Great Lakes is being set in coordination with the Canadian Coast Guard.

Each set of the existing rules has had a separate Subchapter in Title 33. The Act repeals the authority for many of the regulations in these Subchapters, but those that were published under statutes not repealed by the Inland Navigational Rules Act will be retained. Several new Parts will be added in a separate rulemaking to implement the new Act.

The numbering accomplished by this rulemaking will facilitate the smooth transition from the existing navigation rules for United States inland waters to the new unified Inland Navigation Rules. Within the overall Title 33 organization there are a limited number of Parts available for navigation rule implementing regulations. The relatively inefficient organization of the existing regulations would have required that the Part numbers already assigned to those existing regulations be used for the new regulations. However, the new regulations must be published while the existing ones are still in effect. To escape this problem the new organization groups the existing international and inland regulations in separate Subchapters and clears another Subchapter for the regulations that will be proposed to implement the Inland Navigational Rules Act. Thus, Part numbers used for those rules will not duplicate Part numbers of existing regulations. The redesignated Subchapter containing the existing inland navigation regulations will be deleted from the *Code of Federal Regulations* when these rules are no longer effective.

The Part on the towing of barges is being moved to the more appropriate Subchapter P, Ports and Waterways Safety. Part 85, currently reserved for Interpretive Rulings—International Rules, will not be used for this subject matter.

Drafting Information. The prinicipal persons involved in drafting this rule are Mr. Chris Llana, Project Manager, Office of Marine Environment and Systems, and Lt. Michael Tagg, Project Counsel, Office of Chief Counsel.

Regulatory Evaluation. This redesignation is considered to be a non-major regulation in accordance with guidelines set out in Executive Order 12991 of February 17, 1981, and is considered to be a nonsignificant regulation in accordance with guidelines set out in the "Policies and Procedures for Simplification, Analysis, and Review of Regulations" (DOT Order 2100.5 of 5-22-80). An economic evaluation of the proposal has not been conducted since its impact is expected to be minimal. No changes are being made in the affected regulations other than their renumbering. This regulation has no energy, environmental, or economic impacts.

Regulatory Flexibility Act. For rules requiring a general notice of proposed rulemaking under 5 U.S.C. 553, the Regulatory Flexibility Act (94 Stat. 1164, Pub. L. 96-354, 5 U.S.C. 601) requires an analysis of the impact of proposed regulations on small businesses, organizations, and small governmental jurisdictions. This regulation does not require a general notice of proposed rulemaking since it does not change the substance of any regulation, but merely reorganizes a series of regulations by renumbering them. As there are no substantive changes and no rights or privileges are affected, there is no economic impact.

Effective date. Because this regulation contains no substantive rules, notice and opportunity for comment are unnecessary. The redesignations should be made promptly so that the substantive rulemaking needed to implement the Inland Navigational Rules Act of 1980 can proceed with a minimum of confusion. The implementing regulations must be established as soon as possible before the December 24, 1981, effective date of the new Inland Navigation Rules. Thus, the Coast Guard finds good cause for making the redesignation effective immediately. This renumbering will be reflected in the July 1981 edition of Title 33, *Code of Federal Regulations.*

Accordingly, Subchapters D, DD, E, F, and P, Title 33, Code of Federal Regulations, are amended as follows.

Subchapter D Heading [Revised] and Part 85 Heading [Removed]

1. Subchapter D is amended by removing the title "Navigation Requirements for Certain Inland Waters" and inserting in its place the title "International Navigation Rules", and by removing the title "Interpretive rulings—international rules" of Part 85.

Subchapter DD Heading [Removed] and Special Note [Transferred to Subchapter D]

2. The heading "Subchapter DD—Implementation and Interpretation of the 72 COLREGS" is removed. The special note at the beginning of Subchapter DD is transferred to the beginning of Subchapter D.

Subchapter E Heading [Revised]

3. Subchapter E is amended by removing the title "Navigation Requirements for the Great Lakes and St. Marys River" and inserting in its place "Inland Navigation Rules".

Subchapter F [Revised]

4. Subchapter F is amended by removing the title "Navigation

Requirements for Western Rivers" and inserting in its place "Interim Inland Navigation Rules".

5. Parts 80 through 96 inclusive, of Title 33 are redesignated as follows:

Redesignation Table

Old Part Number and Title—New Part Number and Subchapter

Subchapter D

80—Pilot rules for inland waters: 93—F
82—COLREGS demarcation lines: 80—D
84—Towing of barges; 163—P
85—Interpretive rulings—international rules [Reserved]: Removed
86—Interpretive rulings—inland rules: 94—F

Subchapter DD

87—72 COLREGS: Implementing Rules; 81—D
88—72 COLREGS: Interpretative Rules; 82—D

Subchapter E

90—Pilot rules for the Great Lakes: 97—F
91—Interpretive rulings: 98—F
92—Anchorage and navigation regulations: St. Marys River, Michigan; 92—F

Subchapter F

95—Pilot rules for Western Rivers: 95—F
96—Interpretive rulings; 96—F

Derivation Table

New Part Number and Title—Old Part Number and Subchapter

Subchapter D—International Navigation Rules

80—COLREGS demarcation lines; 82—D
81—72 COLREGS: Implementing Rules: 87—DD
82—72 COLREGS: Interpretative Rules: 88—DD

Subchapter E—Inland Navigation Rules

(Reserved)

Subchapter F—Interim Inland Navigation Rules

92—Anchorage and navigation regulations: St. Marys River, Michigan; 92—E
93—Pilot rules for inland waters: 80—D
94—Interpretive rulings—inland rules; 86—D
95—Pilot rules for Western Rivers: 95—F
96—Interpretive rulings; 96—F
97—Pilot rules for Great Lakes: 90—E
98—Interpretive rulings: 91—E

BILLING CODE 4910-14-M

33 CFR Part 110

[CGD11-81-01]

Special Anchorage Areas; Mission Bay, San Diego, Calif.

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This final rule establishes, as requested by the City of San Diego Park and Recreation Department, four Special Anchorage Areas within Mission Bay. The areas affected are presently utilized for the anchoring and mooring of pleasure vessels. Designation as Special Anchorage Areas under the control of the City of San Diego Park and Recreation Department Mission Bay Harbor Police allows for a more orderly and efficient utilization of the water areas. The designated areas are well removed from any fairway and are located where general navigation will not endanger or be endangered by unlighted vessels. Establishment of Special Anchorage Areas eliminates the necessity of displaying anchor lights or sounding fog signals on vessels of not more than sixty-five feet in length while anchored within the area.

EFFECTIVE DATES: This amendment is effective June 25, 1981.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander James B. Morris, Marine Safety Division, Eleventh Coast Guard District, Union Bank Building, 400 Oceangate, Long Beach, CA 90822, (213) 590-2301.

SUPPLEMENTARY INFORMATION: On November 28, 1980, the Coast Guard published a Notice of Proposed Rulemaking (45 FR 79103) concerning this amendment. Interested parties were given until January 20, 1981, to submit comments and no comments were received.

Drafting Information

The principal persons involved in drafting the rule are: Lieutenant Commander James B. Morris, Project Officer, Marine Safety Division, Eleventh Coast Guard District; and Commander Rene N. Roussel, Project Attorney, District Legal Office, Eleventh Coast Guard District.

Discussion of the Final Rule

Article 11(c) of the Navigation Rules for Harbors, Rivers and Inland Waters (Inland Rules (33 U.S.C. 180)) provides for the establishment of "Special Anchorage Areas" by the Secretary of Transportation (delegated to the Coast Guard in 49 CFR 1.05-1(g)). The designation as a Special Anchorage Area exempts anchored vessels not more than sixty-five feet in length from displaying the required single anchor light or sounding the rapidly ringing bell fog signal.

Previously vessels have anchored in the areas with verbal permission from the Mission Bay Harbor Police to not display the required light when at anchor. Designation as a Special Anchorage Area allows for orderly and efficient management of the water areas.

An environmental evaluation has been completed and determination has been made that this proposed action would result in no adverse impact on the quality of the human environment.

Summary of Final Evaluation

This regulation is considered to be nonsignificant in accordance with the guidelines set out in the Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of 5-22-80). An economic evaluation of the rule has not been conducted since its impact is expected to be minimal. The regulation imposes no economic burden and benefits all small vessel owners since they will not have to carry or display anchor lights or sound fog signals when anchored in the Special Anchorages.

Final Regulations

In consideration of the foregoing, Part 110 of Title 33, Code of Federal Regulations, is amended by adding § 110.91 to read as follows:

PART 110—ANCHORAGE REGULATIONS

1. By adding a new § 110.91 in Subpart A to read as follows:

§ 110.91 Mission Bay, California.

(a) Area M-1. In San Juan Cove, the entire water area west of a line drawn from Santa Clara Point Light; latitude 32°46'53.6" N., longitude 117°14'52.5" W.; to El Carmel Point North Light; latitude 32°46'48.0" N., longitude 117°14'50.1" W.

Note.—Control over the anchoring of vessels and the placing of temporary moorings in this area is exercised by the City of San Diego Park and Recreation Department pursuant to local ordinances.

(b) Area M-2. In Santa Barbara Cove, the entire water area west of a line drawn from El Carmel Point South Light; latitude 32°46'40.0" N., longitude 117°14'47.0" W.; to Bahia Point Light; latitude 32°46'33.5" N., longitude 117°14'45.5" W.

Note.—Control over the anchoring of vessels and the placing of temporary moorings in this area is exercised by the City

of San Diego Park and Recreation Department pursuant to local ordinances.

(c) Area M–3. In Mariners Basin, the entire water area west of a line drawn from Mariners Point Light; latitude 32°45'49.2" N., longitude 117°14'42.9" W.; to Mission Point Light; latitude 32°45'43.7" N., longitude 117°14'41.9" W.

Note.—Control over the anchoring of vessels and the placing of temporary moorings in this area is exercised by the City of San Diego Park and Recreation Department pursuant to local ordinances.

(d) Area M–4. In Quivira Basin, the water area enclosed by that portion of a circle of 45 yard radious from Quivira Basin Light 2; latitude 32°45'42.8" N., longitude 117°14'25.6" W.; through the arc from 354° T to 088° T.

Note.—This area is reserved for vessels under impound or control of the City of San Diego Park and Recreation Department Mission Bay Harbor Police.

ENVIRONMENTAL PROTECTION AGENCY

[A–7–FRL–1826–6]

40 CFR Part 52

Missouri; Approval and Promulgation of Implementation Plans

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Receipt of Submittal to Satisfy Conditions of Plan Approval.

SUMMARY: In order to satisfy the requirements of Part D of the Clean Air Act (CAA), as amended, the State of Missouri revised its State Implementation Plan (SIP) in 1979. On April 9, 1980, EPA conditionally approved certain elements of Missouri's plan. On April 14, 1981, the State submitted a revision to the regulations for the purpose of fulfilling one of these conditions. The condition involves the emission limit for volatile organic compounds (VOC) emissions during gasoline loading operations.

The purpose of this notice is to advise the public that the State of Missouri has made a submission involving this condition. EPA is reviewing the material submitted and intends to issue a notice of final rulemaking after the review is completed. Until final action is published in the **Federal Register**, the conditional approval of the SIP is being continued.

ADDRESSES: Copies of the State submission are available for inspection during normal business hours at the following locations:

Environmental Protection Agency, Air, Noise and Radiation Branch, 324 East 11th Street, Kansas City, Missouri 64106

Environmental Protection Agency, Public Information Reference Unit, 401 M Street, S.W., Washington, D.C. 20460

Missouri Department of Natural Resources, 2010 Missouri Boulevard, Jefferson City, Missouri 65101

FOR FURTHER INFORMATION CONTACT: Mary C. Carter at (816) 374–3791, FTS 758–3791.

SUPPLEMENTARY INFORMATION: On April 9, 1980, EPA conditionally approved certain elements of Missouri's SIP with regard to the requirements of Part D of the Clean Air Act, as amended. A detailed discussion of that action can be found in the **Federal Register** notice published on that date (45 FR 24140).

One of the conditions promulgated by the EPA requires the State to revise its regulation for VOC emissions during gasoline loading operations to be consistent with the emission limit recommended by the Control Techniques Guidelines (CTGs) or to provide adequate economic justification for accepting its regulation. This information was to be submitted to the EPA by March 15, 1981. On January 2, 1981, the State published in the Missouri Register a proposed revision to Section (3) of Missouri Rule 10 CSR 10–5.220, Control of Petroleum Liquid Storage and Transfer for the St. Louis ozone nonattainment area. This revision which changes the VOC emission limitation from 0.50 to 0.30 grams per gallon of gasoline loaded, was adopted by the State on March 25, 1981, after the public hearing on February 18, 1981, and submitted to the EPA as a revision to the Missouri SIP on April 14, 1981.

The public is advised that the State has submitted a revision to the regulations to meet this condition. EPA is reviewing the material to determine if it complies with the requirements of the Clean Air Act and the condition promulgated by EPA. EPA intends to issue a notice of final rulemaking after review of this submission is completed. EPA's conditional approval of the Missouri SIP is being continued until final action is published in the **Federal Register**.

Pursuant to the provisions of 5 U.S.C. 605(b) the Administrator has certified that SIP approvals under Sections 110 and 172 of the Clean Air Act will not have a significant economic impact on a substantial number of small entities (46 FR 8709, January 27, 1981). The State submission, if approved, would constitute a SIP approval under Sections 110 and 172 within the terms of the January 27 certification. This action would only approve State actions and would impose no additional substantive requirements. Moreover, due to the nature of the Federal-State relationship, Federal inquiry into the economic reasonableness of the State actions would serve no practical purpose and could well be improper.

Under Executive Order 12291, EPA must judge whether a rule is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This State submission, if approved, would not be "major" because it would only approve State actions and would impose no additional substantive requirements which are not currently applicable under State law. Hence it is unlikely to have an annual effect on the economy of $100 million or more, or to have other significant adverse impacts on the national economy.

This notice was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

Dated: May 1, 1981.

William W. Rice,

Acting Regional Administrator.

BILLING CODE 6560–38–M

40 CFR Part 52

[A–2–FRL 1820–1]

Approval and Promulgation of Implementation Plans; Revision to the New York State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: On May 21, 1980 (45 FR 33981), the Environmental Protection Agency (EPA) promulgated conditional approval of the New York State Implementation Plan (SIP) for the New York City metropolitan area with regard to its ability to meet the requirements of Part D of the Clean Air Act. Six of EPA's conditions on approval required the State to submit to EPA on or before August 1, 1980 certain documentation related to the SIP's transportation control provisions.

EPA received the required documentation under cover of a July 28,

1980 letter from the State and proposed its approval on November 21, 1980 (45 FR 77054). EPA is now taking action to finalize its proposal. EPA is also incorporating the provisions of the State's submission into the approved SIP and is revoking the applicable conditions on its approval of the plan. Until all conditions are met, conditional approval of the SIP will continue.

EFFECTIVE DATE: This action is effective on May 26, 1981.

ADDRESSES: Copies of the State's submission, comments received by EPA, and a technical support document to this notice are available for inspection during normal business hours at the following addresses:

Air Programs Branch, Environmental Protection Agency, Region II, 26 Federal Plaza, Room 1005, New York, New York 10278

Environmental Protection Agency, Public Information Reference Unit, 401 M Street, S.W., Washington, D.C. 20460

Copies of the State's submission are also available for inspection during normal usiness hours at the following address: The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, D.C. 20408.

FOR FURTHER INFORMATION CONTACT: William S. Baker, Chief, Air Programs Branch, Environmental Protection Agency, Region II, 26 Federal Plaza, Room 1005, New York, New York 10278, (212) 264–2517.

SUPPLEMENTARY INFORMATION: On May 21, 1980, at 45 FR 33981, the Environmental Protection Agency (EPA) promulgated conditional approval of the New York State Implementation Plan (SIP) for the New York City metropolitan area (New York City and Nassau, Suffolk, Westchester and Rockland Counties) with regard to its ability to meet requirements of Part D of the Clean Air Act, as amended. Today's notice discusses six conditions of EPA's approval of the plan. These conditions required the State to submit to EPA by August 1, 1980:

1. Key milestones associated with projects relating to transportation control measures which are part of the SIP;

2. An improved program of study for the broader application of certain transportation control measures, and supplemental information on existing studies;

3. Additional documentation necessary to determine the reasonableness of the measure, "Controls on Extended Vehicle Idling;"

4. Criteria and procedures for making changes to transportation projects contained in the SIP;

5. Criteria and procedures for making changes to transportation studies contained in the SIP; and

6. The identification of the resources necessary to carry out the transportation planning process and certain transportation elements of the SIP.

In response to these requirements, on July 28, 1980, the Commissioner of the New York State Department of Environmental Conservation (NYSDEC) provided documentation addressing the six conditions.

EPA published its proposed approval of this submission in the November 21, 1980 issue of the **Federal Register** at 45 FR 77054. EPA found the State's submission to be generally adequate. However, EPA also indicated that: The State's program for the study of transportation control measures should have been broader and better developed; additional documentation should have been provided with regard to determining the reasonableness of the measure, "Controls on Extended Vehicle Idling;" the State's criterion for a "significant" delay in project implementation should have been shorter than fifteen months; and the financial and personnel resources for developing the SIP should have been defined in greater detail. The reader is referred to EPA's November 21, 1980 proposal for a detailed discussion of the New York submission and EPA's findings.

EPA received three comments with respect to its November 21, 1980 proposal. Comments were received in a January 19, 1981 letter from the Federal Highway Administration (FHWA), a February 10, 1981 letter from the NYSDEC, and a February 20, 1981 letter from the Tri-State Regional Planning Commission (Tri-State). Generally, the comments provided clarifying information with regard to several of the issues identified by EPA in its notice of proposed rulemaking.

Certain important facts provided by the commentators will be discussed in today's notice. However, a complete summary of the comments received and EPA's response to them appears in a separate technical support document to today's notice. This document is available for public review at the locations identified in the "Addresses" section presented earlier.

1. *Additional documentation necessary to determine the reasonableness of the measure, "Controls on Extended Vehicle Idling" (Condition (e)(3)).*

In its February 10, 1981 letter the NYSDEC pointed out that in previous correspondence to EPA, dated November 6, 1980, the State provided additional information to reevaluate the classification of the measure, "Controls on Extended Vehicle Idling." Based on this documentation the State recategorizes the status of this measure to "reasonably available," subject to its implementation on a complaint basis throughout the New York City metropolitan area exclusive of Westchester County. Upon formal endorsement of the appropriate elected officials, transportation coordinating committees, and Tri-State, the State will incorporate this measure into the SIP. The State will also request Westchester County to provide further documentation to support its determination that this measure is not reasonably available in the County.

EPA accepts the State's approach and will continue to view "Controls on Extended Vehicle Idling" as a reasonably available transportation control measure in the New York City metropolitan area.

2. *Criteria and procedures for revising and making changes to transportation projects contained in the SIP (Condition (e)(4)).*

The State in its comments agrees with EPA's suggestion that a delay in a project's implementation is "significant" if it occurs within the annual period used to determine if "reasonable further progress" is achieved. However, the State believes that EPA's suggestion that a six-month delay is significant is overly restrictive. Instead, the State will change its criterion for significance from fifteen to twelve months.

Further, the State in considering EPA's suggestion that four months is a reasonable time period in which to prepare and submit any necessary SIP revision has decided not to set a specific time period for such an activity. Due to the complexities and uncertainties associated with the actions committed to in the SIP, the State does not intend to establish any specific time period, but will address each SIP revision individually and expeditiously in consultation with the appropriate transportation coordinating committee.

EPA accepts the State's commitment to use twelve months as the criterion for determining when a delay in project implementation is significant. However, it should be noted that any change to a SIP project, whether significant or not, requires the submittal of a SIP revision. Nonsignificant changes should not require detailed justification, while significant changes will require the

analysis of the change's impact on the clean air program. EPA accepts the State's commitment to give expeditious attention to such revisions.

Based on EPA's review of the submitted documents, the comments received, and discussions with affected agencies, EPA finds that the subject conditions on its approval of the New York SIP for the New York City metropolitan area have been substantively met. Therefore, EPA is incorporating the State's submission into the SIP and revoking the applicable conditions. This action is being made effective immediately since it provides no additional burden on the affected parties.

Under Section 307(b)(1) of the Clean Air Act, judicial review of this action is available only by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within sixty days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

Under Executive Order 12291, EPA must judge whether a regulation is "Major" and therefore subject to the requirement of a Regulatory Impact Analysis. This regulation is not Major because it only approves actions taken by the State. It imposes no new regulatory requirements. Moreover, this action merely clarifies tasks already committed to in the SIP. It will not cost the State or local government agencies additional financial resources to fulfill this requirement.

This regulation was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

(Secs. 110, 172, 301, Clean Air Act, as amended (42 U.S.C. 7410, 7502, 7601))

Dated: May 15, 1981.

Walter C. Barber, Jr.,

Acting Administrator, Environmental Protection Agency.

Note.—Incorporation by reference of the State Implementation Plan for the State of New York was approved by the Director of the Federal Register on July 1, 1980.

Title 40, Chapter I, Subchapter C, Part 52, Code of Federal Regulations is amended as follows:

Subpart HH—New York

1. Section 52.1670 is amended by adding a new paragraph (c)(60) as follows:

§ 52.1670 Identification of plan.

* * * * *

(c) The plan revisions listed below were submitted on the dates specified.

* * * * *

(60) A supplemental submittal, dated July 28, 1980 from the New York State Department of Environmental Conservation which includes:

—Key milestones associated with projects relating to transportation control measures which are part of the SIP;

—An improved program of study for the broader application of certain transportation control measures, and supplemental information on existing studies;

—Additional documentation necessary to determine the reasonableness of the measure, "Controls on Extended Vehicle Idling;"

—Criteria and procedures for making changes to transportation projects contained in the SIP;

—Criteria and procedures for making changes to transportation studies contained in the SIP; and

—The identification of the resources necessary to carry out the transportation planning process and certain transportation elements of the SIP.

§ 52.1674 [Amended]

2. Section 52.1674 is amended by removing and reserving paragraph (e) in its entirety.

40 CFR Part 52

[A-5-FRL 1821-5]

Approval and Promulgation of Implementation Plans; Ohio

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The EPA is approving a revision to the Ohio State Implementation Plan (SIP) for sulfur dioxide (SO_2) for the Naval Weapons Industrial Reserve Plant (NWIRP) in Franklin County, Ohio. The revision adds an alternative emission limitation of 3.65 lbs SO_2/MMBTU that will become effective when proposed plant changes are operational. The existing regulation, 1.06 lbs SO_2/MMBTU, will remain effective and enforceable until that time.

EFFECTIVE DATE: June 25, 1981.

ADDRESSES: The docket #5A-80-15 for this revision is available for inspection and copying during normal business hours at the Central Docket Section, West Tower Lobby, Gallery 1, EPA, 401 M Street, SW., Washington, D.C. 20460 and by appointment at the Air Programs Branch Docket Room, 11th floor, EPA, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Susanne Karacki, Air Programs Branch, Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 353-2211.

SUPPLEMENTARY INFORMATION:

Introduction

On August 27, 1976, EPA promulgated regulations for the control of sulfur dioxide in Ohio (41 FR 36323). On July 31, 1980, Rockwell International Corporation (Rockwell) petitioned the EPA to revise the federally promulgated emission limit for the Naval Weapons Industrial Reserve Plant (NWIRP) in Franklin County, Ohio, operated by Rockwell. The submittal was endorsed by the Department of the Navy on August 6, 1980 and August 7, 1980. Supplementary information was submitted by Rockwell on September 23, 1980 and endorsed by the Department of the Navy on September 29, 1980 and October 3, 1980. Rockwell requested that the emission limit be changed from 1.06 lbs SO_2/MMBTU to 3.65 lbs SO_2/MMBTU based on non-simultaneous operation of the boilers and two proposed physical changes at the plant; first, the installation of a lock-out system on the boiler coal-feeders to permanently derate the maximum design capacity of the boilers; and second, a stack height increase for the two existing stacks. EPA reviewed the petition and proposed to approve the SIP revision, subject to certain restrictions, on January 28, 1981 (46 FR 9127).

Control Strategy Evaluation

Rockwell presently operates five coal-fired boilers [1] with a combined design capacity of 414 MMBTU/hr which exhaust through two identical 23.8 meter stacks. Under these conditions, the existing emission limitation of 1.06 lbs SO_2/MMBTU is necessary to attain and maintain the National Ambient Air Quality Standards (NAAQS) for SO_2.

Rockwell requested that the emission limitation for the boilers at the NWIRP be increased based on three proposed changes at the facility. First Rockwell proposed that the five boilers be operated in only one of three possible combinations at any one time. They are as follows:

[1] Boilers 1, 2, 3, 5a, and 5b. For clarity, modules 5a and 5b of Boiler 5 will be considered as separate boilers in this approval.

a. Any two of boilers 1, 2, or 3 on; the remaining three boilers off.

b. Boilers 5a and 5b on; the remaining three boilers off.

c. Boiler 5b and any one of boilers 1, 2, or 3 on; the remaining three boilers off.

Second, Rockwell proposed that a lock-out system be installed on the boiler coal-feeders to permanently derate the powerhouse from a combined maximum design capacity of 414 MMBTU/hr to 177 MMBTU/hr. Third, Rockwell proposed to increase the height of each of the existing two stacks from 23.8 meters to 44.5 meters based on the Good Engineering Practice (GEP) stack height formula in EPA's proposed stack height regulations (44 FR 2610, January 12, 1979).

Rockwell's revision utilized the RAM urban multipoint dispersion model, with five years (1973–1977) of representative Columbus/Dayton meteorological data and incorporated the three above cited proposed operational and configurational changes at the facility.

EPA reviewed the modeling analysis and found that the revision will attain and maintain the NAAQS for SO_2. EPA also determined that the proposed lock-out system is an acceptable means to permanently derate the boilers and that the stack height increase is consistent with the stack height policy. A detailed discussion of the analysis can be found in the Technical Support Document in the docket.

However, since the Rockwell submittal is based, in part, on physical changes at the facility which have not yet been constructed, EPA is approving the 3.65 lbs SO_2/MMBTU as an alternative emission limitation that will become effective only when these changes are completed. NWIRP shall complete all changes that are necessary to comply with the alternate regulations specified in § 52.1881(b)(27)(ix)(B) within 30 weeks from June 25, 1981. Until that time, the existing regulation, 1.06 lbs SO_2/MMBTU, is effective and enforceable. Additionally, the revision does not affect the compliance schedule and attainment date previously promulgated for this facility on August 27, 1976 (41 FR 36323).

Since the alternative emission limitation is based on operating conditions that restrict the number of boilers that the source may operate at the same time (non-simultaneous operation), NWIRP is subject to the special monitoring and reporting provisions listed at 40 CFR 52.1882(d), (44 FR 47769, August 15, 1979) when it elects to meet the 3.65 lbs SO_2/MMBTU emission limitation.

Public Comments

USEPA proposed to approve the SIP revision for NWIRP on January 28, 1981 (46 FR 9127). No requests for a public hearing were received. The only comment in response to the Notice was submitted by Rockwell through the Department of the Navy. Rockwell commented that EPA's requirement of the special monitoring and reporting provisions specified in proposed § 52.1882(g), for sources with emission limitations based on reduced operating loads, is redundant for NWIRP in view of the nature of the tamper proof sealed lock-out system. Rockwell further stated that a permanent log will be maintained on the lock-out system, and should any problems develop, they will be appropriately recorded in the log. EPA agrees with Rockwell's comments and, accordingly, removes the requirements of proposed § 52.1882(g) from the final rulemaking for NWIRP.

Pursuant to the provisions of 5 U.S.C. Section 605(b) I hereby certify that this revised rule will not have a significant economic impact on a substantial number of small entities. This action applies to only one source and, in addition, represents a more economically feasible alternative emission limitation requested by the source itself.

Under Executive Order 12291, EPA must judge whether a regulation is "major" and, therefore, subject to the requirements of a regulatory impact analysis. Today's action does not constitute a major regulation since it merely approves an alternative, more economically feasible emission limitation requested by NWIRP. The company may elect to use the alterative or the existing regulation. This action was submitted to the Office of Management and Budget (OMB) for review as required by the Order.

Under Section 307(b)(1) of the Clean Air Act, judicial review of this action is available only by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

This Notice of Final Rulemaking is issued under the authority of Sections 110 and 123 of the Clean Air Act, as amended (42 U.S.C. 7410 and 7423).

Dated: May 18, 1981.

Walter C. Barber,

Acting Administrator.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart KK—Ohio

1. Section 52.1881(b)(27)(ix) is revised as follows:

§ 52.1881 Control Strategy: Sulfur oxides (sulfur dioxide).

* * * * *

(b) Regulations for the control of sulfur dioxide in the State of Ohio.

* * * * *

(27) In Franklin County * * *

* * * * *

(ix)(A) The present or any subsequent owner or operator of the Naval Weapons Industrial Reserve Plant in Franklin County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 1.06 pounds of sulfur dioxide per million BTU actual heat input.

(B) In lieu of meeting § 52.1881(b)(27)(ix)(A), the present or any subsequent owner or operator of the Naval Weapons Industrial Reserve Plant may elect to comply with the alternate emission limitation and operating conditions specified below.

(*1*) The present or any subsequent owner or operator of the Naval Weapons Industrial Reserve Plant shall not cause or permit the emission of sulfur dioxide from any stack in excess of 3.65 pounds of sulfur dioxide per million BTU actual heat input provided that such stacks be greater than or equal to 44.5 meters in height and that the combined maximum boiler design capacity be limited to 177 million BTU per hour by installation of a lock-out system on the boiler coal-feeders. The present or any subsequent owner or operator of the Naval Weapons Industrial Reserve Plant shall keep a permanent log on the lock-out system and record any problems with the system in the log. This log shall be available for inspection by the EPA. This log shall be in lieu of the reporting and monitoring requirements of § 52.1882(g).

(*2*) The present or any subsequent owner or operator of the Naval Weapons Industrial Reserve Plant shall be permitted to operate its five boilers (#1, 2, 3, 5a or 5b) in only one of the following three configurations at any given time:

(*i*) Any two of boilers 1, 2, or 3 on; the remaining three boilers off.

(*ii*) Boilers 5a and 5b on; boilers 1, 2, and 3 off.

(*iii*) Boiler 5b and any one of boilers 1, 2, or 3 on; the remaining three boilers off.

(*3*) In the event that the Naval Weapons Industrial Reserve Plant elects to comply with the alternate emission limitation and operating configurations in § 52.1881(b)(27)(ix)(B) (*1*) and (*2*) and vents its boilers through stacks greater than or equal to 44.5 meters in height and installs a lock-out system on the boiler coal-feeders such that the combined maximum boiler design capacity is limited to 177 MMBTU/hr, all such action shall be taken within 30 weeks of (the effective date of promulgation). The Administrator must be notified in writing that all such action was taken within five working days of its completion.

[FR Doc. 81-15512 Filed 5-22-81; 8:45 am]

BILLING CODE 6560-38-M

40 CFR Part 52

[A-6-FRL 1822-5]

Approval and Promulgation of Implementation Plans; Approval of Oklahoma State Variance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This notice approves the State of Oklahoma's request to revise its State Implementation Plan (SIP) to include a variance for the McAlester Army Ammunition Plant in McAlester, Oklahoma.

EFFECTIVE DATE: This rulemaking becomes effective June 25, 1981.

ADDRESSES: Incorporation by reference material is available for inspection during normal business hours at the following locations:

The Office of the Federal Register, 1100 L St., N.W., Washington, D.C. Rm. 8401

Environmental Protection Agency, Public Information Reference Unit, EPA Library, 401 "M" Street, N.W., Washington, D.C. Rm. 2922

FOR FURTHER INFORMATION CONTACT: Estela S. Wackerbarth, Chief, Implementation Plan Section, Air and Hazardous Materials Division, Environmental Protection Agency, Region 6, Dallas, Texas 75270, (214) 767-1518.

SUPPLEMENTARY INFORMATION: On September 21, 1979, the Oklahoma State Department of Health submitted to EPA Petition No. 79-2 (Bomb Plant "B") requesting a variance to State Regulations 7 and 8 (control of particulate matter and visible emissions) until August 1, 1981, for the McAlester Army Ammunition Plant located in McAlester, Oklahoma.

EPA has reviewed the variance request and finds it to be approvable. On December 1, 1980, at 45 FR 79514, EPA proposed to approve the variance in a notice of proposed rulemaking. Public comments were solicited but none were received. Therefore, EPA approves the variance granted by the State as a revision to the Oklahoma State Implementation Plan. Under Section 307(b)(1) of the Clean Air Act, judicial review of this final rulemaking is available *only* by filing of a petition for review in the United States Court of Appeals for the appropriate circuit on or before July 27, 1981. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may *not* be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements. Incorporation by reference of the State Implementation Plan for the State of Oklahoma was approved by the Director of the Federal Register on July 1, 1980.

Under Executive Order 12291, EPA must judge whether a regulation is "Major" and therefore subject to the requirement of a Regulatory Impact Analysis. This regulation is not Major because it is merely approving a State action. It will impose no new regulatory action.

This regulation was submitted to the Office of Management and Budget for review as required by Executive Order 12291.

This notice of final rulemaking is issued under the authority of Section 110 of the Clean Air Act, as amended, 42 U.S.C. 7410.

Dated: May 15, 1981.

Walter C. Barber, Jr.,

Acting Administrator.

Subpart LL of Part 52 of Chapter 1, Title 40 of the Code of Federal Regulations is amended by adding § 52.1920(c)(14) as follows:

§ 52.1920 Identification of Plan.

* * * * *

(c) * * *

(14) A variance to the State Regulations 7 and 8 for McAlester Army Ammunition Plant located in McAlester, Oklahoma was submitted by the State on September 21, 1979 and approved by the State Board of Health on September 8, 1979.

[FR Doc. 81-15524 Filed 5-22-81; 8:45 am]

BILLING CODE 6560-38-M

---

40 CFR Part 52

[A-1-FRL-1836-6]

Rhode Island; Approval and Promulgation of Implementation Plans; Receipt of Plan Revisions

AGENCY: Environmental Protection Agency.

ACTION: Notice of Receipt of submittal to satisfy conditions of plan approval.

SUMMARY: This notice is to announce the receipt of a State Implementation Plan (SIP) revision for Rhode Island, concerning control of stationary sources of volatile organic compounds (VOCs). These revisions were submitted to EPA to satisfy conditions for approval of Rhode Island's Attainment Plan SIP revisions, which were required under Part D of the Clean Air Act, and which had been published in the **Federal Register** on May 7, 1981 (46 FR 25446). This material is available for public review and comment.

ADDRESSES: Copies of the Rhode Island SIP revisions are available for inspection during normal business hours at the following locations: Environmental Protection Agency, Region I, Air Branch, Room 1903, J.F.K. Federal Building, Boston, Massachusetts 02203; Public Information Reference Unit, Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460 and the Department of Environmental Management, Division of Air Resources, Cannon Building, 75 Davis Street, Providence, Rhode Island 02908.

FOR FURTHER INFORMATION CONTACT: Harley Laing, Chief, Air Branch, Environmental Protection Agency, Region I, Room 1903, J.F.K. Federal Building, Boston, Massachusetts 02203, (617) 223-5630.

SUPPLEMENTARY INFORMATION: EPA published a Final Rulemaking Notice in the **Federal Register** on May 7, 1981 (46 FR 25446), conditionally approving Rhode Island's Attainment Plan SIP revisions.

The revision was submitted to comply with the requirements of Part D of the Clean Air Act by implementing new measures for controlling air pollution which are designed to achieve attainment of the primary and secondary National Ambient Air Quality Standards by December 31, 1982. However, EPA's conditional approval was based on a commitment by the State to meet several conditions, one of which specified that the State must amend its regulations governing the control of stationary VOC sources.

In particular, EPA requested revisions in the control regulations for Surface Coating of Paper and Fabrics, Solvent Metal Cleaning, Petroleum Storage and Marketing, and Cutback Asphalt, as well as a commitment from the State to adopt Reasonably Available Control Technology (RACT) for VOC sources for which Control Techniques Guidelines (CTG's) were published after January 1, 1978.

In response to the conditional approval notice, EPA received a revision to the Rhode Island SIP on January 9, 1981. EPA has not yet reviewed this submittal to determine whether these revisions comply with Clean Air Act requirements. The conditional approval will therefore be continued until final action is published in the **Federal Register.**

(Sec. 110(a) of the Clean Air Act (42 U.S.C. 7410(a)))

Dated: April 16, 1981.

Leslie Carothers,

Acting Regional Administrator.

40 CFR Part 86

[EN-FRL 1822-8(a)]

Revised Motor Vehicle Exhaust Emission Standards for Carbon Monoxide (CO) for 1981 and 1982 Model Year Light-Duty Vehicles

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes CO emission standards for several 1981 and 1982 model year light-duty vehicles belonging to engine families for which I have granted waivers from the standard otherwise applicable under section 202(b)(5) of the Clean Air Act, 42 U.S.C. 7521(b)(5). The effect of this regulation is to allow the affected manufacturers to introduce into commerce the vehicles in question under the higher waived CO emission standard prescribed here.

EFFECTIVE DATE: June 25, 1981.

ADDRESS: Information relevant to this rule is contained in Public Docket EN-81-13 at the Central Docket Section of the Environmental Protection Agency (EPA), Gallery I, 401 M Street, S.W., Washington, D.C. 20460 and is available for review between the hours of 8:00 a.m. and 4:00 p.m. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services.

FOR FURTHER INFORMATION CONTACT: Mr. Alex Varela, Attorney/Advisor, Manufacturers Operations Division (EN-340), U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, (202) 472-9421.

SUPPLEMENTARY INFORMATION: Section 202(b)(1)(A) of the Clean Air Act ("the Act"), 42 U.S.C. 7521(b)(1)(A), requires that regulations applicable to CO emissions from light-duty vehicles or engines manufactured during or after the 1981 model year shall contain standards which require a reduction of at least 90 percent from CO emission levels allowable under the 1970 model year standards. Regulations implementing this requirement have established a CO standard, often referred to as the statutory standard for CO, of 3.4 grams per vehicle mile (g/mi).

Section 202(b)(5) of the Act authorizes the Administrator, on application of any manufacturer, to waive the statutory CO standard for the 1981 and 1982 model years for any light-duty vehicle model regarding which the Administrator can make certain findings. In these cases, the Act requires that I promulgate substitute CO standards for 1981 and 1982 model year light-duty vehicles as discussed below. Excalibur Automobiles, Inc. (Excalibur), Ford Motor Company (Ford), and Volkswagen of America (VW) each submitted applications for certain light-duty vehicle models for the 1981 and/or 1982 model year. The statutory criteria, my determinations regarding the criteira with respect to the vehicle models covered by waiver applications, and my decisions to grant the waiver applications appear in the decision along with this rule and are published elsewhere in this issue of the **Federal Register**. In that decision, I granted waivers covering the following vehicle models (engine families for purposes of that decision) for the model years in question:

Manufacturer	Engine family	Model year
Excalibur automobiles	305 CID	1981, 1982
Ford Motor Co	3.8L/V-6	1982
Volkswagen	1.7L/Feedback carburetor (FBC).	1982

Once I have decided to grant the waiver applications for these vehicle models, the Act requires that I simultaneously promulgate regulations adopting emission standards not permitting CO emissions from vehicles of these engine families to exceed 7.0 g/mi. Moreover, the Act further requires that I promulgate regulations establishing these standards no later than 60 days after I receive the waiver applications in question. The public has been afforded an opportunity to comment on the waiver applications at issue, and I have considered those comments in making the decision which requires the promulgation of this amended rule.

For these reasons, I find that providing notice and an opportunity to comment before final promulgation of any of the amendments contained in this rulemaking is impracticable and unnecessary.

Note.—Because the decision accompanying this rulemaking already is based on a detailed analysis indicating that this rulemaking will have a negligible effect on air quality, the Environmental Protection Agency has not prepared an Environmental Impact Statement to accompany this rulemaking as well.

Under Executive Order 12291, EPA must judge whether an action is "Major" and therefore subject to the requirement of a Regulatory Impact Analysis. This action is not major because it is not likely to result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or,

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Ford and VW indicated that if EPA granted the waiver requests, consumers would realize a first cost reduction of $40 and $225, respectively, corresponding to a total first cost reduction to consumers of about $10 million. Excalibur provided no cost information but indicated it expects to sell only about 350 vehicles a year. Since this action has the effect of reducing the regulatory burden on these manufacturers, it is unlikely to have an adverse effect on employment, investment, or productivity. Finally, all of these applicants are predominately United States-based enterprises; therefore, this action should not adversely affect the ability of these manufacturers to compete with predominately foreign-based enterprises.

This action was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

Finally, under the Regulatory Flexibility Act, 5 U.S.C. 601 *et. seq.*, EPA is required to determine whether a regulation will have a significant economic impact on a substantial number of small entities so as to require a regulatory analysis. The interim CO emission standard clarified by this notice impacts directly only on Excalibur, Ford, and VW, which are not "small entities" under the Regulatory Flexibility Act. Therefore, pursuant to 5 U.S.C. 605(b), I hereby certify that this rule will not have a significant economic impact on a substantial number of small entities.

These amendments are issued pursuant to sections 202 and 301(a) of the Clean Air Act, as amended, 42 U.S.C. 7521 and 7501(a).

Dated: May 15, 1981.

Walter C. Barber, Jr.,

Acting Administrator.

1. 40 CFR 86.081–8(a)(1)(ii) is revised to read as follows:

BILLING CODE 6560-33-M

40 CFR Part 123

[SW-3-FRL 1824-6]

Hazardous Waste Management Program; Phase I Interim Authorization for Pennsylvania

AGENCY: Environmental Protection Agency.

ACTION: Authorization of state hazardous waste programs.

SUMMARY: The Commonwealth of Pennsylvania has applied for interim authorization of its hazardous waste program under Subtitle C of the Resource Conservation and Recovery Act and EPA guidelines for the approval of state hazardous waste programs (40 CFR Part 123). EPA has determined that the Commonwealth's program meets all applicable statutory and regulatory requirements and is granting Phase I interim authorization to Pennsylvania to operate a hazardous waste program in lieu of Phase I of the Federal hazardous waste program in its jurisdiction.

EFFECTIVE DATE: May 26, 1981.

FOR FURTHER INFORMATION CONTACT: Robert L. Allen, Chief, Hazardous Materials, Toxics and Pesticides Branch, U.S. EPA, 6th and Walnut Street, Philadelphia, PA 19106, (215) 597–0980.

SUPPLEMENTARY INFORMATION:

I. Introduction

Subtitle C of the Resource Conservation and Recovery Act of 1976 (RCRA), as amended, requires EPA to establish a comprehensive Federal program to assure the safe management of hazardous waste. Once a Federal program is established, EPA is authorized under Section 3006 of RCRA to approve state hazardous waste programs to operate in lieu of the Federal program in their jurisdictions.

Two types of state program approvals are authorized under RCRA. The first, "final authorization," is a permanent approval which may be granted to states whose programs are "equivalent" to and "consistent" with the Federal program and provide adequate enforcement. The second, "interim authorization," is a temporary approval for states which cannot meet the requirements of final authorization but whose programs are "substantially equivalent" to the Federal program. RCRA contemplates that states receiving interim authorization will use the interim authorization period to make the changes in their regulations and statutes necessary to qualify for final authorization.

On May 19, 1980, EPA published the first phase of the Federal hazardous waste program (40 CFR Parts 260–263 and 265) and guidelines for authorizing state hazardous waste programs under Section 3006 (40 CFR Part 123). These guidelines set forth the requirements for interim authorization and the procedures which EPA will follow in acting on state applications for interim authorization. They also provide that EPA will grant interim authorization in two major phases (Phase I and Phase II), corresponding to the two major phases of the Federal Program.

The Commonwealth submitted its final application for Phase I interim authorization on November 19, 1980. A notice of public comment period and public hearing was published in the State's three major newspapers and was sent to those persons on the State and EPA mailing list 30 days prior to the hearing. A **Federal Register** notice announcing the public comment period and the public hearing was published on December 4, 1980 (45 FR 80317) and the public hearing was held on January 6, 1981. The comment period was held open until January 13, 1981.

II. Major Issues

A. Concerns of the Environmental Protection Agency

The Commonwealth of Pennsylvania submitted its final application for Phase I interim authorization on November 19, 1980. After reviewing it, EPA identified several areas of concern, namely:

1. Memorandum of Agreement (MOA)

The State did not indicate that it would notify the Regional Administrator prior to proposing any substantial amendment to statute, regulation, or program policy.

- The State has agreed to the above condition in the revised MOA.

In the case of any interstate shipment for which the manifest has not been returned to the generator, the State needed to assure that it would notify the

State in which the facility designated on the manifest is located or the Regional Administrator, if the facility designated on the manifest is in an unauthorized State.

- The State has agreed to the above condition in the revised MOA.

A method is needed to revise the Pennsylvania program when Federal regulations are revised.

- The State added the following provision to the MOA:

> Any provisions of the State's program which require revision because of a modification of 40 CFR Parts 122, 123, 124, 261, 262, 263, 264, 265, or 266 shall be so revised within one year of the date of promulgation of such regulation, unless the State must amend or enact the statute in order to make the required revision, in which case such revision shall take place within two years.

2. Authorization Plan

The Pennsylvania regulations regarding international shipments (75 part 262(o)(1)) state that any "generator" exporting hazardous waste to a foreign country must meet certain requirements. Other "persons" (e.g., transporters, treatment, storage and disposal facilities, etc.) may also be exporters.

- Pennsylvania has modified its authorization plan by agreeing to modify its rules and regulations to cover all "persons" exporting hazardous waste.

B. Response to Public Comment

Nine comments were received, three at the hearing and six in writing. Three commentors favor granting Phase I interim authorization, two favor authorization with reservations about specific conditions, and four neither supported nor opposed authorization. All comments received during the comment period have been reviewed and considered.

A corporation expressed its concern about the two-part manifest form required by Pennsylvania because the generator retains only the top portion (Part "A"). The bottom portion (Part "B") is returned to the generator upon receipt of the shipment by the treatment, storage or disposal facility (TSDF). The commentor would prefer that the TSDF send a copy of both Parts A and B back to the generator.

- EPA considers Pennsylvania's manifest system to be substantially equivalent to the Federal manifest system. Since both Parts A and B contain a common document number, the generator should be able to match up both Parts A and B for the same shipment.

Another commentor stated that Pennsylvania's manifest requirements for railroads were not consistent with the interim final Federal requirements as published in the **Federal Register**, December 31, 1980 (45 FR 86970).

- The Commonwealth's program must be substantially equivalent to the Federal program as issued on May 19, 1980 (40 CFR 123.128). Revisions to State programs to conform to revisions in the Federal program need not occur until the Commonwealth applies for Phase II approval. In the Memorandum of Agreement the Commonwealth agrees to make changes as necessary to conform to the Federal program within one year after promulgation of changes to the Federal program.

A commentor objected to the requirement for small quantity generators (Pennsylvania Section 75.261(d)) to have written permission from DER to deposit hazardous waste at a municipal facility.

- Requirements placed on municipal facilities by the Commonwealth's program to have written permission from DER to accept small quantities of hazardous waste are allowed under the Federal program. The Commonwealth may impose standards more stringent than those in the Federal program (40 CFR 123.121(g)).

A commentor requested that the manifest designate an alternate treatment or disposal facility in the event delivery is rejected by the treatment, storage or disposal facility designated on the manifest.

- Pursuant to 40 CFR Part 262.20(c), the designation of an alternate facility is optional. Thus, the Pennsylvania manifest system is not required to contain this feature.

A commentor expressed concern over the adequacy of the budget to conduct the State Hazardous Waste Program, and the reduction in estimated expenses from fiscal year 1981 to 1982.

- The budget projected for the coming fiscal years (FY 81 & 82) is a best estimate by EPA and the Commonwealth of Pennsylvania of the cost of administering Phase I interim authorization. Some of these costs represent one-time program development costs that will not be needed in future years. Therefore, EPA believes that the funding level allocated to conduct the Phase I program is adequate.

A comment was made recommending public participation in administrative actions which are a part of the State's enforcement process, including citizen intervention in enforcement cases before the Environmental Hearing Board.

- Changes in 40 CFR 123.128(f)(2) were published in the **Federal Register** on January 19, 1981 (46 FR 5616). States are no longer required to allow intervention as a matter of right in administrative actions. However, the Attorney General has certified that the Commonwealth does provide for intervention in administrative proceedings.

III. Decision

EPA has reviewed the Commonwealth of Pennsylvania's complete application for Phase I interim authorization and determined that the State program is "substantially equivalent" to the Phase I Federal program as defined in 40 CFR Part 123. In accordance with Section 3006(c) of RCRA, the Commonwealth of Pennsylvania is hereby granted interim authorization to operate a hazardous waste program in lieu of Phase I of the Federal hazardous waste program. The practical effect of this decision is that generators, transporters, and owners and operators of hazardous waste management facilities in Pennsylvania will be subject to the Commonwealth of Pennsylvania hazardous waste management program in lieu of the Phase I Federal hazardous waste management program (40 CFR Parts 260-263 and 265) and will not again be subject to the Phase I Federal program unless (1) the State fails to obtain final authorization by the deadline specified in 3006(c) of RCRA and implementing regulations or (2) authorization is withdrawn for cause by EPA.

IV. Compliance with Executive Order 12291

Under Executive Order 12291, EPA must prepare a Regulatory Impact Analysis on "major regulations." A "major regulation" is defined as:

> Any regulation that is likely to result in (1) An annual effect on the economy of $100 million or more (2) A major increase in costs or price for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) Significant adverse effects on competition, employment investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

EPA's decision to approve Pennsylvania's Phase I hazardous waste program is not a major regulation because its effect is to suspend the applicability of certain Federal

regulations in the State of Pennsylvania. In the absence of this decision, persons handling hazardous waste in Pennsylvania would have to comply with Parts 260–263 and 265 of Title 40 of the Code of Federal Regulations in addition to all Pennsylvania hazardous waste management regulations. For these reasons, it is virtually inconceivable that this regulation would result in the significant impacts that characterize a "major rule."

This regulation was submitted to the Office of Management and Budget for review as required by Executive Order 12291.

V. Authority

This notice is issued under the authority of sections 2002(a), 3006, and 7004(b) of the Solid Waste Disposal Act as amended by the Resource Conservation and Recovery Act of 1976, as amended, 42 USC sections 6912(a), 6926 and 6974.

Dated: May 4, 1981.

Jack J. Schramm,

Regional Administrator.

BILLING CODE 6560-30-M

VETERANS ADMINISTRATION

41 CFR Part 8-1

Qualified Products List For Convenience/Labor Saving Foods

AGENCY: Veterans Administration.

ACTION: Final regulation.

SUMMARY: In order to eliminate unnecessary duplication and to promote consistency, VA medical districts are authorized to establish qualified product lists for convenience foods for use within the medical districts. Controls over the use and documentation requirements for the Qualified Products Lists are established. This revision to the VA Procurement Regulations provides procedures and controls over the establishment of Qualified Products Lists for convenience/labor-saving foods.

EFFECTIVE DATE: This rule is effective May 26, 1981.

FOR FURTHER INFORMATION CONTACT: Chris A. Figg, Policy and Interagency Service, Office of Supply Services, Veterans Administration, 810 Vermont Avenue, NW, Washington, DC 20420, Telephone (202) 389–2334.

SUPPLEMENTARY INFORMATION: This proposed regulation has been reviewed pursuant to the requirements of the Regulatory Flexibility Act and it is determined that the regulation has no impact upon small business or State and local governments.

It is the general policy of the VA to allow time for interested parties to participate in the rule making process (38 CFR 1.12). Since this amendment only affects internal review procedures, the public rule making process is deemed unnecessary in this instance.

Approved: May 19, 1981.

Rufus H. Wilson,

Acting Administrator.

41 CFR 8–1.11 is revised to read as follows:

1. In § 8–1.1101, the introductory portion of paragraph (a) is revised by updating organizational titles so that the material reads as follows:

§ 8–1.1101 Procurement of qualified products.

(a) Federal Qualified Products Lists are lists of products qualified under the applicable Federal or interim Federal specification. Such lists may be used as authorized by the appropriate department or staff office. Requests to receive copies of existing Federal Qualified Products Lists will be submitted to the Assistant Administrator for Supply Services (93) for transmittal to General Services Administration. Requests to establish a Federal Qualified Products List for a commodity will be submitted to the Assistant Administrator for Supply Services (93) supported by one or more of the following justifications:

* * * * *

2. A new § 8–1.1102 is added to read as follows:

§ 8–1.1102 Qualified products list for convenience/labor-saving foods.

(a) Each VA medical district's Dietetic Service representative is delegated authority to establish a common Qualified Products List for convenience/labor-saving foods for the use of medical centers within his/her respective district. The medical district Dietetic Service representative will notify the Director, Dietetic Service, VA Central Office, of the establishment of each Qualified Products List and amendments to each established list.

(b) Each medical center is authorized to use its district Qualified Products List. Each medical center may test food of its own choice, but will submit test results to the district Dietetic Service representative. The Dietetic Service representative will coordinate and consolidate the test results and recommendations of individual medical centers and with other medical centers within the district in order to avoid unnecessary duplication.

(c) The approved medical district Qualified Products List will be furnished each Supply office within the district. The Supply Services will have access to complete and accurate records of established Qualified Products Lists and all test results. These records will be made available to the Office of Supply Services (93C), VA Central Office, upon request.

(38 U.S.C. 210(c); 40 U.S.C. 486(c))

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 5867

[C-23349]

Colorado; Partial Revocation of Reclamation Project Withdrawal Wagon Wheel Gap

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order revokes the withdrawal of 21,993.30 acres of national forest lands, of which 324.38 acres are privately owned. The remaining 21,668.92 acres will be open to such forms of disposition as may by law be made of such lands.

EFFECTIVE DATE: June 20, 1981.

FOR FURTHER INFORMATION CONTACT: Alvah Q. Whitledge, Colorado State Office, 303–837–2825.

By virtue of the authority contained in Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714, it is hereby ordered as follows:

1. The Secretary's Order of June 18, 1941, withdrawing lands for the San Luis Valley Project, is hereby revoked so far as it pertains to the following described national forest lands:

Rio Grande National Forest

New Mexico Principal Meridian

San Luis Valley Project

43 CFR Public Land Order 5868

[A-7793]

Arizona, Partial Revocation of Public Land Order No. 848

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order partially revokes Public Land Order No. 848 which withdrew public lands for use of the Department of the Army in connection with the Yuma Test Station. This action will restore 32,245.51 acres to operation of the public land laws generally, including the mining and mineral leasing laws.

EFFECTIVE DATE: June 20, 1981.

FOR FURTHER INFORMATION CONTACT: Mario L. Lopez, Arizona State Office 602-261-4774.

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Public Land Order No. 848 of July 1, 1952, is hereby revoked insofar as it affects the following described lands:

Gila and Salt River Meridian

T. 7 S., R. 15 W.,
Sec. 5.
T. 7 S., R. 16 W.,
Secs. 14 and 15.
T. 7 S., R. 17 W.,
Sec. 31, N½.
T. 6 S., R. 18 W.,
Secs. 31, 32 and 33;
Sec. 34, N½;
Sec. 35, N½.
T. 8 S., R. 18 W.,
Secs. 4 thru 9, inclusive;
Sec. 17, N½;
Sec. 18.
T. 7 S., R. 19 W.,
Secs. 32 thru 36, inclusive.
T. 8 S., R. 19 W.,
Secs. 1 thru 18, inclusive;
Sec. 19, N½, SE¼;
Secs. 20 thru 23, inclusive;
Sec. 24, W½;
Sec. 27, N½;
Sec. 28, N½.
T. 8 S., R. 20 W.,
Secs. 1 and 2;
Sec. 3, N½;
Sec. 11, N½, SE¼;
Sec. 12;
Sec. 13, N½, SE¼.
T. 5 S., R. 21 W.,
Sec. 32.
T. 6 S., R. 21 W.,
Sec. 5.

The areas described aggregate 32,245.51 acres in Yuma County.

2. At 10 a.m. on June 20, 1981, the lands shall be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on June 20, 1981, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. At 10 a.m. on June 20, 1981, the lands will be open to location and entry under the United States mining laws and to applications and offers under the mineral leasing laws.

Inquiries concerning the lands should be addressed to the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

43 CFR Public Land Order 5870

[OR 20225]

Oregon; Partial Revocation of Public Water Reserve No. 77

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order revokes an Executive Order in part as to 40 acres of land withdrawn as a public water reserve. This action will restore the land to nonmetalliferous mineral location under the mining laws.

EFFECTIVE DATE: June 20, 1981.

FOR FURTHER INFORMATION CONTACT:
Champ C. Vaughan, Jr., Oregon State Office, 503–231–6905.

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. The Executive Order of May 25, 1921, which withdrew certain lands for public water reserve purposes is hereby revoked insofar as it affects the following described land:

Willamette Meridian

Public Water Reserve No. 77

T. 32 S., R. 34 E.,
Sec. 28, NW¼NE¼.

The area described contains 40 acres in Harney County.

2. The land has been conveyed from Federal ownership with a reservation of all minerals to the United States. Therefore, the land will not be open to operation of the public land laws generally.

3. At 10 a.m. on June 20, 1981, the land will be open to nonmetalliferous mineral location under the United States mining laws. The land has been and continues to be open to metalliferous mineral location under the United States mining laws and to applications and offers under the mineral leasing laws.

Inquiries concerning the land should be addressed to the State Director, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

Garrey E. Carruthers,
Assistant Secretary of the Interior.
May 15, 1981.

BILLING CODE 4310–84–M

43 CFR Public Land Order 5873

[OR 20236]

Oregon; Partial Revocation of Public Water Reserve No. 91

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order revokes an Executive Order in part as to 200 acres of public lands withdrawn as a public water reserve. This action will restore 40 acres to operation of the public land laws generally, including nonmetalliferous mineral location under the mining laws. The balance of 160 acres remains segregated from the public land laws generally, including the mining laws, for the Hart Mountain National Antelope Range.

EFFECTIVE DATE: June 20, 1981.

FOR FURTHER INFORMATION CONTACT:
Champ C. Vaughan, Jr., Oregon State Office, 503–231–6905.

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. The Executive Order of June 13, 1925, which withdrew certain lands for public water reserve purposes is hereby revoked insofar as it affects the following described lands:

Willamette Meridian

Public Water Reserve No. 91

T. 38 S., R. 23 E.,
Sec. 29, SW¼NW¼.
T. 36 S., R. 25 E.,
Sec. 27, SW¼.

The area described aggregates 200 acres in Lake County.

2. The land in T. 36 S., R. 25 E., is withdrawn for the Hart Mountain National Antelope Refuge and remains segregated from the public land laws generally, including the United States mining laws.

3. At 10 a.m. on June 20, 1981, the public land in T. 38 S., R. 23 E., shall be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on June 20, 1981, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

4. At 10 a.m. on June 20, 1981, the public land in Paragraph 3, will be open to nonmetalliferous mineral location under the United States mining laws. The land has been and continues to be open to metalliferous mineral location under the United States mining laws and to applications and offers under the mineral leasing laws.

Inquiries concerning the land should be addressed to the State Director, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

Oregon; Partial Revocation of Public Land Order No. 3966

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order partially revokes a public land order which withdrew lands for flood control purposes in connection with the Bonneville Dam Project. This action will restore the land to operation of the public land laws, including the mining laws.

EFFECTIVE DATE: June 20, 1981.

FOR FURTHER INFORMATION CONTACT:
Champ Vaughan, Jr., Oregon State Office 503–231–6905.

By virtue of the authority contained in Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714, it is ordered as follows:

1. Public Land Order No. 3966 of April 4, 1966, which withdrew public lands for use by the Department of the Army for flood control purposes in connection with the Bonneville Dam Project, is hereby revoked insofar as it affects the following described land:

Willamette Meridian

T. 2 N., R. 12 E.,
Sec. 3, Lot 3.

Containing 12.51 acres in Wasco County.

2. At 10 a.m. on June 20, 1981, the land shall be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on June 20, 1981, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. At 10 a.m. on June 20, 1981, the land will be open to location under the United States mining laws. It has been open to applications and offers under the mineral leasing laws.

BILLING CODE 4310–84–M

43 CFR Public Land Order 5878

[OR 20274]

Oregon; Partial Revocation of Reclamation Withdrawal

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order revokes a Secretarial Order in part as to 30 acres of land withdrawn for reclamation purposes. This action permits restoration of the lands to operation of the mining laws, provided appropriate rules and regulations are issued to allow mineral location on lands conveyed pursuant to the Recreation and Public Purposes Act.

EFFECTIVE DATE: May 26, 1981.

FOR FURTHER INFORMATION CONTACT: Champ C. Vaughan, Jr., Oregon State Office, 503–231–6905.

By virtue of the authority contained in Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. The Secretarial Order of August 16, 1905, which withdrew certain lands for use by the Water and Power Resources Service (formerly the Bureau of Reclamation) for reclamation purposes in connection with the Umatilla Project is hereby revoked so far as it affects the following described lands:

Willamette Meridian

T. 4 N., R 28 E.,
Sec. 10, W½E½NE¼NW¼ and W½NE¼NW¼.
The area described contains 30 acres in Umatilla County.

2. The surface estate of the lands has been conveyed to the City of Hermiston pursuant to the Recreation and Public Purposes Act of June 14, 1926, as amended (43 U.S.C. 869, 869–4); therefore, unless and until appropriate rules and regulations are issued, the lands will not be open to location under the United States mining laws. The lands have been and continue to be open to applications and offers under the mineral leasing laws.

Inquiries concerning the land should be addressed to the State Director, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

Arizona; Revocation of Public Land Order No. 739

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order will revoke a withdrawal which withdrew certain lands for the use of the Department of the Army in connection with the activities of the Arizona National Guard. This action will restore 1,280 acres to operation of the public land laws, including the mining and mineral leasing laws.

EFFECTIVE DATE: June 20, 1981.

FOR FURTHER INFORMATION CONTACT: Mario L. Lopez, Arizona State Office, 602–261–4774.

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of October 21, 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Public Land Order No. 739 of July 28, 1951, which withdrew the following described public lands for use by the Department of the Army as a rifle range and in connection with the activities of the Arizona National Guard is hereby revoked in its entirety:

Gila and Salt River Meridian

T. 8 S., R. 21 W.,
Secs. 27 and 34.
Containing 1,280 acres in Yuma County.

2. At 10 a.m. on June 20, 1981, the lands shall be open to operation of the public land laws, generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on June 20, 1981, shall be considered simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. At 10 a.m. on June 20, 1981, the lands described shall be open to location under the United States mining laws and to applications and offers under the mineral leasing laws.

BILLING CODE 4310-84-M

43 CFR Public Land Order 5881

[OR 20228]

Oregon; Partial Revocation of Public Water Reserve No. 81

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order revokes an Executive Order in part as to 80 acres of public land withdrawn as a public water reserve. This action will restore the land to operation of the public land laws generally, including nonmetalliferous mineral location under the mining laws.

EFFECTIVE DATE: June 23, 1981.

FOR FURTHER INFORMATION CONTACT: Champ C. Vaughan, Jr., Oregon State Office, 503-231-6905.

By virtue of the authority contained in Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. The Executive Order of November 26, 1921, which withdrew certain lands for public water reserve purposes, is hereby revoked so far as it affects the following described public land:

Willamette Meridian

Public Water Reserve No. 81

T. 17 S., R. 38 E., Sec. 9, W½NW¼

The area described contains 80 acres in Malheur County.

2. At 10 a.m., on June 23, 1981, the land will be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10 a.m., on June 23, 1981, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. At 10 a.m., on June 23, 1981, the land will be open to nonmetalliferous mineral location under the United States mining laws. The land has been and continues to be open to metalliferous mineral location under the United States mining laws and to applications and offers under the mineral leasing laws.

Inquiries concerning the land should be addressed to the State Director, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

BILLING CODE 4310-84-M

43 CFR Public Land Order 5893

[U-15158]

Utah; Partial Revocation of Reclamation Project Withdrawal

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order partially revokes a Secretarial Order which withdrew lands for the Green River, Gunnison Project. This action involves a total of 2,543.45 acres of which 594.50 acres are in State ownership. The remaining 1,948.95 acres will be restored to operation of the public land laws generally, including the mining laws.

EFFECTIVE DATE: June 23, 1981.

FOR FURTHER INFORMATION CONTACT: Ken Latimer, Utah State Office, 801-524-4245.

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. The Secretarial Order of April 30, 1921, which withdrew lands for the Green River, Gunnison Project, is hereby revoked insofar as it affects the following described lands;

Salt Lake Meridian

T. 20 S., R. 15 E. (partially surveyed)
Secs. 33, 34, 35, and 36.

The area described contains a total of 2,543.45 acres of which 1,948.95 acres are public lands described as Secs. 33, 34, 35 and lot 5, Sec. 36 in Emery County. The remaining 594.50 acres are in State ownership.

2. At 10 a.m. on June 23, 1981, the public lands described above shall be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on June 23, 1981, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. The public lands described above will be open to location under the United States mining laws at 10 a.m. on June 23, 1981. They have been open to applications and offers under the mineral leasing laws.

Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, University Club Building, 136 East South Temple, Salt Lake City, Utah 84111.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

May 18, 1981.

BILLING CODE 4310-84-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Parts 33, 94, and 192

[CGD 79-072]

Stowage of Lifeboats and Liferafts

AGENCY: Coast Guard, DOT.

ACTION: Final rules.

SUMMARY: These regulations require that certain vessels having widely separated accommodation or working spaces must have at least one liferaft, of sufficient

aggregate capacity to accommodate at least 50 percent of the persons on board, in each such location. These regulations will improve the probability of survival for crew members in cases where a ship has to be abandoned.

EFFECTIVE DATE: June 25, 1981.

FOR FURTHER INFORMATION CONTACT: Commander John P. Deleonardis (G-MVI-2/TP24), Room 2612, U.S. Coast Guard Headquarters, Washington, D.C. 20593, 202-426-2190.

SUPPLEMENTARY INFORMATION: On December 3, 1979, the Coast Guard published a notice of proposed rulemaking in the **Federal Register** concerning these amendments (44 FR 69312). A supplemental notice of proposed rulemaking was also published in the **Federal Register** of May 27, 1980 (45 FR 35366). The supplemental notice proposed certain additions and revisions to the December 3 notice. The comment period on the rulemaking closed on July 11, 1980, and a total of six (6) written comments were received.

The final rule has been evaluated in accordance with DOT "Regulatory Policies and Procedures," 44 FR 11033 (February 26, 1979). A copy of the final evaluation may be obtained from the Commandant (G-CMC/TP24), U.S. Coast Guard, Washington, D.C. 20593, 202-426-1477.

The Coast Guard has assessed the environmental effects of these amendments and found that these amendments will have no significant impact on the human environment. This assessment is available for review.

Drafting Information

The principal persons involved in drafting this proposal are: Lt. Daniel J. Zedan, Project Manager, Office of Merchant Marine Safety and Michael N. Mervin, Project Attorney, Office of Chief Counsel.

Discussion of Comments

All changes to the proposed regulations have been made to improve clarity without changing the substance of the regulations. The changes reflect and are a direct result of comments received and subsequent Coast Guard review of the proposal.

General Comment

Of the six comments received, four were addressed, and appropriate action initiated, in the supplemental notice of proposed rulemaking.

One of the remaining two comments favored the proposal as written. The other comment requested that for Great Lakes vessels and seagoing barges, the determination as to the location of the raft should be left to the local OCMI. In order to ensure uniform industry wide implementation and enforcement, the Coast Guard rejects this idea.

Accordingly, Chapter I of Title 46 of the Code of Federal Regulations is amended as follows:

PART 33—LIFESAVING EQUIPMENT

1. 46 CFR Part 33 is amended by revising § 33.05-1(f) to read as follows:

§ 33.05-1 Lifeboats and liferafts for tankships; ocean and coastwise; construction or conversion of which was started before November 19, 1952-T/OC.

* * * * *

(f) Each tankship certificated for ocean or coastwise service, and each tankship of less than 1,600 gross tons on an international voyage must carry inflatable liferafts of sufficient aggregate capacity to accommodate at least 50 percent of the persons on board. Those tankships that have widely separated accommodation or working spaces must have at least one liferaft in each such location.

2. 46 CFR Part 33 is amended by revising § 33.05-2(f) to read as follows:

§ 33.05-2 Lifeboats and liferafts for tankships; ocean and coastwise; construction or conversion of which was started after November 18, 1952, and before May 26, 1965-T/OC.

* * * * *

(f) Each tankship certificated for ocean or coastwise service, and each tankship of less than 1,600 gross tons on an international voyage must carry inflatable liferafts of sufficient aggregate capacity to accommodate at least 50 percent of the persons on board. Those tankships that have widely separated accommodation or working spaces must have at least one liferaft in each such location.

3. 46 CFR Part 33 is amended by revising § 33.05-3(f) to read as follows:

§ 33.05-3 Lifeboats and liferafts for tankships; ocean and coastwise; construction or conversion of which was started after May 25, 1965-T/OC.

* * * * *

(f) Each tankship certificated for ocean or coastwise service, and each tankship of less than 1,600 gross tons on an international voyage must carry inflatable liferafts of sufficient aggregate capacity to accommodate at least 50 percent of the persons on board. Those tankships that have widely separated accommodation or working spaces must have at least one liferaft in each such location.

* * * * *

4. 46 CFR Part 33 is amended by revising § 33.05-20(c) to read as follows:

§ 33.05-20 Lifeboats and liferafts for tank vessels; Great Lakes—TB/L.

* * * * *

(c) All tankships of 300 gross tons and over in Great Lakes service shall carry, in addition to the lifeboats required by paragraph (a) of this section, approved inflatable liferafts of such aggregate capacity to accommodate all persons on board: Provided, that such tankships, which are equipped with lifeboats in accordance with § 33.05-1, shall carry additional approved inflatable liferafts of sufficient aggregate capacity to accommodate at least 50 percent of the persons on board. Those tankships that have widely separated accommodation or working spaces must have at least one liferaft in each such location.

* * * * *

PART 94—LIFESAVING EQUIPMENT

5. 46 CFR Part 94 is amended by revising § 94.10-10(e) to read as follows:

§ 94.10-10 Requirements for vessels in ocean or coastwise service other than barges; towing, fishing, and wrecking vessels; pilot boats; and yachts.

* * * * *

(e) In addition to the lifeboats required by paragraph (a) of this section, each vessel on an international voyage and each vessel in ocean or coastwise service must carry liferafts of sufficient aggregate capacity to accommodate at least 50 percent of the persons on board. Those vessels that have widely separated accommodation or working spaces must have at least one liferaft in each such location.

* * * * *

6. A new paragraph (c) is added to § 94.10-15 to read as follows:

§ 94.10-15 Requirements for seagoing barges in ocean or coastwise service.

* * * * *

(c) All manned seagoing barges of 100 gross tons and over in ocean or coastwise service, having widely separated accommodation or working spaces, must have at least one liferaft, of sufficient aggregate capacity to accommodate at least 50 percent of the persons on board, in each such location.

7. 46 CFR Part 94 is amended by

revising footnote 3 to Table 94.10–40(a) to read as follows:

§ 94.10–40 Requirements for vessels in Great Lakes; Lakes, Bays and Sounds; or River Service other than fireboats, wrecking and fishing vessels, pilot boats and yachts.

(a) * * *

[3] Every vessel of 300 gross tons and over, having widely separated accommodation or working spaces, must have at least one liferaft, of sufficient aggregate capacity to accommodate at least 50 percent of the persons on board, in each such location.

PART 192—LIFESAVING EQUIPMENT

8. 46 CFR Part 192 is amended by revising § 192.10–10(d) to read as follows:

§ 192.10–10 Requirements for vessels in ocean or coastwise service.

* * * * *

(d) In addition to the lifeboats required by paragraph (a) of this section, each vessel on an international voyage and each vessel in ocean or coastwise service must carry liferafts of sufficient aggregate capacity to accommodate at least 50 percent of the persons on board. Those vessels that have widely separated accommodation or working spaces must have at least one liferaft in each such location.

* * * * *

(46 U.S.C. 391a, 481; 49 U.S.C. 1655(b); 49 CFR 1.46(b) and (n)(4)).

Dated: May 19, 1981.

J. B. Hayes,

Admiral, U.S. Coast Guard, Commandant.

Proposed Rules

Federal Register
Vol. 46, No. 100
Tuesday, May 26, 1981

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

7 CFR Part 57

United States Standards for Hay and Straw; Review of Standards

AGENCY: Federal Grain Inspection Service,[1] USDA.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Federal Grain Inspection Service (FGIS) has reviewed the United States Standards for Hay and Straw in accordance with the specific criteria established in Executive Order 12291. FGIS proposes that no changes be made to the standards.

DATE: Comments must be submitted on or before July 27, 1981.

ADDRESS: Comments must be submitted in writing, in duplicate, to USDA, FGIS, Director, Issuance and Coordination Staff, 1400 Independence Ave., SW, Washington, D.C. 20250, telephone (202) 447–3910. All comments received will be made available for public inspection at the above address during regular business hours.

FOR FURTHER INFORMATION CONTACT: James L. Driscoll, Director Standardization Division, FGIS, USDA, Richards-Gebaur AFB, Bldg. 221, Grandview, Missouri 64030, telephone (816) 348–2861.

SUPPLEMENTARY INFORMATION: This action is being taken as a part of FGIS' review of regulations under Executive Order 12291. D. R. Galliart, Acting Administrator, has determined that this action is classified as nonmajor and that it will not have a significant economic impact on a substantial number of small entities because no changes in standards for hay and straw are being proposed. Also, the official inspections of hay and straw are performed on a voluntary basis.

Hay and straw inspections are authorized by the Agricultural Marketing Act of 1946 (Act), as amended (7 U.S.C. 1621–1627), and performed according to the Official United States Standards for Hay (7 CFR 57.1–57.13) and the United States Standards for Straw (7 CFR 57.50–57.52). The standards were used frequently until the early 1950's, but the number of official inspections has steadily declined since that time. The decline in the number of official inspections has resulted in part from a decrease in the amount of hay and straw purchased by government agencies. The inability of the standards to accurately reflect nutrient quality also has been suggested by interested parties as a reason for the limited use of the inspection service.

FGIS had indicated in a December 28, 1979 **Federal Register** Notice (44 FR 76835) that it intended to study the feasibility of incorporating objective testing procedures into the hay standards to better indicate quality. These tests would have supplemented the completely subjective analysis procedure used in the present hay inspection system, but the necessary instrumentation for performing such tests has not yet been perfected. FGIS determined that it would defer further study on objective testing procedures for hay until the instrumentation to perform these procedures is perfected and acceptable correlations have been established between instrument values and approved reference methods.

Incorporating objective testing procedures into the straw standards is also impractical at this time, because the necessary instrumentation for performance of such tests has not yet been perfected.

Accordingly, FGIS proposes to make no changes to the United States Standards for Hay (7 CFR 57.1–57.13) and to the United States Standards for Straw (7 CFR 57.50–57.52) at this time. comments are solicited from the public regarding this action.

(Sec. 202, Act of August 14, 1946, ch. 966, Tit. II, 60 Stat. 1087 (7 U.S.C. 1622))

Done in Washington, D.C. on May 8, 1981

D. R. Galliart,
Deputy Administrator for Program Operations and Federal Grain Inspection.

[FR Doc. 81–15606 Filed 5–22–81; 8:45 am]
BILLING CODE 3410–02–M

[1] Authority to exercise the functions of the Secretary of Agriculture contained in the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621–1627), concerning inspection and standardization activities related to grain and similar commodities and products thereof, has been delegated to the Administrator, Federal Grain Inspection Service (7 U.S.C. 75a; 7 CFR 68.2(e)).

Rural Electrification Administration

7 CFR Part 1701

Public Information; Appendix A—REA Bulletins, Specification for Filled Telephone Cables With Expanded Insulation, PE–89

AGENCY: Rural Electrification Administration, USDA.

ACTION: Proposed rule.

SUMMARY: REA proposes to amend Appendix A by issuing a new Bulletin 345–89, Specification for Filled Telephone Cables with Expanded Insulation, PE–89. This specification, which supplements but does not replace PE–39, Specification for Filled Telephone Cable, will permit the use of more cost-effective cables and result in the conservation of petrochemical derived insulating materials.

DATE: Public comments must be received by REA no later than July 27, 1981.

ADDRESS: Submit written comments to Joseph M. Flanigan, Director, Telecommunications Engineering and Standards Division, Rural Electrification Administration, Room 1355, South Building, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Harry M. Hutson, Chief, Outside Plant Branch, Telecommunications Engineering and Standards Division, Rural Electrification Administration, Room 1342, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, telephone (202) 447–3827. The Draft Impact Analysis describing the options considered in developing this proposed rule and the impact of implementing each option is available on request from the above office.

SUPPLEMENTARY INFORMATION: Pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et seq.), REA proposes to amend Appendix A by issuing a new Bulletin 345–89, Specification for Filled Telephone Cables with Expanded Insulation, PE–89. This proposal action has been issued

in conformance with Executive Order 12291, Federal Regulation, and has been determined to be "not major."

(Catalog of Federal Domestic Assistance as 10.851—Rural Telephone Loans and Loan Guarantees)

REA, in its effort to assure the best, most cost-effective telecommunications for rural America, proposes to issue PE-39. This specification supplements PE-89, and permits the use of lower cost petrochemical conserving insulation in cables of 200 pair and larger. All written submissions made pursuant to this action will be made available for public inspection during regular business hours, above address.

Dated: May 11, 1981.

John H. Arnesen,

Assistant Administrator—Telephone.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Ch. I

Water Resources Project Type Activities; Channel Modification Guidelines

AGENCY: Fish and Wildlife Service, Department of the Interior, Soil Conservation Service, Department of Agriculture.

ACTION: Withdrawal of advance notice of proposed rulemaking.

SUMMARY: On December 28, 1979, the Fish and Wildlife Service (FWS) and the Soil Conservation Service (SCS) published in the **Federal Register** (44 FR 76299) advance notice of their intent to convert the Channel Modification Guidelines to rules and regulations. Since that time, FWS and SCS have been carefully assessing the use and effectiveness of the guidelines. This assessment shows that the existing guidelines are being applied effectively in new projects and in projects authorized before their publication. For example, the existing guidelines have been applied to 106 projects in 29 States and resulted in the deletion of over 708 miles of channel work. In addition, construction methods were modified on 24 projects and mitigating measures on 60 acres were added in another project.

Because of demonstrated acceptability and effectiveness of the guidelines, SCS and FWS jointly agree that the guidelines should not be converted to rules and regulations at this time. This decision is consistent with Executive Order 12291, **Federal Register** February 17, 1981, which directs that administrative decisions shall be based on adequate information concerning the need for and consequences of proposed government action.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 81-AAL-6]

Proposed Establishment of Transition Area Sparrevohn, Alaska

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule would designate the Sparrevohn, Alaska, transition area. The need for a transition area was created when the prescribed instrument approach procedure to Sparrevohn was established. The FAA is also proposing to establish a Standard Terminal Arrival Route (the AMOTT ONE STAR) from Sparrevohn NDB to Amott Intersection. The proposed transition area would provide controlled airspace for these procedures.

DATE: Comments must be received on or before June 25, 1981.

ADDRESSES: Send comments on the rule in triplicate to: Director, FAA Alaskan Region, Attn: Chief, Air Traffic Division, Docket No. 81-AAL-6; 701 C Street, Box 14, Anchorage, Alaska 99513.

Comments may be examined in the Rules Docket, weekdays except Federal holidays, between 8:00 a.m. and 4:30 p.m. The official docket may be examined at the following location: Office of the Regional Counsel, Alaskan Region, Federal Aviation Administration, 701 C Street, Box 14, Anchorage, Alaska 99513.

An informal docket may be examined at the office of the Chief Air Traffic Division, at the above address.

FOR FURTHER INFORMATION CONTACT:

Jerry M. Wylie, Operations, Procedures, and Airspace Branch, Air Traffic Division, Federal Aviation Administration, 701 C Street, Box 14, Anchorage, Alaska 99513, telephone (907) 271-5903.

SUPPLEMENTARY INFORMATION: .

Comments Invited

Interested persons are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposals. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposals. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 81-AAL-6." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments wil be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Operations, Procedures, and Airspace Branch, Air Traffic Division, Alaska Region, Federal Aviation

Administration, 701C Street, Box 14, Anchorage, Alaska 99513, or by calling (907) 271-5903. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2, which describes application procedures.

The Proposal

The FAA is considering an amendment to Subpart F of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate a transition area at Sparrevohn, Alaska. This proposal would provide protected controlled airspace for aircraft conducting prescribed instrument approaches to Sparrevohn AFS and for a proposed Standard Terminal Arrival Route to Anchorage.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished, (46 FR 540), by adding the following:

Sparrevohn, Alaska

That airspace extending upward from 700 feet above the surface within 4.5 miles southeast of and 9.5 miles northwest of the 208° bearing from the Sparrevohn NDB (Lat. 61°06.0' N. Long. 155°33.0' W.), extending from the NDB to 24 miles southwest of the NDB; and that airspace extending upward from 1,200 feet above the surface within 4.5 miles each side of the 101° bearing from the Sparrevohn NDB, extending from the NDB to 20 miles east of the NDB.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958, (49 U.S.C. 1348(a) and section 1354(a); Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; (4) is appropriate to have a comment period of less than 45 days; and (5) at promulgation, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Anchorage, Alaska, on May 14, 1981.

Robert L. Faith,

Director, Alaskan Region.

[FR Doc. 81-15562 Filed 5-22-81; 8:45 am]

BILLING CODE 4910-13-M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Ch. I

Proposed Revision of the Customs Bond Structure and Solicitation of Comments

AGENCY: U.S. Customs Service, Treasury.

ACTION: Notice of proposed revision of the Customs bond structure and solicitation of comments.

SUMMARY: Customs is considering an extensive revision of its bond structure to consolidate and reduce the number of bond forms now in use. The purpose of the proposal is to simplify transactions between Customs and the importing public and to facilitate establishment of an efficient computerized bond control system. If the proposal is adopted, numerous amendments to the Customs Regulations will be necessary and will be the subject of a notice of proposed rulemaking published in the Federal Register. The public is invited to comment on the merits of the proposal and to suggest alternatives to the proposed bond format, coverages, and conversion approaches.

DATES: Comments must be received on or before (60 days from the date of publication in the Federal Register).

ADDRESS: Comments (preferably in triplicate) should be addressed to the Commissioner of Customs, Attention: Regulations and Information Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Room 2426, Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Joseph C. Goody, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229, (202-566-5307).

SUPPLEMENTARY INFORMATION:

Background

When merchandise other than noncommercial merchandise accompanying a traveler arrives in the United States, it ordinarily remains in Customs custody until the importer, consignee, or the authorized agent of either establishes ownership and complies with the applicable Customs laws and regulations or laws and regulations enforced by Customs for other Federal and State agencies. In some instances, especially in the case of duty-free noncommercial importations, the merchandise may be released to the importer, consignee, or an authorized agent merely upon furnishing proof of ownership, and no formal documentation is required. However, in most cases involving commercial importations, formal documentation is required to obtain release of the merchandise. The Customs transaction releasing the merchandise to the importer is referred to as an "entry".

As a part of the entry documentation, the importer, consignee, or an authorized agent usually is required to file a bond with Customs. The bond, among other things, guarantees that proper entry summary, with payment of estimated duties and taxes when due, will be made for imported merchandise and that any additional duties and taxes subsequently found to be due will be paid. The bond also guarantees redelivery of imported merchandise to Customs custody for examination or inspection if found not to comply with applicable laws and regulations. Redelivery may be required as a result of a failure to properly mark, label, clean, or fumigate the imported merchandise; or a failure to destroy or export the imported merchandise, if appropriate.

A bond also may provide, as a condition of its satisfaction, for the production of any missing invoices, declarations, certificates, or other documents required in connection with the entry of imported merchandise, in the form and within the time required.

Bonds are used to secure other Customs transactions besides those of importers. For example, carriage of imported merchandise that has not been examined or appraised by Customs must be secured by a Customs bond to guarantee performance of various Customs obligations. Those performance bonds are required from bonded carriers, bonded cartage and lighterage operators, and persons who are authorized to carry merchandise when bonded carrier facilities are not reasonably available. Among other things, those persons are contractually bound to safely deliver that merchandise to Customs at the destination. They are bound to report arrival of the merchandise of Customs at the destination so that it can be examined for Customs purposes. They are bound not to deliver that merchandise to the ultimate consignee

until Customs determines that it can be released. If the bond principal fails to perform as agreed, the principal and surety become liable for payment of liquidated damages.

A similar situation exists for persons who operate Customs bonded warehouses, container stations, and foreign-trade zones. A bond from these people is needed to protect the Government from loss. Generally, imported merchandise is placed in such places before the amount of duty due has been determined. Moreover, until that merchandise is withdrawn for consumption, no duty is paid by the importer. The bond given by such persons serves as a guarantee that the stored merchandise will be kept safely and that it will be released only when authorized to do so by Customs.

Other bonds are required in special instances. For example, persons who use the accelerated drawback program are required to file a bond to guarantee repayment of any money erroneously paid. Another special bond is that required of copyright owners who claim that an imported article infringes their copyright and request Customs to detain that article pending a final determination on the infringement claim. That bond insures that any damage caused to the importer by detention will be corrected.

Presently, there are approximately 50 different forms of Customs bonds in use. Part 113, Customs Regulations (19 CFR Part 113), sets forth a description of the various bonds and the general requirements applicable to Customs bonds. It contains the general authority and powers of the Commissioner of Customs to require bonds, the classes of bonds, procedures for their approval and execution, general and special bond requirements, requirements which must be met to be either a principal or a surety, requirements concerning the production of documents, and the authority and manner of assessing damages and of cancelling the bond or charges against a bond.

Customs is considering an extensive revision of its existing bond structure to consolidate the number of bond forms and to establish an efficient computerizd bond control system. As part of the revision process, discussions have been held with representative segments of the importing community. A number of suggestions received during these discussions have been incorporated into this document.

The purpose of this notice is to afford the public a further meaningful opportunity to participate at an early stage in the revision process by submitting comments on the merits of the proposal and by suggesting alternatives to the proposed bond format, coverages, and conversion approaches.

Types of Bonds

Under the proposal, two types of Customs bonds, designated "single transaction" and "multi-transaction" would be established.

1. *Single Transaction:* The single transaction bond would be used for one transaction at a specific port under the same conditions as a single entry bond currently is being used and would require the approval of the district director at the port where filed.

2. *Multi-Transaction:* The multi-transaction bond would replace present term, blanket, and consolidated bonds and be used for many transactions over a definite period of time. It also would replace the continual type bonds which cover conditions of a continuing nature, such as, carriage of merchandise and establishment of warehouses. This would be similar to, but a more general type application of, the existing Consolidated Aircraft Bond, Customs Form 7606.

An amount associated with each condition referred to on the multi-transaction bond would represent the liability limit for that specific condition. It is anticipated that each condition would be self-contained and appear in a separate section or subsection of the Customs regulations.

The bond contract would remain in full force and effect for one year commencing on the effective date shown on the bond and for each succeeding annual period, or until terminated. Current Customs policy prohibiting the discontinuance of bond coverage before the end of the initial term unless good cause is shown and Customs concurs would not be changed.

At least 60 days before the bond anniversary date, Customs would issue a courtesy notice advising the principal that the bond would terminate on the anniversary date unless the principal notifies Customs by returning the notice, or othewise advises Customs in writing, at least 30 days before the bond expiration date, of its intent to continue the contract. Thus, notification of premium payment on the bond would be sufficient to renew a bond contract for another term.

If a party to the bond contract intends to terminate the contract, that party would be required to notify the other parties to the contract and Customs in writing at least 30 days before the effective date of the termination.

In order that small importers will not be required to purchase more coverage than necessary, it is proposed to create two classes of coverage within the multi-transaction type bonds, the *national class* and the *district class*. The *national class*, at the option of the principal, would include all or specific transactions of a particular principal on a nationwide basis. The *district class*, at the option of the principal, would include all or specific transactions of a particular principal within one district. For example, term bonds which currently are filed on a port level would be consolidated into one district bond. The conditions of this class of bond could be the same as those of a national bond except that the scope of coverage would be limited to one district and the minimum amount of bond required could be less than the minimum amount required on a national bond. In keeping with existing Treasury Department directives and Customs policy, customhouse brokers would not be approved as principals on a national class bond to be used in their capacity as brokers. In addition, this would not change current policy which permits a licensed customhouse broker to be approved as a principal on a national class bond to cover the entry of merchandise actually owned by the broker.

Appendix A to this document lists the Customs bonds currently in use. Whenever possible it is intended to eliminate unnecessary conditions in the proposed bond structure.

Bond Forms

Under the proposal, there would be one standardized bond form for the single transaction and multi-transaction bonds. This standardized bond form, as it might appear, is set forth as Appendix B to this document. A space would be provided on the bond form where the conditions covered by the bond and the related surety liability limit would be indicated. Standardized conditions would be enumerated in the Customs Regulations (19 CFR Chapter I). This procedure would eliminate repeating the similar conditions currently contained in the various Customs bonds. If the proposal is adopted, the Customs Regulations would be revised to incorporate all bonding requirements into the same part in 19 CFR Chapter I. In conjunction with this revision, the bond conditions will be clarified and the language modernized and simplified. Appendix C contains some specific examples of conditions which currently appear in Customs bonds and how they may be written in more modern and simplified language.

Customs Form 53, "Bond Transcript", would continue to be required, but the form might be revised as illustrated in Appendix D to this document. Customs Form 53 would be filed with each bond submitted for approval whether the bond is supported by surety, cash, or other acceptable security.

Based on the comments received and if our continuing analysis indicates it is feasible, the specific information unique to the Customs Form 53 will be incorporated into the proposed standardized bond form. Thus, the "Bond Transcript" would be discontinued. The standardized bond form, as it might appear under these circumstances, is set forth as Appendix E to this document.

Bond Modification

Current Customs policy permitting the addition of principals to bonds and name and address changes after bond approval would not change. Any other bond contract change would require the termination of the old bond and filing of a new bond, as currently prescribed in section 113.23(d), Customs Regulations (19 CFR 113.23)(d)).

Bond Control

A computerized bond control system would be implemented in conjuction with the Customs bond proposal. The proposal would reduce the number of bonds required by a principal to conduct Customs business and thus facilitate the efficient operation of the computerized system.

Under the computerized system, data would be verified and validated, and computer files would be updated, soon after a transaction is entered into the system via a terminal. Routine, time consuming tasks which are a necessary part of the bond approval procedure would be automated to speed up the approval process. For example, the lead time currently required for filing a bond and related transcript before its efffective date would be reduced significantly.

To improve querying and locating bonds, each bond would be assigned a nine digit control number. The first two digits would identify the district where the bond is filed. The last seven digits would be a serial number control uniquely identifying the bond within the district plus a check digit. This bond number would appear on all copies of the bond, whether it is a Customs bond form or a privately printed bond form. Thus, just by knowing the bond number, interested individuals would be able to determine where the bond contract is located physically.

The computerized system would provide increased revenue protection and improve the timely availability of information to authorized officials on a "need to know" basis. In addition, the computerized system would allow bonding procedures to be standardized nationwide. Through the interaction between the bond processing system and other Customs computer processing systems, bond and bond related information would be available to authorized officials on a consolidated basis.

Conversion to the New Bond Structure

To fulfill the Customs objective of establishing the new bond structure and related control system with the least adverse impact on Customs and affected parties, two conversion approaches are being considered.

The first approach would provide for a 90 or 120-day transition period during which all bonds would be terminated and replaced by bonds utilizing the new format. Existing term-type or continual-type bonds not replaced by bonds utilizing the new format would not be considered valid by Customs at the end of the 90 or 120-day transition period.

The second approach would consist of the following alternatives:

1. If a party has only a continual-type bond filed with Customs, a transition period would be provided during which a bond utilizing the new format would be filed in accordance with the procedure stated in the first approach.

2. If a party has more than one term-type bond in effect, the expiration date of the existing bond with the latest termination date would become the replacement control date. Customs would announce the date principals would be required to determine the replacement control date. Applicable replacement control dates thus would be established for the entire importing community at the same time.

Once a replacement control date has been established for an individual or firm, Customs would not approve any bond submitted under the old bond format when the term of that bond would be effective beyond the replacement control date.

3. If a party has a term and continual-type bond in effect, the continual-type bond would be terminated as of the replacement control date established for the term-type bond. A bond in the new format would be filed after the replacement control date.

Comments

Customs invites written comment (preferably in triplicate) from all interested parties on the bond revision proposal.

Commenters should address themselves, among other things, to (1) the proposed format for the bond form, (2) the proposed format for consolidating the bond conditions in the regulations, as well as recommendations for alternative formats, (3) the proposed approaches for conversion to the new system as well as suggestions for additional approaches and (4) the advantages or disadvantages of the new system as it impacts on their operation.

Comments submitted will be available for public inspection in accordance with section 103.8(b), Customs Regulations (19 CFR 103.8(b)), on regular business days between 9:00 a.m. and 4:30 p.m. at the Regulations and Information Division, Room 2426, Headquarters, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

Executive Order 12291

This document will not result in a regulation which is a "major rule" as defined by section 1(b) of Executive Order 12291.

Regulatory Flexibility Act

It appears that the rule, if promulgated, may have a significant economic impact on a substantial number of small entities, and thus require an initial regulatory flexibility analysis in accordance with the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 603). The Customs Office of Economic Analysis is in the process of determining whether such an analysis is indeed necessary. Accordingly, if it is decided to proceed with this matter, the notice of proposed rulemaking will have as an attachment (1) the initial regulatory flexibility analysis or (2) a certification by the Secretary of the Treasury that the analysis is not, in fact, required by the Act.

Authority

This document is issued under the authority of R.S. 251, as amended (19 U.S.C. 66), and sectios 623, as amended, 624, 46 Stat. 759 (19 U.S.C. 1623, 1624).

Drafting Information

The principal author of this document was John Elkins, Regulations and Information Division, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other

Customs offices participated in its development.

William T. Archey,

Acting Commissioner of Customs.

Approved: May 4, 1981.

John P. Simpson,

Acting Assistant Secretary of the Treasury.

Appendix A

The purpose of this appendix is to aid interested parties to compare the bond forms they presently use with the proposed new bond structure formats and concepts embodied in Appendix B, C, and E. The following list indicates the various activities, conditions, and obligations of Customs bonds currently in use. This appendix is for example purposes and subject to change.

Single transaction	Multitransaction
1. CF 4615, Bond of Claimant of Seized Goods for Costs of Court.	1. CF 3583 Proprietor's Manufacturing Warehouse Bond (Class 6).
2. CF 7303, Bond to Produce Manifest and Shipper's Export Declaration for Goods Exported to Canada.	2. Blanket Smelting and Refining Bond.
3. CF 7547, Special Single Entry Carpet Wool and Camel's Hair Bond.	3. Public Gauger's Bond.
4. CF 7551, Immediate Delivery and Consumption Entry Bond (Single Entry).	4. CF 3851, propretor's Warehouse Bond.
5. CF 7555, Warehouse Entry Bond.	5. CF 3587, Carriers Bond.
6. CF 7557, Bond for Exportation or Transportation or for Transportation and Exportation (Single Entry).	6. CF 3588, Private Carrier's Bond.
7. CF 7561, Bond for Articles Entered or Withdrawn from Warehouse Conditionally Free of Duty.	7. CF 3855, Bond of Customs Cartman or Lighterman.
8. CF 7563, Bond for Temporary Importations.	8. CF 7303, Bond to Produce Manifest and Shipper's Export Declaration for Goods Exported to Canada.
9. CF 7565, Exhibition Bond	9. CF 7549, Special Bond-Wool or Hair of the Camel (Term).
10. CF 7567, Vessel, Vehicle or Aircraft Bond (Single Entry).	10. CF 7553, Immediate Delivery and Consumption Entry Bond (Term).
11. CF 7571, Bond on Entry for or Withdrawal from Manufacturing Warehouse.	11. CF 7559, Bond for Exportation or Transportation or for Transportation and Exportation (Term).
12. CF 7581, Bond to Produce Bill of Lading (Single Entry).	12. CF 7587, Bond for the Control of Certain Instruments of International Traffic.
13. CF 7593, Landing Bond	13. Bond for the Control of Identified Shipping Containers.
14. CF 7597, Bond for Use in Connection with Requests for Overtime Services Made by or on Behalf of Owners or Consignees of Merchandise (Single Entry).	14. CF 7563-A, Bond for Temporary Importations (Term)
15. CF 7601, Bond of Actual Owner to Cover the Payment of Increased and Additional Duties and Taxes, the Redelivery of Prohibited Merchandise, the Marking of Merchandise under Customs and Related Laws, and for other Purposes.	15. CF 7569, Vessel, Vehicle, or Aircraft Bond (Term).
16. CF 7603, Bond for Conditionally-Free Withdrawal of Distilled Spirits (Including Alcohol) Wines, or Beer, for Supplies of Fishing Vessels (Single Entry or Term).	16. CF 7595, General Term Bond for Entry of Merchandise.
17. CF 7609, Bond for Accelerated Payment of Drawback (Single Entry).	17. CF 7599, Bond for Use in Connection with Request for Overtime Services Made By or on Behalf of parties in Interest (Term).
18. Special Bond for Entry Merchandise Believed to Involve Unfair Practices.	18. CF 7603, Bond for Conditionally-Free Withdrawal of Distilled Spirits, (Including Alcohol) Wines, or Beer, for Supplies, of Fishing Vessles (Single Entry of Term).
19. Special Bond, for the Clearance of Vessels Penalized for Carrying Narcotics.	19. CF 7605, Air Carrier Blanket Bond.
20. Special Bond for the Observance of Neutrality.	20. CF 7611, Bond for Accelerated Payment of Drawback (Term).
21. Copyright Bond	21. CF 7613 Drawback Export Bond.
22. Special Bond for the Importation of Flammable Fabrics.	22. Containertzed Cargo Bond (Term).
23. Special performance Bond	23. Trade Fair Bond.
24. Bond of Customers Cartman for Issuance of Temporary Identification Card.	24. Special Performance Bond.
	25. Foreign Trade Zone Operator's Bond.

Appendix B

This is an example of the form a bond might take under the new bond structure. This bond would be a two page single sheet, 8½x11 form.

Customs Bond

Bond Number ———

In order to secure payment of duty, tax or charge and compliance with law or regulation as a result of activity covered by any condition referenced below, ———, as principal, and ———, as surety bind themselves to the United States in an amount, or amounts as set forth below.

Section I (Check one box and fill the applicable blank spaces)

☐ Single Transaction Bond—Date of Arrival ——— Place of Arrival ——— Entry No. ———

Date of Entry ———

☐ District Class—Principal expects to conduct business in District of ———

☐ National Class—Applicable at all Customs locations

A multi-transaction bond remains in force for one year beginning ——— 19—. For each succeeding annual period, or until terminated, it constitutes a separate bond for each period at the amounts listed below for any liability that accrues in each period.

A Multi-Transaction bond cannot be unilaterally terminated before the first anniversary date of the bond unless a party thereto can show sufficient cause and Customs concurs. The intention to terminate or renew this bond coverage must be conveyed within the time period and manner prescribed in the Customs Regulations.

Activity code	Activity name	Conditions codified in customs regulations	Limit of liability
Section II (fill in as indicated—see Customs Regulations for Coverage Available*)			
Section III (coverages in addition to the minimum coverage in Section II)			

Witness our hands and seals this ——— day of ———, 19—.

Principal and Surety agree that they are bound to the same extent as if they executed a separate bond covering each of the set(s) of conditions set forth herein.

In no event shall the liability of the Surety for any and all claims under one set of bond conditions exceed the limit of liability specified for that particular set of bond conditions.

If surety fails to appoint an agent under section 7, title 6, U.S. Code, surety consents to service on the clerk of any U.S. District Court or the U.S. Court of International Trade, where suit is brought on the bond. That clerk is to send notice of the service to surety at

.....

(mailing address requested by the surety).

Name ——— Address ——— (Surety) ———

(Seal) ———

Certificate as to Corporate Principal

I, ———, certify that I am the ——— secretary of the corporation named as principal in the within bond, that ———, who signed the said bond on behalf of the principal, was then ——— of said corporation; that I know his signature, and his signature thereto, is genuine; and that said bond was duly signed, sealed, and attested for and in behalf of

said corporation by authority of its governing body.

(Corporate Seal) ———————

Note.—The above certificate to be used when no power of attorney has been filed with the district director of customs.

Schedule of Specific Activities and Minimum Coverage for the Principals

Code	Name	Activity
	The conditions set forth in the Customs Regulation sections shown are required for the related activity [1]	
1	Importer (Brokers).	113.71
2	Internat'l Carriers.	113.72, 113.96, 113.103
3	Bonded Carrier.	113.73, 113.96, 113.104, 113.105, 113.106, and 113.108
4	Cartmen & Lighterman.	113.74, 113.96, 113.104
5	Private Carrier.	113.73, 113.96, 113.104, 113.105, 113.107, and 113.108
6	Class 2,3,4,5, and 8 Warehouse Operator.	113.75, 113.109, 113.110
7	Class 6 Warehouse Operator.	113.76, 113.109, 113.110, and 113.112
8	Class 7 Warehouse Operator.	113.71, 113.77, 113.84, 113.110, and 113.112
9	Container Station Operator.	113.87, 113.96, and 113.108
10	Foreign Trade Zone Operator.	113.79

[1] For additional bond coverage available, refer to Part 113, Customs Regulations.

NOTE.—The section numbers shown are for illustration purpose only.

Examples of modernized and simplified bond conditions as they currently appear on customs bonds and as they might appear under the proposal.

1. Condition 1 of CF 7553, Immediate Delivery and Consumption Entry Bond.

The above-bounden principal, in consideration of the release of all or any part of such shipments as may be charged against this bond before the full amount of duties and taxes imposed upon or by reason of importation has been finally determined, and notwithstanding section 485(d), Tariff Act of 1930, or any other provisions of law, voluntarily undertakes and agrees to pay any and all such duties and taxes found to be due on each entry in question, but not in excess of the amount of this bond, upon condition that no other provision of this bond shall be invoked for the purpose of enforcing the collection of such duties and taxes and upon the further condition that this obligation to pay any and all such duties and taxes found to be due on the shipment (not exceeding the amount of this bond) shall become null and void and of no force and effect as to any entry on and after the date on which the above-bounden principal files with the district director in the manner and within the time prescribed by the regulations a supereding bond on Customs Form 7601 of the owner whose declaration has been filed in accordance with the provisions of section 485(d), in which bond the owner undertakes and agrees to apy any and all such duties and taxes found due on the shipment covered by the above-mentioned entry.

Proposed Language

Agreement To Pay Duties

If principal enters merchandise at any port during the bond period and gets release of all or part of the merchandise before Customs determines the quantity and value of the merchandise and the full amount of duties and taxes due, obligors (principal and surety), on demand by the notice of liquidation, agree to pay any duty and tax, due on any entry charged against this bond. This obligation to pay ends as to any entry on the date when principal timely files with the district director a superseding bond of the owner whose declaration has been properly filed, in which superseding bond the owner agrees to pay any duty and tax due on that entry.

2. Conditions 4, 5 and 6 of CF 7553, Immediate Delivery and Consumption Entry Bond.

And if in any case the above-bounden principal shall redeliver or cause to be redelivered to the order of the district director of Customs, on demand by him, in accordance with the law and regulations in effect on the date of the release of said articles, any and all merchandise found not to comply with the law and regulations governing its admission into the commerce of the United States, unless before such demand the said principal shall have filed with the district director of Customs a superseding bond on Customs Form 7601 in which the actual owner whose declaration has been filed pursuant to section 485(d), Tariff Act of 1930, shall have undertaken upon proper demand on such owner the effect such redelivery; or, in default of redelivery after a proper demand on him, the above-bounden principal shall pay to the said district director such amounts as liquidated damages as may be demanded by him in accordance with the law and regulations, not exceeding the amount of this obligation, for any breach or breaches thereof;

And if in any case the above-bounden principal, in respect of any of the merchandise released from Customs custody, shall redeliver or cause to be redelivered to the order of the district director of Customs such additional packages or quantities of merchandise pursuant to section 499, Tariff Act of 1930, as amended, for the purpose of examination, inspection, or appraisement, upon a demand made at any time before the report of appraisement, unless before that time the said principal shall have filed with the district director of Customs a superseding bond on Customs Form 7601 in which the actual owner whose declaration has been filed pursuant to section 485(d), Tariff Act of 1930, shall have undertaken upon proper demand on such owner to effect redelivery for such purposes; or, in default of redelivery after a proper demand on him, the above-bounden principal shall pay to the said district director such amounts as liquidated damages as may be demanded by him in accordance with the law and regulations, not exceeding the amount of this obligation, for any breach or breaches thereof;

And if in any case the above-bounden principal shall redeliver or cause to be redelivered to the order of the district director of Customs for marking pursuant to the provisions of paragraph 367 or 368, or section 304, Tariff Act of 1930, as amended, upon a demand made not later than twenty (20) days after the report of appraisement, such of the merchandise as may have been released from Customs custody, unless before that time the said principal shall have filed with the district director of Customs and bond on Customs Form 7601 in which the actual owner whose declaration has been filed pursuant to said section 485(d) shall have undertaken upon proper demand on such owner to effect redelivery for such purposes; or, in default of redelivery after a proper demand on him, the above-bounden principal shall pay to the said district director such amounts as liquidated damages as may be demanded by him in accordance with the law and regulations, not exceeding the amount of this obligation, for any breach or breaches thereof.

Proposed Language

Agreement To Redeliver Merchandise

If merchandise is released conditionally to principal before all required evidence is produced, before its quantity and value are determined, or

before its right of admission into the United States is determined, principal agrees to redeliver timely the merchandise released to the principal on demand by Customs if the merchandise—

(i) fails to comply with the laws or regulations governing admission to the United States;

(ii) must be examined, inspected, or appraised as required by section 449, Tariff Act of 1930, as amended; or

(iii) must be marked as required by Headnote 4, Part 2E, Schedule 7, Tariff Schedules of the United States, or by section 304, Tariff Act of 1930, as amended.

If principal defaults obligors agree to pay liquidated damages as may be demanded by Customs. This obligation to redeliver ends as to any entry on the date when principal timely files a superseding bond of the owner whose declaration to so redeliver has been properly filed.

BILLING CODE 6972-73-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-5-FRL 1823-4]

Promulgation of Michigan State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Proposed rulemaking.

SUMMARY: On May 6, 1980 (45 FR 29790), the U.S. Environmental Protection Agency (EPA) announced final rulemaking to approve, and, in part, conditionally approve certain Michigan Air Pollution Control Commission rules as a part of the Michigan State Implementation Plan (SIP). The State is relying on these rules as part of its control strategy for nonattainment areas. On July 28, 1980, the State submitted to EPA amendments to Rules 283 and 610 as revisions to its SIP. The purpose of this notice is to propose EPA rulemaking action and solicit public comment on these revisions to the Michigan SIP.

DATE: Comments on the revision and on EPA's proposed rulemaking are due by June 25, 1981.

ADDRESSES: Copies of these SIP revisions are available for public inspection during normal business hours at the following addresses:

United States Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604

United States Environmental Protection Agency, Public Information Reference Unit, 401 M Street SW., Washington, D.C. 20460

Michigan Department of Natural Resources, Air Quality Divison, State Secondary Government Complex, General Office Building, 7150 Harris Drive, Lansing, Michigan 48917

Written comments should be sent to. Mr. Gary Gulezian, Chief, Regulatory Analysis Section, U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604. (312) 886–6038.

FOR FURTHER INFORMATION CONTACT: Judy Kertcher, Regulatory Analysis Section, Air Programs Branch, U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

SUPPLEMENTARY INFORMATION: Part D of the Clean Air Act, as amended in 1977, requires each State to revise its SIP to meet specific requirements for areas designated as not attaining the National Ambient Air Quality Standards (NAAQS). These SIP revisions must demonstrate attainment of the NAAQS by December 31, 1982, and in certain circumstances, no later than December 31, 1987, for ozone and/or carbon monoxide. The requirements for an approvable SIP are described in a **Federal Register** notice published April 4, 1979 (44 FR 20372). Supplements to the April 4, 1979 notice were published on July 2, 1979 (44 FR 38583), August 28, 1979 (44 FR 50371), September 17, 1979 (44 FR 53761) and November 23, 1979 (44 FR 67182).

On May 6, 1980 (45 FR 29790), EPA announced final rulemaking to approve, and, in part, to conditionally approve, Michigan Air Pollution Control Commission rules as a part of the Michigan SIP. In that notice (45 FR 29790, 29791), EPA approved those rules which had not been previously approved by EPA and on which the State is relying as part of its control strategy for nonattainment areas.

On July 28, 1980, Michigan submitted to EPA revisions to its State Implementation Plan (SIP). The revisions were amendments to Commission Rules 283 and 610. The amendments became effective on July 17, 1980. The following sections discuss these amendments and EPA's proposed rulemaking actions.

Rule 283

The amendment to Rule 283 would exempt equipment used for hydraulic or hydrostatic testing from the requirement for a permit. Since there are no emissions of any significance related to this type of testing, EPA proposes to approve the amendment to Rule 283 as a revision to the Michigan SIP.

Rule 610

The amendment to Rule 610 consists of revisions to Table 62 which lists minimum coating transfer efficiencies for several emission limitations for automobile and light duty truck coating operations. These changes are found in the footnotes to Table 62. Changes in footnotes 2 and 4 apply to the entire Table; changes in footnotes 5 and 7 apply only to specified facilities.

Footnote No. (facility)	Minimum coating transfer efficiency	
	EPA approved regulation	Amendment
2		
4		
5 (Wayne assembly and Wixon assembly)	60% on and after 12/31/82; 55% on and after 12/31/86.	50% on and after 12/31/86
5 (Michigan truck and Dearborn assembly)	65% on and after 12/31/84	50% on and after 12/31/84
7 (Jefferson truck)	55% on and after 12/31/79; 65% on and after 12/31/81.	50% on and after 12/31/81
7 (Lynch Road)	65% on and after 12/31/82	50% on and after 12/31/82
7 (Hamtramck and Warren Main)	65% on and after 12/31/83	50% on and after 12/31/83
7 (Warren Compact)	65% on and after 12/31/84	50% on and after 12/31/84

EPA has reviewed the proposed amendments to the minimum coating transfer efficiencies in Rule 610. These amendments do not impact the attainment demonstrations since there were no changes to the approved emission limitations. The revision changes only the technique employed to achieve equivalence with the limitations. The changes in the coating efficiencies are consistent with the July 3, 1979, policy memorandum from Richard G. Rhoads, Director, Control Programs Development Division, entitled "Appropriate Transfer Efficiency for Waterborne Equivalence" EPA proposes to approve as a revision to the Michigan SIP the amendments to Rule 610.

All interested persons are invited to comment on these revisions to the Michigan SIP and on USEPA's proposed action. Comments should be submitted to the address listed in the front of this notice. Public comments received on or before June 25, 1981, will be considered in USEPA's final rulemaking. All comments received will be available for inspection at the Region V Air Programs Branch, 230 South Dearborn Street, Chicago, Illinois 60604.

Pursuant to the provisions of 5 U.S.C section 605(b), the Administrator has certified 46 FR 8709 that the attached rule will not, if promulgated, have a significant economic impact on a substantial number of small entities. The action only approves State actions.

Under Executive Order 12291 (Order), EPA must judge whether a regulation is "major" and, therefore, subject to the requirements of a regulatory impact analysis. Today's action does not constitute a major regulation because it merely approves regulations which were developed by the State and are currently effective in the area and exempts certain sources from compliance with the State regulation while providing other sources with alternate methods for compliance. This proposed rulemaking was submitted to the Office of Management and Budget (OMB) for review as required by the Order.

This notice of proposed rulemaking is issued under the authority of Sections 110 and 172 of the Clean Air Act (42 U.S.C. 7410, 7502).

Dated: April 10, 1981

Valdas V. Adamkus,

Acting Regional Administrator.

40 CFR Part 60

[AD-FRL 1803-2]

Standards of Performance for New Stationary Sources; Asphalt Processing and Asphalt Roofing Manufacture

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; amendment and clarification.

SUMMARY: On November 18, 1980, "Standards of Performance for New Stationary Sources: Asphalt Processing and Asphalt Roofing Manufacture" were proposed in the **Federal Register** (45 FR

76404). During the public comment period, clarification was requested regarding the applicability of the standards to asphalt processing facilities that prepare blown asphalts used for nonroofing purposes. The amendments are being published to clarify the applicability of the proposed standards and to provide an opportunity for comments from processors of nonroofing asphalts who may be subject to the amended proposed standards.

This notice also pertains to the Amendment to the Priority List (45 FR 76427). It clarifies that asphalt processing refers to blowing stills and storage tanks for roofing and/or nonroofing asphalts that are located at asphalt processing plants, petroleum refineries, and asphalt roofing plants.

DATES: *Comments:* Comments on this amendment must be received by July 10, 1981.

PUBLIC HEARING: A public hearing will be held, if requested. Persons wishing to request a public hearing must contact EPA by June 9, 1981. If a hearing is requested, an announcement of the date and place will appear in a separate **Federal Register** notice.

ADDRESSES: *Comments:* Comments relating to this amendment only should be submitted (with one duplicate copy) to: Central Docket Section (A–130), Attention: Docket No. OAQPS A–79–39, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

Public Hearing. Persons wishing to request a public hearing on the amendment should notify Ms. Naomi Durkee, Emission Standards and Engineering Division (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone (919) 541–5631.

Background Information Document. The background information document (BID) for the proposed standards may be obtained from the U.S. EPA Library (MD–35), Research Triangle Park, North Carolina 27711, telephone (919) 541–2777. Please refer to "Asphalt Roofing Manufacturing Industry, Background Information for Proposed Standards," EPA–450/3–80–021a.

Docket. A docket, number OAQPS A–79–39, containing information used by EPA in development of the proposed standards, is available for public inspection between 8:00 a.m. and 4:00 p.m. Monday through Friday at EPA's Central Docket Section (A–130), West Tower Lobby, Gallery 1, Waterside Mall, 401 M Street, SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Ms. Susan R. Wyatt, Emission Standards and Engineering Division (MD–13), Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone (919) 541–5578.

SUPPLEMENTARY INFORMATION:

Amendments to Proposed Standards

"Standards of Performance for New Stationary Sources: Asphalt Processing and Asphalt Roofing Manufacture" were proposed in the November 18, 1980, **Federal Register** (45 FR 76404). These proposed standards limit particulate emissions from asphalt roofing facilities and from two asphalt processing facilities: blowing stills and storage tanks. The definition of asphalt processing in the proposed regulations referred to the storage and blowing of asphalt "for use in the manufacture of asphalt roofing products." Blowing stills were defined as equipment "in which air is blown through hot asphalt flux to produce different grades of asphalt for the manufacture of asphalt roofing." The asphalt storage tank was defined as a tank storing hot asphalt "for roofing manufacture or asphalt processing." When considered together, these definitions restrict the applicability of the proposed standards to equipment used to produce or store roofing asphalts.

Half of the blown asphalts currently being produced is used in the roofing industry.(*1–3*) The other half includes predominantly those asphalts used for paving but also includes asphalts used for pipe wrapping, pond liners, and mopping grade asphalts. EPA and industry growth projections indicated the necessity for three to seven stills and 21 to about 50 storage tanks respectively, by 1985 to supply the demand for roofing asphalts. However, the market for blown nonroofing asphalts is not expected to grow in the next five years.(*3*) Therefore, construction of new stills and storage tanks subject to the proposed standards of performance is expected to take place only to meet the demand for roofing asphalts.

Comments received after proposal have indicated that even though growth will occur only due to the increased demand for roofing asphalts, the applicability of the proposed standards should include blowing stills and storage tanks that process or store any type of asphalt. The same still and storage tank may be used for nonroofing as well as roofing asphalts. If the applicability of the standards depended on the eventual use of the product, a still or storage tank could be subject to the regulation on one day (while blowing or storing roofing asphalt) but not subject to the regulation on another day (while blowing or storing nonroofing asphalt). Even if the same still or storage tank were not used for more than one type of asphalt, there could be one unit devoted to roofing asphalts and subject to the regulation while another identical unit devoted to nonroofing asphalts would not be subject to the regulation. Furthermore, to meet the increased demand for roofing asphalt, a manufacturer could increase capacity by constructing new stills or storage tanks, but then limit the use of the new facilities to nonroofing asphalts while devoting a larger number of existing facilities to roofing asphalts.

The fluxes from which nonroofing blown asphalts are prepared may vary in physical characteristics, such as volatility, but such variation also exists with roofing asphalt fluxes. Industry supplied information on the range of volatility found among asphalt fluxes that are air blown. It was determined that the standard was achievable for all fluxes within this range as noted in the November 18, 1980 **Federal Register** notice (45 FR 76410). The size and operating parameters (such as temperature and residence time) of a control device required to achieve the emission limits for the highest volatility fluxes were determined, and costs were calculated accordingly. These costs have been determined to be reasonable for asphalt processing plants, petroleum refineries, and asphalt roofing plants, the same plants that could have blowing stills used for nonroofing blown asphalts. An asphalt storage tank containing asphalt to be used in roofing manufacture is no different from a storage tank containing asphalt that will be used for some other purpose. The number of new stills and storage tanks constructed in the asphalt processing and asphalt roofing industries remains the same as was projected in the proposed regulations since such construction will be due to growth in the asphalt roofing market. Therefore, the environmental, energy, and economic impacts of the proposed standards are not changed as a result of these amendments.

In summary, the same blowing stills and storage tanks are, or may be, used to process or store either nonroofing or roofing asphalts, and the emission limits remain achievable independent of the type of asphalt blown. The costs and the economic, energy, and environmental impacts projected in the November 18, 1980 **Federal Register** (45 FR 76404) apply to all asphalt blowing stills and storage tanks regardless of how the asphalts will be used. These costs and

impacts were determined to be reasonable. EPA has determined that the proposed emission limits for blowing stills and storage tanks used for roofing asphalts should apply to blowing stills and storage tanks for any type of asphalt except asphalt mixtures referred to as cutback and emulsified asphalts which are not included in this regulation. These proposed amendments would change the definitions of "asphalt processing," "asphalt storage tanks," and "blowing still" to include asphalts used for any purpose. The amendments would also add definitions for "asphalt processing plant" and "asphalt roofing plant" to be consistent with the proposed regulation. The regulation refers to the plants where process operations occur rather than to the processes themselves.

Because there may be some asphalt processing plants or petroleum refineries blowing and/or storing asphalts used for purposes other than roofing, which were not included in the proposed standards but which may be inlcuded in the amended proposed standards, the date used to determine if facilities at these locations are subject to the standards is the proposal date of this amendment rather than the proposal date of the standard. A paragraph has been added to the proposed standards to indicate this.

Minor amendments were made to the performance test procedures to clarify the duration of the tests when stills are being used to process nonroofing asphalts.

Clarification of the Amendment to the Priority List. The Priority List was amended (45 FR 76427) to add "asphalt processing" to the source category previously listed as "asphalt roofing." The amendment was necessary because the processing of asphalt for roofing manufacture takes place at petroleum refineries and asphalt processing plants as well as at roofing plants, and the process is essentially the same at any of the locations. Since "asphalt processing" has been added to the Priority List, no additional changes to the list or to the amendment are necessary; however, the new, broader definition of asphalt processing applies to the Priority List source category.

Applicability of Proposed Standards to Storage Tanks. During the public comment period that followed publication of the proposed standards in the **Federal Register** (45 FR 76404), several comments were received regarding the applicability of the proposed standards to asphalt storage tanks which may exist at petroleum refineries that do not process asphalt (i.e., that do not have blowing stills). These tanks are covered by the proposed standards. The revised definitions make this clearer. They also expand the applicability to include storage tanks that store asphalt to be used for any purpose, not only roofing products. Cutback asphalts (asphalts diluted with solvents to reduce viscosity so that asphalts can be used at lower temperatures) and emulsified asphalts (asphalts dispersed in water with an emulsifying agent) are not included in the proposed standards. If asphalt is stored at relatively low temperatures and tanks exhibit zero percent opacity without controls, they would meet the proposed standards. Otherwise, controls are available for meeting the proposed standards.

Environmental, Energy, and Economic Impacts. The environmental, energy, and economic impacts discussed in the November 18, 1980 **Federal Register** notice (45 FR 76404) for the proposed standards are not projected to change as a result of these amendments. These impacts were based on the construction of three to seven new stills and 21 to about 50 new storage tanks to meet the growth in the asphalt roofing market. Since there is no growth projected for the use of other blown asphalt products, the number of affected facilities remains the same. Changes to existing stills and storage tanks that would qualify as a modification or reconstruction would be very rare. Any increases in capacity would be met by the addition of a new unit or by replacing a small still or storage tank with a new, larger one. Stills and storage tanks used for nonroofing asphalt may be the same ones used for roofing asphalt or they may be additional units. Either way, they will be located at the same locations (asphalt processing plants, petroleum refineries, and asphalt roofing plants) and will require the same control devices. Since the economic impacts were based on conditions which are applicable to blowing or storing nonroofing asphalts as well as roofing asphalts, these impacts remain unchanged.

"Major Rule" Determination. Under Executive Order 12291, EPA is required to judge whether a regulation is a "major rule" and therefore subject to certain requirements of the Order. The Agency has determined that this regulation, both as proposed and as amended, would result in none of the adverse economic effects set forth in Section 1 of the Order as grounds for finding a regulation to be a "major rule." Fifth-year annualized costs of the proposed standard would be $450,000. The product wholesale price could increase about 0.5 percent, which could increase the price for a roof on a typical 3-bedroom house by about $3.00. If the costs were absorbed, the resulting drop in net profit after taxes could be about 0.4 percent. The Agency has also concluded that this rule is not "major" under either of the other criteria established in the Executive Order. The proposed amendment does not change the economic impacts of the standard. This regulation was submitted to the Office of Management and Budget for review as required by Executive Order 12291.

Regulatory Flexibility Analysis Certification. Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that the attached amendments to the proposed rule will not, if promulgated, have a significant economic impact on a substantial number of small entities. The amendments will not affect any small entities since additional stills and storage tanks used for nonroofing asphalts would not exist at these locations.

Dated: May 19, 1981.

Walter C. Barber,

Acting Administrator.

(3) Letter from V. P. Puzinauskas, the Asphalt Institute to R. C. Cooper, MRI. January 1981. Blown asphalt products. Docket No. A–79–39–IV–E–004.

It is proposed to amend 40 CFR Part 60 by amending §§ 60.470, 60.471, and 60.474 to read as follows.

1. Section 60.470 (a) and (b) is revised to read as follows:

§ 60.470 Applicability and designation of affected facilities.

(a) The affected facilities to which this subpart applies are saturators and mineral handling and storage facilities at asphalt roofing plants; and asphalt storage tanks and blowing stills at asphalt processing plants, petroleum refineries, and asphalt roofing plants.

(b) Any saturator or mineral handling and storage facility under paragraph (a) of this section that commences construction or modification on or after November 18, 1980, is subject to the requirements of this subpart. Any asphalt storage tank or blowing still located at an asphalt processing plant, petroleum refinery, or asphalt roofing plant that processes and/or stores

asphalt used for roofing only or for roofing and other purposes, and that commences construction or modification on or after November 18, 1980, is subject to the requirements of this subpart. Any asphalt storage tank or blowing still located at an asphalt processing plant, petroleum refinery, or asphalt roofing plant that processes and/or stores only nonroofing asphalts and that commences construction or modification on or after May 26, 1981 is subject to the requirements of this subpart.

* * * * *

2. Section 60.471 is revised by changing the definitions of "asphalt processing," "aspahlt storage tank," and "blowing still" and by adding the definitions of "asphalt processing plant" and "asphalt roofing plant":

§ 60.741 Definitions.

* * * * *

"Asphalt processing" means the storage and blowing of asphalt.

"Asphalt processing plant" means a plant which blows asphalt for use in the manufacture of asphalt products.

* * * * *

"Asphalt roofing plant" means a plant which produces asphalt roofing products (shingles, roll roofing, siding, or saturated felt).

"Asphalt storage tank" means any tank used to store asphalt at an asphalt roofing plant, a petroleum refinery, and an asphalt processing plant. Storage tanks containing cutback asphalts (asphalts diluted with solvents to reduce viscosity for low temperature applications) and emulsified asphalts (asphalts dispersed in water with an emulsifying agent) are not subject to this regulation.

"Blowing still" means the equipment in which air is blown through asphalt flux to produce different grades of asphalt.

* * * * *

3. Section 60.474 is amended by revising paragraphs (b) and (e) to read as follows:

§ 60.474 Test methods and procedures.

* * * * *

(b) For Method 26 the sampling time for each run on a saturator shall be at least 120 minutes, and the sampling volume shall be at least 3 dscm. Method 26 shall be used to measure the emissions from each saturator while the asphalt roofing plant is making 106.6-kg (125-lb) asphalt shingle if the final product is shingle or mineral-surfaced roll roofing or while the asphalt roofing plant is making 6.8-kg (15-lb) saturated felt if the final product is saturated felt or smooth-surfaced roll roofing. Method 26 shall be used to measure emissions from the blowing still for at least 90 minutes or for the duration of the coating blow, whichever is greater. If the blowing still is not used to blow coating asphalt, Method 26 shall be used to measure emissions from the blowing still for at least 90 minutes or for the duration of the blow, whichever is greater.

* * * * *

(e) The production rate of asphalt from the blowing still, P_s (Mg/h), shall be determined by dividing the weight of asphalt charged to the still by the time required for the performance test during a blow. The weight of asphalt charged to the still shall be determined at the starting temperature of the blow. The weight of asphalt shall be converted from the volume measurement as follows:

$M = Vd/c$

M = weight of asphalt in megagrams
V = volume of asphalt in cubic meters
d = density of asphalt in kilograms per cubic meter
c = conversion factor 1,000 kilograms per megagram

The density of asphalt at any measured temperature is calculated by using the following equation:

$d = 1056.1 - 0.6176 \times °C$

The method of measurement shall have an accuracy of ±10 percent.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Ch. I

[CC Docket No. 79-245; FCC 81-224]

American Telephone & Telegraph Co.; Manual and Procedures for the Allocation of Costs

AGENCY: Federal Communications Commission.

ACTION: Petitions for reconsideration, and a petition for reconsideration and clarification.

SUMMARY: The Commission adopted an Interim Cost Allocation Manual on December 19, 1980. The Manual was contained in a Report and Order in Docket 79-245, *In the Matter of American Telephone and Telegraph Co. Manual and Procedures for the Allocation of Costs* (Published January 22, 1981, 46 FR 6951). This Memorandum Opinion and Order grants in part and denies in part Petitions for Reconsideration, and a Petition for Reconsideration and Clarification of the Report and Order. Proposed changes to the Report and Order cost manual were for the most part accepted. Proposals to abandon the Report and Order cost manual were rejected because of a timetable established by the courts calling for prompt resolution of cost manual issues.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Bert Halprin, Policy and Program Planning Division, Common Carrier Bureau, Room 544, (202) 632-9342.

SUPPLEMENTARY INFORMATION:

Order on Reconsideration

Adopted: May 7, 1981.
Released: May 15, 1981.

In the matter of American Telephone and Telegraph Co., manual and procedures for the allocation of costs, CC Docket No. 79-245, 46 FR 15326; 3-5-81.

I. Summary

1. On January 6, 1981, we released a *Report and Order (AT&T Manual and Procedures for the Allocation of Costs,* 84 FCC 2d 384, adopted December 19, 1980) in which we adopted an Interim Cost Allocation Manual (ICAM) to be used by the American Telephone and Telegraph Company to allocate interstate revenues, investments and expenses to four designated reporting categories: MTS, WATS, Private Line and ENFIA. This action represented the first time this Commission has adopted a cost allocation manual. Although AT&T developed and used several cost manuals subsequent to the issuance of our Memorandum Opinion and Order in Docket 18128,[1] none of these manuals had been approved by the Commission. The interim manual was adopted after completion of Notice of Inquiry [2] and Notice of Proposed Rulemaking [3] proceedings.

2. Before us are *Petitions for Reconsideration* filed by the Independent Data Communications Manufacturers Association, Inc. (IDCMA), the Tele-Communications Association (TCA), and the American Telephone and Telegraph Company (AT&T). The American Broadcasting Companies, Inc., CBS Inc. and National Broadcasting Company, Inc. (collectively, the Networks), filed a

[1] AT&T Private Line rate Case, 16 FCC 2d 587, on reconsideration, 64 FCC 2d 971 (1977), on further reconsideration, 64 FCC 2d 1441 (1978).

[2] 73 FCC 2d 629, Notice of Inquiry.

[3] 78 FCC 2d 1296, Notice of Proposed Rulemaking Paragraphs 12-30 review the history of this proceeding.

Petition for Reconsideration and Clarification. An *Opposition* was filed by AT&T. Aeronautical Radio, Inc. (ARINC) filed a *Response to Petitions for Reconsideration.* The Ad Hoc Telecommunications Users Committee (Ad Hoc) filed *Comments on Petitions for Reconsideration. Reply* comments were filed by IDCMA, TCA and the Networks.[4]

3. Briefly, the interim manual sets forth procedures for the allocation of AT&T's interstate investment between message and private line in accordance with separations results. Further disaggregation between MTS and WATS interstate investment is based upon message minute miles (viz. messages × time × distance)—the factor used by separations to assign MTS and WATS costs to the interstate jurisdiction. A complete count of message minute miles is obtained from AT&T's Centralized Message Data System (CMDS) data base. The investment associated with ENFIA service—presently a far smaller category then MTS, WATS or Private Line—is obtained separately. Where expenses are specifically identifiable with a particular service or reporting category, they are assigned directly. Nonattributable expenses are assigned pursuant to the various allocations specified in the FCC–NARUC Jurisdictional Separations Manual and are, in general, to be allocated in the "reasonably proportionate manner" to the four reporting categories.

4. The interim manual does not assign costs to individual private line services, but rather to the private line category as a whole. The only specific instruction given AT&T in making further assignments of plant and investment to specific private line services for tariff purposes is that all allocations must be based upon fully distributed costs. Apart from this, AT&T is left with the discretion to choose a reasonable means of allocating costs. However, the *Report and Order* makes clear that the burden remains upon AT&T to fully justify its tariff rates and any underlying cost assignments in individual tariff proceedings.

5. Under the interim cost manual, each reporting category (except ENFIA, whose rates were set after negotiations) is required to earn the full interstate rate of return. Since private line services are aggregated into a single reporting category, there is no requirement that individual private line services within this category earn the interstate rate of return. The requirement is only that private line services do so as a whole.

[4] These pleadings are summarized in Appendix A.

6. The criticisms raised against the interim manual in the Petitions for Reconsideration are basically of two types. First, there are general objections on both legal and policy grounds to the adoption of the interim manual itself. These objections are essentially restatements of arguments raised by the parties in their earlier comments and fully considered by the Commission in issuing its Memorandum Opinion and Order. Upon Reconsideration, we affirm the essential validity of the interim cost manual for AT&T contained therein. Second, several rather modest changes, of a technical nature, are suggested which might be described as proposed "improvements" to the manual. We have agreed to adopt, in essence, the proposed changes for the allocation of switchboard investment and associated expense. We consider below, separately, both groups of contentions.

II. Contentions Previously Raised

7. In analyzing the general challenges raised by the parties as to the overall validity of the manual, we believe it would be helpful to first review the framework in which this proceeding arose. The Commission was obligated by an order of the Circuit Court of the District of Columbia (*MCI Telecommunications* v. *F.C.C.*, Case No. 79–1119, April 2, 1980) to promulgate a manual on an expedited schedule. There was no way to accomplish this except through the adoption of simplified procedures. As the *Report and Order* recites, the Commission has already spend years trying to implement Method 7 without success and it had become clear that this goal could not be accomplished in the near future. Acceptable, reliable, auditable data was simply not available, and could only be made available, if ever, over a period measured in years. Alternative approaches suggested by other parties likewise lacked the underlying data and allocative information necessary to their implementation in the short-run. Contrary to the contentions raised by TCA (Petition, pp. 9–10) and the Network Parties (Petition, p. 24), we continue to believe that the Commission was required to adopt an immediate cost allocation solution on an interim basis and that given this constraint, the interim cost manual adopted in our *Report and Order* which divides AT&T's revenues and costs into four aggregate categories was the best, or perhaps more correctly, the only alternative available to us.

8. TCA argues, however, that the compulsion of the Commission was not as great as believed: That the schedule adopted by the D.C. Circuit "did not bind the Commission to prescribing a cost allocation manual in December 1980"; that the "Commission could have sought an extension"; and, that "indeed (the Commission had) previously done so." (TCA Petition, p. 9). It is true that the Commission had sought, and the Court had granted, a brief extension of two months to December 1980 for the prescription of a cost manual. It is also true that perhaps a further short extension could have been obtained. This was not the problem here. There was no way that the Commission could guarantee the Court that verifiable Method 7 data sufficient for regulatory purposes could have been available within a few months. The theoretical difficulties plaguing Method 7 (which are described at length in our Notice of Proposed Rulemaking and Report and Order) and the vast amounts of data, as yet unavailable, required to implement this methodology made it self-evident that implementation, if at all possible, was a task which would take at least several years to complete. It would have been foolhardy to the point of irresponsibility for the Commission to have sought to try the Court's patience by requesting the extensive delay necessary to implement Method 7. Moreover, as inadvisable as such a request would have been in the first instance, it is even less acceptable for the Commission now to renounce the interim manual, to go back to the Court, to inform the Court that its schedule has not been met and to request a new schedule. Such a course would evince the kind of indecision and delay complained of by the Court in *MCI* v. *FCC*.

9. We would emphasize that in prescribing an interim manual, we have not discarded Method 7.[5] Nor have we enshrined Method 1.[6] The long-term solution as to the appropriate means of allocating AT&T costs has been left to further proceedings. We expect these proceedings to begin shortly and would like to reassure the parties (See IDCMA's Petition, pp. 6–7 and the Network Parties Petition p. 24) that the

[5] At the same time, we continue to adhere, of course, to our tentative views as to the difficulties—both theoretical and practical—of implementing Method 7. We would also note—and this was pointed out in the Report and Order (para. 16)—that Method 7 was not the central focus during much of the 18128 proceeding, that the "revised Method 7" methodology was left to working sessions to develop, and that it was never, in fact, promulgated.

[6] Although the interim cost manual is based upon relative use, it is not identical with Method 1. Indeed, it differs in several respects complained of by the parties. Thus, the interim manual does not attempt to allocate costs to all AT&T's private line services or to prescribe individual rates of return for these services.

search for long-term solution will be pressed with all the vigor and expedition that our available resources allow. A public notice calling for suggested topics for these proceedings was issued on February 23, 1981. Comments were received from a number of parties. We anticipate that these sessions will commence in the very near future. The interim manual is simply that: An interim arrangement pending the adoption of more refined allocative mechanisms which will be developed through future proceedings.

10. Again, we have not made any final decisions for the long term. The parties will have a full opportunity to argue the virtues of Method 1, Method 7, the "Hinchman proposal," the need to include FAFFG (facilities available for future growth) in any acceptable methodology, or any other allocative scheme in the further proceedings which will soon be commenced for that purpose.

11. The fact that we are unable to develop an "ideal" manual (assuming, as we do not, that this is theoretically possible) at this time does not condemn the Commission to total inaction. A perceived need to accomplish perfection, or to accomplish all goals or improvements at once, would become a prescription for regulatory paralysis making it impossible for us to meet our obligations under the statute generally, and in this specific case, the mandate of the Court of Appeals. We continue to believe as we stated in our Report and Order that the proposal for an interim manual must be judged by two standards. "First, it is an improvement over existing procedures and, second, it is superior to alternative proposals which can be implemented at this time." (para 8).

12. The Petitions for Reconsideration and subsequent pleadings filed herein contain descriptions of the history of this proceeding, the bases for the Commission's adoption of the interim manual, the Commission's intent in adopting an interim manual, etc. with which, in some instances, we do not agree and which, in some instances, we regard s less than fully accurate. No purpose would be served, however, by an attempt on our part to refute, correct, or embellish, upon each statement in the pleadings and we will focus instead upon what we perceive to be the major issues raised. It is to these issues that we now turn.

A. The Use of Separations Based Procedures

13. TCA and the Network Parties raise a number of objections to the interim manual's reliance on jusisdicational separations procedures (see TCA's petition, pp. 4–7; Network Petition, pp. 15–21). Arguments virtually identical to those raised here were considered and rejected by the Commission in a lengthy discussion in our Report and Order (see paras. 19–33). It would appear unnecessary to repeat the discussion in the Report and Order and would direct the parties to our earlier reasoning. We regard the discussion in our Report and Order as completely dispositive of all the various separations related challenges raised on reconsideration. We would, nevertheless, take this opportunity to reiterate, briefly, several points:

1. The purpose of a separations manual is to allocate to the interstate jurisdiction the total revenues, investment and expenses associated with that jurisdiction pursuant to jurisdictional separations procedures which can only be revised after an initial determination is made by a Joint Board composed of state and federal regulators. This assignment to interstate—regardless of whether it is considered fair or unfair, just or unjust, reasonable or unreasonable—must be the starting point for a manual. The whole purpose of the kind of cost allocation procedure we are dealing with here is to further subdivide the amounts already assigned interstate by jurisdictional separations since the sum of the parts (e.g., the amounts assigned to individual interstate servicces) must equal the whole (e.g., the total amount assigned by separations to the interstate jurisdiction) reliance upon jurisdictional separations is unavoidable. Any manual allocating costs or revenues to different interstate services must begin with jusisdictional separations. And this is true regardless of whether we are using Method 7, Method 1, the interim manual, or any other method. all service allocation procedures must begin with jurisdictional separations.

2. The only further use of jurisdictional separations in the interim manual is to make the split between private line and message services. We recognized in our Report and Order that, in all likelihood, the use of jurisdictional separations results in an overassignment of cost to MTS and under assignment to Privat Line. Nevertheless, since the interim manual increased the assignment of costs to private line, we believed we were moving in the right direction and that the results were acceptable for an interim period until more refined costs allocation techniques could be made available.

3. Any cost allocation scheme will have to be implemented by AT&T, and will, as a consequence, give AT&T some flexibility in the implementation process. In our view, this result cannot be completely avoided. We would also agree that it is important to seek to improve jurisdictional separations to make results easier to audit and to give careful scrutiny to AT&T's allocations. This need for improvement—which would almost certainly be inherent in any cost allocation scheme—does not of course, invalidate the procedures we have adopted.

14. Moreover, as we have already noted, the need to adopt a short-run solution left us with no real choice here. The use of jurisdictional separations to allocate cost between the message services and private line was the best alternative available. As we stated in our Report and Order (para. 28):

> While parties continue to attack the validity of the division between private line and message services made by separations, they have not demonstrated, or indeed attempted to demonstrate, that a superior alternative exists at this time. AT&T, which had earlier urged the continuation of its FDC 7 approach, with improvements, has indicated that the Notice "provides a basic framework with which (AT&T) can work to arrive at a cost allocation solution for the present." No other party has suggested how any system other than separations will produce, e.g., a 1980 central submission that is more understandable, more auditable and less subject to management discretion, than does the interim manual.

B. The use of Aggregated Reporting Categories

15. TCA and the network parties argue that the interim cost manual is defective in that it does not prescribe the assignment of costs to all private line services (TCA petition, pp. 11–13; network petition, pp. 20–23). Here again, this matter was discussed fully in our Report and Order (paras. 34–45) and, here again, we will rely upon our earlier discussion as dispositive except for a few brief remarks.

16. The Network Parties argue (Petition, p. 23) that if jurisdictional separations results are used—

> • • • Then AT&T should appropriately calculate the revenues and costs of the program transmission services as a threshold matter. These costs and revenues should be directly attributed to, and separately reported in, the private line aggregate category, and uniquely traceable throughout the ratemaking process in determining the rates for these services.

The costs and revenues attributable to program transmission services are not separately reported or broken out from other private line information for jurisdictional separations purposes. Consequently, we have no better way of reviewing AT&T's computation of these costs than would be the case for other private line services. We are also uncertain that the kind of breakdown that would result from an allocation of private line costs and revenues among interstate services directly from jurisdictional separations would be equitable or yield just and reasonable rates. The Network Parties are free, however, to raise this suggestion at the tariff implementation stage and to insist

that AT&T show program transmission costs obtained through computations based directly on jurisdictional separations. We would consider the merits of such a request at that time.

17. The reason for our failure to assign costs to individual private line services is quite simple. We do not *at this time* have any accurate means of assigning private line costs to individual private line services. We therefore had no choice in prescribing an interim manual for the immediate future, but to go ahead without assigning costs to specific private line services and to leave this step for further proceedings. We noted in our Report and Order (para. 34) that—

> Because we continue to believe that no proposal is before us which will properly, or even adequately, allocate cost to individual services or service elements we are declining to issue a prescription on how to achieve that end at this time.

18. As we have already stated, we will make a concerted effort to develop means of assigning cost to individual private line services and meetings have already been scheduled which seek to accomplish this result.

19. Further, because we have no way of assigning cost to individual private line services, we believe that it would be of little use to require that each private line service earn precisely the interstate rate of return. We had no effective means of enforcing such a constraint even if it were deemed to be desirable. Rather, we thought that under the circumstances the better course was to leave the situation fluid and to determine the justness and reasonableness of individual private line rates in the context of individual tariff filings. With the development of better cost information it is possible that we will review this matter and decide that it is necessary that each private line service earns the precise rate of return. However, we must leave this for the future. Moreover, we continue to believe that the development of a simplified, "building block" private line tariff—a goal we are pursuing in the Private Line Rate Structure Proceeding, CC Docket No. 79–246—is an important and, perhaps, necessary precondition to prescribing a reasonable and auditable methodology for allocating costs to individual private line services.

III. Specific Proposals for Modification

20. We now turn to consideration of the TCA and AT&T request that changes be made to specific proposals for modification of the ICAM contained in the Petitions the ICAM regarding the allocation procedures for switchboard investment and related expenses, and "other" investment.[7] AT&T correctly explains (*Petition for Reconsideration*, p. 4) that it has not previously had the opportunity to comment on the appropriateness of the Commission's prescribed methods since they were presented for the first time in the *Report and Order*.

21. Although AT&T recognizes that WATS users must share in the responsibility for these costs to a greater extent than was the case under prior cost allocation methodologies, it maintains in effect that the method selected by the Commission does not recognize that switchboard investment and expense can be broken into three categories with each category allocated on an appropriate basis. TCA points out that the ICAM methods for allocating switchboard costs to MTS and WATS incorrectly assumes that WATS customers make person-to-person, collect, conference, credit card and third number-billing calls (TCA Petition for Reconsideration, p. 13).

22. AT&T presents a method for allocating these costs which is based on jurisdictional separations procedures data and on routine reports filed with the Commission (Petition for Reconsideration, pp. 6–14). We view their proposal as representing an improvement which is comprehensive in scope and consistent with the ICAM approach of relying on JSP results, including direct assignment of costs wherever appropriate (*Report and Order*, para. 5). Thus we are persuaded to adopt their proposal for allocating these costs, as explained below.[8]

23. Long Lines switchboard investment (with the exception of switchboard investment used for and assigned to private line services) will be directly assigned to the MTS reporting category, as recommended by AT&T. Bell Operating Company switchboard investment will be developed for three categories: (1) "Single-purpose" switchboards (e.g., switchboards used to provide 800 Service information or international MTS service); (2) switchboards used to complete billed messages (revenue producing switchboards); and (3) switchboards used to service non-billed messages (network service switchboards). Investment amounts for each of these categories will be developed through use of JSP data. Single purpose switchboard investment amounts will be directly assigned to the appropriate reporting category. Investment amounts in revenue producing switchboards will be allocated to MTS and WATS based on the relative number of MTS and WATS messages served by such switchboards (i.e., operator assisted or completed). Investment amounts in network service switchboards will be allocated to reporting categories on the basis of the relative number of total MTS and Outwards WATS messages.

24. We view these modifications as being appropriate for the following reasons. First, "single-purpose" switchboards are in fact used exclusively either by WATS or MTS and that JSP data can directly identify these investment amounts by reporting category. Second, rates for billed messages such as person-to-person calls are compensatory (or will be in the near future) on a fully distributed cost basis with all revenues generated by such calls going directly to the appropriate category. Third, AT&T will separately identify investment amounts associated with billed and non-billed messages for switchboards which handle both types of messages (derived on the basis of traffic units).

25. Traffic operator expenses will be separately identified for Long Lines and Bell Operating Companies. Long Lines message switchboard services are provided exclusively for MTS International service. Therefore traffic operator expenses for these switchboards will be assigned to MTS. For the Bell Operating Companies, traffic operator expenses will be identified (using JSP data) and directly assigned to reporting categories where possible. The remaining traffic operator expenses will be broken down into either expenses incurred in connection with serving non-billed messages (e.g. rate and route, information, intercept and miscellaneous services) or expenses incurred to served billed messages. Traffic operator work units will be used to make this identification. Expenses associated with billed messages will be allocated to MTS and WATS based on the relative number of MTS and WATS messages served by such switchboards. Expenses associated with non-billed messages will be allocated to MTS, WATS and ENFIA based on the relative number of total MTS, Outward WATS and ENFIA messages.

26. The provisions of the General Services and Licenses subsection of the ICAM that allocate expenses related to operator services will be changed to

---

[7] The investments and reserves in the "other" category are: Land and Buildings; Furniture and Office Equipment; Vehicles and Other Work Equipment; Telephone Plant Under Construction; Property Held for Future Telephone Use; Material and Supplies; Customer Deposits; Organization, Franchize and Patent Rights; Depreciation Reserve and Accumulated Deferred Income Tax Reserve; Amortization Reserve; and Cash Working Capital.

[8] AT&T may incorporate these changes into its upcoming Central Submission if time permits.

conform with the above approach for allocating the costs of switchboard services. Expenses in these subsections will be allocated on the basis of switchboard plant in service derived as explained above.

27. AT&T and TCA also petition the Commission to reverse the method adopted in the ICAM for allocating "other" investments and reserves between the MTS and WATS reporting categories. This investment was allocated by a composite ratio based on combined allocations of Account 100.1 interexchange, exchange and switching equipment investments and international satellite earth stations. AT&T claims that JSP data can be used to achieve a more detailed and cost related allocation of this investment to MTS and WATS. Furthermore, AT&T argues that many of the investment items in this category are more casually related to expense allocations than to the major plant category investment allocations.

28. In our *Report and Order* (para. 64), we explained that while many of the allocation factors suggested by AT&T in Appendix B of its Comments to the Notice of Proposed Rulemaking did not appear intrinsically unreasonable, we preferred to adopt a different approach. To elaborate on this, it is our view that the subject accounts can be characterized as an investment overhead, unlike plant used directly to provide service (e.g., switchboards). As such, attempting to apply refined techniques seems to imply a degree of causation which does not appear to exist, especially when the proposed allocators are themselves several steps removed from the direct provision of service (e.g., "related function, by space category"). Use of the composite ratio allows these overhead investment amounts to be added proportionately as a "mark-up" to the directly assigned investment amounts. In addition the composite ratio introduced in the Report and Order incorporates all of the allocation factors used to develop investment for MTS and WATS (i.e., SLU, DEM, MMM, switched MM and International Satellite Rent Expense). Thus, the composite ratio reflects relative use throughout the public switched network, improving the quality of the allocation results.

29. We note that with the exception of Land and Buildings, and Furniture and Office Equipment, the allocation basis AT&T recommends be used for "other" investment and reserve accounts is generally either total Account 100.1 or Account 100.1 by corresponding plant class. Thus in order for use of the composite ratio to have caused the transfer of about $145 million (see AT&T *Petition for Reconsideration*, p. 15), the allocation factors chosen by AT&T for Land and Buildings, and Furniture and Office Equipment must have been heavily weighted towards allocating plant to MTS. This is due to the fact that the composite ratio itself allocates "other" investment and reserve amounts primarily on the basis of Account 100.1. The inclusion of International Earth Stations, however, causes a slightly higher proportion of investment to be allocated to MTS. We believe that utilizing a composite ratio representing plant used directly to provide common carrier service is a preferable method of determining the allocation of "overhead" investment. Therefore, we will continue to require use of the composite ratio at this time.[9]

IV. Conclusion

30. This proceeding was instituted for the purpose of adopting cost allocation rules for AT&T's interstate investment, expenses and revenues. After issuing a Notice of Inquiry and a Notice of Proposed Rulemaking, we concluded that a fully distributed cost standard was preferred over a marginal cost standard, consistent with our finding in Docket 18128, but that changing circumstances in the telecommunications industry required substitution of a relative use approach for a historical cost causation approach. Also important was the recognition that extensive, inflexible costing rules would not work in an industry characterized by emerging competition and rapidly changing services and technology. In this context, the ICAM was offered as a pragmatic response to problems which required prompt resolutions.

31. Another important factor which led to the development and adoption of the ICAM was a judicial mandate which required timely resolution of this proceeding. We therefore made limited use of immediately available data from the Jurisdictional Separations Process to aid in making cost allocations to four reporting categories. Because the Jurisdictional Separations Process is used by and subject to outside scrutiny by several parties with differing interests, we viewed the data resulting from that process, if used only for an interim period, to have a higher degree of reliability than data produced by AT&T's FDC Method 7 Special Studies. Recognizing, however, that JSP data are nonetheless subject to criticism, that conceptually superior cost allocation methods may be available, and that an extended investigation may produce such methods, we have remained committed to establishing a proceeding to explore and possibly adopt a long-term solution to cost allocation problems.

32. TCA and the Networks have requested that we immediately abandon the ICAM and renew efforts to develop a workable FDC Method 7 approach. This request is made in spite of our extensive discussion in both the Notice of Proposed Rulemaking and the Report and Order on the difficulties with that approach. Any effort to correct the deficiencies of FDC Method 7 would require a period of time of perhaps up to a year, during which all current and future AT&T tariff filings would either be held in abeyance, or automatically become effective without a Commission ruling on their lawfulness. Such a result is clearly not in the public interest. We prefer to examine such contentions in the context of the long-term phase of this docket, which will be initiated in the near future.

33. Accordingly, it is ordered, that the Petitions for Reconsideration and Petitions for Reconsideration and Clarification are granted in part to the extent indicated herein and othewise denied.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix A—Summary of Comments

AT&T

AT&T considers the ICAM to provide a reasonable framework within which it can work in the near term. It recommends changes in two areas, however. First, AT&T recommends changes in the allocation of Bell Operating Company and Long Lines switchboard investments and related traffic operator expenses and General Services and Licenses expenses. Second, AT&T recommends an alternative to use of a "composite ratio" to allocate message "other" investments and reserves between the MTS and WATS reporting categories. These changes, according to AT&T, would provide for a more direct allocation of costs to MTS and WATS.

In its Opposition to Petitions for Reconsideration, AT&T states that with the exception of an issue raised by TCA, the petitions filed by other parties raised no substantive issues, facts or arguments which had not been previously raised by the parties in this and other proceedings, and fully considered and disposed of by the

[9] Appendix B to this Memorandum Opinion and Order is an updated version of the Interim Cost Allocation Manual. Revisions have been made which incorporate the change discussed herein. In addition, miscellaneous editorial changes have been made, primarily to the Expenses and Income section. We have modified the term "attributable" to mean the sum of allocated and directly assigned expenses by reporting category.

Commission. The one issue raised by TCA concerned the provisions of the ICAM governing the allocation of switchboard investments and traffic expenses, and the use of a "composite ratio" to allocate message "other" investments and reserves between the MTS and WATS reporting categories. TCA supported AT&T's position on this issue.

IDCMA

IDCMA emphasizes that the Commission should not lose sight of cost allocation problems which the ICAM was not designed to resolve. Specifically, IDCMA is concerned that the ICAM does not allocate costs within reporting categories, and thereby cannot be used to detect possible cross-subsidization among private line services. IDCMA claims that the cost manual must permit the ascertainment of costs to the rate element level in order to assure that rates are cost-based. Furthermore, it requests that the Commission reaffirm its commitment to address there issues by issuing a Supplemental Notice of Proposed Rulemaking immediately.

With respect to the rate of return which the Commission should allow individual services offered by AT&T to earn, IDCMA takes the view that competitive services should earn a higher rate of retrun than the return for the basic services for which substitutes do not readily exist. At a minimum, IDCMA would have the Commission require that the rate of return for any competitive service offered by AT&T be at least as high as the return level earned on its non-competitive services.

IDCMA requests that the Commission address the inadequacies of AT&T's data bases when it addresses the proper long term cost allocation procedures to be used by AT&T.

In its Reply filing, IDCMA criticizes arguments contained in AT&T's Opposition. With respect to the argument that no viable or easily implementable manual exists which would assign costs to the rate element level, IDCMA counters that AT&T has overlooked the manual adopted by the Administrative Law Judge in Docket No. 20814, and the proposal by Walter Hinchman Associates. Concerning AT&T's claim that the Commission will rely upon other regulatory approaches (in addition to the ICAM) to fulfull its statutory responsibilities, IDCMA argues that the alternative approaches are predicated upon establishment of effective cost allocation principles.

IDCMA restates its request that the Commission establish a proceeding to address long term cost allocation procedures and that it require any "competitive" service offered by AT&T to be at least as high as the return level earned on its non-competitive services.

TCA

TCA urges the Commission to modify its Report and Order based on the following points: (1) Terminate the use of Separations and Settlements procedures for the allocation of AT&T's costs among its various services; (2) prescribe cost allocation procedures to govern the allocation of AT&T's costs to rate elements and individual private line services; (3) require each private line service not to earn in excess of AT&T's system-wide authorized rate of return; and (4) revise the methodology for allocating switchboard and operator associated investment and expenses and all Account 100.1 investment and reserve accounts other than exchange, interexchange, international satellite and switching telephone plant among MTS and WATS.

In its Reply to AT&T's Opposition, TCA states that the three matters it raised in its Petition for Reconsideration which AT&T opposed were incorrectly characterized by AT&T as issues previously considered and disposed of by the Commission. TCA claims those issues pinpointed deficiencies in the reasoning and factual bases set forth in the Report and Order.

TCA points out that the Commission has an obligation to review in a public proceeding AT&T's implementation of the Separations Manual before relying on AT&T's procedures for rate regulation purposes. According to TCA, the serious deficiencies of the ICAM, which AT&T attempts to excuse by pointing out that the ICAM is only a temporary measure, are not sanctioned by Sections 201 and 205 of the Communications Act. TCA renews its request that the Commission correct the errors set forth in TCA's Petition for Reconsideration.

The Networks

The Networks assert that FDC Method 7 is the only cost methodology which has been determined to meet the Commission's statutory mandate under the Communications Act. Rather than abandon FDC Method 7, the Networks advise the Commission to expend its efforts expeditiously to formulate workable FDC Method 7 implementation procedures.

The Networks consider a cost allocation methodology which is based on jurisdictional separations principles to be arbitrary and unfair because, according to them, it assigns burdensome and unrelated costs to the program transmission services categories. The Networks claim that a separations-based cost allocation methodology does not properly account for actual use of facilities nor does it appropriately account for growth plant. In addition, the Networks argue that the cost manual contained in the Report and Order would give AT&T too much discretion to shift costs among services vis a vis FDC Method 7. They maintain further that the ICAM will deny parties and the staff the ability to review meaningfully the tariff support material provided by AT&T.

In the event the Commission decides to continue using a separations type methodology in allocating costs to the private line services category, the Networks request that the cost alloction manual be clarified. According to the Networks, the manual must include sufficient detail to assure that AT&T follows the assignment concepts described in the February, 1971 NARUC–FCC Separations Manual. They claim this detail is necessary to assure that the Cost Allocations Manual appropriately makes provision for the allocation, on a direct assignment basis, of costs to and revenues from the program transmission services categories.

Finally, the Networks urge the Commission to act expeditiously to prescribe a permanent manual.

In its Reply to AT&T's Opposition, the Networks points out that AT&T does not attempt to refute its position that program transmission services should not bear any of the subsidy that is used to support exchange service because the program transmission services do not share in the use of common exchange plant.

The Networks claim that AT&T is incorrect in claiming that it will be held accountable for its allocation of costs, and thus for rates, under the ICAM. As evidence, the Networks point to AT&T's recent proposal to raise private line rates which, according to the Networks, lacks documentation on the allocation of costs and revenues to individual services or rate elements. AT&T is also incorrect, the Networks claim, in suggesting that the Commission explained its reasoning for rejecting the concept of FAFFG in the Report and Order.

The Networks oppose the explanation that rates developed in conjunction with the ICAM can be acceptable because they are only temporary. Nor do they agree with the contention that the ICAM will bring "certainty" to the cost allocation process. Finally, the Networks oppose the argument that the ICAM represents the only manual that can be implemented now. The Networks explain that the other manuals, such as the one recommended by the Administrative Law Judge in Docket 20814, could be implemented (with "minor" modification).

Ad Hoc

In its Comments on Petitions for Reconsideration, Ad Hoc claims that the ICAM will not be auditable, will not further the Commission's objectives established in Docket 18128, and will not represent an improvement over existing cost manuals used by AT&T.

Ad Hoc believes the ICAM to be a "dramatic" reversal of the Commission's "commitment" to historical cost causation as the primary allocative principle controlling AT&T cost allocations. Problem areas, according to Ad Hoc, are AT&T's administration of the Separations procedures which gives rise to discretion and flexibility leading to inauditability, and the lack of standards in the Report and Order for controlling AT&T's assignment of costs to individual private line services and rate elements.

ARINC

Aeronautical Radio, Inc., in its Response to Petitions for Reconsideration, supports those petitioners who request that the Commission reconsider its choice of utilizing jurisdictional separations procedures for interstate retemaking purpose. ARINC would prefer a cost manual based on FDC Method 7 procedures.

Appendix II—Cost Allocation Manual

This manual contains general instructions for allocating the annual investment and expense costs to the following reporting categories for AT&T.

Exchange Network Facilities for Interstate Access (ENFIA)
Private Line

Message Telecommunications Service (MTS) Outward WATS and 800 Service (collectively, WATS)

For each of the reporting categories, an earnings ratio will be developed according to this formula:

Earnings Ratio =

$$\frac{\text{Revenues minus (expenses and taxes)}}{\text{Gross investment minus reserves}}$$

These earnings ratios, plus supporting documents, will be filed with the Commission during June following the reporting year ("central submission"). These earnings ratios will be subject to final interpretation by the Commission.

The process for making changes to this manual shall be determined by the Chief, Common Carrier Bureau. Minor changes (such as changes in account names) may be made providing these changes are approved by the Chief, Common Carrier Bureau prior to filing of the central submission. Substantive changes, which may be requested by any party, will require appropriate procedures.

I. Investments and Reserves

Instructions in this section are to be used to allocate interstate investments and reserves to the reporting categories.

A. *Bell Operating Companies (BOCs).* The final output of the Jurisdictional Separations Process (JSP) will be used as the definition of total BOC interstate private line investment and reserves and total BOC interstate message investment and reserves.[1] Investment and reserve amounts for ENFIA and other facilities provided to OCCs are derived from JSP data. Message investment will be grouped into exchange, interexchange and "other" categories, and allocated to MTS and WATS according to instructions described below. Those portions of exchange and interexchange investment associated with the switching function (Toll Dial Switching, Switchboards and Local Dial Switching) will be allocated separately as described below.

B. *Long Lines Department.* Using JSP principles, and Long Lines accounting records, investment and reserves for the Long Lines Department will be divided between private line and message categories. Message investments will be grouped into exchange, interexchange and "other" categories, to be used in further allocation to MTS and WATS. As with BOC investment, exchange and interexchange investment associated with the switching function will be allocated separately as described below.

C. *Reporting Categories. ENFIA.*—This category will include investments and reserves for ENFIA (rate elements 2 and 3). Investments and reserves are developed at this time from JSP data. Further delineation of service categories to be included in this reporting category (to be called Exchange Access in the future), and of the definition of investment used for exchange access, will result from CC Docket No. 78–72.

Private Line

Private Line investments and reserves from the BOCs and Long Lines Department are to be added together to establish total private line investment and reserve amounts.

MTS and WATS

Investment and reserve amounts for the BOC and Long Lines message category, as developed above, will be added together and then allocated to MTS and WATS. Message telephone plant (defined here as Account 100.1 less private line investment, land, buildings, furniture and office equipment, and vehicles and other work equipment) will be identified as either exchange or interexchange. Toll Dial Switching, Switchboard and Local Dial Switching investment associated with exchange and interexchange will also be separately identified. Exchange plant amounts will be allocated to MTS and WATS on the basis of relative subscriber line minutes of use.[2] Interexchange plant amounts will be allocated between MTS and WATS based on network message minute miles. Toll Dial Switching investment will be allocated on the basis of switched message-minutes. The determination of investment in the various switchboard types will be based on JSP data. Investment in Long Lines message switchboards will be directly assigned to the MTS reporting category. BOC investment in switchboards used exclusively to provide 800 Service information will be assigned to the WATS category. BOC network service switchboards (rate and route, information, intercept and miscellaneous) will be allocated between the MTS and WATS reporting categories based on the relative number of total MTS and Outward WATS messages. Investment in other BOC switchboards (revenue producing) will be determined on the basis of whether billed or non-billed messages are being served, using traffic unit data. Investment serving billed messages will be allocated between MTS and WATS based on the relative number of MTS and WATS messages served by such investment. Investment serving non-billed messages will be allocated based on the relative number of total MTS and Outward WATS messages. Local Dial Switching investment will be allocated on the basis of dial equipment minutes. International satellite associated earth station investment (Account 100.5) and its associated depreciation and amortization account (Account 175) will be allocated on the basis of international satellite rents.

Exchange, interexchange, international satellite and switching telephone plant developed separately for MTS and WATS will be added together to form total message telephone plant amounts for MTS and WATS. The percentage which MTS and WATS telephone plant each makes of total message telephone plant (as defined above) will be used as a distributive ratio to allocate all remaining investment ("other") and reserve accounts between MTS and WATS.[3]

II. Expenses and Income—Description of FDC Methodologies

Procedures in this section are to be used to distribute all interstate expenses (600 series accounts) and income to the reporting categories. Expenses are directly assigned where applicable or allocated on the basis of the procedures described below. Certain accounts are allocated on the basis of "total attributable expenses," which represents the ratio of expenses by reporting category (total reporting category expenses derived through direct assignment and allocation procedures) to total assigned and allocated expenses.

Expenses and Revenues—FDC Methods

Operating expense accounts	Allocation procedures
602.1–602.8 Repairs of Outside Plant (OSP).	Allocate to reporting categories based on associated OSP in service (Accounts 214 through 244). Allocate maintenance of overseas facilities to reporting categories based on the number of associated circuits in service.
603–01 Subscriber Line Testing.	Subdivides into 3 parts (Station, OSP, and COE) in proportion to troubles found. (1) Allocate the station portion to reporting categories in proportion to station repair expense (See 605–01). (2) Allocate the OSP portion to reporting categories based on exchange OSP investment. (3) Allocate the COE portion to reporting categories based on the exchange COE investment.
603–02 Service Order Testing.	Allocate to the public switched network (PSN) and private line reporting categories in proportion to service order activity subsequent to the initial installation. Then allocate the total amount for PSN services to the PSN reporting categories based on the distribution of exchange outside plant and exchange central office equipment investment.
603–04 Trunk Testing ...	Allocate circuit testing to reporting categories using an analysis of reported testing hours. Overseas testing allocated to reporting categories based on number of circuits in service. Allocate facilities testing to reporting categories based on associated interexchange (IX) plant in service.
604 COE Repairs	Directly assign the Long Lines Service Engineering portions of Account 604 to the private line reporting category. Directly assign #4ESS international generic program costs to MTS.

[1] The primary source for this information is currently provided by AT&T's Interstate Settlement Information System (ISIS) report. JSP results are adjusted for changes required in Docket 19129 Phase II. Additional adjustments are currently made (but subject to final determination by the Joint Board) for facilities provided to Other Common Carriers under contractual agreement and for facilities used to provide ENFIA.

[2] In developing the count of minutes of use for the allocation of exchange "non-traffic sensitive" plant, both the interstate originating and terminating WATS minutes of use shall be counted. The usage measures specified herein (SLU, MMM, MM, DEM) are based on total day volumes.

[3] Included in this remaining investment and reserves portions are the following accounts: Land and Buildings; Furniture and Office Equipment; Vehicles and Other Work Equipment; Telephone Plant under Construction; Property Held For Future Telephone Use; Materials and Supplies; Customer Deposits; Organization, Franchise and Patent Rights; Depreciation Reserve and Accumulated Deferred Income Tax Reserve; Amortization Reserve; Earth Station Depreciation and Amortization Reserve; and, Cash Working Capital.

Expenses and Revenues—FDC Methods—Continued

Operating expense accounts	Allocation procedures
	Allocate the circuit rearrangements and change portions of Account 604-07 and Account 604-08 (less Long Lines Service Engineering) to reporting categories based on number of IX circuit sections.
	Allocate overseas facility terminal equipment maintenance to reporting categories based on associated number of circuits.
	Allocate the remainder of Account 604 to reporting categories based on associated COE plant in service.
605 Station Equipment Maintenance.	Allocate Associated Company Account 605 to reporting categories based on the station equipment plant in service. Allocate Long Lines Account 605 to reporting categories based on Long Lines station equipment plant in service (Account 231, 232, and 234).
606 Buildings and Grounds.	Allocate to reporting categories based on investment in buildings (less general office and garage and storeroom space).
610 Maintaining Transmission Power.	Allocate to reporting categories based on COE plant (Account 221) separately for domestic and overseas.
612 Other Maintenance..	Allocate to reporting categories based on combined Accounts 602 through 606 and 610.
608 Depreciation.....	Allocate to reporting categories based on the depreciable classes of plant in service using composite Associated Company and Long Lines depreciation rates. (Ocean cable depreciation is allocated separately based on the ocean plant in service in each category).
609 Extraordinary Retirements.	Allocate to reporting categories based on special analysis of accounting records.
613 Amortization of Intangible Property.	Allocate to reporting categories based on total attributable expenses.
614 Amortization of Plant Acquisition Adjustments.	Directly assign to reporting categories based on special analyses of accounting records.
NOTE.—Accounts 621 through 633 are treated separately for the Associated Companies and Long Lines; except accounts allocated based on investment.	
621-01 General Traffic Supervision (Except Accounts 621-311 and 316).	Allocate to reporting categories based on Account 624 less 624-22 and 624-25.
621-311/316/05, 622-02/03, 624-25/629-08, 631-38 and 631-48 Business Services.	Allocate to reporting categories using data from a Business Service time reporting system.
621-03, 624-22, 629-07, 631-37/47 Network Administration.	Allocate Accounts 621-431, 624-222, 624-422 and 624-622 (switching and line and number administration) to reporting categories based on toll dial switching equipment plant in service.
	Allocate Accounts 621-331 and 624-322 (traffic loan data administration) to reporting categories based on toll dial switching and switched services IX central office equipment and OSP plant in service, excluding dedicated overseas IX central office equipment and outside plant.
	Allocate Accounts 624-722 (Trunk Administration) to reporting categories based on switched services IX central office equipment plant and OSP plant in service, *excluding* dedicated overseas IX central office equipment and outside plant.
	Allocate Accounts 621-231 (network administration staff) to reporting categories based on the combined attribution of Accounts 624-222, -622 and-722.
	Allocate the remainder (training and other staff) of Account 621-03 based on the combined attribution of Accounts 621-231, -331 and -431.
	Allocate the remainder (supervision, training and other) of Accounts 624-22, 629-07, 631-37 and 631-47 based on the combined attribution of Accounts 624-222, -322, -422, -622 and -722.
622-01 Service Observing.	Allocate to reporting categories based on Account 624 less 624-22, and 624-25.
624 (Except Accounts 624-22 and 624-25) Operators Wages less Network Administration and Business Services.	Directly assign Long Lines expenses to Private Line and MTS. Determine BOC expenses by switchboard type based on JSP traffic unit data. Directly assign expenses incurred at 800 Service Switchboards to WATS. Allocate expenses incurred at network service switchboards (rate and route information, intercept and miscellaneous) to MTS, WATS and ENFIA based on the relative number of MTS, outward WATS and ENFIA messages. Determine expenses incurred at other switchboards associated with billed messages on the basis of traffic units. Allocate expenses associated with billed messages based on the relative number of MTS and WATS messages served by such switchboards. Allocate expenses allocated with non-billed messages based on the relative number of total MTS and Outward WATS messages.
626 Rest and Lunch Rooms.	Allocate to reporting categories based on Account 624 less 624-22, and 624-25. (Network Administration and Business Service portions of these accounts are treated above).
627 Operator's Employment and Training.	Same as Account 626.
629 less -07 and -08 Co Stationery and Printing.	Same as Account 626
630 Co House Service ...	Same as Account 626.
631 less -37, -38, -47, and -48 Miscellaneous Co Expenses.	Same as Account 626
632 Public Telephone Expenses.	Allocate Associated Company expenses to reporting categories based on traffic units.
633 Other.....	Same as Account 626.
640 General Commercial Administration.	Allocate Associated Company expenses to reporting categories based on Associated Company Account 645.
	Directly assign Long Lines Produce Management expense to reporting categories. Allocate remainder of Long Lines Account 640 to service categories based on Long Lines Account 643.
642 Advertising.....	Directly assign Residence Sales, Long Distance Residence Sales and Long Distance Business Sales to MTS. Allocate Business Sales and the remainder based on total attributable expenses.
643 Sales.....	Allocate to reporting categories using the results from a sales time reporting system.
644 Connecting Company Relations.	Allocate to reporting categories based on allocation of Independent Company Settlements.
645 Local Commercial Operations.	Directly assign Associated Company coin telephone collection (645-181/381) to MTS.
	Allocate remainder of Associated Company expenses to reporting categories using results of an analysis of commercial work measurement plan.
	Allocate Long Lines expenses to reporting categories using results from a sales time reporting system.
648 Public Telephone Commission.	Directly assign to MTS.
649 Directory.....	Allocate to MTS, WATS, and ENFIA based on a count of MTS, Outward WATS, and ENFIA messages.
650 Other Commercial Expenses.	Allocate Associated Company expenses to reporting categories based on Associated Company Account 645.
	Allocate Long Lines expenses based on Long Lines Account 643.
661 Executive Department.	Allocate based on total attributable expenses.
662 Accounting Department.	Allocate Revenue Accounting to reporting categories based on analysis of work hours and functions from Associated Company work measurement plan and analysis of Long Lines Revenues Accounting Offices. Allocate remainder to reporting categories based on total attributable expenses.
663 Treasury Department.	Allocate to reporting categories based on assigned plant in service.
664 Law Department	Directly assign overseas legal expenses to overseas services based on analysis of records.
	Directly assign outside legal consultant fees and associated costs based on analysis of AT&T Form M Schedule 39.
	Allocate remainder to reporting categories based on total attributable expenses.
665 Other General Office Salaries and Expenses.	Allocate Personnel, Account 665-03, to reporting categories based on Maintenance, Traffic, Commercial and Revenue Accounting salaries.
	Directly assign Long Lines Service Engineering expenses (Portion of 665-09) to the private line category.
	Allocate Account 665-29, Customer Services, to categories based on reported hours.
	Allocate Account 665-149, Central Office Planning and Engineering, based on toll dial switching equipment plant in service.
	Allocate remainder based on total attributable expenses.
668-669 Insurance and Accidents and Damages.	Allocate to reporting categories based on plant in service.
670 Earth Station Expenses.	Allocate to reporting categories based on Account 100.5.

Expenses and Revenues—FDC Methods—Continued

Operating expense accounts	Allocation procedures
671 Operating Rents.....	Allocate circuit and miscellaneous rents to reporting categories based on interexchange OSP and circuit equipment and toll switching equipment plant in service. Allocate Long Lines rents paid to affiliates to reporting categories based on number of circuits. Directly assign international satellite rents incurred for services that can only be provided on satellite facilities directly to reporting categories. Allocate remaining international satellite rents to reporting categories based on total international voice-grade circuits in use. Allocate domestic satellite rents to reporting categories based on domestic satellite circuits in use. Allocate building space rents to reporting categories based on the combined Accounts 643, 645 and Revenue Accounting portion of 662.
672 Relief and Pensions.	Allocate to reporting categories based on Maintenance, Traffic, Commercial, and Revenue Accounting Salaries.
673 Telephone Franchise Requirement (dr).	Allocate based on the total investment in Account 100..1
674 (and Long Lines Account 691) General Services and Licenses.	Allocate to reporting categories on bases consistent with the nature of the items of expense.
675 Other Expenses.....	Allocate to reporting categories based on plant in service.
676 Telephone Franchise Requirements (cr).	Allocate based on the total investment in Account 100.1.
677 Expenses Charged Construction (cr).	Same as Account 675

Income Accounts—FDC Methods Subsection

Income accounts	Allocation procedures
Gross Operating Revenues (Accounts 500–518, 524).	Directly assign to reporting categories based on accounting records.
Earth Station Revenue (Account 522).	Allocate to reporting categories based on the allocation of international satellite rent expense.
Long Lines Directory Advertising and Sales (Account 523).	Directly assign to MTS
Other Operating Revenues (Account 526).	Allocate based on gross operating revenues.
Uncollectibles (Account 530).	Allocate to reporting categories based on an analysis of accounting records.
Independent Company Settlements.	Allocate based on the revenue account charged.
LL Settlements except Division of Revenue.	Allocate based on the revenue account charged.
Miscellaneous Income Charges (Account 323).	Allocate based on plant in service (Account 100.1).
Interest on Customer Deposits (Account 336).	Allocate based on the total investment in Account 100.1.

Taxes—FDC Methods

Type of tax	Allocation procedures
Gross Receipts Taxes.....	Allocate based on the allocation of reporting category revenues.
Social Security Taxes (Account 307-05).	Allocate based on the apportionment of Maintenance, Traffic, Commercial, and Revenue Accounting salaries.
Ad Valorem Taxes (Account 307-01).	Allocate based on the allocation of plant in service.
Income Adjustments for Income Tax Determination.	Allocate depreciation of capitalized items, Relief and Pensions, and, Social Security Taxes capitalized based on plant in service. Allocate Operating Fixed Charges based on the allocation of net investment.
State and Local Income Taxes (Account 307-02).	Allocate the actual tax incurred based on the state and local taxable income for each reporting category (net revenue less expenses, income charges, taxes excluding Federal Income Taxes, and income adjustments).
Amortization of Investment Credits.	Allocate based on the allocation of plant in service.
Federal Income Tax	Allocate to reporting categories by multiplying the statutory rate times the Federal taxable income for each reporting category (net revenue less expenses, income charges, other taxes, and income adjustments).

General Services and Licenses

[Account 674 and LL Account 691]

Expense categories	Allocation basis
(1) Bell Telephone Laboratories Billing for Research and Systems Engineering.	
(A) Switching:	
(1) Business Communications Systems.	PBX plant in service (Account 234).
(2) All other.....	COE switching plant in service.
(B) Transmission:	
(1) Ocean Cable.....	Ocean cable and associated COE Plant in service.
(2) Satellite Communications	Domsat rents.
(3) Waveguide Systems.	IX plant in service
(4) Other toll transmission.	IX plant in service.
(5) Exchange transmission.	Exchange plant in service
(C) Station.....	Station equipment plant in service (Accounts 231 and 232).
(D) Outside plant.....	OSP in service, less ocean cable.
(E) General:	
(1) BIS.....	Total attributable expenses
(2) Other.....	Total attributable expenses.
(F) Associated Work.....	Total attributable expenses.
(2) Network Planning and Design:	
(A) Central Office Planning and Design.	COE plant in service.
(B) Distribution Services Planning and Design.	Exchange OSP in service
(C) Toll transmission and Design.	IX OSP + IX COE plant in service, excluding Overseas.
(D) Operator Services Planning and Design.	Switchboard plant in service
(E) All other	Plant in service.
(3) Network Services:	
(A) Central Office Operations and Engineering.	COE plant in service.
(B) Distribution Operations and Engineering.	Exchange OSP in service
(C) Toll Transmission Operations and Engineering.	IX OSP + IX COE plant in service excluding Overseas.
(D) Operator Services Operations and Engineering.	Switchboard plant in service
(E) All other	Plant in service
(4) Residence Marketing:	
(A) Customer Facilities.	Station equipment plant in service (Accounts 231, 232, and 234)
(B) Customer Services..	Accounts 640 and 643.
(5) Information Systems....	Total attributable expenses
(6) Directory & Public Services.	Count of MTS and Outward Wats and ENFIA messages
(7) Staff	Total attributable expenses
(8) Business Marketing	Accounts 640 and 643
(9) Business Services:	
(A) Business Services Strategy Division:	
(1) Customer Facilities.	Station equipment plant in service (Accounts 231, 232, and 234)
(2) Customer Assistance.	Account 640
(B) Business Services Operations Division.	
(1) Customer Facilities.	Station equipment plant in service (Accounts 231, 232, and 234)
(2) Customer Assistance	Account 640.
(10) Planning and Administration D.	Total attributable expenses
(11) Public Relations and Employee Information	Total attributable expenses
(12) Human Resources....	Maintenance, Traffic, Commercial and Revenue Accounting salaries, combined.
(13) Labor Relations.....	Maintenance, Traffic, Commercial and Revenue Accounting salaries, combined.
(14) Comptrollers	Total attributable expenses
(15) Treasury.....	Plant in service.
(16) Tariffs and Costs	Gross revenues.
(17) Public Affairs	Total attributable expenses
(18) State Regulatory Matters.	Total attributable expenses
(19) Federal Regulatory Matters.	Total attributable expenses
(20) Legal:	
(A) General Legal and Tax.	Total attributable expenses
(B) Patent Matters	Bell Laboratories Billing (see Item 1 above).
(C) Antitrust and MCI Docket.	Total attributable expenses
(21) Secretary.....	Total attributable expenses
(22) Administrative Services.	Total attributable expenses
(23) Executive.....	Total attributable expenses
(24) Operations Planning..	Total attributable expenses
(25) Provision for Service Pensions and Death Benefits.	Results of 2 through 24 above
(26) Other expenses.....	Results of 2 through 24 above
(27) Taxes other than F.I.T.	Results of 2 through 24 above
(28) Return Requirement (including related F.I.T. on net investment in the General Departments Account 101.1).	Results of 1 through 27 above

BILLING CODE 6712-01-M

INTERSTATE COMMERCE COMMISSION

49 CFR Ch. X

[Ex Parte No. MC-137]

No Suspend Zone; Motor Common Carriers of Property

AGENCY: Interstate Commerce Commission.

ACTION: Withdrawal of Notice of Proposed Rulemaking.

SUMMARY: In our notices in this proceeding (45 FR 6974, January 31, 1980; 45 FR 12273, February 25, 1980; 45 FR 39316, June 10, 1980; and 45 FR 45932, July 8, 1980), we proposed upward and downward rate flexibility by creating a "no suspend zone" for motor carrier freight rates. We sought comments on this as well as a "no notice zone" and possible methods of implementing these concepts. The Motor Carrier Act of 1980 (Pub. L. No. 96-296) authorized a no suspend zone. The other actions proposed in the notice should not be considered until after the effects of the legislative changes contained in Pub. L. No. 96-296 can be studied.

DATES: This proceeding is discontinued effective June 25, 1981.

FOR FURTHER INFORMATION CONTACT: Richard B. Felder or Jane F. Mackall, (202) 275-7656.

SUPPLEMENTARY INFORMATION: In our notices, we proposed a number of methods to increase carrier ratemaking flexibility. We suggested development of a no suspend zone within which rates would not be suspended or investigated on the grounds that the rates appeared too high or too low. No suspend zone rate changes were proposed only for carriers acting independently; no rate bureau could use the zone. We proposed either to develop a "base rate" or to use present rates from which to compute increases or decreases allowable under a no suspend zone. Further expansion of the zone (downward or upward) for particular types of carriers was proposed to be considered in the sub proceedings established in Ex Parte No. MC-135, *Master Certificates and Permits*. We also proposed the possibility of a no notice zone within the no suspend zone.

Section 10708(d), added by the Motor Carrier Act, established a 10-percent zone of rate freedom. Increases are judged from the rate in effect on July 1, 1980[1] These rates must be set independently. See Ex Parte No. 297 (Sub-No. 5), *Motor Carrier Rate Bureaus-Implementation of Pub. L. 96-296*, 364 I.C.C. 464, (45 FR 86736, December 31, 1980). For two years, general increases applied to rates for which a zone increase is proposed are to be counted towards the allowable zone to the extent they exceed 5 percent.

The zone is now available and we have issued rules (49 CFR 1309.8 and 1310.1(c)) for zone filings. No. 37416, *Identification of Rates filed Under Zone of Rate Freedom by Motor Common Carriers of Property and Freight Forwarders* (decided July 15, 1980), 45 FR 52161, August 6, 1980.

This new provision resolves most of the issues raised in our notice, i.e., jurisdiction, rationale, costing techniques, and extent of a no suspend zone. Moreover, expansion of the zone based on cost and market considerations for particular types of motor carrier services may no longer be considered as we had originally proposed. Ex Parte No. MC-135, *supra*, has been discontinued. See, § 10922(b)(3).

The Motor Carrier Act does not provide a no notice zone. While we could nonetheless proceed to consider adopting one, we will not do so now. We think it more appropriate for the time being to refrain from this action. We intend to monitor and study the use of § 10708(d) and will consider this and other actions to the extent there is a need for them.

The Motor Carrier Act raises new issues related to the zone, i.e., an increase in the zone under § 10708(d)(2) and application of the Producers Price Index after July 1, 1982 (§ 10708(d)(3)(B)). A question has also been raised concerning the proper definition of "general increase" used in § 10708(d)(3)(A). These subjects are under study.

We recognize that a number of parties disagreed with our earlier conclusion (45 FR 39316, June 10, 1980) to develop a record in this case prior to the passage of motor carrier reform legislation. We continue to believe the record was helpful. Continuing the proceeding in order to receive comments focussed the issues, encouraged interested persons to analyze them and formulate positions and, we believe ultimately assisted the legislative process. Furthermore, one issue that has not been discussed in depth here—the relationship between independent pricing under the zone and collective ratemaking based on a rate of return standard—remains. (See Question 18 in the notice, 45 FR 6974, January 31, 1980.) This issue has also been raised in Ex Parte No. MC-128, *Revenue Need Standards in Motor Carrier General Increase Proceedings*, and can be addressed there, rather than in this proceeding.

This decision does not significantly affect either the quality of the human environment or conservation of energy resources.

(49 U.S.C. 10321, 10708(d), and 5 U.S.C. 553)

Dated: May 18, 1981.

By the Commission, Acting Chairman Alexis, Commissioners Gresham, Clapp, Trantum, and Gilliam.

Agatha L. Mergenovich,

Secretary.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 23

Export of Bobcat, Lynx, River Otter, Alaskan Gray Wolf, Alaskan Brown Bear, American Alligator, and American Ginseng Taken in 1981-82 Season

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of Intent.

SUMMARY: The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) is a 67-nation treaty regulating the international shipment of certain wildlife and plant species. Exports of wildlife or plants listed in Appendix II of CITES may occur only if a Scientific Authority has advised a permit-issuing Management Authority that such exports will not be detrimental to the survival of the species, and if a Management Authority is satisfied that the wildlife or plants were not obtained in violation of laws for its protection.

The Service must make such decisions on the bobcat, lynx, river otter, Alaskan gray wolf, Alaskan brown bear, American alligator, and American ginseng, which are all included in Appendix II. These decisions are made on a state-by-state basis for all specimens taken in a particular season. This notice announces the Service's intent to develop findings on export of specimens of these species taken in the 1981-82 season. The Service solicits comments on criteria to be used in the findings. The Service also requests information on environmental and economic impacts and effects on small business, organizational, or governmental entities, that might result from the findings.

DATES: All information and comments received by the following dates will be considered: June 15, 1981, for American alligator and American ginseng, and July 1, 1981, for bobcat, lynx, river otter, Alaskan gray wolf, and Alaskan brown bear.

ADDRESS: Please send correspondence concerning this notice to the Office of the Scientific Authority, U.S. Fish and Wildlife Service, Washington, D.C. 20240. Materials received will be available for public inspection from 7:45 a.m. to 4:15 p.m., Monday through Friday, in room 536, 1717 H Street, N.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:
Scientific Authority Findings—Dr. Richard L. Jackowski, Office of the Scientific Authority, U.S. Fish and Wildlife Service, Washington, D.C. 20240, telephone (202) 653–5948.

Management Authority Findings—Mr. S Ronald Singer, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240, telephone (703) 235–2418.

Export Permits—Mr. Robert J. Batky, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240, telephone (703) 235–1903.

SUPPLEMENTARY INFORMATION: This is the first of three notices concerning the Service's findings on export of bobcat, lynx, river otter, Alaskan gray wolf, Alaskan brown bear, American alligator, and American ginseng, taken in the 1981–82 season. It proposes criteria for Scientific Authority findings on whether export will not be detrimental to the survival of the species, and for Management Authority findings on whether the wildlife was not obtained in violation of laws for its protection.

Scientific Authority Findings

The Service published a notice on July 10, 1980, (45 FR 46464) summarizing criteria used by the Scientific Authority in advising on whether export will not be detrimental to the survival of the species. The general criteria for such findings are as follows:

1. Whether similar export has occurred in the past, and has not reduced the numbers or distribution of the species, nor caused signs of ecological or behavioral stress within the species, or in other species of the affected ecosystem.

2. Whether life history parameters of the species and the structure and function of its ecosystem indicate that the present frequency of export will not appreciably reduce the numbers or distribution of the species, nor cause signs of ecological or behavioral stress within the species or in other species of the affected ecosystem.

3. Whether such export is expected to increase, decrease, or remain constant in frequency.

In using these general criteria, the Service established specific requirements for advising on the export of certain species. Last year, the Service followed the practice of the former Endangered Species Scientific Authority (ESSA) in advising on export of the species discussed in the present notice, based on an annual review of state programs for their conservation. The Service adopted minimum requirements, previously used by the ESSA, in giving such advice on export of bobcat, lynx, and river otter. These requirements were recommended by a working group of wildlife biologists convened by the ESSA in 1977.

A. Minimum requirements for biological information:

(1) Population trend information, the method of determination to be a matter of state choice.

(2) Information on total harvest of the species.

(3) Information on distribution of harvest.

(4) Habitat evaluation.

B. Minimum requirements for a management program:

(1) There should be a controlled harvest, methods and seasons to be a matter of state choice.

(2) All pelts should be registered and marked.

(3) Harvest level objective should be determined annually.

Bobcat

Defenders of Wildlife, Inc., challlenged the validity of these specific requirements for bobcat exports in a suit brought against the ESSA and the Department of the Interior. On February 3, 1981, the United States Court of Appeals for the District of Columbia Circuit held that the requirements set forth above are invalid, and that they are to be set aside to the extent they authorize findings, that export of bobcats would not be detrimental to the survival of the species, when such findings are not based on reliable estimates of the bobcat population and data showing the total number of bobcats to be killed, in each of the states involved.

Although the suit focused on the 1979–1980 harvest season, the court made it clear that the revised requirements also should apply to subsequent seasons. The court's requirements are obviously a departure from wildlife management as it has traditionally been practiced in almost all states. The court's requirements have not been used in managing elusive, widespread species such as the bobcat, which are very difficult to census. The Service believes that findings based solely on the court's requirements would not be meaningful, and that it is important to consider certain other types of information that the Service has sought in the past.

The court offered very little guidance with respect to its requirement of a reliable population estimate. The court stated that "The Scientific Authority has considerable discretion to determine the method by which that estimate may be made and in evaluating its reliability." Accordingly, the Service intends to allow individual states the greatest possible latitude in selecting methods of estimating their bobcat populations, to the extent they are able to make such estimates. The Service suggests that any such estimates should be accompanied by an assessment of their reliability (confidence limits).

The court's second requirement was that there must be information concerning the total number of animals to be harvested in the particular season. While the court gave no guidance on this requirement, the Service views it as very similar to the previous minimum requirements for a management program, particularly the requirement that individual states should determine their harvest level objective annually.

In order for the Service to determine if a particular export level will not be detrimental to the survival of the species in a given state, it will still need evidence of the ability of the bobcat population to sustain the harvest. Accordingly, the Service requests certain of the same types of information this year as in previous years. In addition, in view of the court's order, the Service requests that each state submit an estimate of its current total bobcat population, to the extent it is able make such an estimate.

The Service has asked each state to provide the following types of information.

1. Biological Information:

a. An estimate of the size of the statewide population, including a description of: (i) how it is calculated, with an indication of the geographic areas where data used in the calculations were gathered, (ii) how it accommodates differences in abundance over the range of habitat occupied by the species, and (iii) the confidence limits on the estimate.

b. A description of any research being conducted to assess the distribution, abundance, or general condition of the species in the state. Please briefly

summarize results so far obtained, including results of any analyses of age structure or reproductive parameters.

c. A description of any population models being used in the state to evaluate the status of the species.

d. An assessment of long-term population trends of the species in the state, and the relationship of these trends to habitat condition, management practices, harvesting pressure, prey abundance, or other factors.

2. Management Program:

a. Harvest level objective for the 1981–82 season (anticipated total statewide harvest of the species). Please describe: (i) how this figure is derived, and (ii) how biological information is used in setting the harvest level objective.

b. A description of methods used to insure that the actual harvest will not substantially exceed the harvest level objective.

c. A copy of current state regulations governing harvest, possession, transport, and sale of the species. Please indicate any changes to be made for the 1981–82 season.

3. Harvest Information for the previous 1980–81 Season:

a. Number of animals (listed by county or game management unit, if data are available at these local levels) that were: (i) harvested, (ii) tagged, and (iii) bought by dealers operating in the state. Please also give the total number of animals that were harvested and tagged in the 1979–80 season in the state.

b. Number of licensed trappers in the state, and number of these trappers setting for the species in question. Please provide any available information on harvest per unit effort.

c. Prices paid to trappers for pelts of the species, including the average price and the range of extremes.

4. Name, address, and telephone number of the state staff person the Service should contact concerning these information needs.

The approach toward Scientific Authority advice outlined in this notice is an interim measure. The Department of the Interior has strongly recommended to the Department of Justice that the appellate court's decision should be appealed to the Supreme Court. Because there might be no resolution of this legal issue before the next bobcat harvest season, the Service believes it is necessary to attempt to address the appellate court's requirements. Information requested in items 1a and 2a above is related to requirements of that court. At present, the Service's intention is to integrate its previous requirements and those of the court.

Lynx, River Otter and Alligator

Although the court's decision concerns only bobcats, Scientific Authority findings on lynx, river otter, and American alligator could be subject to legal challenge if they do not address the court's requirements. Therefore, the Service is requesting that each state also submit the same types of information on these species, to the extent it is able to do so.

Requirements discussed above are for Scientific Authority decisions on whether export of bobcat, lynx, river otter, or American alligator will not be detrimental to the survival of the species. The Service recognizes that the listing of these species in Appendix II is also for the purpose of effectively controlling international trade in other species of cats, otters, or crocodilians, respectively. Accordingly, the Service will consider the impact of trade in these species on the effectiveness of CITES in controlling trade in other related species, when determining conditions under which export may be allowed.

Gray Wolf and Brown Bear

Nations participating in CITES agreed that the Alaskan gray wolf and Alaskan brown bear are included in Appendix II under the provisions of Article II.2(b) to effectively control international trade in other populations of these species that are included in Appendix I or II. Scientific Authority advice on non-detriment for export of Alaskan wolves and brown bears will, therefore, be based on consideration of the impact of that trade on the effectiveness of CITES in controlling trade in other subspecies or geographically separate populations that they were listed to protect.

American Ginseng

American ginseng *(Panax quinquefolius)* was listed in Appendix II when the Convention became effective on July 1, 1975. Last year, the Service followed the practice of the former Endangered Species Scientific Authority (ESSA) in advising on the export of American ginseng based on an annual review of state programs for the conservation of the species. The Service adopted the following specific requirements, previously used by the ESSA, in giving such advice:

The ESSA proposes to approve export of wild American ginseng from those states that have implemented substantial programs to conserve the species whose populations can support the harvest. Acceptable conservation programs generally must include some form of research and regulations designed to monitor the status of the state's wild populations to provide annual harvest estimates, and to control exploitation. The ESSA recognizes the recency of wild plant management in many states, and the frequent lack of management authority in state agencies. Consequently, we propose to approve export from certain states whose management agencies lack authority to limit exploitation provided those states have substantial plans for 1979 under existing authority and provided available information indicates that populations of the state can support the harvest.

This year the Service plans to refine those specific requirements in advising on whether exports of ginseng will not be detrimental to the survival of the species by evaluating: (1) information from each state on past, present, and potential distribution, relative frequency, local abundance, population trends, and harvest intensities on a county-by-county basis, and (2) state research and management programs for this species, including a limited harvest season to conserve the species.

Management Authority Findings

In addition to advice from the Scientific Authority, export of Appendix II species requires that the Management Authority is satisfied that specimens were not obtained in violation of state of Federal law. The Service, in meeting this responsibility, is contacting each state by letter, outlining specific requirements to satisfy export requirements of CITES.

The Service considers the following ongoing program to be necessary to qualify a state's bobcat, lynx, river otter, gray wolf, brown bear or alligator for export:

A tagging system must exist as proof of legal taking. Tags must:

1. Be made of metal or some other permanent material;

2. Be permanently attached to each skin, preferably by state personnel;

3. Accompany finished products to the port where the state tags will be collected by Service officers (tags are necessary to show source and numbers of pelts used in the manufacture of the product);

4. Be applied within a specified time of taking that is set by the state;

5. Show state of origin;

6. Show year of taking;

7. Show species; and

8. Be serially unique.

This year, the Service is considering the feasibility of supplyiing tags meeting these requirements to the states for use in exporting bobcat, lynx, and river otter.

In addition, the Service considers the following ongoing program to be necessary to ensure that ginseng to be exported was not obtained in violation of state or Federal law:

1. State certification or registration of dealers and exporters;

2. A requirement that dealers and exporters maintain a record of their commerce in ginseng; and

3. A certificate of legal taking identifying origin, year of taking, whether wild or artifically propagated, and weight of the shipment, attached to each export from the state. (Please note: this is required only for each export, not each transaction within the state.) This certificate is the only proof of legal taking that will be accepted by Federal officials at the point of export from the United States.

Schedule

The Service intends to develop final findings on export in advance of the 1981–82 harvest season. The planned schedule is as follows:

Late-April, 1981—Communicate requests for biological and management information to states.

Early May, 1981—Publish **Federal Register** notice of requirements for allowing export of certain Appendix II species, and invite public comment.

June 15, 1981—Deadline for receipt of information from states on alligator and ginseng.

June 26, 1981—Publish **Federal Register** notice of proposed findings on the export of alligator and ginseng, and invite public comment.

July 1, 1981—Deadline for receipt of information from states on furbearing species (bobcat, lynx, river otter, Alaskan gray wolf, and Alaskan brown bear).

July 20, 1981—Publish **Federal Register** notice of proposed findings on the export of furbearing species, and invite public comment.

July 24, 1981—Publish **Federal Register** notice of final findings on the export of alligator and ginseng.

August 18, 1981—Publish **Federal Register** notice of final findings on the export of furbearing species.

Request for Information

The Service requests information and comments concerning the criteria to be used in Scientific Authority and Management Authority findings for the export of species discussed in this notice. The Service also requests information on environmental and economic impacts, as well as any effects on small entities (including small businesses, small organizations and small governmental jurisdictions) that would result from such findings, either in favor of export or against it. This information will aid the Service in preparing any required analysis of effects to comply with the requirements of the National Environmental Policy Act, Executive Order 12291 on Federal Regulation, and the Regulatory Flexibility Act.

Dated: May 20, 1981.

G. Ray Arnett,

Assistant Secretary for Fish and Wildlife and Parks.

Vol. 46, No. 100
Tuesday, May 26, 1981

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Forest Land and Resource Management Plan; Targhee National Forest, Bonneville, Butte, Clark, Fremont, Lemhi, Madison, and Teton Counties, Idaho, Lincoln and Teton Counties, Wyoming; Revised Intent To Prepare an Environmental Impact Statement

A Notice of Intent to Prepare an Environmental Impact Statement for the Targhee National Forest Land and Resource Management Plan was published in the **Federal Register**, Volume 45, No. 17, p. 5784, January 24, 1980.

The estimated dates for filing the Draft and Final Environmental Impact Statements with the Environmental Protection Agency and release to the public have been postponed. The Draft Environmental Impact Statement is now expected in September 1981, and the Final Environmental Impact Statement is proposed for release in April 1982.

All other conditions of the original Notice of Intent remain the same.

Dated: May 12, 1981.

Jeff M. Sirmon,

Regional Forester.

BILLING CODE 3410-11-M

Office of the Secretary

1980 Corn and Sorghum Crops: Determinations Regarding the National Program Acreages, Program Allocation Factors and Payment Rates

AGENCY: Agricultural Stabilization and Conservation Service (ASCS), USDA.

ACTION: Notice of Revision of National Program Acreages and Announcement of the Program Allocation Factors and Payment Rates for 1980 Crops of Corn and Sorghum.

SUMMARY: The purpose of this notice is to announce the revised national program acreages (NPA's), program allocation factors and deficiency payment rates for the 1980 crops of corn and sorghum. These actions are required to be made in accordance with the provisions of the Agricultural Act of 1949, as amended.

EFFECTIVE DATE: May 22, 1981.

ADDRESS: Production Adjustment Division, ASCS/USDA, 3630 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT: Lois G. Moe, Agricultural Program Specialist, Production Adjustment Division, ASCS/USDA, P.O. Box 2415, Washington, D.C. 20013, (202) 447-6688. The Final Impact Statement describing the options considered in developing this notice and the impact of implementing each option is available on request from the above named individual.

SUPPLEMENTARY INFORMATION: This notice of determination has been reviewed in accordance with the provisions of Executive Order 12291 and has been classified "not major."

The title and number of the Federal Assistance program that this notice applies to are: Feed Grains Production Stabilization: 10.056, as found in the Catalog of Federal Domestic Assistance.

This action will not have a significant impact specifically on area and community development. Therefore, a review as established by OMB Circular A-95 was not used to assure that units of local government are informed of this action.

Section 105A of the Agricultural Act of 1949, as amended (referred to as the "Act") provides that the 1980-crop NPA's first proclaimed may be revised for the purpose of determining the allocation factor if the Secretary determines that such revision is necessary based upon the latest available information. The Secretary has determined that the NPA's for the 1980 crop of corn and sorghum shall be revised because of higher than anticipated domestic use and exports for corn and lower than anticipated domestic use for sorghum.

In addition, section 105A of the Act requires that the Secretary of Agriculture determine an allocation factor for the 1980 crop of corn and sorghum. The allocation factor shall be determined by dividing the NPA for the crop by the number of acres which the Secretary estimates will be harvested for each crop, but in no event shall the allocation factor be more than 100 percent nor less than 80 percent.

Section 105A of the Act also provides that deficiency payments be computed for the 1980 crops of corn and sorghum at a rate equal to the amount by which the higher of (1) the national weighted average market price received by farmers during the first five months of the marketing year (October through February) or (2) the loan level is less than the established "target" price per bushel.

A notice was published in the **Federal Register** (45 FR 1648) on January 8, 1980, proclaiming NPA's for the 1980 crops of corn and sorgum. It was noted that section 105A of the Act provides that the Secretary of Agriculture may revise the NPA's if the Secretary determines it necessary based upon the latest information. It was also noted that the program allocation factors would be determined in April 1981 for corn and sorghum.

The purpose of this notice is (1) to revise the 1980-crop corn and sorghum NPA's, (2) to determine the program allocation factors for these commodities, and (3) to announce the payment rates for corn and sorghum. These provisions are authorized by sections 105A(b)(1) (B) and (D) and sections 105A(d) (1) and (2) of the Act.

It is essential that these revisions be made effective as soon as possible since the Act requires the proclamation of the revised NPA's as soon as such determinations are made.

The Secretary has made the following determinations with respect to the 1980 crops of corn and sorghum.

Determinations

1. *Revised National Program Acreages.*

It is hereby proclaimed that the revised national program acreages (NPA's) for the 1980 crops of corn and sorghum shall be 84.1 and 12.8 million acres, respectively. The revised NPA's are based on the following data:

	Corn	Sorghum
(a) Estimated domestic use, 1980–81	5,100	407
(b) Plus estimated silage use, 1980–81	611	39
(c) Plus estimated exports, 1980–81	2,550	250
(d) Minus estimated imports, 1980–81	−1	0
(e) Plus or minus adjustment for carryover to desired level [1]	−167	+33
(f) Divided by national weighted average farm program yield (Bushels/acre)	96.2	57.1
(g) Equals: 1980 national program acreage (million acres)	84.1	12.8

[1] An appropriate carrover level of U.S. feed grain stocks has been determined to be equal to 6.7 percent of world consumption of coarse grains. Such consumption during the 1979–80 marketing year is estmated to be 727.2 million metric tons (MMT) (727.2 × 0.067 = 48.7 MMT (maximum level of U.S. feed grain carryover stocks)). The corn componet of the feed grain total has been determined to be 1,450 million bushels (36.8 MMT × 39.368). 1980–81 carryn corn stocks were 1,617 million bushels resulting in a 167 million bushel stock adjustment. The sorghum component of the feed grain total has been determined to be 180 million bushels (4.6 MMT). 1980–81 carryng sorghum stocks were 147 million bushels resulting in a 33 million bushel stock adjustment.

2. *Program Allocation Factors.*

It is hereby proclaimed that the 1980 crop program allocation factors shall be 100 percent for corn and 94.8 percent for sorghum, based on the following data:

	Corn	Sorghum
(a) 1980 NPA (million acres)	84.1	12.8
(b) Divided by estimated 1980 national harvested acreage (million acres) [1]	82.3	13.5
(c) Equals 1980 program allocation factor (percentage) [2]	100.0	94.8

[1] Based on corn and sorghum harvested acreage as reported in "Corp Production" dated January 14, 1981.
[2] Allocation factor may not exceed 100 percent. Actual factor is 102.2 percent for corn.

3. *Deficiency Payment Rates.*

It is hereby proclaimed that the deficiency payment rates for the 1980-crop corn and sorghum are zero; therefore, there will be no deficiency payments for 1980-crop corn and sorghum.

The national weighted average prices received by farmers for the first five months of the 1980–81 marketing year (October through February) are $3.11 per bushel for corn and $3.04 per bushel for sorghum. The official USDA price determination was published on page 22 of "Agricultural Prices" dated March 1981.

Since the weighted average prices received by farmers ($3.11 per bushel for corn; $3.04 per bushel for sorghum) are higher than the national loan rates ($2.25 per bushel for corn; $2.14 per bushel for sorghum), the weighted average prices become the determining factors in the establishment of the 1980-crop corn and sorghum deficiency payment rates.

The determination of the deficiency payment rates is based on the following data:

	Corn	Sorghum
(a) 1980 national established "target" prices (dollars per bushel)	[1] $2.05/ 2.35	[1] $2.45/ 2.50
(b) Minus higher of weighted five-month average price or loan rate (dollars per bushel) [2]	3.11	3.04
(c) Equals 1980 deficiency payment rate (dollars per bushel)	0	0

[1] The first entry is the target price applicable to those producers who planted in excess of the farm normal crop acreage (NCA). The second is for those who planted within the farm NCA.
[2] 1980 price support (loan) rates for corn and sorghum are $2.25 per bushel and $2.14 per bushel respectively. National weighted average market prices received by farmers during the first five months (October-February) of the 1980–81 marketing year are $3.11 and $3.04 per bushel for corn and sorghum, respectively. Consequently, these levels are higher than the respective loan rates and will be used in the determination of the deficiency payment level.

Signed at Washington, D.C. on May 5, 1981.

John R. Block,

Secretary.

BILLING CODE 3410-05-M

Soil Conservation Service

Augustine Beach R.C. & D. Measure, Delaware; Finding of No Significant Impact

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

FOR FURTHER INFORMATION CONTACT: Mr. Otis D. Fincher, State Conservationist, Soil Conservation Service, Treadway Towers, Suite 204, 9 East Loockerman Street, Dover, Delaware 11901, telephone 302–678–0750.

Notice: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Augustine Beach R.C. & D. Measure, New Castle County, Delaware.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Otis D. Fincher, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns installation of a double bay reinforced concrete boat launching ramp 220 feet long by 30 feet wide which will extend 170 feet toward the channel from the mean high waterline; 210 feet of timber approach pier attached to 160 feet of a steel pile breakwater/pier system with a timber sheet pile curtain wall; 40 feet of gangway and a 20 foot by 8 foot floating courtesy dock attached to the breakwater/pier system. The planned work will be installed along the Delaware River 1 mile south of Port Penn, Delaware, and will provide safe public access to the waterways for recreational use.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Otis D. Fincher. The FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until June 25, 1981.

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program. Office of Management and Budget Circular A–95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects is applicable)

Dated: May 15, 1981.

Joseph W. Haas,

Deputy Chief for Natural Resource Projects

BILLING CODE 3410-16-M

Clove Brook Watershed, New Jersey; Finding of No Significant Impact

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of finding of no significant impact.

FOR FURTHER INFORMATION CONTACT: Mr. Plater T. Cambell, State Conservationist, Soil Conservation Service, 1370 Hamilton Street, P.O. Box 219, Somerset, New Jersey 08873, telephone (201) 246–1205.

Notice: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service, Guidelines (7 CFR

Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Clove Brook Watershed, Sussex County, New Jersey.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Plater T. Campbell, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project involves the installation of agricultural waste management systems to reduce nonpoint pollution loadings to Clove Acres lake and the streams in the watershed.

The Notice of Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Plater T. Campbell, State Conservationist. The FNSI has been sent to various Federal, State, and local agencies, and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until June 25, 1981.

BILLING CODE 3410-16-M

Goldsboro Watershed, Maryland; Intent To Prepare an Environmental Impact Statement

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of intent to prepare an environmental impact statement.

FOR FURTHER INFORMATION CONTACT: Mr. Gerald R. Calhoun, State Conservationist, Soil Conservation Service, 4321 Hartwick Road, Room 522, College Park, Maryland 20740, telephone (301) 344-4180.

Notice: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is being prepared for the Goldsboro Watershed, Caroline County, Maryland.

The environmental assessment of this federally assisted action indicates that the project may cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Gerald R. Calhoun, State Conservationist, has determined that the preparation and review of an environmental impact statement is needed for this project.

The project concerns a plan for watershed protection, flood damage reduction, and adequate agricultural drainage. Alternatives under consideration include systems for conservation land treatment, nonstructural measures, and channel modification.

A draft environmental impact statement will be prepared and circulated for review by agencies and the public. The Soil Conservation Service invites participation by agencies and individuals with expertise or interest in the preparation of the draft environmental impact statement. The draft environmental impact statement will be developed by Mr. Gerald R. Calhoun, State Conservationist. A meeting will be held at 7:30 p.m. on June 25, 1981, at the Public Library at Denton, Maryland, corner of First Street and Market Street, to determine the scope of evaluation of the proposed action. Further information on the proposed action or on the scoping meeting may be obtained from Mr. Calhoun at the above address.

BILLING CODE 3410-16-M

Graham County Schools R.C. & D. Measure, North Carolina; Finding of No Significant Impact

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of a Finding of No Significant Impact.

FOR FURTHER INFORMATION CONTACT: Mr. George C. Norris, Acting State Conservationist, Soil Conservation Service, Room 544, Federal Building, 310 New Bern Avenue, Raleigh, North Carolina 27611; telephone 919-755-4210.

Notice: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Graham County Schools RC. & D. Measure, Graham County, North Carolina.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. George C. Norris, Acting State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for the reduction of erosion on approximately 6.8 acres of critically eroding land and draining approximately 4.7 acres of general play area. The planned works of improvement include two grassed waterways, tile drains, and the seeding of the eroding areas with adapted perennial vegetation. Areas of existing vegetation destroyed during installation will be reestablished.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. George C. Norris. The FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until June 25, 1981.

BILLING CODE 3410-16-M

Highland and Queensborough Parks Critical Area Treatment R.C. & D. Measure, Louisiana; Finding of No Significant Impact

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of a Finding of No Significant Impact.

FOR FURTHER INFORMATION CONTACT: Mr. Alton Mangum, State Conservationist, Soil Conservation Service, 3737 Government Street, Alexandria, Louisiana 71301, telephone 318–473–7751.

Notice: Pursuant to Section 102 (2) (C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Highland and Queensborough Parks Critical Area Treatment R.C. & D. Measure, Caddo Parish, Louisiana.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Alton Mangum, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for the stabilization of critically eroding land on a 10-acre and 6-acre park. Some of the area will be shaped, filled, and revegetated. Planned structural measures include a concrete drop structure, splash basin, traffic barricades, and parking area.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Alton Mangum. The FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until June 25, 1981.

BILLING CODE 3410–16–M

Lake Townsend Wildlife R.C & D. Measure, North Carolina; Finding of No Significant Impact

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of a Finding of No Significant Impact.

FOR FURTHER INFORMATION CONTACT: Mr. George C. Norris, Acting State Conservationist, Soil Conservation Service, Room 544, Federal Building, 310 New Bern Avenue, Raleigh, North Carolina 27611, telephone 919–755–4201.

Notice: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Lake Townsend Wildlife R.C. & D. Measure, Guilford County, North Carolina.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. George C. Norris, Acting State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for the construction of approximately 1,200 linear feet of low earthen dike along with a flash board riser for water control. In addition, a pump will be used to flood the 14 acre marsh area during low water and drought periods. Approximately 40 wood duck nesting boxes will be erected in the marsh and bottom land area.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. George C. Norris. The FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until June 25, 1981.

BILLING CODE 3410–16–M

McClellanville Flood Prevention R.C. & D. Measure, South Carolina; Finding of No Significant Impact

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of a Finding of No Significant Impact.

FOR FURTHER INFORMATION CONTACT: Mr. George E. Huey, State Conservationist, Soil Conservation Service, 1835 Assembly Street, Room 950, Columbia, South Carolina 29201, telephone 803–765–5681.

Notice: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the McClellanville Flood Prevention R.C. & D. Measure, Charleston County, South Carolina.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. George E. Huey, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a proposal to reduce flooding and improve flow conditions on 6.1 miles of ephemeral streams in and adjacent to the town of McClellanville through channel enlargement. Spoil will be spread adjacent to the channel. All areas disturbed will be vegetated. Several culvert systems at roads and street will be altered.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental

assessment are on file and may be reviewed by contacting Mr. George E. Huey. The FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until June 25, 1981.

BILLING CODE 3410–16–M

Mercer County Schools Critical Area Treatment and Land Drainage R.C. & D. Measure, West Virginia; Finding of No Significant Impact

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of a Finding of No Significant Impact.

FOR FURTHER INFORMATION CONTACT: Mr. Craig M. Right, State Conservationist, Soil Conservation Service, 75 High Street, Morgantown, West Virginia 26505, telephone 304–599–7151.

Notice: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Mercer County Schools Critical Area Treatment and Land Drainage R.C. & D. Measure, Mercer County, West Virginia.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Craig M. Right, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure is designed to stabilize and revegetate approximately 3.0 acres of land at five schools in Mercer County which are subject to erosion and drainage problems. Included in the planned works of improvement are land shaping and smoothing, about 3,000 feet of subsurface drainage, vegetative practices necessary to establish adequate ground cover, 120 feet of grassed waterway, 250 feet of drainage field ditch, and one drop inlet.

The Notice of a Finding of No Significant Impact (FNSI) has been forewarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Craig M. Right. The FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until June 25, 1981.

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program. Office of Management and Budget Circular A–95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects is applicable)

Dated: May 15, 1981.

BILLING CODE 3410–16–M

Northeast Camden Flood Prevention RC&D Measure, South Carolina; Finding of No Significant Impact

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of a Finding of No Significant Impact.

FOR FURTHER INFORMATION CONTACT: Mr. George E. Huey, State Conservationist, Soil Conservation Service, 1835 Assembly Street, Room 950, Columbia, South Carolina 29201, telephone 803–765–5681.

Notice

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Northeast Camden Flood Prevention RC&D Measure, Kershaw County, South Carolina.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. George E. Huey, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a proposal to reduce flooding and improve flow conditions on a 0.5 mile ephemeral stream. The existing stream will be enlarged and lined with rock riprap to prevent erosion. Spoil will be spread adjacent to the channel and disposed of properly. All areas disturbed will be vegetated. Several culvert systems at roads and streets will be altered.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. George E. Huey. The FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until June 25, 1981.

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program. Office of Management and Budget Circular A–95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects is applicable)

Dated: May 18, 1981.

Joseph W. Haas,

Deputy Chief for Natural Resource Projects.

BILLING CODE 3410–16–M

Triad School RC&D Measure, Ohio; Finding of No Significant Impact

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of a Finding of No Significant Impact.

FOR FURTHER INFORMATION CONTACT: Mr. Robert R. Shaw, State Conservationist, Soil Conservation Service, Room 522, 200 North High Street, Columbus, Ohio 43215, telephone 614–469–6962.

Notice

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an

environmental impact statement is not being prepared for the Triad School RC&D Measure, Champaign County, Ohio.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Robert R. Shaw, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for flood prevention on open space areas of the Triad School property. The planned works of improvement include grading and shaping, construction of a diversion and collection basins to concentrate surface runoff, and the installation of subsurface drains to convey runoff to a stable outlet. Critical area seeding will be applied on all areas distrubed by construction.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Robert R. Shaw. The FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until June 25, 1981.

BILLING CODE 3410-16-M

Union County Fairgrounds RC&D Measure, Ohio; Finding of No Significant Impact

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of a Finding of No Significant Impact.

FOR FURTHER INFORMATION CONTACT: Mr. Robert R. Shaw, State Conservationist, Soil Conservation Service, Room 522, 200 North High Street, Columbus, Ohio 43215, telephone 614-469-6962.

Notice

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Union County Fairgrounds RC&D Measure, Marysville, Ohio.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Robert R. Shaw, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for land drainage on open space areas of the fairgrounds. The planned works of improvement include constructing a grassed waterway, grading and shaping, and installation of subsurface drains to safely collect and dispose of excess surface and subsurface water. Critical area seeding will be applied on all areas disturbed by construction.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Robert R. Shaw. The FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until June 25, 1981.

BILLING CODE 3410-16-M

CIVIL AERONAUTICS BOARD

[Order 81-5-104; Docket 39643]

Application of Air Chicago for Certificate Authority Under Subpart Q

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Order 81-5-104 application of Air Chicago under Subpart Q for a certificate of public convenience and necessity Docket 39628.

SUMMARY: The Board is instituting the *Air Chicago Fitness Investigation* Docket 39643, and setting it for a hearing before an Administrative Law Judge of the Board on an expedited basis, at a time and place to be determined later, to consider whether Air Chicago is fit, willing, and able to provide service in the Chicago (Midway Airport) markets listed in its application. The complete text of this order is available as noted below.

DATES: Objections: All interested persons having objections to the Board instituting the fitness investigation shall file, and serve upon all persons listed below no later than June 1, 1981, a statement of objections, together with a summary of testimony, statistical data, and other material expected to be relied upon to support the stated objections.

ADDRESSES: Objections should be filed in Docket 39643, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428.

FOR FURTHER INFORMATION CONTACT: Thomas G. Chew, Bureau of Domestic Aviation, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, (202) 673-5056.

SUPPLEMENTARY INFORMATION: Objections should be served upon Air Chicago, the Illinois Department of Transportation, the Louisiana Department of Transportation, the Michigan Aeronautics Commission, the New York State Department of Transportation, the Oklahoma Aeronautics Commission, the Ohio Department of Transportation, the Tennessee Department of Transportation, and the Texas Aeronautics Commission; the Mayors of Chicago, Illinois, Atlanta, Georgia, Baltimore, Maryland, Boston, Massachusetts, Buffalo, New York, Cincinnati, Ohio, Cleveland, Ohio, Columbus, Ohio, Dallas/Ft. Worth, Texas, Dayton, Ohio, Denver, Colorado, Des Moines, Iowa, Detroit, Michigan, Hartford, Connecticut, Houston, Texas, Indianapolis, Indiana, Long Island, New York, Kansas City, Missouri, Lincoln, Nebraska, Louisville, Kentucky, Memphis, Tennessee, Milwaukee, Wisconsin, Minneapolis/St. Paul, Minnesota, Nashville, Tennessee, New Orleans, Louisiana, New York, New York, Newark, New Jersey, Oklahoma City, Oklahoma, Omaha, Nebraska, Peoria, Illinois, Philadelphia,

Pennsylvania, Pittsburgh, Pennsylvania, Moline, Illinois, Rockford, Illinois, Rochester, New York, St. Louis, Missouri, Sioux Falls, South Dakota, Syracuse, New York, Toledo, Ohio, Tulsa, Oklahoma, Washington, D.C., and White Plains, New York; and the managers of these cities' airports. The complete text of Order 81-5-104 is available from our Distribution Section, Room 516, 1825 Connecticut Avenue, N.W., Washington, D.C. Persons outside the metropolitan area may send a post card request for Order 81-5-104 to the Distribution Section, Civil Aeronautics Board, Washington, D.C. 20428.

By the Civil Aeronautics Board: May 19, 1981.

Phyllis T. Kaylor,

Secretary.

[FR Doc. 81-15537 Filed 5-22-81; 8:45 am]

BILLING CODE 6320-01-M

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q of the Board's Procedural Regulations

Week Ended May 15, 1981.

Subpart Q—Applications

The due date for answers, conforming application or motions to modify scope are set forth below for each application. Following the answer period the board may process the application by expedited procedures. Such procedures may consist of the adoption of a show cause order, a tentative order, or in appropriate cases a final order without further proceeding.

Date filed	Docket No.	Description
May 11, 1981	39620	Air Nauru, c/o Andrew T.A. Macdonald, Wilmer, Cutler & Pickering, 1666 K Street, N.W., Washington, D.C. 20006. Application of Air Nauru pursuant to Section 402 of the Act and Subpart Q of the Board's Procedural Regulations, requests an amendment to its temporary foreign air carrier permit so as (1) to delete existing Segments 3, 4 and 5, and (2) to authorize it to engage in foreign air transportation of persons, property and mail over a new and revised segment 3 and a new Segment 4 as follows. *Segment 3:* Between a point or points in the Republic of Nauru; the intermediate points Ponape and Truk, Trust Territory of the Pacific Islands; Guam; Saipan, Commonwealth of the Northern Mananas; and (a) beyond Saipan, the intermediate points Palau (Belau), Trust Territory of the Pacific Islands; Manila, Philippines; Taipei, Taiwan, and the terminal point Hong Kong; and (b) beyond Saipan, the intermediate points Palau (Belau), Trust Territory of the Pacific Islands; Manila, Philippines; Taipei, Taiwan, and the terminal point Singapore. *Segment 4:* Between a point or points in the Republic of Nauru; the intermediate points Tarawa and Canton Island, Kiribati; Apia, Western Samoa; Pago Pago, American Samoa; Rarotonga, Cook Islands, and the terminal point Papeete, Society Islands. Answers may be filed by June 8, 1981.
May 13, 1981	39628	Air Chicago, Inc., c/o paul M. Ruden, Wilner & Scheiner, 1200 New Hampshire Avenue, N.W., Washington, D.C. 20036. Application of Air Chicago, Inc. pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations, seeks issuance of a certificate of public convenience and necessity authorizing it to engage in scheduled air transportation of persons, property and mail as follows. Between and among the terminal point Chicago, Illinois, and the following alternate terminal points: Atlanta, GA, Baltimore, MD, Boston, MA, Buffalo, NY, Cincinnati, OH, Cleveland, OH, Columbus, OH, Dallas/Ft. Worth, TX, Dayton, OH, Denver, CO, Des Moines, IA, Detroit, MI, Hartford, CT, Houston, TX, Indianapolis, IN, Long Island-MacArthur, NY, Kansas City, MO, Lincoln, NE, Louisville, KY, Memphis, TN, Milwaukee, WI, Minneapolis/St. Paul, MN, Nashville, TN, New Orleans, LA, New York, NY, Newark, NJ, Oklahoma City, OK, Omaha, ME, Peoria, IL, Philadelphia, PA, Pittsburgh, PA, Moline, IL, Rockford, IL, Rochester, NY, St. Louis, MO, Sioux Falls, SD, Syracuse, NY, Toledo, OH, Tulsa, OK, Washington, D.C., White Plains, NY. Conforming Applications, motions to modify scope, and Answers may be filed by June 5, 1981.
May 13, 1981	39631	Eastern Air Lines, Inc., Miami International Airport, Miami, Florida 33148. Conforming Application of Eastern Air Lines, Inc. pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations requests amendment of its certificate of public convenience and necessity for Route 165 so as to authorize nonstop service as follows: Between points in the U.S. and coterminal points in Switzerland, Israel and Jordan. Answers may be filed by May 27, 1981.

Phyllis T. Kaylor,

Secretary.

Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the **Federal Register.**

Regulations (15 CFR 301.9) issued under the cited Act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30 A.M. and 5:00 P.M., Monday through Friday, in Room 3109 of the Department of Commerce Building, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Docket Number 81-00189. Applicant: Wesley Medical School, 550 North Hillside, Wichita, Kansas 67214. Article: Teletherapy Treatment Planning Simulator, Therasim 750. Manufacturer: Atomic Energy of Canada, Ltd., Canada. Intended use of article: The article is intended to be used for the study of malignancy in humans. The phenomena to be investigated is the relevancy of the localization of the site of the occurrence of the disease with the result of treatment. Studies will be conducted which compare cure vs. complications of treatment with previous methods of tumor localization, i.e., ordinary x-ray films, and the more exact method using a treatment simulator. In addition, the article will be used for training students in the following courses:

1. Medical Nuclear Physics II.
2. Radiologic Technology Training Program.
3. Radiology Elective for Medical Students.

Application received by Commissioner of Customs: April 14, 1981.

Docket Number 81-00190. Applicant: The Trustees of the University of Pennsylvania, Purchasing Department, 3451 Walnut Street, 16, Philadelphia, PA 19104. Article: Ultra-High Vacuum 3-Axis Goniometer. Manufacturer: Panmure Instruments, United Kingdom. Intended use of article: The article is intended to be used to perform high resolution (sub0.1A) surface studies using a medium energy ion scattering with channeling and blocking (C/B) complemented with angle resolved ultraviolet photoelectron spectroscopy on reconstructed metal surfaces (Tungsten), rearranged semiconductors (Gallium Antimony and Cadmium Selenium) and reactions on metal surfaces (Nickel) which will be constrasted with Low Energy Electron Diffraction (LEED) results. The techniques used involve: (A) low energy ion scattering (0.5-10 keV), (B) medium energy scattering (50-500 keV) and (C) high energy scattering (>1 MeV). The possibility of performing high-resolution structural studies of clean and adsorbate covered surfaces, using non-destructive techniques opens up new and fascinating possibilities, particularly a number of outstanding problems and obtaining information about phenomena that have so far been beyond reach. Application received by Commissioner of Customs: April 14, 1981.

Docket Number 81-00191. Applicant: Massachusetts Institute of Technology, Room E18-360, Cambridge, MA 02139. Article: Dye Laser, Model FL-2002. Manufacturer: Lambda Physics Inc., France. Intended use of article: The article will provide light of a precise wavelength to excite molecules to energy levels necessary for chemical reaction. The article will also be used by undergraduate and graduate students to learn the fundamentals of laser techniques in Physical Chemistry and Molecules Spectroscopy. Application received by Commissioner of Customs: April 14, 1981.

Docket Number 81-00192. Applicant: University of Cincinnati, Department of Chemistry, Cincinnati, Ohio 45221. Article: High Performance Mass Spectrometer System, MS-80. Manufacturer: Kratos Scientific Instruments, United Kingdom. Intended use of article: The article is intended to be used for a broad range of research topics from studies on the molecular aspects necessary to provide an understanding of basic metabolism and the adverse effects of toxic compounds, to studies on statistics employed in epidemiology, to clinical research involving occupational exposures to chemicals, noise and stress, to the development of methods to safeguard public health and the integrity of the ecosystem under study. Specific projects being carried out include:

(1) Investigation of the pulmonary metabolism of carcinogenic polynuclear aromatic hydrocarbons and N-heterocyclic aromatics in an isolated perfused lung system under various conditions that influence their carcinogenic potential.

2. Mutagenesis and carcinogenesis characterization of organics in drinking water.

(3) Analysis for pesticides and their metabolites.

Application received by Commissioner of Customs: April 14, 1981.

Docket Number 81-00193. Applicant: The Pennsylvania State University, Department of Meteorology, 503 Walker Building, University Park, PA 16802. Article: Sodar SR 101A including WPU-3 Wind Processing Unit. Manufacturer: Sensitron ab, Sweden. Intended use of article: The article is intended to be used for studying the turbulent sensible heat flux in the atmosphere's planetary boundary layer. There is to be a intercomparison study with units of U.S. manufacture. The article will also be used for educational purposes in the course Indirect Atmospheric Probing, Meteorology 520 for familiarization with sodar technology and systems. Application received by Commissioner of Customs: April 14, 1981.

Docket Number 81-00194. Applicant: Southeast Missouri State University, 900 Normal, Cape Girardeau, MO 63701. Article: Microscope Photometer, TM 3-C and Accessories. Manufacturer: Indumess, Austria. Intended use of article: The article is intended to be used for studies of polished sections of ore (opaque crystalline substances). Experiments to be conducted will involve the measurement of dispersion of reflectance for known and unknown opaque minerals occurring in tin-tungsten bearing ore veins in southeastern Missouri. In addition, the

article will be used in the course Ore Deposits (BL420) which is the study of the origin, character and description of metallic ore deposits. The objectives of the course are (i) to introduce the student to the study of ore deposits; (ii) introduce the student to the ore microscope, (iii) provide the student with means to identify opaque minerals by optical-chemical methods and to increase the students' opportunity for employment. Application received by Commissioner of Customs: April 14, 1981.

BILLING CODE 3510-25-M

Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the **Federal Register.**

Regulations (15 CFR 301.9) issued under the cited Act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30 A.M. and 5:00 P.M., Monday through Friday, in Room 3109 of the Department of Commerce Building, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket Number 81-00180. Applicant: Northwestern University Medical School, Department of Pathology, 745 N. Fairbanks Court, Chicago, IL 60611. Article: Election Microscope, Model JEM 100CX and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for studies of biological materials from a variety of organs including heart, kidney, brain and microorganisms. The objectives of these studies will be to provide morphological correlations with biological and physiological phenomena. Studies will localize abnormal proteins in basement membranes, and identify abnormal cells and cellular organelles in injured tissues. Other studies will be conducted to determine membrane structural alterations, cell hormonal receptor sites in normal and chemically induced carcinogenesis. Viruses will be localized and identified in neural tissues. Application received by Commissioner of Customs: April 3, 1981.

Docket Number 81-00181. Applicant: Syracuse University, Department of Chemistry, 108 Bowne Hall, Syracuse, NY 13210. Article: Excimer Laser, Model TE 861S with Unstable Resarator Optics, Models 504RX and 504FX. Manufacturer: Lumonics, Inc., Canada. Intended use of article: The article is intended to be used for the following studies: photo dissociation and kinetics of polyatomic molecules, particularly aldehydes including glyoxal, formaldehyde, acetaldehyde, butyraldehyde, into transient species and determination of the lowest concentrations of these individual aldehydes and the transient species. Each of the species being studied will be selectively excited to a higher energy level and each has particular radiative and nonradiative decay mechanisms. Many of these species formed by dissociation of the aldehydes are very short-lived molecules and are known to be intermediates in the production of atmospheric pollutants. Application received by Commissioner of Customs: April 3, 1981.

Docket Number 81-00183. Applicant: Western Washington University, Bureau for Faculty Research, 430 Old Main, Billingham, Washington 98225. Article: Accessories for Underwater Communication System. Manufacturer: U.D.I. Group Ltd., United Kingdom. Intended use of article: The article is intended to be used in a diving investigation of a unique arctic kelp (biological) community off the northern coast of Alaska. The objective of the study is to learn as much as possible about the biological, ecological, and physical characteristics of the community. Experiments conducted will include growth measurements of biological organisms and observations of the abiotic environment e.g., measurements of turbidity, sedimentation, ice growth, etc. Underwater communications are used exclusively in the collection of this data (which is transmitted directly to the surface and recorded), as well as communication between the divers for safety purposes. The above research program is used in thesis work by graduate students and in "special topic" courses for undergraduate students in the field of marine biology. Application received by Commissioner of Customs: April 6, 1981.

Docket Number 81-00185. Applicant: University of Illinois Urbana-Champaign Campus, Purchasing Division, 223 Administration Building, 506 South Wright Street, Urbana, Illinois 61801. Article: Excimer Laser-Pumped Dye Laser System consisting of EMG 101, FL 2002 and FL 52. Manufacturer: Lambda-Physik GMbH., West Germany. Intended use of article: The article is intended to be used for photodissociation of organic molecules in single revibronic excited states and quantum beat spectroscopy. The article will also be used to teach graduate students working towards the Ph.D. degree in Chemistry some of the techniques for applying lasers to atomic and molecular research. Application received by Commissioner of Customs: April 8, 1981.

Docket Number 81-00186. Applicant: Temple University School of Medicine, Department of Microbiology & Immunology, 3400 North Broad Street, Philadelphia, Pennsylvania 19104. Article: Bulk Specimen Holder Accessory, Model H-5001B. Manufacturer: Hitachi Scientific Instruments, Japan. Intended use of article: The article is an accessory to an existing electron microscope that will be used in the study of the structure and synthesis of bacterial cell walls and membranes; the division of bacteria; the morphogenetic process that is involved in converting the yeast, Candida albicans, into a human pathogen; the role of cyclic nucleotides in the mitogenic response in lymphoblastoid cell-lines produced by transforming isolated blood lymphocytes with Epstein-Barr Virus. The specimens to be examined with the article will be examined in the secondary scanning mode. The article will also be used in the training of graduate students in the use of electron microscopy. Application received by Commissioner of Customs: April 10, 1981.

Docket Number 81-00187. Applicant: University of Maryland, Baltimore County, 5401 Wilkens Avenue, Catonsville, Maryland 21228. Article: 35mm Camera, Model JEM 100CX-A35-4 for Electron Microscope Model 100CX. Manufacturer: Japan Electron Optics Laboratory, Japan. Intended use of article: The article is an accessory to an existing electron microscope that will be used to record electron microscopic images on 35mm photograhic films.

Several investigators in a variety of biological and biochemical fields will use the article. In general, DNAs and RNAs isolated from phages, bacteria, algae, and higher organisms will be studied under the electron microscope. In all cases, statistical data have to be collected and analyzed. In addition, the article will be used in the training of graduate and undergraduate students. Application received by Commissioner of Customs: April 10, 1981.

Docket Number 81-00188. Applicant: Vanderbilt University, Department of Electrical Eng., P.O. 1631B, Nashville, TN 37235. Article: Visual Display Generator. Manufacturer: Joyce Electronics, United Kingdom. Intended use of article: The article is intended to be used to generate visual stimuli for testing the behavior of cells in the brain which are responsible for vision. In particular, it is to suport work on a research project entitled "Spatial adaptation of neurons in cat striate cortex." Stimuli produced on the screen will elicit responses in the brains of experimental animals (cats). These responses, either in the form of slow waves (the visually-evoked potential) or nerve spikes, will be stored in digital form on a computer. The work is intended to clarify the mechanisms which support the capacity of cells in the visual cortex to act as spatial filters. In addition, the article will be used as a training tool for the graduate students working on research projects in the laboratory. Application received by Commissioner of Customs: April 13, 1981.

BILLING CODE 3510-25-M

Canned Tomato Paste From France; Preliminary Results of Administrative Review of Countervailing Duty Order and of Tentative Determination To Revoke

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice of Preliminary Results of Administrative Review of Countervailing Duty Order and of Tentative Determination To Revoke.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order on canned tomato paste from France. As a result, the Department has tentatively determined to revoke such order on the grounds that the subsidy practices which resulted in the final determination have been terminated. Interested parties are invited to comment on this decision.

EFFECTIVE DATE: May 26, 1981.

FOR FURTHER INFORMATION CONTACT: Joseph Black or Josephine Russo, Office of Compliance, Room 1126, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230 (202-377-1774 or 377-2786).

SUPPLEMENTARY INFORMATION:

Procedural Background

A notice of "Final Countervailing Duty Determination," T.D. 68-111, was published in the **Federal Register** of April 19, 1968 (33 FR 6010).

The notice stated that the Treasury Department had determined that exports of canned tomato paste from France were provided bounties or grants, within the meaning of section 303 of the Tariff Act of 1930 (19 U.S.C. 1303) ("the Tariff Act"). Accordingly, imports into the United States of this merchandise were subject to countervailing duties.

On August 22, 1979 a notice of "Final Countervailing Duty Determination" was published in the **Federal Register** (44 FR 49248) regarding exports of tomato products from the European Communities ("the EC"). On January 1, 1980, the provisions of title I of the Trade Agreements Act of 1979 ("the TAA") became effective. On January 2, 1980, the authority for administering the countervailing duty law was transferred from the Department of the Treasury to the Department of Commerce ("the Department"). The Department published in the **Federal Register** of May 13, 1980 (45 FR 31455) a notice of intent to conduct administrative reviews of all outstanding countervailing duty orders. As required by section 751 of the Tariff Act, the Department has conducted an administrative review of the order on canned tomato paste from France.

Scope of the Review

Imports covered by this review are canned tomato pastes, currently classifiable under item number 141.65 of the Tariff Schedules of the United States (TSUS).

Preliminary Results of Review

As a result of our review, we preliminarily conclude that the imported merchandise no longer benefits from subsidies from the Government of France. The Department has received official confirmation from the Government of France that the government has ended all subsidy programs on this merchandise. The French subsidy programs were replaced by the EC subsidies. The International Trade Commission found no injury by reason of the EC subsidies and we revoked the order on tomato products from the EC on October 24, 1980.

Therefore, in accordance with § 355.42(c)(2) of the Commerce Regulations, the Department has tentatively determined to revoke the countervailing duty order concerning canned tomato paste. If this order is revoked, it shall apply with respect to unliquidated entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. The Department is not aware of any unliquidated entries prior to August 22, 1979, the effective date of the order on tomato products from the EC. Since any entries of French tomato paste only received subsidies under the programs of the EC since that date, entries made on or after August 22, 1979, through December 31, 1979, shall be liquidated in accordance with the EC order. The revocation on tomato products from the EC required liquidation of all entries made on or after January 1, 1980 without regard to countervailing duties. Consequently, the Department intends to instruct Customs offers to proceed with liquidation of all such entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after January 1, 1980 without regard to countervailing duties.

Interested parties may submit written comments on or before June 25, 1981 and may request disclosure and/or a hearing within 15 days of the date of publication. Any request for an administrative protective order must be made within 5 days of the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of issues raised in written comments or at a hearing.

This administrative review, tentative determination to revoke, and notice are in accordance with sections 751(a)(1), (c) of the Tariff Act (19 U.S.C. 1675(a)(1), (c)) and § 355.42 of the Commerce Regulations (19 CFR 355.42).

B. Waring Partridge III,

Acting Deputy Assistant Secretary for Import Administration.

May 19, 1981.

BILLING CODE 3510-25-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcing Import Levels for Certain Cotton and Manmade Fiber Textile Products from the Dominican Republic, Effective on June 1, 1981

May 20, 1981.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Establishing import restraint levels for certain cotton and manmade fiber textile products, produced or manufactured in the Dominican Republic and exported to the United States during the twelve-month period beginning on June 1, 1981.

SUMMARY: The Bilateral Cotton, Wool and Manmade Fiber Textile Agreement of August 7 and 8, 1979, as amended, between the Government of the United States and the Dominican Republic established specific levels of restraint for Categories 340 (men's and boys' woven cotton shirts), 351 (cotton nightwear), 639 (women's, girls' and infants manmade fiber knit shirts and blouses), and 649 (manmade fiber brassieres and other body supporting garments) during the agreement year which begins on June 1, 1981 and extends through May 31, 1982. Accordingly, in the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs, under the terms fo the bilateral agreement, to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, of textile products in the foregoing categories, produced or manufactured in the Dominican Republic and exported during the twelve-month period which begins on June 1, 1981 and extends through May 31, 1982, in excess of the designated levels of restraint.

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506) and December 24, 1980 (45 FR 85142), and May 5, 1981 (46 FR 25121))

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Paul T. O'Day,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

May 20, 1981.

Commissioner of Customs, Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Cotton, Wool and Man-Made Textile Agreement of August 7 and 8, 1979, as amended, between the Governments of the United States and the Dominican Republic; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on June 1, 1981 and for the twelve-month period extending through May 31, 1982, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in Categories 340, 351, 639, and 649, produced or manufactured in the Dominican Republic, in excess of the following levels of restraint:

Category	Twelve-month level of restraint (dozen)
340	139,678
351	324,167
639	314,848
649	1,500,000

In carrying out this directive entries of textile products in the foregoing categories, produced or manufactured in the Dominican Republic, which have been exported to the United States on and after June 1, 1980, and extending through May 31, 1981, shall, to the extent of any unfilled balances, be charged against the levels of restraint established for such goods during the twelve-month period beginning on June 1, 1980 and extending through May 31, 1981. In the event that the levels of restraint established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter.

The levels of restraint set forth above are subject to adjustment pursuant to the provisions of the bilateral agreement of August 7 and 8, 1979, as amended, between the Governments of the United States and the Dominican Republic which provide, in part, that: (1) specific limits may be exceeded by designated percentages to account for swing; (2) specific limits may also be increased for carryover and carryforward up to 11 percent of the applicable category limit; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Any appropriate future adjustments under the foregoing provisions of the bilateral agreement will be made to you by letter.

A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506) and December 24, 1980 (45 FR 85142), and May 5, 1981 (46 FR 25121).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of the Dominican Republic and with respect to imports of cotton and man-made fiber textile products from the Dominican Republic have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register.**

Sincerely,

Paul T. O'Day

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-25-M

DELAWARE RIVER BASIN COMMISSION

Pennsylvania Department of Environmental Resources and the Delaware River Basin Commission; Joint Hearing

Notice is hereby given that the Pennsylvania Department of Environmental Resources and the Delaware River Basin Commission will jointly hold a public hearing on Wednesday, June 10, 1981, commencing at 3:00 p.m. The hearing will be held at the Boyertown Area High School Auditorium, 4th and Monroe Street, Boyertown, Pennsylvania 19512.

The subject of the hearing will be an application by the Borough of Boyertown (100 South Washington Street, Boyertown, Pennsylvania 19512) to increase the existing water supply allocation from Trout Run Reservior (about 1.3 miles upstream from the confluence of Trout Run with Manatawny Creek in Earl Township, Berks County) from 900,000 gallons per day to 961,000 gallons per day. The Borough also seeks to acquire new water rights to withdraw 836,000 gallons per day from Ironstone Creek at a point about seven-tenths (0.7) mile northwest of Boyertown and to withdrawn 203,000 gallons per day from the existing Boyertown Reservoir located on Popodickon Creek which is a tributary to Ironstone Creek in Earl Township, Berks County. The requested allocation of all three sources totals 2.0 million gallons of water per day.

The application was filed with the Pennsylvania Department of Environmental Resources under the 1939 Water Rights Act (P.L. 842) as amended

(32 P.S. § 691 et. seq.). It was referred to the Delaware River Basin Commission on October 8, 1980 for review in accordance with the Delaware River Basin Compact and the Commission's Rules of Practice and Procedure. The hearing will be to assist the Commission in determining whether the application by the Borough of Boyertown should be included in the Comprehensive Plan for the Delaware River Basin and approved pursuant to Section 3.8 of the Compact.

Section 7 of the Water Rights Act outlines the duties of the Department of Environmental Resources to investigate water allocation requests and consider conflicts of interest. Approval of the requested allocation shall be given where it is determined that the proposed sources of supply:

1. Will not conflict with the water rights held by any other public water supply agency.
2. Are reasonably necessary for the present purposes and future needs of the public water supplier making application.
3. Will not interfere with navigation.
4. Will not jeopardize public safety.
5. Will not cause substantial injury to the Commonwealth.
6. Will be utilized in conjunction with water conservation measures.

The Department of Environmental Resources has received numerous letters and a petition objecting to the proposed withdrawal from Ironstone Creek on the grounds that it will interfere with public safety and downstream users. The Pennsylvania Fish Commission has recommended that no more than 15 percent of the average daily flow or about 850,000 gallons per day be taken from Ironstone Creek by the Borough of Boyertown. The Fish Commission also has recommended that at least 15 percent of the average daily flow of Ironstone Creek or about 850,000 gallons per day be allowed to pass the intake at all times. Under this proposal, the Borough of Boyertown would not be able to utilize Ironstone Creek if the flow were less than 850,000 gallons per day. The Department will hear and receive testimony on all issues to aid in its determination of the conditions that should be imposed to protect public safety and downstream users.

The hearing will be held from 3:00 p.m. to 5:30 p.m. and will resume with an evening session at 7:00 p.m. Interested parties are invited to attend the June 10th hearing and to participate by making oral or written statements presenting their data, views and comments on the subject. Persons wishing to testify are requested to register with W. Brinton Whitall, Secretary to the Commission, P.O. Box 7360, West Trenton, New Jersey 08628, (609–883–9500), prior to the hearing.

The application and documents relating thereto may be examined at the Department of Environmental Resources office, Third and Reily Street, Harrisburg, Pennsylvania or at the Delaware River Basin Commission office, 25 State Police Drive, West Trenton, New Jersey.

W. Brinton Whitall,

Secretary.

May 20, 1981.

BILLING CODE 6360-1-M

DEPARTMENT OF ENERGY

National Petroleum Council, Water Quality Task Group of the Committee on Environmental Conservation; Rescheduled Meeting

This notice is given to advise of the rescheduling of the sixth meeting of the Water Quality Task Group of the Committee on Environmental Conservation. The meeting will be on Thursday, May 28, 1981, in lieu of the date announced in the April 2, 1981, issue of the **Federal Register** (46 FR 19971).

Issued at Washington, D.C. on May 15, 1981.

Roger W. A. LeGassie,

Acting Assistant Secretary for Fossil Energy.

May 15, 1981.

[FR Doc. 81-15475 Filed 5-22-81; 8:45 am]

BILLING CODE 6450-01-M

Proposed Subsequent arrangements

Pursuant to Section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of proposed "subsequent arrangements" under the Additional Agreement for Cooperation Between the Government of the United States of America and the European Atomic Energy Community (EURATOM) Concerning Peaceful Uses of aTomic Energy, as amended.

The subsequent arrangements to be carried out under the above mentioned agreement involve approval for the conversion of Long-Term, Fixed Commitment Uranium Enrichment contracts to the Adjustable, Fixed Commitment contracts at the customers option as shown below:

Contract No.	Customer	Facility
EU-126	COGEMA	Fessenheim-2
EU-130	COGEMA	Bugey-5

In accordance with Section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that the conversion of these contracts to the Adjustable, Fixed Commitment contract form will not be inimical to the common defense and security.

These subsequent arrangements will take effect no sooner than June 10, 1981.

For the Department of Energy.

Dated: May 19, 1981.

Harold D. Bengelsdorf,

Director for Nuclear Affairs, International Nuclear and Technical Programs.

[FR Doc. 81-15473 Filed 5-22-81; 8:45 am]

BILLING CODE 6450-01-M

Proposed Subsequent Arrangements

Pursuant to Section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of proposed "subsequent arrangements" under the Additional Agreement for Cooperation Between the Government of the United States of America and the European Atomic Energy Community (EURATOM) Concerning Peaceful Uses of Atomic Energy, as amended, the Agreements for Cooperation Between the United States of America and the Governments of Japan, Spain, Sweden, and Switzerland Concerning Civil Uses of Atomic Energy, as amended, and the Agreement for Cooperation Between the Government of the United States of America and the International Atomic Energy Agency Concerning Peaceful Application of Atomic Energy, as amended.

The subsequent arrangements to be carrier out under the above mentioned agreements involves contractual arrangements under which DOE will consent, if requested, to the assignments of portions of various uranium enrichment services contracts held by U.S. and foreign utilities to various European and Japanese utilities as shown below:

Company	Separative work units	Fiscal year
COGEMA	40,000	1985
COGEMA	60,000	1986
COGEMA	400,000	1987
Tokyo Electric Power Co	160,000	1985
Tokyo Electric Power Co	150,000	1986
Tokyo Electric Power Co	1,000,000	1987
Japan Atomic Power Co	150,000	1987
Kyushu Electric Co.	15,000	1985
Kyushu Electric Co	150,000	1986
Kyushu Electric Co.	400,000	1987

In accordance with Section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that entering into these subsequent arrangements will not be inimical to the common defense and security. It has furthermore been determined that the assignment of these

enrichment services complies with the provisions of Pub. L. 96-280 permitting the supply of additional low-enriched uranium under international agreements for cooperation in the civil uses of atomic energy.

These subsequent arrangements will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: May 19, 1981.

Harold D. Bengelsdorf,

Director for Nuclear Affairs, International Nuclear and Technical Programs.

[FR Doc. 81-15474 Filed 5-22-81; 8:45 am]

BILLING CODE 6450-01-M

Economic Regulatory Administration

[Docket No. ERA-FC-80-012; (OFC Case No. 50180-6464-01-77)]

Basin Electric Power Cooperative; Classification

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of Classification—Basin Electric Power Cooperative.

SUMMARY: On January 23, 1980, the Basin Electric Power Cooperative filed a request with the Economic Regulatory Administration (ERA) to classify an auxiliary boiler being installed at its Antelope Valley Station in rural Mercer County approximately seven miles northwest of Beulah, North Dakota, as an existing installation pursuant to 10 CFR Part 515 (44 FR 60690, October 19, 1979, as amended, 44 FR 69919, December 5, 1979) and the Powerplant and Industrial Fuel Use Act of 1978, 42 U.S.C. § 8301 *et seq.*, (FUA). A summary of Basin Electric Power Cooperative's request was published in the **Federal Register** on May 13, 1980, at 45 FR 31461. The public comment period provided in the notice expired on May 29, 1980. No comments were received.

Pursuant to 10 CFR § 515.13(b), ERA has determined that the auxiliary boiler being installed is an existing installation and is therefore subject to the provisions of Title III of FUA.

FOR FURTHER INFORMATION CONTACT:

Anthony M. Vaitekunas, Case Manager, New MFBI Branch, Office of Fuels Conversion, Economic Regulatory Administration, 2000 M Street NW., Room 3128-K, Washington, D.C. 20461, (202) 653-4237

Edward Jiran, Office of the General Counsel, Department of Energy, Forrestal Building, Room 6B-178, 1000 Independence Avenue SW., Washington, D.C. 20585, (202) 252-2967.

SUPPLEMENTARY INFORMATION: The MFBI for which the request for classification was filed is a package boiler, designated "Auxiliary Boiler" by the Basin Electric Power Cooperative, and is being installed at the Antelope Valley Station. The boiler has a design capability to consume fuel at a heat input rate of 137.7 million Btu's per hour and will be used for startup of the main lignite-fired generators and for emergency heat for plant facilities when the main generating units are not operating. The auxiliary boiler will use No. 2 fuel oil as its primary energy source. Basin Electric Power Cooperative established eligibility to request classification of its Auxiliary Boiler by satisfactorily demonstrating, pursuant to 10 CFR § 515.10, that it had executed a contract for the construction or acquisition of its auxiliary boiler prior to November 9, 1978. Basin Electric Power Cooperative claims that its auxiliary boiler should be classified as existing pursuant to 10 CFR § 515.13(b) on the basis that cancellation, rescheduling or modification of the unit at November 9, 1978, would have resulted in significant operational detriment.

Based upon its review of Basin Electric Power Cooperative's request, ERA has determined that Basin Electric Power Coopeative has satisfactorily demonstrated that the modification of its construction plans for the Antelope Valley Station on November 9, 1978, in order to use an alternate fuel, would have resulted in significant operational detriment. Accordingly, Basin Electric Power Cooperative's auxiliary boiler at the Antelope Valley Station is classified as an existing installation pursuant to 10 CFR § 515.13(b), and is therefore subject to the provisions of Title III of FUA.

The public file containing documents of these proceedings, including ERA's analyses of Basin Electric Power Cooperative's request, is available for inspection upon request at: Economic Regulatory Administration, Room B-110, 2000 M Street NW., Washington, D.C. 20461, Monday through Friday, 8:00 a.m.-4:30 p.m.

Issued in Washington, D.C. on May 18, 1981.

Robert L. Davies,

Director, Office of Fuels Conversion, Economic Regulatory Administration.

[FR Doc. 81-15469 Filed 5-22-81; 8:45 am]

BILLING CODE 6450-01-M

[Docket No. ERA-FC-80-043 (ERA Case No. 51209-1393-27-22)]

Gulf States Utilities Co.; Roy S. Nelson Unit No. 7; Decision and Order Granting Exemption From the Prohibitions of the Powerplant and Industrial Fuel Use Act of 1978

The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby issues this Decision and Order to Gulf States Utilities Company (GSU) granting a permanent peakload exemption from the prohibitions against (1) the use of petroleum or natural gas as a primary energy source by new powerplants and (2) the construction of new powerplants without the capability to use an alternate fuel as a primary energy source, which are contained in Section 201 of the Powerplant and Industrial Fuel Use Act of 1978, 42 U.S.C. 8301 *et. seq.* (FUA or the Act).

Background

On December 9, 1980, GSU filed a petition with ERA for a permanent peakload powerplant exemption to enable it to use oil or natural gas as a primary energy source in a 114,828 kW oil or natural gas-fired combustion turbine powerplant to be known as Roy S. Nelson Unit No. 7 and which is to be located in West Lake, Louisiana. ERA accepted the petition on February 2, 1980, and published a Notice of Acceptance, together with a statement of the reasons set forth in the petition for requesting the exemption, in the **Federal Register** on February 6, 1981 (46 FR 11337).

Publication of the notice of acceptance commenced a 45-day public comment period pursuant to section 701 of FUA. During this period, which ended on March 23, 1981, interested parties were also afforded an opportunity to request a public hearing. No comments or requests for a public hearing were received.

ERA's staff reviewed the information contained in the record of the proceeding. A Tentative Staff Analysis (TSA) recommended that ERA issue an order granting GSU a permanent peakload powerplant exemption to use oil or natural gas in Roy S. Nelson Unit No. 7, subject to certain terms and conditions. A notice of availability of the TSA was published in the **Federal Register** on April 17, 1981 (46 FR 22425). The publication of the notice of availability opened a 14-day public comment period which ended May 1, 1981, during which no comments were received.

On the basis of ERA's review of the entire record of this proceeding, ERA has determined to grant the exemption requested by GSU to use oil or natural gas in Roy S. Nelson Unit No. 7, subject to the terms and conditions enumerated below.

On August 11, 1980, DOE published in the **Federal Register** (45 FR 53199) a notice of proposed amendments to the guidelines for compliance with the National Environmental Policy Act of 1969 (NEPA). Pursuant to the guidelines, the grant or denial of certain FUA permanent exemptions, including the permanent exemption by certification for a peakload powerplant, was identified as an action which normally does not require an Environmental Impact Statement or an Environmental Assessment pursuant to NEPA (categorical exclusion).

This classification raises a rebuttable presumption that the grant or denial of the exemption will not significantly affect the quality of the human environment. GSU has certified that it will secure all applicable permits and approvals prior to commencement of operation of the new unit under exemption. The Environmental Checklist completed and certified to by GSU pursuant to 10 CFR § 503.15(b) has been reviewed by DOE's Office of Environment, in consultation with the Office of the General Counsel. GSU's responses to the questions contained therein indicate that the operation of the peakload powerplant will have no impact on those areas regulated by specified laws that impose consultation requirements on DOE, and otherwise affirm the applicability of the categorical exclusion to this FUA action. ERA has not received any public comments relating to this action which raise a substantial question regarding the categorical exclusion status in this case. Therefore, no additional environmental review is deemed to be required.

DATE: This order will take effect on July 25, 1981.

ADDRESSES: FOR FURTHER INFORMATION CONTACT:

Jack C. Vandenberg, Office of Public Information, Economic Regulatory Administration, Department of Energy, 2000 M Street, NW., Room B–110, Washington, D.C. 20461, Phone (202) 653–4055

Louis T. Krezanosky, Office of Fuels Conversion, Economic Regulatory Administration, Department of Energy, 2000 M Street, NW., Room 3012 B, Washington, D.C. 20461, Phone (202) 653–4208

Christina Simmons, Office of General Counsel, Department of Energy, 1000 Independence Avenue SW., Room 6B–178, Washington, D.C. 20585, Phone (202) 252–2967.

SUPPLEMENTARY INFORMATION: The Powerplant and Industrial Fuel Use Act of 1978, 42 U.S.C. 8301 *et seq.* (FUA or the Act), prohibits the use of natural gas or petroleum in certain new major fuel burning installations and powerplants unless an exemption for such use has been granted by ERA.

Gulf States Utilities (GSU) plans to install a 114,828 KW natural gas/oil-fired combustion turbine unit to be called Roy S. Nelson Unit No. 7 located in West Lake, Louisiana. Based upon estimates by GSU, the proposed unit is expected to consume approximately 313,000 barrels of No. 2 fuel oil per year. The unit is scheduled for commercial operation in May 1982.

GSU submitted a sworn statement with the petition signed by Mr. J. H. Derr, Jr., Vice President of GSU, as required by 10 CFR § 503.41(b)(1). In his statement, Mr. Derr certified that Roy S. Nelson Unit No. 7 will be operated solely as a peakload powerplant only to meet peakload demand for the life of the plant. He also certified that the maximum design capacity of the unit is 114,828 KW and that the maximum generation that the unit will be allowed during any 12-month period is the design capacity times 1,500 hours or 172,242,000 Kwh.

Order

ERA hereby grants to GSU a permanent exemption from the prohibitions of FUA with respect to the use of oil or natural gas in Roy S. Nelson Unit No. 7 provided that the powerplant is operated solely as a peakload powerplant and to meet peakload demand subject to the following terms and conditions imposed pursuant to the authority granted to ERA by section 214(a) of the Act:

Terms and Conditions

A. GSU shall not produce more than 172,242,000 Kwh during any 12-month period with the proposed unit. GSU shall provide annual estimates of the expected periods (hours during specific months) of operation of Roy S. Nelson Unit No. 7 for peakload purposes (e.g., 8:00–10:00 a.m. and 3:00–6:00 p.m. during the June-September period, etc.). Estimates of the hours during which GSU expects to operate Unit No. 7 during the first 12-month period shall be furnished within 30 days from the date of this order.

B. GSU shall comply with the reporting requirements set forth in 10 CFR 503.41(d).

c. The quality of any petroleum to be burned in this unit will be the lowest grade available which is technically feasible and capable of being burned consistent with applicable environmental requirements.

D. This order shall take effect July 25, 1981.

Issued in Washington, D.C. on May 18, 1981.

Robert I. Davies,

Office Director, Office of Fuels Conversion, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[Docket No. ERA–FC–80–039 (ERA Case No. 51892–2092–23–22)]

Missouri Public Service Co., Ralph Green Unit No. 3; Decision and Order Granting Exemption From the Prohibitions of the Powerplant and Industrial Fuel Use Act of 1978

The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby issues this Decision and Order to Missouri Public Service Company (MPS) granting a permanent peakload exemption from the prohibitions against (1) the use of natural gas as a primary energy source by new powerplants and (2) the construction of new powerplants without the capability to use an alternate fuel as a primary energy source, which are contained in section 201 of the Powerplant and Industrial Fuel Use Act of 1978, 42 U.S.C. § 8301 *et seq.* (FUA or the Act).

Background

On November 7, 1980, MPS filed a petition with ERA for a permanent peakload powerplant exemption to enable it to use natural gas as a primary energy source in a 77,885 kilowatt natural gas-fired combustion turbine powerplant to be known as Ralph Green Unit No. 3, which is to be located in Pleasant Hill, Missouri. ERA accepted the petition on January 11, 1981, and published a Notice of Acceptance, together with a statement of the reasons set forth in the petition for requesting the exemption, in the **Federal Register** on January 19, 1981 (46 FR 5043). Publication of the notice of acceptance commenced at 45-day public comment period pursuant to section 701 of FUA. During this period, which ended on March 5, 1981, interested parties were also afforded an opportunity to request a public hearing.

Comments on MPS's petition were received from the Missouri Department of Natural Resources. No public hearing was requested.

ERA's staff reviewed the information contained in the record of the proceeding. A Tentative Staff Analysis (TSA) recommended that ERA issue an order granting MPS a permanent peakload powerplant exemption to use natural gas in Ralph Green Unit No. 3 subject to certain terms and conditions. A notice of availability of the TSA was published in the **Federal Register** on April 14, 1981 (46 FR 21802). The publication of the notice of availability opened a 14-day public comment period which ended April 28, 1981, during which no comments were received.

On the basis of ERA's review of the entire record of this proceeding, including a review of the public comments received after publication of the notice of acceptance, ERA has determined to grant the exemption requested by MPS to use natural gas in Ralph Green Unit No. 3, subject to the terms and conditions enumerated below.

On August 11, 1980, DOE published in the **Federal Register** (45 FR 53199) a notice of proposed amendments to the guidelines for compliance with the National Environmental Policy Act of 1969 (NEPA). Pursuant to the guidelines, the grant or denial of certain FUA permanent exemptions, including the permanent exemption by certification for a peakload powerplant, was identified as an action which normally does not require an Environmental Impact Statement or an Environmental assessment pursuant to NEPA (categorical exclusion).

This classification raises a rebuttable presumption that the grant or denial of the exemption will not significantly affect the quality of the human environment. MPS has certified that it will secure all applicable permits and approvals prior to commencement of operation of the new unit under exemption.The Environmental Checklist completed and certified to by MPS pursuant to 10 CFR § 503.15(b) has been reviewed by DOE's Office of Environment, in consultation with the Offices of the General Counsel. MPS's responses to the questions contained therein indicate that the operation of the peakload powerplant will have no impact on those areas regulated by specified laws that impose consultation requirements on DOE, and otherwise affirm the applicability of the categorical exclusion to this FUA action. ERA has not received any public comments relating to this action which raise a substantial question regarding the categorical exclusion status in this case. Therefore, no additional environmental review is deemed to be required.

DATES: This order will take effect on July 25, 1981.

ADDRESSES: FOR FURTHER INFORMATION CONTACT:

Jack C. Vandenberg, Office of Public Information, Economic Regulatory Administration, Department of Energy, 2000 M Street NW., Room B–110, Washington, D.C. 20461, Phone (202) 653–4055

Louis T. Krezanosky, Office of Fuels Conversion, Economic Regulatory Administration, Department of Energy, 2000 M Street NW., Room 3012 B, Washington, D.C. 20461, Phone (202) 653–4208

Christina Simmons, Office of General Counsel, Department of Energy, 1000 Independence Avenue SW., Room 6B–178, Washington, D.C. 20585, Phone (202) 252–2967.

SUPPLEMENTARY INFORMATION: The Powerplant and Industrial Fuel Use Act of 1978, 42 U.S.C. § 8301 *et seq.* (FUA or the Act), prohibits the use of natural gas or petroleum in certain new major fuel burning installations and powerplants unless an exemption for such use has been granted by ERA.

Missouri Public Service Company (MPS) plans to install a 77,885 KW natural gas combustion turbine unit to be called Ralph Green Unit No. 3 located in Pleasant Hill, Missouri. The unit is scheduled for commercial operation in May 1981. MPS submitted a sworn statement with the petition signed by Mr. Richard Green, President of MPS, as required by 10 CFR § 503.41(b)(1). In his statement, Mr. Green certified that the unit will be operated solely as a peakload powerplant and will be operated only to meet peakload demand fot the life of the plant. He also certified that the maximum design capacity of the unit is 77,885 KW and that the maximum generation that the unit will be allowed during any 12-month period is the design capacity times 1,500 hours or 116,827,500 Kwh.

On February 10, 1981, the Missouri Department of Natural Resources (MDNR) advised ERA that after reviewing MPS's petition submitted to ERA, MDNR should have no problems issuing environmental permits for Ralph Green Unit No. 3 and encourage granting MPS's exemption request.

Order

ERA hereby grants to MPS a permanent exemption from the prohibitions of FUA with respect to the use of natural gas in Ralph Green Unit No. 3 provided that the powerplant is operated solely as a peakload powerplant and to meet peakload demand subject to the following terms and conditions imposed pursuant to the authority granted to ERA by section 214(a) of the Act:

Terms and Conditions

A. MPS shall not produce more than 116,827,500 Kwh during any 12-month period with the proposed unit. MPS shall provide annual estimates of the expected periods (hours during specific months) of operation of Ralph Green Unit No. 3 for peakload purposes (e.g., 8:00–10:00 a.m. and 3:00–6:00 p.m. during the June–September period, etc.). Estimates of the hours during which MPS expects to operate Ralph Green Unit No. 3 during the first 12-month period shall be furnished within 30 days from the date of this order.

B. MPS shall comply with the reporting requirements set forth in 10 CFR § 503.41(d).

C. this order shall not take effect earlier than July 25, 1981.

Issued in Washington, D.C. on May 18, 1981.

Robert L. Davies,

Office Director, Office of Fuels Conversion, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Case No 52970-9039-01, 02, 03, 04-82]

Tucson Electric Power Co.; Public Hearing

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of hearing.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives notice that it will hold a public hearing concerning pending prohibition order proceedings under section 301(c) of the the Powerplant and Industrial Fuel Use Act of 1978 (FUA or the Act) relating to Tucson Electric Power Company's (TEP) Irvington Generating Station Units 1, 2, 3 and 4 (Irvington), located in Tucson, Arizona.

DATE: The hearing will be held beginning at 9:30 a.m. on June 22, 1981.

ADDRESS: Tucson Community Center, Greenley Room, 260 South Church Street, Tucson, Arizona.

FOR FURTHER INFORMATION CONTACT:

Jack C. Vandenberg, Office of Public Information, Economic Regulatory Administration, Department of Energy, 2000 M Street, N.W., Room B–110, Washington, D.C. 20461 (202) 653–4055

Kathleen J. Ewing, FUA Public Hearings Staff, Economic Regulatory Administration, Case Control unit, Box 4629, Room 3009, 2000 M Street, N.W., Washington, D.C. 20461 (202) 653–4258

Marilyn Ross, Office of General Counsel, Department of Energy, 1000 Independence Ave., S.W., Room 6B–178, Washington, D.C. 20585 (202) 252–2967

SUPPLEMENTARY INFORMATION: On December 31, 1980, ERA issued proposed prohibition orders pursuant to section 301(c) of RUA, to TEP's Irvington Station (46 FR 1769, January 7, 1981). The proposed orders, if finalized, would prohibit the units from burning petroleum (or natural gas) in a mixture with an alternate fuel (coal) in amounts in excess of the minimum amounts necessary to maintain reliability of operation of the units consistent with maintaining reasonable fuel efficiency.

In accordance with 10 CFR 501.51(b), the publication of the proposed orders commenced an initial public comment period of three months, during which period interested parties, including the utility, were given the opportunity to challenge ERA's initial finding that it is technically feasible for the Irvington units to use a mixture of petroleum or natural gas and coal, alternately burned, as a primary energy source. During this period, the proposed order recipient and any other interested parties were required to furnish ERA with any evidence bearing upon the other statutory findings which section 301(c) of FUA requires ERA to make prior to the issuance of final prohibition orders. The recipient of the proposed orders was also required, during this period, to identify any exemptions for which the Irvington units might qualify. The initial public comment period on the Irvington proposed prohibition orders expired on April 7, 1981. No comments were received nor did the proposed order recipient assert qualifications for any exemption from the prohibition of the proposed orders.

on May 4, 1981, a public meeting was held in Tucson, Arizona for the purpose of identifying key issues, including environmental issues, associated with the issuance of the proposed orders. Presentations were made by ERA, TEP, the Southwest Gas Corporation and the Sierra Club, Grand Canyon Chapter. A copy of the transcript of the meeting is contained in the public record of the proceeding, available through the Office of Public Information at the address above. In addition, a copy of the public record will be available for inspection at the Tucson Public Library, Main Library, at 200 South 6th Avenue, Tucson, Arizona.

On the basis of all of the evidence available to it, ERA determined to continue with the order proceeding, and on May 15, 1981, issued a combined Notice of Intention to Proceed (NOIP), pursuant to 10 CFR 501.51(b)(4) and Notice of Availability of Tentative Staff Analysis pursuant to 10 CFR 501.51(b)(6) (46 FR 27155, May 18, 1981). The NOIP normally would begin a second three-month comment period. However, TEP requested that the remaining public comment periods provided for by 10 CFR 501.51 be combine and reduced to a single comment period of 145 days, as permitted by 10 CFR 501.51(b)(8). ERA granted this request and gave notice that a 45-day public comment period would commence with publication of the NOIP and Notice of Availability of the Tentative Staff Analysis (46 FR 27155, May 18, 1981).

The ERA staff prepared a Tentative Staff Analysis in which it concluded that the findings required by section 301(c) of FUA can be made, and it recommended that final prohibition orders should be issued to TEP.

A copy of the Tentative Staff Analysis is available from the Office of Public Information at the address listed above. Following the publication of the NOIP and notice of Availability of the Tentative Staff Analysis, ERA received requests for a public hearing from Southern Arizonans for Fair Energy Rates and the Phoenix Building and Construction Trades Council. ERA has determined to grant these requests, and has appointed Lawrence A. Gollomp, Esq., Acting Assistant General Counsel for Regulatory Interventions, as the Presiding Officer in the proceeding.

At the public hearing, ERA will provide interested persons an opportunity to present oral or written data, views and arguments on the petitions for exemption. In addition, in accordance with 10 CFR 501.34(f), interested persons will be given an opportunity to question (1) other interested persons who make oral presentations, (2) employees and contractors of the United States who have made written or oral presentations or who have participated in the prohibition order proceedings, and (3) experts and consultants who have provided information to any person who makes an oral presentation and which information is contained in or referred to in such presentation.

Persons who wish to participate in the hearing or who wish to be included on the service list, must submit their names to the Presiding Officer, c/o FUA Public Hearing Staff, Economic Regulatory Administration, Case Control Unit (FUA), Box 4629, Room 3009, 2000 M Street, N.W., Washington, D.C. 20461. ERA encourages persons who wish to participate in the hearing to submit this information at the earliest possible date; in any case, their submission must be received by the Presiding Officer no later than June 10, 1981. In accordance with the provisions of 10 CFR 501.33 and 501.34, the request to participate in the hearing shall include (1) a description of that party's interest in the issue or issues involved in the proceeding and (2) an outline of the anticipated content of the presentation, identifying any witnesses that are intended to be called at the hearing, a summary of their anticipated testimony and/or questions to be asked and a list of exhibits to be presented and a list of government and/or utility personnel which the parties wish to examine.

Robert L. Davies,

Assistant Administrator, Office of Fuels Conversion, Economic Regulatory Administration.

May 20, 1981.

BILLING CODE 6450-01-M

Office of Hearings and Appeals

Objections to Proposed Remedial Orders Filed; Period of April 13 Through April 24, 1981

During the period of April 13 through April 24, 1981, the notices of objection to proposed remedial orders listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Any person who wishes to participate in the proceeding the Department of Energy will conduct concerning the proposed remedial orders described in the Appendix to this Notice must file a request to participate pursuant to 10 CFR 205.194 on or before June 15, 1981. The Office of Hearings and Appeals will then determine those persons who may participate on an active basis in the proceeding and will prepare an official service list, which it will mail to all persons who filed requests to participate. Persons may also be placed on the official service list as non-participants for good cause shown.

All requests to participate in these proceedings should be filed with the Office of Hearings and Appeals,

Department of Energy, Washington, D.C. 20461

George B. Breznay,

Director, Office of Hearings and Appeals.

May 18, 1981.

Marinas of the Future, Inc., Flushing, New York, BRO–1431, motor gasoline

On April 20, 1981, Marinas of the Future, Inc., Northern Blvd. & 125th Street, Flushing, New York 11368 filed a Notice of Objection to a Proposed Remedial Order which the DOE Northeast District Office of Enforcement issued to the firm on February 25, 1981. In the Proposed Remedial Order the Northeast District found that during April 1, 1980 to October 10, 1980, Marinas of the Future, Inc. committed pricing violations in its sales of motor gasoline in the State of New York.

According to the Proposed Remedial Order, the Marinas of the Future, Inc. violation resulted in $22,581.52 of overcharges. This Notice of Objection has been transferred to the Northeast Regional Center of the Office of Hearings and Appeals for analysis.

Placid Oil Co., Dallas, Texas, BRO–1433, crude oil

On April 24, 1981, Placid Oil Company of Dallas, Texas filed a Notice of Objection to a Proposed Remedial Order which the DOE Southwest District Office of Enforcement issued to the firm on March 30, 1981. In the PRO the Southwest District found that during 1973 to 1977, Placid sold crude oil in excess of the ceiling price regulations governing first sales of crude oil.

According to the PRO the Placid Oil Company violation resulted in $1,988,919.06 of overcharges.

R.L. Burns Corporation, Denver, Colorado, BRO–1432, crude oil

On April 21, 1981, R.L. Burns Corporation, 1860 Lincoln Street, Suite 1310, Denver, Colorado 80295 filed a Notice of Objection to a Proposed Remedial Order which the San Antonio Audit Group of the Economic Regulatory Administration (ERA) issued to the firm on March 26, 1981. In the PRO the ERA found that during the period September 1973 through January 1976, the firm overcharged its customers in sales of domestic crude oil.

According to the PRO the R.L. Burns Corporation violation resulted in $3,121,041 of overcharges.

ENVIRONMENTAL PROTECTION AGENCY

[EN FRL 1822–8(b)]

Application for Waiver of Effective Date of the 1981 and 1982 Model Year Carbon Monoxide Standard for Light-Duty Motor Vehicles; Thirteenth Decision of the Administrator

I. Introduction

This is the thirteenth decision the Environmental Protection Agency (EPA) has issued under section (202)(b)(5) of the Clean Air Act, as amended (Act), 42 U.S.C. 7521(b)(5), regarding applications from automobile manufacturers for waiver of the 3.4 grams per vehicle mile (g/mi) carbon monoxide (CO) emission standard scheduled to apply to 1981 and 1982 model year light-duty motor vehicles and engines.[1]

As the introductions to the previous decisions explain, section 2029b)(1)(A) of the amended Act establishes a schedule for implementing standards applicable to CO emissions for 1977 and later model year light-duty motor vehicles and engines.[2] The 1977 amendments to the Act, however, included a new provision allowing the Administrator of EPA under certain limited conditions, to delay for up to two model years implementation of the statutory 3.4 g/mi CO standard scheduled to take effect for the 1981 and 1982 model years.[3] However, these amendments require the Administrator to promulgate interim standards in such cases which do not permit CO emission over 7.0 g/mi.[4]

EPA received CO waiver applications from Excalibur Motors, Ltd. (Excalibur) on February 4, 1981, Ford Motor Company (Ford) on February 11, 1981, and Volkswagen of America, Inc. (VW) on February 17, 1981. The Agency issued a **Federal Register** notice on February 13, 1981,[5] announcing the opportunity to comment and scheduling a public hearing on pending applications. EPA received no comments at the public hearing and consequently has relied on written information submitted to the public record by the applicants and other interested parties.

In response to waiver applications received prior to the one under consideration, EPA held eight sets of public hearings and issued 12 decisions pursuant to section 202(b)(5)(A).[6]

This decision will address the waiver requests from these manufacturers on the basis of information from these manufacturers and from other sources.[7] All of the information upon which I have based my decision on these waiver requests is included in EPA Public Docket EN–81–13.[8]

II. Summary

I am granting these waiver requests from Excalibur, Ford and VW for the model years requested for each of the engine families[9] in question in these

[1] The preceding decisions were published as follows: 44 FR 53376 (September 13, 1979); 44 FR 69417 (December 3, 1979); 45 FR 7122 (January 31, 1980); 45 FR 17914 (March 19, 1980); 45 FR 37360 (June 2, 1980); 45 FR 40030 (June 12, 1980); 45 FR 49876 (July 25, 1980); 45 FR 53400 (August 11, 1980); 45 FR 59396 (September 9, 1980); 45 FR 67753 (October 14, 1980); 46 FR 1590 (January 6, 1981); 46 FR 15689, 15768 (March 10, 1981).

[2] Regulations were promulgated on August 24, 1978, setting a CO standard of 3.4 g/mi for 1981 and later model year vehicles. 40 CFR 86.081–8(a)(1)(ii). This standard represents at least a 90 percent reduction in CO emissions from the CO standard applicable to 1970 model year vehicles.

[3] Section 202(b)(5)(C) of the Act provides, in part: The Administrator may grant such waiver if he finds that protection of the public health does not require attainment of such 90 percent reduction for carbon monoxide for the model years to which such waiver applies in the case of such vehicles and engines and if determines that—

(i) such waiver is essential to the public interest or the public health and welfare of the United States;

(ii) all good faith efforts have been made to meet the standards established by this subsection;

(iii) the applicant has established that effective control technology, processes, operating methods, or other alternatives are not available or have not been available with respect to the model in question for a sufficient period of time to achieve compliance prior to the effective date of such standards, taking into consideration costs, driveability, and fuel economy; and

(iv) studies and investigations of the National Academy of Sciences conducted pursuant to subsection (c) and other information available to him has not indicated that technology, processes, or other alternatives are available (within the meaning of clause (iii) to meet such standards.

[4] As noted in previous decisions, section 202(b)(5) of the Act requires that I make a separate assessment for each vehicle model covered by a waiver request. See, e.g., 44 FR 53376 (September 13, 1979); 44 FR 69416 (December 3, 1979); 45 FR 7122 (January 31, 1980). Thus, these earlier consolidated decisions generally have included separate decisions for individual engine families. I have distinguished among engine families primarily on the basis of engine displacement. See note 17, second consolidated decision, 44 FR 69416, 69418 (December 3, 1979).

[5] 46 FR 12326. This notice was issued in response to a letter of intent to file an application submitted by VW on January 20, 1981.

[6] EPA has included testimony received at these seven hearings, as well as all other information considered in deciding these seven groups of waiver applications, in EPA Public Dockets EN–79–4, EN–79–17, EN–79–19, EN–80–1, EN–80–9, EN–80–13, EN–80–14, and EN–80–16. These dockets have been incorporated be reference into EPA Public Docket EN–81–13 for this decision. EPA Public Docket 81–13 can be found in EPA's Central Docket Section, Gallery I, 401 M St., S.W., Washington, D.C. 20460. Copies of materials in the docket may be obtained by writing to this address at Mail Code (A–130).

[7] See the discussion on my considerations of other information in the previous waiver decisions, e.g., section III(B)(C), 44 FR 69416, 69422 (December 3, 1979).

[8] This decision uses the following abbreviation:

Ford App.—Ford Application for Waiver of 1982 Carbon Monoxide Emission Standard dated February 11, 1980, for its 3.8 liter engine family.

VW App.—Volkswagen of America Application for Waiver of 1982 Carbon Monoxide Emission standard, dated February 1981, for its 1.7L/FBC engine family.

Excalibur App.—Excalibur Automobiles Application for Waiver of the 1981 and 1982 Carbon Monoxide Emission standard, dated February 4, 1981, for its 305 CID engine family.

[9] As was the case in the earlier consolidated decisions, I am using the term in this decision to encompass the statutory language "technology processes, operating methods, or other alternatives"

Continued

proceedings. I am therefore prescribing an interim CO emission standard of 7.0 g/mi for the 1982 model year for the Ford 3.8L/V–6 and VW 1.7L feedback carburetor (FBC) engine families and 1981 and 1982 model years for the Excalibur 305 CID engine family.

I have determined that the public interest benefits from granting these waiver requests from manufacturers with substantial economic problems for models which have never been produced under the statutory CO standard outweigh the potential environmental benefits from denying these waivers.[10] I have made these decisions because each of the applications has established that it is essential to provide these manufacturers with sufficient production flexibility to improve the competitiveness of these three models under current market conditions by waiving the 3.4 g/mi statutory CO standard for the model years in question. Having made these determinations as well as all other requisite findings, I have therefore determined that the manufacturers' CO waiver applications have established that the engine families in question meet all of the statutory criteria.

III. Discussion

A. Available Technology and Public Interest

The decisions I have made here on whether to grant or deny the requested waivers turn primarily on public interest considerations involved in marketing these engine families and what technology most likely would be available to enable the engine families in question to meet the 3.4 g/mi CO standard for the model year in question. Section 202(b)(5)(C)(iii) of the Act expressly assigns an applicant the task of establishing that effective CO control technology is not available, taking into account costs, driveability, and fuel economy.

As was the case in the previous CO waiver decisions, this decision relies on information contained in the waiver applications and other information found in the public record.[11] I conclude on the basis of this information that the applicants have adequately established that the risks that could arise were I to deny these waiver requests at issue are significant enough that I must conclude that the requisite technology, considering costs, driveability, and fuel economy, is not available for the engine families in question, the Ford 3.8L/V–6 and VW 1.7L/FBC engine families for the 1982 model year and the Excalibur 305 CID for the 1981 and 1982 model years.

As section 202(b)(5)(C)(iv) of the Act requires, I have considered the results of NAS studies and investigations conducted under section 202(c) of the Act regarding available technology, processes, or other alternatives. The findings of the available NAS studies do not contradict my assessment regarding the availability of technology for these engine families.[12]

1. *Appliçants' Positions Summarized.* Excalibur is a small manufacturer producing about 300 to 350 vehicles a year and purchasing its engines and emission control systems from General Motors Corporation (GM).[13] Excalibur stated that effective technology was unavailable because emission data from its 1981 model year certification vehicle indicated that its 1981 emissions control system was incapable of meeting the statutory standard and that Excalibur has insufficient lead time to obtain and calibrate a newer model engine/emissions control system from GM.[14] Information submitted by Excalibur indicated that it suffered large losses relative to gross sales[15] for the 1980 fiscal year. Finally, Excalibur contended that it has made continuous good faith efforts to meet emissions standards[16] and that granting this waiver request would have an insignificant effect on air quality.[17]

Ford contended that effective technology is not available to enable its new 3.8L/V–6 engine family to meet the statutory standard without unreasonable risks that production vehicles will not meet emission requirements[18] or unreasonable cost penalties.[19] Specifically, Ford stated that certification durability test data using its prototype 49-state[20] emissions system produced a deterioration factor[21] which is too high to allow Ford to meet assembly line and in-use emission requirements with an acceptable risk.[22] Ford stated that its emissions control system designed to comply with California emission requirements[23] could be recalibrated to meet the Federal statutory CO standard but only with lead time and cost penalties compared to a system it could produce under a waived standard.[24] Ford contended that it continues to suffer severe problems in sales, unemployment and profitability and that successful marketing of this engine family, which is intended to eventually replace its less fuel-efficient V–6 engine families, is essential to its rapid recovery from these problems.[25] Finally, Ford contends that, based upon the June 1980 study by the National Academy of Sciences[26] and other sources, an industry-wide waiver of the 1982 statutory CO emission standard would not be injurious to the public health.[27]

VW filed a CO waiver application for its 1982 1.7L/FBC model after withdrawing a request for reconsideration for its 1.46L model.[28] VW noted that its 1.7L fuel-injected engine family is capable of meeting the statutory standard[29] but that it needs to market the less-expensive 1.7L/FBC engine family in order to recapture lost sales of its gasoline-powered Rabbit models.[30] VW also contended that it needed a CO waiver for the 1.7L/FBC engine family in order to provide it the flexibility to improve marketability by improving driveability.[31] VW also indicated that it has experienced some economic problems in 1980 and that its sales, especially of gasoline-powered models, have recently declined.[32] VW contended that it needed to improve its

---

included as part of section 202(b)(5)(C)(iii) of the Act, and using the term "engine families" to encompass the statutory language "models" as in previous decisions (see, e.g., 44 FR 53376, (September 13, 1979)).

[10] Compare EPA's 4th, 8th, 11th and 12th CO waiver decisions, 46 FR 1590 (January 6, 1981); 45 FR 17914 (March 19, 1980); 45 FR 53400 (June 12, 1980); 46 FR 15689, 15768 (March 13, 1981).

[11] See note 7, *supra.*

[12] Report by the Committee on Motor Vehicle Emissions by the National Research Council of the National Academy of Sciences, dated June 30, 1980. See also discussions of the applicability of earlier NAS studies in previous CO waiver decisions; e.g., 44 FR 53376, 53386 (September 13, 1979) and 44 FR 69416, 69423, 69428 (December 3, 1979). For further discussion of how the NAS findings are consistent with my determinations relating to section 202(b)(5)(c)(iii) of the Act, see, e.g., 45 FR 67753, 67756 (October 14, 1980) and 46 FR 1590 (January 6, 1981).

sales figures to justify current investment levels.[33] Finally, VW projected an insignificant air quality impact from granting this waiver request because sales of this vehicle model would account for only about 0.05 percent of 1982 U.S. automobile sales.[34]

2. *Waiver Applications Granted.* After due consideration of these arguments and the information submitted in support of them, I have concluded that each of the applicants has established that the applications covering the three engine families in question meet the necessary statutory requirements for receiving a waiver of the 3.4 g/mi statutory CO emission standard for the applicable model years. I have reached this determination primarily on the basis of my conclusion that it is essential to the public interest to grant waivers to allow these manufacturers, which are experiencing significant economic difficulties, additional flexibility to improve the competitiveness of these models which have never been marketed subject to the statutory standard [35] even though in some of these cases marginally marketable technology may be available even considering costs, driveability, and fuel economy. My decision to grant these waivers also stems from the risk that waiver denials may turn out to be partially erroneous;[36] that is, waiver denials might result in reducing the competitive market position, and therefore the sales levels, that these particular models (which are vital to these manufacturers' future viability at a time when these manufacturers are attempting to recover from their recent economic problems) could attain if these applicants were able to take advantage of the added flexibility a waiver might provide.[37] None of these engine families has been previously marketed under the 3.4 g/mi statutory CO emission standard.[38] For this reason, these manufacturers have not had the opportunity to use production and in-use experience to improve the competitive features (specifically, cost, driveability, and fuel economy) of any of the subject engine families produced in compliance with the 3.4 g/mi standard. Hence, without waivers they may have insufficient lead time or flexibility to optimize competitive features of these engine families for the 1981 or 1982 model years.[39]

The flexibility which temporarily relaxing the 3.4 g/mi CO standard would afford manufacturers of these particular engine families does not by itself necessarily justify granting these waivers, particularly in those cases in which it appears that technology may be available to permit a manufacturer to market an engine family with marginally acceptable cost, driveability, and fuel ecomony.[40] With the waiver applications at hand, however, all of the engine families at issue are aimed at specific market segments which are extraordinarily important to the overall marketing plans of the respective manufacturers and essential to their economic recovery.[41] The manufacturers before me have provided information that indicates that each manufacturer is suffering substantial economic problems at the present time.[42] Ford and VW especially have experienced significant sales losses during the 1980 model year and substantial financial losses for the 1980 fiscal year.[43] These problems have resulted in significant adverse social and economic reperecussions for the country, including extensive layoffs, increasing trade deficits and effects on suppliers and related industries.[44]

Granting waiver requests for the engine families at issue could allow these manufacturers the flexibility to improve the competitive marketability of some features [45] at a time when these financially troubled manufacturers are depending on successful marketing of these particular engine families in order to achieve economic recovery. Each of these manufacturers has already

---

[33] Notes, VW–EPA meeting, January 13, 1981.

[34] VW App., section II.

[35] The Ford 3.8L/V–6 and VW 1.7L/FBC models are being produced for the first time in the 1982 model year. Ford App., section I, II. VW App., section IV. Excalibur is just starting its 1981 model year and has not yet certified or sold 1981 model year vehicles subject to the statutory standard. Excalibur supplemental submission, March 24, 1981.

[36] See, *International Harvester* v. *Ruckelshaus*, 487 F. 2d 615, 641, (D.C. Cir., 1973). See also, 45 FR 53400 (August 11, 1980).

[37] For example, a waiver could provide VW and Ford the flexibility to offer a less costly model and VW the flexibility to improve driveability. Ford App., section III, VW App., section 3.1, 4.2. A waiver could also allow Excalibur the lead time necessary to market in the 1981 model year and spare it the expense of certifying a new engine family. Excalibur supplemental submission, March 24, 1981.

[38] Specifically, Ford and VW are marketing new engine families for the 1982 model year. Ford is introducing an innovative cast aluminum 3.8L/V–6 engine which will replace less fuel-efficient V–8 engine families and VW will produce a new 1.7L Carter feedback carburetor fuel-efficient inexpensive Rabbit model. (Ford App., sections I, II; VW App., section 3). Excalibur is applying for a waiver for its 1981 and 1982 model years for which it has not started marketing. (See notes 35, 37, *supra*).

[39] Manufacturers that have successfully certified and marketed vehicle models under the statutory 3.4 g/mi CO standard have the flexibility to "carry over" 1981 certification results for the 1982 model year and avoid incurring the engineering expense and effort necessary for a separate certification program. See also, note 37, *supra*. In addition, those manufacturers could apply their engineering efforts toward improving competitive features of these vehicles meeting the 3.4 g/mi standard using the production and marketing experience. Accord, 46 FR 1590, 1593 (January 6, 1981).

[40] For example, in previous decisions, EPA determined that marketable technology could be available to permit this VW model using an alternative engine family, the 1.7L fuel injected engine family, to meet the 3.4 g/mi CO standard, even considering cost, driveability and fuel economy. See my earlier decisions on these engine families. 44 FR 53376 (September 13, 1979); 45 FR 59396 (September 9, 1980). However, in this application VW provided new information regarding the potential risks and consequences to VW from current sales trends. Cf. VW App., section 3. Notes, VW meeting with EPA January 13, 1981.

[41] Ford App., section II. VW App., section 3. Excalibur App., section III.

[42] Ford App., section II. VW App., section 3. Notes of VW-EPA meeting, January 13, 1981. Excalibur App., III.

[43] Ford reported 12-month losses of $1.5 billion and Ford sales are down about 8 percent from the same 12-month period last year. VW of America announced 1980 losses of more than $30 million and VW's sales are down from last year. See, e.g., Wall Street Journal, March 12, 1981, sec. 1, p. 18. "VW of America Says It Had 1980 Deficit of Over $30 Million", Wall Street Journal, Feb. 23, 1981, sec. 1, p. 2, "GM Is Intensifying Cost-Cutting Drive, More Salaried Staff Could be Laid Off" (predicted that Ford is studing cuts of 8–15 percent); Wall Street Journal, Feb. 23, 1981, sec. 2, p. 26, "AMC Posts Loss of $29 Million For 4th Quarter," (Ford may lay off 15–28,000 salaried employees); Wall Street Journal, Feb. 27, 1981, sec. 1, p. 6, "GM Will Increase 2 Units' Output; Ford Plans Cuts." "Ford Sets 2 Temporary Closedowns" (total of 8,950 Ford workers idled); New York Times, Feb. 25, 1981, "Feb. 11–20 Car Sales Down 23.7 percent at Big 3", by John Holusha. (Sales running at seasonably adjusted rate of 8.4 million, well below forecasts of 10 million; Ford fell to 24 percent share); Wall Street Journal, Feb. 25, 1981, sec. 1, p. 2. "New-Car Sales Declined by 23 Percent In Mid February." (VW reported 1.3 percent increase, Ford sales declined 24 percent); New York Times, March 4, 1981, Sec. D, p. 4, "VW of America Says Sales Rose by 4.6 percent" (in February compared to February 1980 sales, 1.8 percent decline over year-to-date period compared to 1980); New York Times, March 2, 1981, sec. 1, p. 3, "Auto Makers Again Reduce Output", Leonard Apcar, (1st quarter production of 13 percent from last year: Ford down 8.6 percent, VW down .1 percent (quarter), Ford down 13.3 percent, VW down 8.6 percent (March); Wall Street Journal, March 3, 1981, Sec. 1, p. 6, "U.S. Auto Output During February Fell by Nearly 22 percent;" *Wards Automotive Reports*, Vol. 56, No. 9, p. 66, March 2, 1981, "Industry Workforce Shrinks as Automakers Change Production Strategy," (Indefinite layoffs stand at 192,950 for 4 U.S. makers, 1/4 of workforce out); "Wards Production Estimates and Statistics", p. 72, Ford production slipped from 2.0 million to 1.3 million for 23-month period.

[44] See, e.g., Ford App., section II. See, also e.g., United States International Trade Commission Decision on Certain Motor Vehicles, Publication 1110, December 1980, pp. A17–76. Automotive News, February 23, 1981, "1607 U.S.-line dealerships vanish in 1980", John K. Teahen, Jr., p. 1, (Ford lost 8.5 percent of its dealers); Wall Street Journal, March 5, 1981, sec. 1, p. 2, "Ford Tapes German Units for Loan of Over $1.2 Billion for U.S. Operations", Leonard Apcar.

[45] A waiver to 7.0 g/mi may allow a manufacturer flexibility to design an engine family to achieve better fuel economy, driveability or costs or allow a manufacturer to market alternative technology where more effective technology may be delayed. See, e.g., the eleventh CO waiver decision, 46 FR 1590, 1593 (January 6, 1981). See also, Excalibur letter, March 24, 1981; note 20, *supra*.

expended a considerable amount of cost and effort in attempting to meet the 3.4 g/mi CO emission standard [46] and to retool for these new models, thereby further limiting the resources they have available to otherwise improve the competitiveness of these models.[47] In light of these circumstances, I have determined that it is in the public interest to grant the waiver requests for these particular engine families because of the risk that denial of these waivers could limit the manufacturers' flexibility to improve the competitiveness of these important engine families and ultimately interfere with the future of these automobile manufacturers.[48]

In *International Harvester Co.* v. *Ruckelshaus,*[49] the United States Court of Appeals for the District of Columbia Circuit reviewed the Administrator's decision to deny manufacturers' requests for a one-year suspension (from 1975 to 1976) of the effective date of the statutory hydrocarbon (HC) and CO standards mandated by the 1970 version of the Act. The Court stated, among other things, that the Administrator should have considered the risks associated with the possibility of erroneously granting or denying those requests. The Court indicated that the Administrator should balance the economic costs (in terms of jobs lost and misallocated resources) possibly associated with an erroneous or only partially accurate denial versus the possible environmental benefits lost through an erroneous grant.

Under the current section 202(b)(5) of the Act, the gravity of the economic and other risks which both a waiver applicant and the public face from the possibility of an erroneous denial depends on the following two factors: (1) the likelihood that the denial, in fact, will turn out to be either erroneous or only partially accurate and (2) the severity of the adverse economic consequences which could occur as the result of an erroneous or partially accurate denial.[50]

In this case, I find that there is a significant likelihood that a decision denying any one of these waiver requests could turn out to be only partially accurate.[51] At a time when these manufacturers need to be as competitive as possible to effect an economic recovery, a partially accurate denial would risk diminishing their ability to adequately compete in market segments which are important to these manufacturers [52] thereby potentially delaying planned recovery, continuing unemployment problems, increasing economic stagnation, and limiting the increase in the number and diversity of new vehicles in use.

Alternatively, the environmental benefits from denying waiver requests for any one or all of these engine families would be insignificant.[53] Vehicles using these engine families are projected to account for less than 3 percent of total 1982 model year domestic sales.[54] Adding the number of engine families which already have waivers for the 1982 model year increases this total to only about 38 percent of projected 1982 model year U.S. sales. This is consistent with my previous findings that the CO waiver proceedings to date have shown that the 3.4 g/mi CO emission standard is generally achievable with marketable cost, driveability and fuel economy, and that waivers are appropriate only in extenuating circumstances, such as those identified here. In addition, many manufacturers, including those considered here, have made significant efforts to reduce emissions even from those engine families which have received waivers for the 1981 model year while preserving the ability of those families to maintain strong competitive positions in the domestic market. For example, serveral engine families which already had waivers at an alternative 7.0 g/mi CO emission standard generally exhibited CO emissions in certification and production which were close to or marginally below 3.4 g/mi.[55]

In addition, the air quality effect of granting waivers for other engine families, if any, which may share similar public interest considerations and incur similar adverse risks comparable to these engine families which have never been marketed in the statutory standard is also quite likely to be insignificant.[56] Finally, these engine families will continue to have to meet other regulatory requirements designed to control emissions of in-use vehicles and for which Congress provided no such flexibility to discriminately relax requirements.[57]

While Congress might not have envisioned the waiver process as a mechanism which could permit applicants to attain more competitive technology (as opposed to reasonably marketable technology considering cost, driveability and fuel economy characteristics) when it prescribed the criteria under which I may grant a waiver request, the current economic circumstances and business realities for many automobile manufacturers are significantly different from what they were when Congress adopted the CO

---

[46] Compare section III C of my eleventh decision. Many of the engines are already achieving emission levels close to or under 3.4 g/mi standard. See note 43, 46 FR 1590, 1593 (January 6, 1981). Specifically, Ford, VW and Excalibur have employed or attempted to employ closed-loop feed-back emission control systems. See note 65, *infra.*

[47] See e.g. Ford's contention regarding competitive disadvantage. Ford App., p. 7. See also *International Harvester,* 478 F. 2d 615, 637–638 (D.C. Cir., 1973).

[48] See generally, *International Harvester, 478 F. 2d 615, 633, 641 (D.C. Cir., 1973); 45 FR 53401, 53403 (August 1980).*

[49] 478 F. 2d 615 (D.C. Cir., 1973).

[50] *Cf. Ethyl Corp.* v. *Environmental Protection Agency,* 541 F. 2d 1, 18 (D.C. Cir., 1976) (stating that the Administrator's finding under section 211 of the Act that lead particulates "will endanger the public health and welfare" is composed of reciprocal elements of probability and severity). For example, EPA discussed the consequences of a partially accurate decision in the eighth CO waiver decision. See, e.g., 45 FR 53400, 53404. (January 31, 1981). See also, note 38, *supra,* note 51, *infra.*

[51] *Cf. International Harvester, supra,* 478 F.2d at 641: "[A] partially accurate decision would allow companies to produce but at a significantly reduced level of output." Here, companies are already producing at a lower output due to market conditions, and a waiver denial at this time could likely limit the flexibility these companies need to improve marketability (by improving cost, driveability, or fuel economy, for example) and sales. For example, a finding that technology is available may be only partially accurate if these three manufacturers believed that technology currently being developed and tested at the statutory standard faced unreasonable risks of failing assembly-line and in-use requirements and consequently delayed marketing or declined to market these models. See, e.g. Ford App., section III A. Similarly, a finding that technology is available could also be partially accurate if, in order to reduce the risks of failing to comply with the statutory standard, these manufacturers attemped to market technology which exhibited only marginally acceptable cost, driveability or fuel economy features. See e.g., Ford App., sections I, III; VW App., section 3. See also, e.g., 45 FR 17914 (March 19, 1980), 45 FR 53400 (August 11, 1980), and 46 FR 1560 (January 6, 1981).

[52] VW noted that it was particularly important for it to market a lower priced (than its 1.7L/fuel-injected model) gasoline model in the inexpensive fuel-efficient compact car market. VW App., section 3. Notes from VW meeting of January 13, 1981. Excalibur makes only two models, both using the same engine family, and claimed that it woud be unable to certify its family and continue any production without a waiver. Excalibur App., section 1. Ford stated that its 3.8L/V–6 is intended to eventually replace all of its V–8 engine familes. Ford App., sections II, III.

[53] See also section III B.

[54] Se, e.g., VW App., section 2.1; Excalibur App., section 1.6. Automotive News, November 3, 1980, p. 1, "80 V–8 output cut in half; sixes lead, but fours gain." This projection assumes 1982 model year domestic sales of about ten million vehicles.

[55] See generally, e.g., 45 FR 49876, Appendix A (July 25, 1980). 46 FR 1590 (January 6, 1980). Ford supp. submission, pp. 4–7, March 16, 1981; Ford App., section III B.

[56] *Cf.*, discussion of a similar concern in my 8th and 11th CO waiver decisions. 45 FR 53401, 43404 (August 11, 1980), and 46 FR 1590, 1594 (January 7, 1981). Most of the engine families granted waivers for the 1981 model year already have waivers for the 1982 model year. See 40 CFR 86.081–8(a)(1) and 86.082–8(a)(1). At this time manufacturers have only filed applications for three engine families which are new for the 1982 model year. See also, 46 FR 15768 (March 9, 1981).

[57] See, e.g., 45 FR 66984 (October 8, 1980).

waiver provision.[58] Under these circumstances, I find it unlikely that Congress intended me to deny applications where the benefits to the public of a waiver grant would outweigh the benefits of a waiver denial.[59] I believe the language of section 202(b)(5)(A) gives me the flexibility to provide the relief granted here.[60]

B. Protection of Public Health

Section 202(b)(5)(C) of the Act requires that before I grant a waiver covering a given engine family, I must find that protection of the public health does not require attainment of a 3.4 g/mi CO standard by the vehicles of the engine family receiving the waiver. I have already examined this issue with respect to the relative consequences and risks involved in granting or denying the waiver requests for the families at issued here.[61]

I have found as a result of this examination that any adverse health effects resulting from waiving the 3.4 g/mi standard for the 1981 and 1982 model year engine families discussed in this consolidated decision would be insignificant. The same statement is true regarding the combined health effects resulting from emissions from engine families receiving waivers under the previous consolidated CO waiver decisions. As a result, protection of the public health does not require attainment of the 3.4 g/mi CO standard by the engine families here, for which I have determined that effective control technology is not available for the applicable model years.[62]

While waiving the statutory CO standards for these engine families arguably would not significantly affect public health, noticeable increases in ambient CO levels could result from granting waivers industry-wide.[63] In light of the fact that industry-wide waivers would not be protective of the public health, it is reasonable to grant waivers covering only that portion of the industry consisting of engine families for which I have determined, given the relative risks at stake, that effective control technology, considering costs, driveability, and fuel economy, is not available and which I have determined are essential to the public interest (presuming these families also meet the remaining statutory criteria).[64]

C. Good Faith

In order for me to grant a waiver to any applicant, section 202(b)(5)(C)(ii) of the Act requires that I determine that the applicant in question has made all good faith efforts to meet the established emission standards. As a result, I have examined information regarding these applicants' previous and projected efforts toward meeting a 3.4 g/mi CO emission standard for the engine families in question.[65]

Each of the applicants has provided engineering, financial and technical information to support the contention that its has acted in good faith in trying to meet the 3.4 g/mi CO standard. In general, information in the record provides support for determining that each has made good faith efforts in developing emission control technology to meet the 3.4 g/mi CO standard.

As I mentioned earlier, these applicants generally have already made significant progress in developing the technological capabilities of these engine families to meet the 3.4 g/mi CO emission standard.[66] Evidence of such improved CO emissions control capabilities[67] substantiate these applicants' claims that they have generally exercised good faith efforts toward meeting the statutory standard and are therefore not benefitting from a potentially inequitable competitive advantage they migh achieve by avoiding the good faith effort requirement of the act and being unjustifiably granted a waiver.[68]

IV. Conclusion and Interim Standards

Each of the three engine families which were the subject of this decision are covered by waiver applications which met the requirements for receiving a waiver under section 202(b)(5)(C) of the Act. As a result, I am granting a waiver of the effective date of the statutory CO emission standard for the Ford 3.8L/V-6 and VW 1.7L/FBC engine families for the 1982 model year and for the Excalibur 305 CID engine family for the 1981 and 1982 model years.

Pursuant to section 202(b)(5)(A) of the Act, I am simultaneously promulgating regulations prescribing an interim CO emission standard for 1981 and 1982 model year vehicles of 7.0 g/mi for the engine families receiving a waiver. For these engine families, this action continues in effect through the 1982 model year the CO emission standard applicable to all 1980 model year light-duty vehicles.

---

[58] The Court in *International Horvester* adopted a similar approach in interpreting Congress' intent:

> The Court must seek to discern and reconstruct what the legislature that enacted the statute would have contemplated for the court's action if it could have been able to foresee the precise situation. It is in this perspective that we have not flinched from our discussion of the economic and ecological risks inherent in a wrong decision by the Administrator.

478 F. 2d 615, 648 citing *Montana Power Co. v. FPC*, 144 U.S. App., D.C. 263, 270, 445 F. 2d 739, 746 (*en banc, 1970*), *cert.* denied 400 U.S. 1013, 91 S. Ct. 566, 27 L. Ed. 2d 627 (1971).

[59] The flexibility which Congress explicitly afforded me through the waiver provision (which is similar to its legislative predecessor, the suspension provision) in implementing the 3.4 g/mi CO standard, gives me a unique opportunity to accommodate these concerns which waiver applicants have raised here. See, e.g., the legislative history for the suspension provision in the 1970 Act: 116 Cong. Rec. 33120, (Senator Baker); 33081 (Senator Griffin); 32905 (Senator Muskie) (1970).

[60] Cf., 45 FR 17914 (March 19, 1980); 45 FR 53400 (August 11, 1980); 46 FR 1590 (January 6, 1981); 46 FR 15798 (March 13, 1980).

[61] See section III A(2).

[62] See, e.g., my discussion of ambient air quality effects in my first consolidated CO waiver decision. App. B, 44 FR 53376, 53402, 53407 (September 13, 1979) and 44 FR 69416, 69146, 69458–69462 (December 3, 1979). The engine families receiving waivers under my previous CO waiver decisions constitute less than 34 percent of the total projected 1982 model year light-duty vehicle sales in the United States. 46 FR 1590, 1597, n.83 (January 6, 1980). These manufacturers projected sales of about 3 percent of all vehicle sales in the 1982 model year. See e.g., 46 FR 15768, 15770 (March 13, 1981).

[63] For further discussion concerning this issue see the first decision, 44 FR 53376, 53381 and Appendix B at 44 FR 54402–53047 (September 13, 1979).

[64] I discussed the ambient air quality effect of granting CO waivers in each Appendix B in two previous decisions. 44 FR 53376, 53402–53407 (September 13, 1979) and 44 FR 69416, 69456–69462 (December 3, 1979).

The National Automobile Dealers Association (NADA) suggested that I grant industry-wide waivers (NADA submission, March 6, 1981) based, in part, upon the recent report "To Breathe Clean Air" by the National Commission on Air Quality (February 1981). Since I am granting all of the waiver requests at issue here, I need not reach the question posed by NADA's submission.

[65] See, e.g., 45 FR 49876, 49881 (July 25, 1980) and 45 FR 53400, 53404, 53405 (August 11, 1980). VW noted that it had developed and is marketing more costly technology capable of meeting the statutory standard. VW App., sections 1, 3. Certification durability emissions data from one of the Ford 3.8L/V-6 test vehicles indicate that this system had some potential to meet the statutory standard except for the risks associated with the relatively high deterioration factor. Ford App., section III.

Excalibur indicated that its new 1981 model year engine emissions system might be able at least to certify to a CO standard of 3.47 g/mi. Excalibur App., section 1(a).

[66] See section IIIB(1).

[67] See note 46, *supra*. See generally, e.g., 46 FR 1590, 1594 (January 6, 1981).

[68] *International Harvester, supra*, 478 F. 2d 615, 637, 638 (D.C. Cir. 1973). See also Ford App., section 2. Each of these applicants had developed or attempted to develop or utilized electronic feedback control fuel systems for the models in question. Excalibur App., p. section 1(b)(iii); Ford App., section 1(b)(iii); VW App., section 4.

Dated: May 15, 1981.

Walter C. Barber, Jr.,

Acting Administrator.

Assessments of Human Exposure to Atmospheric Concentration of Selected Chemicals; Public Comment Period

AGENCY: Environmental Protection Agency.

ACTION: Notice of Extension of Public Comment Period.

SUMMARY: This notice extends the period from May 11, 1981 through June 15, 1981 for public comment of the adequacy of the Systems Applications, Inc. (SAI) and SRI, International (SRI) exposure methodologies and the accuracy of the exposure assessments.

DATES: Comments on the above reports should be postmarked no later than June 15, 1981.

ADDRESSES: A copy of the above reports may be obtained from the U.S. Department of Commerce, National Technical Information Service, Springfield, Virginia 22161, telephone number 703-487-4650. Please request publication numbers PB-81-193252 (cost $33.50) and PB-81-193260 (cost $30.50) when ordering the two Systems Applications, Inc. reports, and publication number PB-81-193278 (cost $21.50) for the SRI, International report. Those interested in obtaining copies of all three volumes should request publication number PB-81-193245 (total cost $83.50). Those previously requesting reports from the U.S. Environmental Protection Agency library and not receiving copies before EPA's supply was distributed, will be notified by the library to submit their request to the National Technical Information Service.

Comments should be sent in duplicate to Mrs Nancy Riley, Strategies and Air Standards Division, (MD-12), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone number 919-541-5502 (FTS 629-5502).

FOR FURTHER INFORMATION CONTACT: Mrs. Nancy Riley, (919) 541-5502 (FTS 629-5502).

SUPPLEMENTARY INFORMATION: On March 10, 1981, the Environmental Protection Agency announced in the **Federal Register** (46 FR 15938) the availability of two reports estimating public exposure to selected chemicals of concern that are emitted into the atmosphere. Interested individuals were invited to comment on the adequacy of the exposure methodologies and the accuracy of the assessments.

Due to the unexpected number of requests for the Systems Applications, Inc. report and the delay in making more copies available for distribution, EPA is extending the comment period by five weeks through June 15, 1981. In addition, because of the high duplicating costs, EPA can no longer supply copies. Copies of both exposure reports will only be available, for a fee to cover printing and distribution costs, from the National Technical Information Service.

Dated: April 23, 1981.

Edward F. Tuerk,

Acting Assistant Administrator for Air, Noise and Radiation.

FEDERAL COMMUNICATIONS COMMISSION

FM Translator Applications Accepted for Filing and Notification of CutOff Date

Released: May 18, 1981.

Cutoff Date: July 6, 1981.

Notice is hereby given that the applications listed in the attached appendix below are accepted for filing. They will be considered to be ready and available for processing after July 6, 1981. An application, in order to be considered with any application appearing on the attached list or with any other application on file by the close of business on July 6, 1981, which involves a conflict necessitating a hearing with any application on this list, must be substantially complete and tendered for filing at the offices of the Commission in Washington, D.C., no later than the close of business on July 6, 1981.

Petitions to deny any application on this list must be on file with the Commission not later than the close of business on July 6, 1981.

Applications for new stations may not be filed against any application on the attached list which is designated by an asterisk (*).

Federal Communications Commission.

William J. Tricarico,

Secretary.

TV Broadcast Application Accepted for Filing and Notification of Cutoff Date

Released: May 14, 1981.

Cutoff Date: June 25, 1981.

Notice is hereby given that the application listed below is accepted for filing. Because the application listed below is in conflict with an application which was accepted for filing and listed previously as subject to a cutoff date for conflicting applications, no application which would be in conflict with the below-listed application will be accepted for filing.

Petitions to deny the application listed below and minor amendments thereto must be on file with the Commission not later than the close of business on June 25, 1981. The application previously accepted for filing and in conflict with the below-listed application may also be amended as a matter of right not later than the close of business on June 25, 1981. Amendments filed pursuant to this notice are subject to the provisions of § 73.3572(b) of the Commission's rules.

BPCT–810302KF (new), Reno, Nevada, High Country Broadcasting, Inc., Channel 27, ERP: Vis. 877 kW; HAAT: 2930 feet.

FEDERAL RESERVE SYSTEM

Allied Bancshares, Inc.; Formation of Bank Holding Company

Allied Bancshares, Inc., Houston, Texas, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 100 percent of the voting shares of Jetero Bank, Houston, Texas. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Dallas. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than June 18, 1981. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, May 18, 1981.

D. Michael Manies,

Assistant Secretary of the Board.

Ashland Capital Corp., Inc.; Formation of Bank Holding Company

Ashland Capital Corporation, Inc., Ashland, Alabama, has applied for the Board's approval under 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 80 percent or more of the voting shares of The First National Bank of Ashland, Ashland, Alabama. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Atlanta. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than June 15, 1981. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, May 15, 1981.

BILLING CODE 6210-01-M

Bank Holding Companies; Proposed De Novo Nonbank Activities

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and, except as noted, received by the appropriate Federal Reserve Bank not later than June 13, 1981.

A. *Federal Reserve Bank of Boston* (Richard E. Randall, Vice President), 30 Pearl Street, Boston, Massachusetts 02106:

1. Industrial National Corporation, Providence, Rhode Island (mortgage banking and insurance activities; Kansas: to engage *de novo* through its indirect subsidiary, Mortgage Associates, Inc., in the origination and sale of residential mortgages, the servicing of residential mortgage loans and insurance agency activities for the sale of credit life and credit accident and health insurance directly related to an extension of credit. These activities would be conducted from a new office to be located in Wichita, Kansas, serving the following Kansas counties: Butler, Cowley, Harper, Harvey, Kingman, Reno, Sedgwick and Sumner.

2. Industrial National Corporation, Providence, Rhode Island (consumer finance and insurance activities; Wisconsin): to engage *de novo* through its indirect subsidiary, Mortgage Associates, Inc., in consumer finance and insurance agency activities for the sale of credit life and credit accident and health insurance directly related to an extension of credit. These activities would be conducted from a new office located in Racine, Wisconsin, serving the following Wisconsin counties: Kenosha, Racine and Walworth.

3. Industrial National Corporation, Providence, Rhode Island (financing; Missouri): to engage *de novo* through its indirect subsidiary, Mortgage Associates, Inc., in consumer finance. This activity would be conducted from an existing office located in Clayton, Missouri, serving the Missouri counties of Jefferson, St. Charles and St. Louis.

4. Industrial National Corporation, Providence, Rhode Island (mortgage banking and insurance activities; Wisconsin): to engage *de novo* through its indirect subsidiary, Amortized Mortgages, Inc., in the origination and sale of residential mortgages, the servicing of residential mortgage loans and insurance agency activities for the sale of credit life and credit accident and health insurance directly related to an extension of credit. These activities would be conducted from a new office to be located in Janesville, Wisconsin, serving the following Wisconsin counties: Adams, Columbia, Crawford, Dane, Grant, Green, Iowa, Jefferson, Juneau, Lafayette, Richland, Rock, Sauk and Vernon.

5. Industrial National Corporation, Providence, Rhode Island (financing and insurance activities; Idaho, Colorado, Wyoming, Nevada, and Utah): to engage *de novo* through its indirect subsidiary, Kensington Mortgage and Finance Corp., in the origination, sale and servicing of mobile home loans, insurance agency activities for the sale of credit life and credit accident and health insurance sold in connection with extensions of credit and insurance agency activities for the sale of property and casualty insurance sold in connection with extensions of credit. These activities would be conducted from a new office in Murray, Utah serving the states of Utah, southern Idaho, western Colorado, western Wyoming and Elko, Eureka, Lincoln and White Pine Counties in Nevada, except for the sale of property and casualty insurance which will be provided only in Utah and southern Idaho.

B. *Federal Reserve Bank of Kansas City* (Thomas M. Hoenig, Assistant Vice President), 925 Grand Avenue, Kansas City, Missouri 64198:

Omaha National Corporation, Omaha, Nebraska (mortgage banking activities; Kansas): to engage through its subsidiary, Realbank, Inc., in mortgage banking activities, including soliciting and processing residential mortgage loans for sale to permanent investors, loans will be primarily FHA insured or VA guaranteed loans, conventional loans would be processed only when take-out commitments are available. These activities would be conducted from an office in Wichita, Kansas, serving a one hundred mile radius of Wichita, Kansas, excluding any area of the State of Oklahoma. Comments on this application must be received not later than June 15, 1981.

Other Federal Reserve Banks: None.

Board of Governors of the Federal Reserve System, May 15, 1981.

Theodore E. Allison,

Secretary of the Board.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than June 18, 1981.

A. *Federal Reserve Bank of San Francisco* (Harry W. Green, Vice President), 400 Sansome Street, San Francisco, California 94120:

1. Bankamerica Corporation, San Francisco, California (industrial loan activities; Utah): to engage through its indirect subsidiary, FinanceAmerica Thrift Corporation, a Utah corporation, in the activities of an industrial loan corporation under the Utah Industrial Loan Law. Such activities will include, but not be limited to, issuing investment certificates and accepting savings accounts; making consumer installment loans; making loans and other extensions of credit to small businesses; making loans secured by real and personal property. These activities will be conducted from a *de novo* office in Orem, Utah, serving the state of Utah.

2. Bankamerica Corporation, San Francisco, California (financing, servicing, and insurance activities; Wisconsin): to engage, through its indirect subsidiary, Financeamerica Corporation, a Wisconsin corporation, in the activities of making or acquiring for its own account loans and other extensions of credit such as would be made or acquired by a finance company; servicing such loans and other extensions of credit; and offering credit-related life insurance, credit-related accident and health insurance and credit-related property insurance. Such activities will include, but will not be limited to, making consumer installment loans, purchasing installment sales finance contracts, making loans and other extensions of credit to small businesses, making loans secured by real and personal property, and offering credit-related life, accident and health and property insurance directly related to extensions of credit made or acquired by FinanceAmerica Corporation.

These activities will be conducted from a *de novo* office located in Madison, Wisconsin, serving the state of Wisconsin.

U.S. Bancorp, Portland, Oregon (commercial finance and leasing; Alaska, Arizona, Colorado, Idaho, Montana, Nevada, Oregon, Utah, Washington and Wyoming): to engage through its subsidiary, U.S. Bancorp Financial, Inc., in the making, acquiring and servicing of loans and other extensions of credit, either secured or unsecured, for its own account or for the account of others, including but not limited to, commercial, rediscount, installment sales contracts and other forms of receivables, and leasing of personal property and equipment. These activities will be performed from an office in Bellevue, Washington, serving Alaska, Idaho, Montana, Oregon, and Washington; and from an office in Denver, Colorado, serving Arizona, Colorado, Nevada, Utah and Wyoming.

B. *Other Federal Reserve Banks:* None.

Board of Governors of the Federal Reserve System, May 18, 1981.

BILLING CODE 6210-01-M

Padgett Agency, Inc.; Proposed Acquisition of Greenleaf Development Company, Inc.

Padgett Agency, Inc., Greenleaf, Kansas, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Greenleaf Development Company, Inc., Greenleaf, Kansas.

Applicant states that the proposed subsidiary would engage in the activities of promoting, fostering, stimulating, developing, encouraging and advancing the sound business, industrial and economic development, prosperity, welfare and expansion of Greenleaf, Kansas and vicinity; of encouraging and assisting through loans, investments or other business transactions the location of new business and industry in Greenleaf, Kansas and vicinity; of rehabilitating and assisting existing business and industry in Greenleaf, Kansas and vicinity; of stimulating and assisting in the expansion of any kind of business activity which would tend to promote the business development and maintain the economic stability of Greenleaf, Kansas and vicinity, provide maximum opportunities for employment, encourage thrift and improve the standard of living of the citizens of Greenleaf, Kansas and vicinity; of cooperating and acting in conjunction with other organizations, public or private, including the Small Business Administration, an agency of the United States Government, in the promotion and advancement of industrial, commercial, agricultural and recreational development in Greenleaf, Kansas and vicinity; and of providing financing for the promotion, development and conduct of all kinds of business activity in Greenleaf, Kansas and vicinity; provided, however, that the primary objective is to benefit the community of Greenleaf, Kansas and vicinity as measured by increased employment, payroll, business volume and corresponding factors and indirect benefits rather than monetary profits or a return of an investment in the shares of the capital stock of Greenleaf Development Company, Inc. These activities would be performed from offices of Applicant's subsidiary in Greenleaf, Kansas, and the geographic areas to be served are Greenleaf, Kansas, and vicinity. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received not later than June 18, 1981.

Board of Governors of the Federal Reserve System, May 18, 1981.

D. Michael Manies,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

Wood Lake Bancorporation; Formation of Bank Holding Company

Wood Lake Bancorporation, Wood Lake, Minnesota, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 90 per cent or more of the voting shares of Wood Lake Corporation, Wood Lake, Wood Lake, Minnesota, and thereby, its subsidiary bank, State Bank of Wood Lake, Minnesota. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Wood Lake Bancorporation, Wood Lake, Minnesota, has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to engage in the activities of a general insurance agency in a town of less than 5,000 population. These activities would be performed from offices located in Wood Lake, Minnesota, and the geographic area to be served is the 100 square mile area immediately surrounding and including the town of Wood Lake, Minnesota. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of section 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis.

Any views or requests for hearing should be submitted in writing and received by the Reserve Bank not later than June 18, 1981.

Board of Governors of the Federal Reserve System, May 18, 1981.

D. Michael Manies,

Assistant Secretary of the Board.

first line, the word "Insolex" should be corrected to read "Inolex".

BILLING CODE 1505-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NM 44219]

New Mexico; Application

May 18, 1981.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Transwestern Pipeline Company has applied for one 10-inch natural gas pipeline right-of-way across the following lands:

New Mexico Principal Meridian, New Mexico

T. 17S., R. 32 E., NMPM
Sec. 21: SE¼SW¼;
Sec. 28: N½NW¼;
Sec. 29: SE¼NE¼, SE¼SW¼, N½SE¼, SW¼SE¼;
Sec. 31: SE¼NE¼, N½SE¼, SW¼SE¼;
T. 18 S., R. 31 E., NMPM
Sec. 1: NE¼SE¼;
Sec. 11: E½SE¼;
Sec. 12A NW¼NE¼, NE¼NW¼, S½NW¼, NW¼SW¼;
Sec. 14: N½NE¼, SW¼NE¼, SE¼NW¼, N½SW¼, SW¼SW¼;
Sec. 15: SE¼SE¼;
Sec. 22: N½NE¼, SW¼NE¼, SE¼NW¼, E½SW¼;
Sec. 27: N½NW¼, SW¼NW¼, NW¼SW¼;
T. 18S., R. 32 E., NMPM
Sec. 6: Lots 2, 3, 5, 6, SE¼NW¼.

These pipelines will convey natural gas across 7.802 miles of public land in Eddy and Lea Counties, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, New Mexico 88201.

Richard Bastin,
District Manager.

BILLING CODE 4310-84-M

[A-8927]

Public Lands in Graham County, Ariz.

The following described lands have been determined to be suitable for disposal by exchange under Section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716:

Township 6 South, Range 28 East, G&SRM
Sec. 1: Lot 17, 18;
Sec. 18: Lot 6, 7, 8, 9, 10, 11, 12, 13, W½NE¼NW¼, W½NW¼, SE¼NW¼.
Township 6 South, Range 27 East, G&SRM
Sec. 7: Lot 9, 12;
Sec. 18: Lot 5, 6, 7, 8, 9.

Containing 502.38 acres more or less.

In exchange for these lands, the Federal Government will acquire non-Federal land in the Apache-Sitgreaves National Forest in Coconino County, Arizona, from Kennecott Copper Corporation. The description of the non-Federal land is as follows:

Township 13 North, Range 12 East, G&SRM
Sec. 1: N½SW¼, SW¼SW¼, NW¼SE¼SW¼;
Township 13 North, Range 13 East, G&SRM
Sec. 7: Lot 9, 10.

The purpose of the exchange is to acquire non-Federal lands within the forest for Federal programs and better land management. The exchange is consistant with the Bureau's planning for the lands involved. The exchange has been discussed with Graham and Coconino County officials. The public interest will be weell served by making the exchange.

The value of the lands to be exchanged are approximately equal; full equalization of values will be achieved by payment to the United States of funds in the amount not to exceed 25% of the total value of the lands to be transferred out of Federal ownership.

Lands to be transferred from the United States will be subject to the following reservations, terms and conditions: There will be reserved to the United States rights-of-way for ditches and canals pursuant to the Act of August 30, 1890, 26 Stat. 391; 43 U.S.C. 945. There are no reservations concerning the mineral estate. The non-Federal land to be acquired will be subject to the following reservations, terms and comditions: There will be reserved to Southwest Forest Industries, its successors and assigns, the right to cut and remove from the property until May 20, 1987, all timber located thereon more than twelve inches (12") in diameter, breast high at the time of cutting, together with the right to build and maintain ingress and egress as necessary.

Detailed information concerning the exchange, including the environmental assessment and the record of public input, is available for review at the Safford District office, 425 East 4th Street, Safford, Arizona 85546.

For a period of 45 days, interested parties may submit comments to the District Manager, Safford District office, 425 East 4th Street, Safford, Arizona 85546.

Dated: May 13, 1981.

Fritz V. Rennebaum,
Acting District Manager.

[FR Doc. 81-15533 Filed 5-22-81; 8:45 am]
BILLING CODE 4310-84-M

Upland Petroleum Leasing-Alaska; Invitation Geophysical Permit Applications

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of invitation to submit applications.

SUMMARY: The Department of the Interior is accepting applications from industry and the public for permits to conduct geophysical exploration on applicable Federal lands, pursuant to Section 1008 of the Alaska National

Interest Lands Conservation Act (ANILCA).

ADDRESS: Applications should be submitted to the following address:

For BLM-administered lands: District Manager, Anchorage District Office, 4700 E. 72nd Avenue, Anchorage, Alaska 99507

or

District Manager, Fairbanks District Office, Post Fort Wainwright, P.O. Box 1150, Fairbanks, Alaska 99707

For National Forest lands: Regional Forester, U.S. Forest Service, Federal Office Building, Box 1628, Juneau, Alaska 99802.

FOR FURTHER INFORMATION CONTACT: The Bureau of Land Management at (907) 271–5069 in Alaska, or (202) 343–7722 in Washington, D.C.; or the U.S. Forest Service at (907) 586–7247 in Alaska or (703) 235–8105 in Washington, D.C.

SUPPLEMENTARY INFORMATION: The Department of the Interior invites interested parties to submit applications for geophysical exploration permits for oil and gas assessment on certain lands in Alaska. These lands are public lands administered by the Bureau of Land Management and lands in the National Forest System with the exception of designated wilderness areas and national monuments. These lands are situated generally south of the Brooks Range and are described in more detail in the notice published at 46 FR 24307 (April 30, 1981). Units of the National Park System and the National Wilderness Preservation System are excluded as are certain other lands which are legally withdrawn from mineral leasing. This invitation is made as part of the implementation of Section 1008 of the Alaska National Interest Lands Conservation Act. Information gained from activities undertaken through these permits must be made available to the U.S. Geological Survey (USGS) upon request.

All information will be considered proprietary and will not be made public. The USGS will use the information as part of their resource assessment program and in further evaluating areas as favorable petroleum geological provinces.

Each application will be reviewed and a determination made to assure that the proposed action is consistent with the land management emphasis for the area.

For lands in the National Wildlife Refuge System to be studied under Section 1008 of ANILCA, a request for applications similar to these will be published within 120 days.

Applications should include the location of the work proposed, the dates in which the work will be performed, and a description of the methods to be used including support requirements. Prospective applicants should contact the appropriate agency prior to submitting an application to be apprised of any additional information that may be required.

Ed Hastey,

Director, Bureau of Land Management.

National Park Service

Gateway National Recreation Area; Gateway Advisory Commission Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act, that a meeting of the Gateway National Recreation Area Advisory Commission will be held commencing at 3 p.m., Monday, June 15, 1981, at Federal Hall, lower level, 28 Wall Street, New York.

The Commission was established by Pub. L. 92–592 to meet and consult with the Secretary of the Interior on general policies and specific matters relating to the development of Gateway National Recreation Area.

The matters to be discussed at this meeting include:

1. Status of Park—

(a) Response from Secretary to Resolution.

(b) Latest developments.

2. Budget Fiscal Year 1981. (a) Status of Funds, Construction/Planning/Operations.

3. Transportation—

(a) Status of one-way tolls.

(b) Status of ferry service.

4. Floyd Bennett Field Phase II—(a) Planning and alternatives.

5. Breezy Point Co-operative—(a) Status

6. New Business—

(a) William Fitts Ryan Visitor Center Dedication June 20th.

(b) Scheduling of next six meetings of Gateway Advisory Commission.

Persons wishing further information concerning this meeting or who wish to submit written statements, may contact Herbert S. Cables, Superintendent, Gateway National Recreation Area, Headquarters, Building #69, Floyd Bennett Field, Brooklyn, New York 11234, (212) 630–0353.

Minutes of the meeting will be available for inspection four weeks after

the meeting at the Gateway National Recreation Area Headquarters building.

Dated: May 13, 1981.

Herbert S. Cables, Jr.,

Superintendent.

BILLING CODE 4310-70-M

National Capital Memorial Advisory Committee; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the National Capital Memorial Advisory Committee will be held at 1:30 p.m. on Wednesday, June 17, 1981, in Room 234 at the National Capital Region Headquarters, 1100 Ohio Drive, SW., Washington, D.C.

The Committee was established for the purpose of preparing and recommending to the Secretary broad criteria, guidelines and policies for memorializing persons and events on Federal lands in the National Capital Region (as defined in the National Capital Planning Act of 1952, as amended) through the media of monuments, memorials and statues. It is to examine each memorial proposal for adequacy and appropriateness, make recommendations to the Secretary with respect to site location on Federal land in the National Capital Region and to serve as an information focal point for those seeking to erect memorials on Federal land in the National Capital Region.

The members of the Committee are as follows:

Mr. Russell E. Dickenson (Chairman), Director, National Park Service, Washington, D.C.
Mrs. Helen M. Scharf, Chairman, National Capital Planning Commission, 1325 G Street, NW., Washington, D.C.
Mr. George M. White, Architect of the Capitol, Washington, D.C.
General Mark W. Clark, Chairman, American Battle Monuments Commission
Mr. J. Carter Brown, Chairman, Commission of Fine Arts, Washington, D.C.
Honorable Marion S. Barry, Mayor of the District of Columbia, Washington, D.C.
Mr. Gerald P. Carmen, Commissioner, Public Buildings Service, Washington, D.C.

The purpose of the meeting will be to review the following memorial proposals:

A.

1. H.J. Resolution 207

To require the Secretary of the Interior to place a plaque at the United States Marine Corps War Memorial honoring Joseph Rosenthal, photographer of the scene depicted by the memorial.

2. S.J. Resolution 48

To provide for the erection of an appropriate statue or other memorial in the Arlington National Cemetery to honor individuals who were combat glider pilots during World War II.

3. S. 941

To authorize the construction and maintenance of the General Draza Mihailovich Monument in Washington, District of Columbia, in recognition of the role he played in saving the lives of approximately five hundred United States airmen in Yugoslavia during World War II.

B. Also, review draft design objectives and guidelines for the proposed Navy memorial authorized by Pub. L. 96-199 (Section 113a).

C. Also review the preliminary design for the Vietnam Veterans Memorial to be located in Constitution Gardens, West Potomac Park. This design was recently selected in a national design competition from 1,420 entries. The competition was conducted by the Vietnam Veterans Memorial Fund, sponsors of the memorial.

The meeting will be open to the public. Any person may file with the Committee a written statement concerning the matters to be discussed. Persons who wish to file a written statement or who want further information concerning the meeting may contact Mr. John G. Parsons, Associate Regional Director, Land Use Coordination, National Capital Region, at (202) 426-7750. Minutes of the meeting will be available for public inspection 2 week after the meeting at the National Capital Region Headquarters, Room 208, 1100 Ohio Drive, SW., Washington, D.C.

Dated: May 19, 1981.

George J. Becklasy,

Acting Regional Director, National Capital Region.

BILLING CODE 4310-70-M

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 29614]

Elgin, Joliet & Eastern Railway Co.—Exemption Under 49 U.S.C. 10505 From 49 U.S.C. 11343

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Interstate Commerce Commission exempts from the requirements for prior approval under 49 U.S.C. 11343 the trackage rights agreement for Elgin, Joliet, and Eastern Railway Company (EJ&E) to operate over approximately 2,500 feet of track owned by the Indiana Harbor Belt Railway (IHB) and approximately 384 feet of track owned by the Baltimore and Ohio Chicago Terminal Railroad Company (BOCT). Both tracks are located in Hammond (Lake County), IN.

DATES: This exemption will be effective June 25, 1981. Petitions for reconsideration of this action must be filed within 20 days after this publication.

ADDRESSES: Send petitions for reconsideration to: (1) Section of Finance, Room 5414, Interstate Commerce Commission, 12th Street & Constitution Avenue NW., Washington, DC 20423, and (2) Petitioner's representative D. Kevin Blair, Attorney for Elgin, Joliet and Eastern Railway Company, 55 West Monroe, Suite 1500, Chicago, IL 60603.

Pleadings should refer to Finance Docket No. 29614.

FOR FURTHER INFORMATION CONTACT: Ellen Hanson, (202) 275-7245.

SUPPLEMENTARY INFORMATION:

Background

The Elgin, Joliet, and Eastern Railway Company (EJ&E), a common carrier by railroad, seeks exemption pursuant to 49 U.S.C. 10505 in connection with two proposed trackage rights agreements by petition filed March 23, 1981.

The agreement, dated December 1, 1980, is between EJ&E and the Indiana Harbor Belt Railroad Company (IHB). It grants EJ&E the right to use approximately one-half mile of IHB track immediately west of, and connected with, EJ&E track used in connection with its service to industries in northwest Indiana.

The other agreement, dated December 31, 1980, is with the Baltimore and Ohio Chicago Terminal Railroad Company (BOCT). It grants EJ&E a right to use approximately 384 feet of track extending east from the Illinois-Indiana State line. The easternmost end of the track connects with the track owned by the IHB and used by EJ&E under its trackage rights agreement.

In accordance with an agreement dated August 1, 1972, EJ&E had been using a 960-foot section of track owned by the Erie Lackawanna Railway Company (EL). This track extends east from the Illinois-Indiana State line to a section of EJ&E track known as the Towle Spur which is leased from EL. The Towle Spur eventually connects with a EJ&E main line track used to serve industries along Lake Michigan in northwestern Indiana.

On April 1, 1976, EL ceased operations; EJ&E has been the only railroad continuing operations on this track. The agreements will make it possible for the EL trackage to be removed.

Specifically, they give EJ&E an alternative route between the Indiana-Illinois State line and the EJ&E right-of-way one-half mile to the east. This route runs substantially parallel to and is located roughly 100 feet to the north of the route now used by EJ&E. The agreements with IHB and BOCT will provide EJ&E alternate access to its right-of-way.

The agreements will not increase, decrease, or alter the competition among carriers serving the Chicago Switching District. No industries are served solely by these lines, therefore, there will be no disruption of service.

The trackage rights agreements will benefit several railroad operations in the Chicago Switching District by reducing the cost to all parties who now pay a pro-rata share of the State Line Interlocker maintenance expense.

Discussion and Conclusions

Exemptions Criteria

The acquistion by a rail carrier of trackage rights over another rail line requires our prior approval under 49 U.S.C. 11343, pursuant to an application filed under 49 CFR Part 1111.

Under 49 U.S.C. 10505, as recently amended by section 213 of the Staggers Rail Act of 1980 (Pub. L. No. 96-448, 94 Stat. 1895, October 14, 1980), we are authorized to exempt a rail transaction where we find that (1) regulation is not necessary to carry out the rail transportation policy set forth in 49 U.S.C. 10101a, and (2) the transaction is either of limited scope or regulation of the transaction is not needed to protect shippers from the abuse of the market power.

The two trackage rights agreements under consideration involve approximately one-half mile of track which will simply provide EJ&E with an alternative route of access to its right-of-way without the need to pass over the EL tracks. Implementation of the proposed trackage rights agreements will not allow an expansion of EJ&E's service market, nor will it alter the existing rail service. The impact of the agreements will not affect the services available to any shipper located in the Chicago Switching District. Therefore, our scrutiny of this transaction is not necessary to carry out the rail transportation policy. Exempting these transactions from regulation will facilitate at least one of the objectives: to minimize the need for regulatory control, and to require expeditious decisions when regulation is necessary. 49 U.S.C. 10101a(2).

Additionally, the exemptions would avoid the undue burden of time and expense by the applicant and other parties seeking Commission approval.

Also, the agreements are of limited scope because: (1) only small segments of track are involved, (2) no significantly changed rail operations will occur; and (3) neither railroad employees, shippers, carriers, nor the environment will be affected adversely.

Having concluded that the transaction is of limited scope, we need not determine whether regulation is necessary to protect shippers from the abuse of market power.

Labor Protection

The Rail Labor Executives' Association has filed in opposition to the application, requesting conditions for the protection of employees. In granting this exemption, we may not relieve a carrier of its obligation to protect the interests of employees. See 49 U.S.C. 10505(g)(2). Therefore, as a condition to use of this exemption, we will require the uniform level of labor protection which is set forth in *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified by *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

We find: (1) Application of the requirements of 49 U.S.C. 11343 for prior approval of EJ&E's trackage rights and operations over 2,500 feet of track owned by IHG and 384 feet of track owned by BOCT is not necessary to carry out the rail transportation policy of 49 U.S.C. 10101a.

(2) This transaction is of limited scope.

(3) This decision will not relieve EJ&E from an obligation to provide contractual terms for liability and claims which are consistent with 49 U.S.C. 11707.

(4) This decision is not a major Federal action significantly affecting energy consumption or the quality of the human environment.

It is ordered: (1) Pursuant to 49 U.S.C. 10505, we exempt EJ&E's acquisition of the described trackage rights over the IHB and BOCT from 49 U.S.C. 11343, subject to the employee protective conditions imposed in *Norfolk & Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 650 (1978), as modified by *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

(2) Within 60 days after this transaction is consummated, EJ&E shall submit three copies of a sworn statement showing all journal entries necessary to record the transaction.

(3) This exemption shall continue in effect for one year from the effective date of this decision. The parties must consummate the transaction during that time in order to take advantage of this exemption.

(4) Notice of our action shall be given to the general public by delivery of a copy of this decision to the Director of the Federal Register, for publication.

(5) This decision shall be effective 30 days from its date of publication in the **Federal Register**.

(6) Petitions to stay the effective date of this decision must be filed no later than 10 days after the date of publication in the **Federal Register**.

(7) Petitions to reopen this proceeding for reconsideration must be filed no later than 20 days after the date of publication in the **Federal Register**.

Dated: May 15, 1981.

By the Commission, Acting Chairman Alexis, Commissioners Gresham, Clapp, Trantum, and Gilliam. Acting Chairman Alexis was absent and did not participate.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

Finance Applications; Decision-Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 (formerly Section 5) of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsiderations; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1132.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive and effective notice. The notice will indicate that

consummation of the transfer will be presumed to occur on the 20th day following service of the notice, unless either applicant has advised the Commission that the transfer will not be consummated or that an extension of time for consummation is needed. The notice will also recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 30 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

By the Commission, Review Board No. 3, The Motor Carrier Board, Members Krock, Joyce, and Dowell.

MC–FC–78955. By decision of March 27, 1981, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board No. 3 approved the transfer to ALABAMA STORAGE COMPANY, INC., d.b.a. ALABAMA–MAYFLOWER, Birmingham, AL 35211 of certificate No. MC–26544 (Sub-No. 2) issued May 6, 1975, to Alabama Storage Company, Inc. (X&Y Corp.), Dothan, AL 36301 authorizing the transportation of *used household goods*, between points in Calhoun, Cherokee, Clay, Cleburne, Etowah, Randolph, Saint Clair, Talladega, De Kalb, Bibb, Blount, Cullman, Fayette, Jefferson, Lamar, Marion, Pickens, Shelby, Tuscaloosa, Walker, and Winston Counties, AL. Representative: Jim Loftin, P.O. Box 1333, Dothan, AL 36302. No TA application has been filed. Transferee holds no authority.

MC–FC–78993. By decision of March 12, 1981, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board No. 3 approved the transfer to HAPPY TIME TOURS (THUNDER BAY) LIMITED of Certificate No. MC–127618 issued February 2, 1967 to Wagar Coach Lines, Limited authorizing the transportation over irregular routes of passengers and their baggage; in charter operations, beginning and ending at ports of entry in the United States. Canada Boundary Line, and extending to points in the United States (except those in Alaska and Hawaii), restricted to traffic originating at points on Ontario, Canada. Representative: Jeremy Kahn, Attorney-at-Law, 1511 K Street, NW, Washington, D.C. 20005.

MC–FC–79010. By decision of April 9, 1981, issued under 49 U.S.C. 10931 or 10932 and the transfer rules at 49 CFR 1132. Review Board No. 3 approved the transfer to TRANS-WAY, INC., of Avenel, NJ, of Certificate No MC–120963 and (Sub-No. 1) issued to Robert Bernard Brysh, d.b.a. Challenger Freightways, of Meridan, CT, evidencing a right to engage in transportation in interstate commerce corresponding in scope to Certificate C–1473 dated June 2, 1961, issued by the Connecticut Public Utilities Commission, authorizing general commodities between points in Connecticut subject to the following conditions: (1) Transferor must request in writing cancellation of Certificate of Registration No. MC–120963 (Sub-1) and (2) transferee shall prior to or concurrently with, consummation of the transaction, furnish the Commission a certified copy of the State certificate as re-issued to the acquiring party applicant, or if the State Commission does not re-issue the certificate, a certified copy of the order which approves the transfer of the intrastate certificate, together with a statement in writing confirming the date of consummation of the interstate transaction. Representative: Robert B. Pepper, 168 Woodbridge. Avenue, Highland Park, NJ 08904. Transferee is a carrier. TA lease is not sought.

Note.—No. MC–147784 (Sub-Nos. 2 and 3), published in another section of this **Federal Register** issue, are directly related matters.

MC–FC–79052. By decision of April 9, 1981, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board No. 3 approved the transfer to QUAD CITIES EXPRESS, INC., of Rock Island, IL, Certificate No. MC–149492 and (Sub-No. 1) F issued March 28, 1980, and December 18, 1980, to Chicago and Quad Cities Express, Inc., of Chicago, IL, authorizing the transportation of Docket No. MC–149492. Regular routes: *General commodities* (except those of unusual value, and except dangerous explosives, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 MC 467, commodities in bulk, and those requiring special equipment, Between Chicago and Moline, IL, serving all intermediate points, From Chicago over U.S. Highway 66 to junction Alternate U.S. Highway 66, then over Alternate U.S. Highway 66 to Joliet, IL (also from Chicago over Illinois HIghway 4A to Joliet), then over unnumbered highway via Colona and Carbon Cliff, IL, to junction Illinois Highway 92 to Moline, and return over the same route. No. MC–149492 (Sub-No. 1 F). Regular routes: *General commodities* except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment (1) between Moline, Illinois, and its commercial zone and Clinton, Iowa, and return over the same route, serving all intermediate points, and (2) between Moline, Illinois, and its commercial zone and Mascatine, Iowa, and its commercial zone; from Moline Illinois, over U.S. Highway 61 and return over the same route, serving all intermediate points. Representatives: Brian K. Ridenour, P.O. Box 82928, 1200 N. Street, 500 Atrium, Lincoln, NE 68501, and Philip A. Lee, 120 West Madison Street, Suite 618, Chicago, IL 60602.

MC–FC–79053. By decision of March 30, 1981, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board No. 3 approved the transfer to HAROLD TRUCKING, INC., of Seminary, MS, of permit No. MC–123919 issued Spetember 28, 1966, to Floyd Davia Bullock, SR., d.b.a. Floyd Bullock, of Hattiesburg, authorizing the transportation *farm supplies* from Birmingham and Mobile, AL, and New Orleans, LA, to points in MS (except points in that part of MS located west of a line beginning at Vicksburg, MS, and extending north along U.S. Hwy 61 to junction MS Hwy 3, then along MS Hwy 3 to Yazoo City, MS, then along U.S. Hwy 49W to junction U.S. Hwy 49E east of Yazoo City, MS, then along U.S. Hwy 49E to Greenwood, MS, then along MS Hwy 7 to junction MS Hwy 8, then along MS to Grenada, MS, then north along U.S. Hwy 51 to the Mississippi-Tennessee State Line), under a continuing contract, or contracts, with Mississippi Federated Cooperatives, of Jackson, MS, restricted against transportation in tank or hopper-type vehicles. Representative: Donald B. Morrison, P.O. Box 22628, Jackson, MS 39205.

MC–FC–79058. By decision April 9, 1981, issued under 49 CFR 1132, Review Board No. 3 approved the transfer to LUSIUS, INC., of Commerce City, CO, of Certificate No. MC–143199 issued January 29, 1980 to Cop's, Inc., of Commerce City, CO, authorizing the transportation of *meats, meat products, meat byproducts and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I in *Descriptions in Motor Carrier Certificates*, 61 MCC 209 and 766 (except hides and commodities in bulk), from Denver, Ft. Morgan, Greely, and Sterling, CO, to points in Connecticut, Delaware, Illinois, Indiana, Kentucky, Maine, Maryland, Massachusets, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, and

the District of Columbia, restricted to the transportation of shipments originating at the named origins and destined to the named destination points. Representative: Richard E. Cole, 8331 Pontiac Street, Commerce City, CO 80022, (303) 289–2941.

MC–FC–79064. By decision of March 30, 1981, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board, No. 3 approved the transfer BLUE WATER TRANSPORT, a Division of International Movements, Inc. of Pasadena, MD, of Certificate No. MC–84751 and Subs 3 and 4 issued to Merchants Storage Company of Virginia, of Alexandria, VA, (Richard A. Bantl, Trustee in Bankruptcy) authorizing the transportation of used automobiles, in driveaway service, from Washington, DC, to New York, NY, and points in New York and New Jersey within ten miles of New York, NY; Baltimore, MD, Portsmouth, Newport News, and Norfolk, VA, and Philadelphia, PA, with no transportation for compensation on return except as otherwise authorized, subject to certain restrictions; *household goods* as defined by the Commission, between points in the District of Columbia, on the one hand, and, on the other, points within 100 miles of the District of Columbia; between Takoma Park, MD, Alexandria, VA, points in Arlington County, VA, and points in Maryland within ten miles of Takoma Park, MD, on the one hand, and, on the other, points in Pennsylvania, Delaware, Georgia, South Carolina, North Carolina, Virginia, Maryland, and Florida; *Household goods* as defined by the Commission, and *soda fountain equipment*, between Washington, DC, on the one hand, and, on the other, points in Pennsylvania, Delaware, New Jersey, New York, Rhode Island, Tennessee, Georgia, South Carolina, North Carolina, Virginia, Maryland, and Florida; *used household goods*, between the District of Columbia, Alexandria, VA, and points in Montgomery, Howard, Frederick, Carroll, Baltimore, Anne Arundel, Prince Georges, Calvert, Charles, and St. Marys Counties, MD, Baltimore, MD, and points in Arlington, Fairfax, Prince William, Stafford, Spotsylvania, King George, Facquier, and Loudon Counties, VA, subject to certain restrictions; *household goods*, between, Washington, DC, on the one hand, and, on the other, points in Illinois, Ohio, Connecticut, Kentucky, Massachusetts, West Virginia, Vermont, and Maine. Representative: Alan F. Wohlstetter, 1700 K Street, NW, Washington, DC 20006. Transferee is not a carrier. TA lease is not sought.

MC–FC–79072. By decision of March 30, 1981, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board No. 3 approved the transfer to PACIFIC INTERMODAL TRANSPORT, INC., Bothell, Washington of certificate No. MC–125551 (portion) and MC–125551 Sub 16F, issued December 3, 1969, to K & W Trucking Co., Inc., St. Cloud, Minnesota authorizing the common carrier transportation over irregular routes of (1) *general commodities*, except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, between points in Alaska with the pertinent restrictions. Sub 16F *general commodities* (except classes A and B explosives), between points in the commercial zone of Seattle, WA, restricted to traffic having a prior or subsequent movement by water. Representative: Robert D. Gisvold, (612) 333-1314, 1600 TCF Tower, 121 So. 8th Street, Minneapolis, MN 55402.

MC–FC–79085. By decision of April 9, 1981, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1132, Review Board No. 3 approved the transfer to NOR–PAC DISTRIBUTING CORP. of Aberdeen, WA a portion of Certificate No. MC–81495 1 and all of MC–81495 (Sub-Nos. 2 and 4) issued April 11, 1966, April 19, 1968, and May 11, 1971 to Vigilant, Inc. of Aberdeen, WA authorizing the transportation of new furniture, stoves and machinery, over a regular route, between Hoquiam, Wash., and Portland, Oreg. From Hoquiam over Washington Highway 9 to Grand Mount, Wash., thence over U.S. Highway 99 to Portland, and return over the same route. Service is authorized to and from the intermediate point of Aberdeen, Wash. General commodities, except those of unusual value, and except dangerous explosives, household goods as defined in practices of Motor Carriers of Household Goods, 17 MCC 467, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, over irregular routes, between points and places within three miles of Abredeen, Hoquiam, and Cosmopolis, Washington, including Aberdeen, Hoquiam and Cosmopolis, general commodities (except those of unusual value, dangerous explosives, household goods, as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), over irregular routes, between points in Grays Harbor County, Wash., restricted to prior or subsequent interstate rail movements. General commodities (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), over irregular routes between Aberdeen and Hoquiam, Wash., on the one hand, and, on the other, the Wynoochee Dam Site (Grays Harbor County), Wash. Representative: George Kargianis, 2120 Pacific Bldg., Seattle, WA 98104, Omaha, NE 68102. TA application has not been filed.

MC–FC–79088. By decision of April 9, 1981, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board No. 3 approved the transfer to LOOP FLEET SERVICE, INC. of Permit No. MC–148583 and MC–148583 (Sub-No. 4F) issued September 25, 1975 to Loop Cartage, Inc. authorizing the transportation of Commodities sold in drug, apparel, chain, discount and department stores between points in Kenosha, Milwaukee, Ozaukee, Racine and Waukesha Counties, WI, Lake County, IL and Chicago, IL. Also plumbing fixtures, electric generators and internal combustion engines between the facilities of Kohler Company in Sheboygan County, WI and Chicago, IL and Milwaukee and Waukesha, WI. Subject to the following conditions if any. Representative: James L. Sernovite, 1818 N. Commerce St., Milwaukee, WI 53212.

MC–FC–79092. By decision of April 9, 1981, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board No. 3 approved the transfer to LEONARD JOSEPH HAMAEKERS, d.b.a. AMERICAN TRAIL VENTURES of Mountain View, CA of Certificate No. MC–145008 (Sub 2)F issued to Western Safaris, Inc., d.b.a. Heart of America Tours of El Paso, TX authorizing: *passengers* and their baggage, limited to transportation of not more than 20 passengers (excluding the driver) in one vehicle at one time in one-way and round-trip special operations as camping and sightseeing tours, from El Paso, TX, Denver, CO, and Los Angeles and San Francisco, CA, to points in AZ, CA, CO, NM, NV, TX and UT, and return. Representative: Leonard J. Hamaekers, 1555 W. Middlefield Rd., Mountain View, CA 94043. TA lease is not sought. Transferee is not a carrier.

MC–FC–79100. By decision of April 10, 1981, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board No. 3 approved the transfer to REYNOLD L. MIARER, an Individual of Certificate No. MC–146676

(Sub-No. 1F) issued December 2, 1980 to Burks Trucking, Inc. authorizing the transportation of *fertilizer and fertilizer ingredients,* over irregular routes, between the facilities of Ohio Farmers Grain and Supply Association, at or near Fostoria, OH, on the one hand, and, on the other, points in Indiana and Michigan. Representative: Richard H. Brandon, P.O. Box 97, 220 West Bridge Street, Bublin, OH 43017.

MC–FC–79102. By decision of April 9, 1981 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board Number 3 approved the transfer to MARTINO TRUCKING INC., of Rochester, PA of Certificate No. MC–128618 issued on August 3, 1967 to John L. Martino, d.b.a. Martino Trucking Co., of Rochester, PA authorizing the transportation of (1) *rough castings,* in dump vehicles, from New Brighton and Rochester, PA to Youngstown, OH; and (2) *scrap metals,* in dump vehicles, from Youngstown, OH, to New Brighton and Rochester, PA. Representative: John A. Vuono, Esq., Wick, Vuono & Lavelle, 2310 Grant Building, Pittsburgh, PA 15219.

MC–FC–79104. By decision of April 9, 1981 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board No. 3 approved the transfer to PAUL's EXPRESS, INC., of Westwood, MA, of Certificate No. MC–17806, acquired in No. MC–FC–75731 by Ruth F. Holderried, Joseph E. Holderried, and Leo Donald Holderried, Jr., d.b.a. Paul's Express, of Westwood, MA, authorizing *General commodities* (usual exceptions), between points in Massachusetts within the miles of Boston, including Boston. Representative: Joseph E. Holderried, 198 Mill St., Westwood, MA 02090. TA lease is not sought. Transferee is not a carrier.

Decision-Notice

The following operating rights applications, filed on or after July 3, 1980, are filed in connection with pending finance applications under 49 U.S.C. 10926, 11343 or 11344. The applications are governed by Special Rule 252 of the Commission's General Rules of Practice (49 CFR 1100.252).

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. Persons submitting protests to applications filed in connection with pending finance applications are requested to indicate across the front page of all documents and letters submitted that the involved proceeding is directly related to a finance application and the finance docket number should be provided. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. However, the Commission may have modified the application to conform to the Commission's policy of simplifying grants of operating authority.

Findings: With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each applicant has demonstrated that its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests in the form of verified statements as to the finance application *or* to the following operating rights applications directly related thereto filed within 45 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except where the application involves duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice by effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Dated: May 18, 1981.

By the Commission, Review Board Number 3, Members Krock, Joyce and Dowell.

MC 147784 (Sub-2), filed February 9, 1981. Applicant: TRANS-WAY, INC., Route 1 and Inman Avenue, Avenel, NJ 07001. Representative: Robert B. Pepper, 168 Woodbridge Avenue, Highland Park, NJ 08904. To operate as a common carrier by motor vehicle, over irregular routes, transporting General Commodities (except classes A and B explosives) between points in Connecticut. (Hearing site: Newark, NJ.)

Note.—This application is filed as a directly related application to finance proceeding docketed MC–FC–79010. The purpose of this application is a conversion of a certificate of registration. No. MC–FC–79010 is published in another section of this **Federal Register** issue.

MC 147784 (Sub-3), filed February 9, 1981. Applicant: TRANS-WAY, INC., Route 1 and Inman Avenue, Avenel, NJ 07001. Representative: Robert B. Pepper, 168 Woodbridge Avenue, Highland Park, NJ 08904. To operate as a common carrier by motor vehicle, over irregular routes, transporting (1) General commodities, except classes A and B explosives, between points within the territory (inclusive of the points specified) bounded by a line beginning at New York, NY, and extending in a westerly direction along NJ Hwy 4 to Paterson, NJ, thence along US Hwy 46 to junction US Hwy 202, thence along US Hwy 202 to junction US Hwy 206, thence along US Hwy 206 to Princeton, NJ, thence in a southeasterly direction along an unnumbered Hwy to Hightstown, NJ, thence along NJ Hwy 33 to junction US Hwy 9, thence along Hwy 9 to Perth Amboy, NJ, and thence in a easterly direction to New York, NY, on the one hand, and, on the other, points in CT; (2) General commodities, except those of unusual value, classes A and B explosives, household goods as defined by the Commission, office furniture and equipment, commodities in bulk, and those requiring the use of special equipment between points in CT, on the one hand, and, on the other, Philadelphia, PA, and (3) Floor covering and materials, supplies and equipment used or useful in the installation of floor covering, from points in CT to Camden, NJ, Wilmington, DE and Baltimore, MD. (Hearing site: Newark, NJ.)

Note.—This application is filed as a directly related application to finance proceeding docketed MC–FC–79010. The purpose of this application is eliminate the gateway of Greenwich, CT. No. MC–FC–79010 is published in another section of this **Federal Register** issue.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

Motor Carrier Temporary Authority Application; Important Notice

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F–122

The following applications were filed in region I. Send protests to: Interstate Commerce Commission, Regional Authority Center, 150 Causeway Street, Room 501, Boston, MA 02114.

MC 155695 (Sub-1–1TA), filed May 7, 1981. Applicant: WEIDHAAS TOURS, INC., 4420 Westfield Avenue, Pennsauken, NJ 08110. Representative: Robert G. Weidhaas (same as applicant). *Passengers and their baggage in charter and special operations* from points in NJ and PA to points in the U.S. and return. Agatha L. Mergenovich,

Secretary.

[FR Doc. 81-15507 Filed 5-22-81; 8:45 am]

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by Special Rule 251 of the Commission's Rules of Practice, see 49 CFR 1100.251. Special Rule 251 was published in the **Federal Register** on December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. Applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we fine, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulation. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the

Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later become unoposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

Volume No. OPY-3-072

Decided: May 18, 1981.

By The Commission, Review Board No. 2, Members Carleton, Fisher, and Williams.

MC 78795 (Sub-1), filed May 6, 1981. Applicant: ERNEST L. DINGES, d.b.a. DINGES A. MOVING & STORAGE CO., 800 2nd Ave., Dunvansville, PA 16635. Representative: Alvin F. Dinges (same address as applicant). Transporting *used household goods* for the account of the United States Government incident to the performance of a pack-and-crate service on behalf of the Department of Defense, between points in the U.S.

MC 104104 (Sub-27), filed May 6, 1981. Applicant: GEORGE A. FETZER, INC., Route 565, Augusta, NJ 07822. Representative: Louise M. Fetzer (same address as applicant). Transporting for or on behalf of the United States Government, *general commodities* (except used household goods, hazardous or secret materials, and sensitive weapons and munitions), between points in the U.S.

Volume No OPY-3-075

Decided: May 18, 1981.

By the Commission, Review Board No. 2, Members Carleton, Fisher, and Williams.

MC 155835, filed May 6, 1981. Applicant: THOMAS A. BROWN, 3509 76th St., Lubbock, TX 79423. Representative: Thomas A. Brown (same address as applicant), (806) 792-0285. As a *broker of general commodities* (except household goods), between points in the U.S.

BILLING CODE 7035-01-M

[Volume No. OP-3-232]

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Decided: May 18, 1981.

The following applications, filed on or after July 3, 1980, are governed by Special Rule 247 of the Commission's Rules of Practice, see 49 CFR 1100.247. Special rule 247 was published in the Federal Register of July 3, 1980, at 45 FR 45539.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.247(B). A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.gs., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment not a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests in the form of verified statements filed within 45 days of publication of this decision-notice (or, if the application later becomes unopposed) appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notice that the decision-notice is effective. Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board Number 2, Members Carleton, Fisher and Williams.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

MC 133194 (Sub-23), filed January 28, 1981. Applicant: WOODLINE MOTOR FREIGHT, INC., Airport Rd., P.O. Box 1047, Russellville, AR 72801. Representative: Richard H. Streeter, 1729 H St., NW, Washington, DC 20006. Over regular routes, transporting *general commodities* (except classes A and B explosives), (1) Between Dardanelle, AR and Danville, AR: From Dardanelle over AR Hwy 27 to junction AR Hwy 10, then over AR Hwy 10 to Danville, and return over the same route, (2) Between Dardanelle, AR and Rover, AR: From Dardanelle over AR Hwy 7 to junction U.S. Hwy 28, then over U.S. Hwy 28 to Rover, and return over the same route, and (3) Between Ola, AR and Danville, AR, over AR Hwy 10, serving all intermediate points in (1), (2), and (3) above.

Note.—Applicant intends to tack and interline this requested authority with its existing authority.

BILLING CODE 7035-01-M

[Volume No. 86]

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

Decided: May 20, 1981.

The following restriction removal applications, filed after December 28, 1980, are governed by 49 CFR Part 1137 was published in the Federal Register of December 31, 1980, at 45 FR 86747.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1137.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Restriction Removal Board, Members Sporn, Alspaugh, and Shaffer.

Agatha L. Mergenovich,
Secretary.

MC 5888 (Sub-59)X, filed May 7, 1981. Applicant: MID-AMERICAN LINES, INC., 127 West 10th Street, Kansas City, MO 64105. Representative: Carl L. Steiner, 39 South LaSalle Street, Chicago, IL 60603. Applicant seeks to remove restrictions from its lead and Sub-Nos. 16, 17, 21, 24, 30, 31, 32, 33, 34, 35, 36, 37, 38, 40, 41, 42, 43F, 49F, 50F, 51F, 54F, and 56F certificates to: (1) eliminate all exceptions in its general commodities authority except classes A and B explosives in its lead and Sub-Nos. 17, 21, 24, 27, 29, 30, 31, 34, 35, 36, 40, and 42; (2) eliminate all service restrictions and authorize service at all intermediate points on its regular routes; (3) authorize two-way authority in lieu of one-way authority in the lead (Sheets 4 and 5), and in Sub-Nos. 17 (Sheet 2); 31 (Sheet 4); and 35 (Sheets 3, 9, 10, 11 and 29); (4) authorize country-wide authority in lieu of plant sites and specified points in the irregular route portions of its authorities, as follows: (a) in its lead (Sheet 5) from Parsons, Neodesha, Pittsburg, Concordia, Fort Scott and Hillsboro, KS, to Lalette, Wilson, Crawford, Cloud, Bourbon, and Marion Counties, KS; from St. Joseph, Carthage, Lemar and Butler, MO, to Buchanan, Jaspar, Barton and Bates Counties, MO; (b) in Sub-No. 17, Sheet 2, Paragraph 2, from Cedar Point, Florence, Clements, Council Grove, Cottonwood Falls, Peabody, Wichita, Hutchinson, El Dorado, Burns, Emporia, and Matfield Green, KS, to Chase, Marion, Morris, Sedgwick, Reno, Butler and Lyons Counties, KS, and from St. Joseph, MO, to Buchanan County, MO; and in Paragraph 5, from Emporia, KS, to Lyon County, KS; and on Sheet 3, from Cedar Point, KS, to Chase County, KS; (c) in Sub-No. 31, Sheet 4, from Terre Haute, IN, to Vigo County, IN, and from Decatur, Springfield, Quincy, LaSalle, Elgin, Canton, Macomb, Monmouth, Kewanee and Ottawa, IL, to Macon, Sangamon, Adams, LaSalle, Kane, Fulton, McDonough and Henry Counties, IL; (d) in Sub-No. 35, Sheet 9, Paragraph 1, from Osceola, Creston, Gowrie and Coon Rapids, IA, to Clarke, Union, Webster and Carroll Counties; IA; (e) in Sub-No. 37, from Wathena, KS, to Doniphan County, KS; (f) in Sub-No. 38, from Waukesha, WI, to Waukesha County, WI; (g) in Sub-No. 41, from New Haven, IN, to Allen County, IN; (h) in Sub-No. 43, from Waukesha, WI, to Waukesha County, WI; (i) in Sub-No. 49F, from Monroe, MI to Monroe County, MI; and; (j) in Sub-No. 50F, from Bayport, MN, to Washington, County, MN; (5) in Sub-No. 32, eliminate the plant site limitation and the originating at and destined to restriction; remove exceptions of iron and steel, bulk and size and weight commodities and authorize service between points in Scott County, MN, on the one hand, and, on the other, points in several States; (6) in Sub-No. 33, authorize radial authority in lieu of one-way authority between Kansas City, KS, on the one hand, and, on the other, points in MN and Wi, and to remove in bulk restriction, and the restriction against service at a facility in Kansas City, (7) to enlarge commodity descriptions, as follows: (a) in the lead sheet 5, from dairy products to "food and related products;" on Sheet 4 from malt beverages to "food and related products" and from machinery and twine to "machinery and textile mill products;" and on Sheet 5, from tractors, farm and dairy machinery, supplies, equipment and parts and building materials and equipment to "machinery and building materials;" (b) in Sub-No. 17, Sheet 2, from agricultural implemenmts and agricultural implements parts to "lumber and wood products and machinery;" (c) in Sub-No. 33, from mineral wool, mineral wool products, insulating material and insulating air ducts to "building materials; (d) in Sub-No. 35, Sheet 9, from poultry, butter and eggs, to "food and related products; sheet 15, from butter, eggs, poultry, dressed rabbits, meat & paper to "food and related products and pulp and paper products", and at Sheet 29, from steel and steel articles to "metal products;" (e) in Sub-No. 37, from building and building parts and materials, accessories and supplies used in connection with installation, erection and construction of buildings to "buildings and building materials"; (f) in Sub-No. 38, from electrical distribution transformers to "machinery;" (g) in Sub-No. 41, from fibrous glass products and materials, mineral wool products and materials, insulated air ducts, insulating products and materials, glass fibre rovings, yarn and strands and glass fibre mats and matting, to "clay, concrete, glass or stone products, and building materials and textile mill products;" (h) in Sub-No. 43F, from electrical distribution transformers and parts of same to "machinery;" (i) in Sub-No. 49F, from iron and steel articles to "metal products;" (j) in Sub-No. 50F, from windows, screens, doors, and building woodwork to "building materials;" (k) in in Sub-No. 51F, from aluminum and zinc ingots to "metal products;" (l) in Sub-No. 54F, from expanded metal products to "metal products; and (m) in Sub-No. 56F, from wrought steel pipe and tubing and wrought iron pipe and tubing to "metal products;" and (7) to authorize radial in lieu of one-way authority: (a) in Sub-No. 35, Sheet 29, between points in Putnam County, IL, and, points in IN and KY; (b) in Sub-No. 37, between points in Doniphan County, KS, and, points in IL, IN, IA, MI, MN, MO, OH, and WI, and those in NE and SD on and east of U.S. Hwy. 81; (c) in Sub-No. 38, between points in Waukesha County, WI, and, points in IA, KS and MO; (d) in Sub-No. 49F, between points in Monroe County, MI, and, points in IA, IL, IN, KS, MN, MO, OH, and WI; and (e) in Sub-No. 50F, between points in Washington County, MN, and, points in the Lower Peninsula of MI.

MC 36459 (Sub-5)X, filed April 30, 1981. Applicant: WILLIAM C. BONNER,

INC., Route 1, P.O. Box 3366, Wescosville, PA 18106. Representative: Alan Kahn & Barry D. Kleban, 1430 Land Title Building, Philadelphia, PA 19110. Applicant seeks to remove restrictions in its lead, and Sub-Nos. 1, 2, 3, and 4F certificates to (A) broaden the commodity descriptions: lead certificate (in part), to "those commodities which because of size or weight require special handling or equipment" from heaters and parts, tanks, fittings, and chemical apparatus; Sub-No. 1, to "metal products" from steel, and "building materials" from brick and concrete pipe; Sub-No. 2, to "metal products" from steel; Sub-No. 3 (in part), to "ores and minerals; and clay, concrete, glass or stone products" from marble, finished and unfinished; and, in the lead and Sub-No. 4, remove all exceptions in the general commodities authority "except classes A and B explosives"; (B) delete the restriction to traffic having a prior or subsequent movement by water in Sub-No. 4; and (c) broaden territorial descriptions from plantsite and city-wide to county-wide authority, and replace one-way service with radial service: lead certificate, between Philadelphia, PA, and, New York, NY, and points in NJ; Sub-No. 1, (a) between Philadelphia, PA, and, points in three States, and (b) Montgomery and Berks Counties, PA (Pottstown and Reading, PA), and, Atlantic (Atlantic City, NJ) and Camden Counties, NJ; Sub-No. 2, between Bucks County, PA (plantsite in Bristol, PA), and, points in three States; Sub-No. 3, (a) between Philadelphia, PA, and, points in two States and DC, and (b) between Philadelphia, PA, and points in six States and DC; and Sub-No. 4, between Philadelphia, PA, and, described parts of PA.

MC 38403 (Sub-4)X, filed May 8, 1981. Applicant: WELLING TRUCK SERVICE, INC., 3610 Tree Ct., Industrial Drive, Kirkwood, MO 63122. Representative: H. Barney Firestone, 10 S. LaSalle Street, Chicago, IL 60603. Applicant seeks to remove restrictions in lead and Sub-Nos. 2 and 3F certificates to (1) remove all exceptions in its general commodities authority (except Classes A and B explosives) in the regular route portion of the lead (2) broaden the commodity description from brick to "clay, concrete, glass or stone products" in Sub-No. 2 and from confectionery products, chocolate, cocoa and cocoa compounds, chocolate syrup, oleomargarine, in part (1) and dessert preparations and materials and supplies in part (2) to "food and related products and materials and supplies used in the manufacture thereof" in Sub-No. 3F (3) allow service at all intermediate points on its regular route between Aviston, IL and St. Louis, MO, remove the delivery only restriction at off-route points, and expand off-route points within 6 miles of Aviston and 4 miles of Trenton to Clinton County, IL, in the lead, (4) change city to county-wide, Maryland Height, MO to St. Louis County, MO in Sub-No. 2, and Trenton and Aviston to Clinton County, IL in the irregular route portion of the lead; (5) remove exception to Harvey, IL in Statewide authority in Sub-No. 2, (6) change one-way to radial authority between St. Louis County, MO and points in IL in Sub-No. 2.

MC 41932 (Sub-16)X, filed May 4, 1981. Applicant: BROWNING FREIGHT LINES, INC., 650 South Redwood Road, Salt Lake City, UT 84104. Representative: Ronald D. Browning, 1321 S. E. Water Ave., Portland, OR 97214. Applicant seeks to remove restrictions in its lead and Sub-Nos. 10, 11, 13 and 14 certificates to (1) broaden the general commodity descriptions to (a) "general commodities" in the lead (Sheets 1 and 2) and Sub-No. 13; (b) "general commodities (except Class A and B explosives)" in lead (Sheet 2), Sub-Nos. 10, 11 and 14; (2) allow service at all intermediate points between Salt Lake City, UT and Twin Falls, ID; Twin Falls and Bliss, ID; Twin Falls and Rupert, ID; Boise and Bliss, ID; Twin Falls and Buhl, ID; Buhl and Castleford, ID in the lead; and between Mountain Home and Mountain Home Air Force Base, ID in Sub-No. 11; and (3) replace off-route points with county-wide authority as follows: in the lead, Utah Army Service Forces Depot (near Ogden, UT) with Salt Lake, Davis, Weber and Box Elder Counties, UT; off-route points north of and within 15 miles of the described route between Jerome and Rupert, ID, with Cassia, Minidoka, Jerome, Twin Falls, and Gooding Counties, ID; in Sub-No. 10, Egin, a site at Scoville, ID, Lewisville, Menan, Ririe, and Roberts with Jefferson County, ID; Parker with Bannock, Bingham, Bonneville, Fremont, and Madison Counties, ID; and Borah, Aberdeen, Springfield, Rockford, and Moreland with Power, Bannock, Bingham, Cassia and Minidoka Counties, ID.

MC 67646 (Sub-99)X, filed April 24, 1981. Applicant: HALL'S MOTOR TRANSIT COMPANY, 6060 Carlisle Pike, Mechanicsburg, PA 17055. Representative: Edward W. Kelliher (same as applicant). Applicant seeks to remove restrictions in its Sub-No. 82 certificate to (1) broaden the commodity description from general commodities (with exceptions) to "general commodities (except class A and B explosives);" from dairy products, frozen foods, beverage preparations and related advertising matter, fish, meats, meat products, meat byproducts, dairy products, and articles distributed by meat packinghouses, to "food and related products"; from tile and tools, and equipment used in the installation of tile, to "clay, concrete, glass or stone products and metal products", from fencing, fence materials, and tools and equipment used in erecting fences, to "metal products"; from ammunition to "ordnance and accessories"; from skin creams, skin lotions, suntan preparations, cosmetics, antiseptic creams, shaving products, and other skin preparations, to "chemicals and related products"; and from electrical transformers and parts thereof, to "machinery" (2) authorize service at all intermediate points in connection with its regular routes through IA, WI, IL, IN, OH, PA, MD, NJ and NY, (3) in the regular-route portions broaden off-route points by (a) removing facilities limitations at named points: at Rochelle, IL; at or near St. James and Madelia, MN and, at or near Cockeysville, MD, (b) replace facilities limitations at Fernald, OH with Harrison; OH; at Brownhelm Township, OH with Vermillion, OH; at Darrowville, OH with Stow, OH; at Greenwood Township, PA with Crawford County PA; at Mt. Haley Springs, PA with Cumberland County, PA; and at Chaska, MN with Carver County, MN (4) in irregular routes change city to county-wide authority; from Milwaukee, WI to Milwaukee, Ozaukee, Racine, Washington and Waukesha Counties, WI; from North Chicago, IL to Lake County, IL; from Fairmont, MN to Martin County, MN; from Anoka, MN to Anoka County, MN; from Minneapolis/St. Paul, MN to Anoka, Carver, Dakota, Hennepin, Ramsey, Scott and Washington Counties, MN; from Villa Park, IL to DuPage County, IL from Duluth, MN to St. Louis County, MN; from Blue Earth, Fairmont, LeSeuer, Mankato, Mapleton, Madelia, Montgomery, New Prague, St. Peter, Waseca and Winnebago, MN to Blue Earth, Faribault, LeSeuer, Martin, Nicolett, Scott, Waseca and Watonwan Counties, MN; from Albany, NY to Albany County, NY; from Yonkers, NY to Westchester County, NY; and from Boston, to Essex, Middlesex, Norfolk, Plymouth, and Suffolk Counties, MA, (5) remove plantsite limitation and (a) replace Albert Lea, Fairmont, Mankato, Winnebago, and Worthington, MN with Blue Earth, Faribault, Freeborn, Martin, and Noble Counties, MN, and (b) replace Waukesha, WI with Waukesha County, WI (6) remove the "in bulk" restriction, (7) remove restriction against

transportation of hides, skins, pelts, chromes, crusts or pieces thereof from MN or IL on an alternate route authorizing general commodities (8) in regular route authority to serve points in MA remove restriction against the transportation of traffic from or to points in the commercial zones of points located in NH, on sheet 21 (9) remove the interline restriction at Mechanicsburg, PA, on sheet 25; (10) authorize service over alternate routes and at off-route points to allow service to be in connection with all applicant's regular route operations, (11) remove restrictions against transportation of traffic originating at, destined to, or interchanged at named points over all alternate routes, (12) remove "for purpose of joinder only" on regular route between Harrisburgh, PA and a junction in PA, (13) remove restriction to the transportation of traffic moving from, to, or through Pittsburgh or points in PA within 35 miles of Pittsburgh on regular routes between points in PA on sheet 12, (14) remove a restriction to traffic moving to or from Frederick, MD and points west of Frederick on regular route between Frederick and Baltimore, MD, on sheet 15, (15) remove the originating at and/or destined to facilities at Rochelle, IL restrictions on sheet 11, (16) change one-way to radial and two-way authority in connection with both regular and irregular routes authority between various points throughout the U.S. and (17) remove the restrictions limiting service from and to terminal points of Minneapolis, St. Paul, and Chicago and intermediate and off-route points to that moving to or from specified points.

MC 68860 (Sub-54)X, filed May 4, 1981. Applicant: RUSSELL TRANSFER, INCORPORATED, 5259 Aviation Drive, Roanoke, Virginia 24012. Representative: Liniel G. Gregory, Jr. (same address as applicant). Applicant seeks to remove restrictions in its lead and Sub-Nos. 13, 14, 16, 19, 21, 26, 28, 29, 30, 32F, 40F, 43F, 52F and 53F certificates and Sub-E–1 Letter notice, and its authority in MC 68860 Sub-Nos. 23 and 24 acquired in MC–F 13042 and MC–F 13054, with reissued certificates still pending. It seeks to (A) broaden the commodity descriptions: in the lead and Sub-Nos. 13, 23 and 43F, from general commodities, with exceptions, to "general commodities (except classes A and B explosives)"; in the lead, from overalls and denims, canned goods, sugar, butter, poultry, bags, wool, seeds, milk, and cream and milk powder; in Sub-E–1, part (1), from canned goods, sugar and vinegar and (also in Sub-No. 14) from such merchandise as are dealt in by wholesale, retail and chain grocery and food business houses, to "such commodities as are dealt in by retail, wholesale, chain grocery and food business houses, materials, equipment and supplies used in the conduct of such business"; in Sub-Nos. 19, 24 and E–1 part (2) from angles, bars, bases, beams, bridge steel, channels, forms (structural), joists, piling, pipe (cast iron, plate, or sheet), pipe fittings, plates (structural), rivets, rods, sheets, slabs, wire rope and accessories for beams and joists, to "iron and steel articles"; in Sub-No. 26, from incandescent electric lamps to "incandescent electric lamps, materials, equipment and supplies"; remove the restrictions against: commodities in bulk, in tank vehicles and/or requiring the use of special equipment in Sub-Nos. 21, 28, 30 and 52F; "in truckload lots" and in Sub-No. 24, parts (1), (2) and (3); and against traffic having a prior or subsequent movement by air in Sub-No. 35F; (B) broaden the territorial scope by: replacing one way authority with: radial in the lead; and Sub-Nos. 14, 19, 26, 29, 32, 40, and 53F; by removing facilities limitations in Sub-Nos. 21, 26, 32, 40, 52F and 53F; by replacing plantsite and city-wide with county-wide authority as follows: in Sub-No. 14, Lynchburg, and points within 75 miles thereof, with Lynchburg and points in Campbell, Highland, Augusta, Albemarle, Fluvanna, Buchingham, Amelia, Prince Edward, Nottoway, Charlotte, Halifax, Pittsylvania, Henry, Patrick, Floyd, Pulaski, Giles, Graig, Roanoke, Botetourt, Allegheny, Bath, Rockbridge, Bedford, Amherst, Campbell, Appomottox, Nelson, Franklin, Cumberland, Luneburg and Mecklenburg Counties, VA; in Sub-Nos. 16 and 19, Trouteville with Botetourt County, VA; and in Sub-No. 30, Huntington with Cabell County WV; and removing the restrictions limiting transportation to traffic originating at or destined to named facilities in Sub-Nos. 19 and 30.

MC 81412 (Sub-34)X, filed April 30, 1981. Applicant: VALLEY TRANSFER AND STORAGE COMPANY, INC., Route 1, P.O. Box 3366, Wescosville, PA 18106. Representative: Alan Kahn, and Barry D. Kleban, 1430 Land Title Building, Philadelphia, PA 19110. Applicant seeks to remove restrictions in its Sub-Nos. 1 and 33F certificates to (1) broaden the commodity description from, structural steel, prefabricated houses, and steel transmission poles, to "those commodities which because of their size or weight require the use of special handling or equipment"; (2) remove a facilities limitation at Hazleton, PA in Sub-No. 33F; (3) replace city-wide authority with county-wide authority as follows: Allentown and Bethlehem, PA, and West Hazelton, PA, with Lehigh, Northampton and Luzerne Counties, PA; (4) replace existing one-way authority with radial authority between points in PA, and points located throughout the U.S.; and (5) eliminate the restriction in Sub-No. 33F against service to AK, HI and PA.

MC 109328 (Sub-116)X, filed April 20, 1981, published in the **Federal Register** of May 8, 1981, republished as corrected this issue. Applicant: C & D TRANSPORTATION CO., INC., Box 10506, New Orleans, LA 70121. Representative: William P. Jackson, Jr., Box 1240, Arlington, VA 22210. Applicant seeks to remove restrictions in its lead and Sub-Nos. 103, 104, 106, 107, 108G, 110, 111, 114F, 115F, E letter notices E1, E2, E3, E4, E5, E6, E7, E8, E9, E10, E11, E12, E13, E37, E38, E39, E40, and E41 to (1) broaden commodity descriptions to "food and related products" from perishable foods, packinghouse products, dairy productrs, fresh and frozen seafood and fresh and frozen fruits and vegetables, frozen citrus products, cheese, fresh and frozen meats, foodstuffs (except bananas), foodstuffs, canned goods and frozen foods, bananas, perishable foods and foodstuffs, meat, meat products, meat by-products, dairy products, and commodities distrubuted by meat packinghouses and returned shipments, fresh or frozen foods and foodstuffs (excess carcass meat suspended on rails) and returned shipments, coffee beans, poultry products and poultry by-products, animal and poultry feed, and meat in carcass form in the lead; from meats, meat products and meat by-products and articles distributed by meat packing houses in Sub-Nos. 103, 106, 107, and E letters notices E3, E11, E37, E38, E39, E40, and E41; from spring water, in containers in Sub-No. 104; from packinghouse products, dairy products, fresh and frozen seafood and fresh and frozen vegetables, meat, meat product, meat by-products, dairy products and commodities distributed by meat packinghouses in Sub-No. 108G from bananas in Sub-Nos. 110, E letter notices E1, E2, E4, E5, E6, E7, E8, E9, E10, E12, E13, from foodstuffs in Sub-No. 111; and from frozen foods in Sub-No. 113; to "printed matter" from advertising, promotional, and display material and when moving in the same vehicle at the same time with canned goods and frozen foods in part of the lead; to "metal products" from cans in part of the lead; to "pulp, paper and related products" from boxes in part of the lead; to "containers" from cartons and containers, and cardboard, fibreboard,

paper and composition containers in parts of the lead; to "machinery" from machinery, parts, accessories, equipment, supplies, implements, parts, appliances, and products usually or customarily used or useful in the processing, manufacture, packing, freezing, or canning of foodstuffs in part of the lead; and to "containers and packaging materials" from glass and plastic containers and other related packaging materials in Sub-No. 104, (2) remove the "in bulk" restriction in the lead, Sub-Nos. 103, 106, 107, 108G, 111, 114, E37, and E41, (3) remove the mechanical refrigeration vehicle restrictions in the lead, and E3, E11, E38, and E39 (4) remove (a) the restriction against the transportation of bananas between New Orleans, LA and Gulfport, MS in the lead (b) the ex-water restrictions in the lead, and Sub-No. 110 (c) the restriction against the transportation from or to any facility of The Great Atlantic and Pacific Tea Company, Inc. of New York, NY and Hunt Foods and Industries, Inc., (merged into Norton Simon, Inc.) of Fullerton, CA, in the lead, Sub-Nos. 103, 104, 106, 107, 108G, 110, 111, E letter notices E37, E38, E39, E40, and E41 (d) the restriction against transportation to AK and HI in Sub-No. 114 (5) remove the facilities limitation (a) in the fourth paragraph of the lead and replace New Albany, MS with Union County, MS, (b) in the fifth paragraph of the lead and replace Jackson, MS with Hinds County, MS, (c) in the sixth paragraph of the lead and replace Collins, New Albany, Canton, Crystal Springs, and Jackson, MS with Covington, Union, Madison, Copiah, and Hinds Counties, MS (d) in paragraphs 8, 9, 10 and 11 in the lead and replace Moorhead, MS with Sunflower County, MS, (e) in Sub-No. 103 and replace Goodlettsville, TN with Davidson County, TN, (f) in Sub-No. 106 and replace Shreveport, LA with Caddo Parish, LA, (g) in Sub-No. 113 and replace Forest, MS with Scott County, MS, (h) in Sub-No. 114 and replace Brundidge and Troy, AL with Pike County, AL, (6) replace city with county-wide authority (a) in paragraph 2 of the lead from Montgomery, AL to Montgomery County, AL; in the seventh paragraph of the lead from Mobile, AL to Mobile County, AL; in the ninth paragraph of the lead from Birmingham, AL to Jefferson County, AL; Arlington, TX to Tarrant County, TX; Austin, IN to Scott County, IN; in the tenth paragraph of the lead, Birmingham, AL to Jefferson County, AL and Monroe, LA to Quachita Parish, LA; in paragraph twelve of the lead, Wilmington, DE to New Castle County, DE; in paragraph thirteen, Orange, TX to Orange County, TX and New Orleans and points within 15 miles thereof to New Orleans, LA; paragraphs fourteen through seventeen, Ft. Walton Beach, Panama City, and Pensacola, FL to Okloosa, Bay and Escambia Counties, FL; Gulfport, Columbus, Hattiesburg, Jackson, Laurel, Meridan, Pascagoula, and Vickburg, MS to Harrison, Lowdnes, Forrest, Hinds, Jones, Lauderdale, Jackson and Warren Counties, MS; and, Mobile, AL to Mobile County, AL; in paragraphs sixteen and seventeen of the lead Birmingham, AL to Jefferson County, AL; in paragraph 20 of the lead Decatur, IL to Macon County, IL and Terre Haute, IN to Vigo County, IN; in paragraph 21 of the lead Mobile, AL to Mobile County, AL; in paragraph 24 Sikeston, MO to Scott County, MO and Mobile and Eight Mile, AL to Mobile County, AL, (b) in Sub-No. 104, Deer Park, MD to Garrett County, MD, (c) in Sub-No. 107, Gulfport, MS to Harrison County, MS, (d) in Sub-No. 108G, second paragraph, Pascagoula, and Bay St. Louis, MS to Jackson and Hancock Counties, MS; in the fourth paragraph Montogomery, AL to Montgomery County, AL, (e) in Sub-No. 110 Mobile, AL to Mobile County, AL, (f) in E1, E11 and E12, Miami, FL to Dade County, FL (g) in E4 and E10 Terre Haute, IN to Vigo County, IN, (h) in E8 Pensacola, FL to Escambia County, FL, (i) in E37 Mobile, AL to Mobile County, AL, (j) in E3 and E39 Montgomery, AL to Montgomery County, AL, and (k) in E38 Birmingham, AL to Jefferson County, AL; (7) remove the "orginating at or destined to" named facilities restrictions in the lead and Sub-Nos. 103 and 113 and (8) change one-way to radial authority between various points throughout the U.S. in the lead, Sub-Nos. 103, 104, 106, 107, 108G, 110, 113, 115, E letter notices E1, E2, E3, E4, E5, E6, E7, E8, E9, E10, E11, E12, E13, E37, E38, E39, E40, E41. The purpose of this republication is to (1) provide notice (a) of a broadened commodity description for E letter notice E–3 in part (1); (b) of county-wide authority for lead certificate, paragraphs 7 and 21, and E-letter notices E–3 and E–38; and to (2) correct several typographical errors.

MC 109346 (Sub-10)X, filed May 4, 1981. Applicant: J. L. COX & SON, INC., 777 Action Street, Odessa, MO 64076. Representative: Tom B. Kretsinger, P.O. Box 258, 20 E. Franklin, Liberty, MO 64068. Applicant seeks to remove restrictions in its lead and Sub-No. 6 and 8 certificates to: (1) broaden the commodity description from pipe, pipe-line materials, machinery and equipment incidental to and used in connection with the construction, repairing, or dismantling of gas, gasoline and oil pipe-lines; and steel and metal pipe, pipe fittings, paint and tar to be used in the construction of pipelines; in the lead; from machinery, equipment, materials, and supplies used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and byproducts, water, or sewerage, in Sub-No. 6; and from machinery, equipment, materials, and supplies used in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines for the transportation of water and sewage, including the stringing and picking up of pipe, in Sub-No. 8, to "pipe, pipeline machinery, equipment, materials and supplies, used in connection with the construction, operation, repair, servicing, maintenance and dismantling of pipelines, including the stringing and picking up of pipe"; (2) remove the territorial restrictions limiting service between rail-heads, on the one hand, and, on the other pipe-line rights-of-way and/or to or from pipe-line rights-of-way in order to allow service between points in IA, IL, IN, KS, MO, OH, OK and TX, between points in AL, AR, CO, CT, DE, FL, GA, KY, LA, MA, MD, ME, MI, MN, MS, MT, NE, NH, NJ, NM, NC, ND, RI, SC, SD, UT, VA, VT, WI, WV, WY and DC, between points in AZ, ID, NE, OR and WA, between points in AZ, ID, NE, OR, and WA on the one hand, and, on the other, points in AL, AR, CO, CT, DE, FL, GA, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NH, NJ, NM, NY, NC, ND, OH, OK, PA, RI, SC, SD, TN, TX, UT, VT, VA, WV, WI, WY and DC, and between points in NY, PA and TN.

MC 115651 (Sub-102)X, filed May 7, 1981. Applicant: KANEY TRANSPORTATION INC., 7222 Cunningham Road, Rockford, IL 61102. Representative: E. Stephen Heisley, 805 McLachlen Bank Building, 666 Eleventh Street, NW, Washington, DC 20001. Applicant seeks to remove restrictions in its lead, and Sub-Nos. 2, 3, 5, and 6 certificates to (1) broaden the commodity description (a) from paint and paint materials, varnish, lacquers, driers, stains, shellacs, fillers, thickeners, thinners, and reducing or removing compounds, to "commodities in bulk", in the lead; (b) from core compound to "chemicals and related products" in the lead, and Sub-Nos. 3, and 6; (c) from paint and paint materials, varnish, lacquers, driers, stains, shellacs, fillers, thickeners, thinners, and

reducing or removing compounds to "chemicals and related products" in Sub-Nos. 2 and 6; and (d) from urethane foam components, liquid, in tank vehicles, to "commodities in bulk" in Sub-No. 5; (2) convert existing one-way authority to radial authority between specified points located mainly in the eastern and central portions of the U.S. in the lead, Sub-Nos. 2, 3, 5, and 6; (3) broaden the territorial description in (a) Sub-No. 2 by deleting the exception against service to Quincy, MA; (b) in Sub-No. 6 by broadening Denver and Pueblo, CO, to Arapahoe, Adams, Denver, Jefferson, and Pueblo Counties, CO; (d) convert the origin of Rockford, IL, to points in Winnebago County, IL in the lead and Sub-Nos. 2, 3, 5, and 6; and (4) delete the in bulk, in tank vehicles, limitations in the lead, Sub-Nos. 2, 3, 5, and 6.

MC 125996 (Sub-98)X, filed May 6, 1981. Applicant: GOLDEN TRANSPORTATION INC., P.O. Box 26908, Salt Lake City, UT 84125. Representative: Stanley C. Olsen, Jr., 5200 Willson Road, Suite 307, Edina, MN 55424. Applicant seeks to remove restrictions from its lead docket and Sub-Nos. 2, 3, 5, 6, 7, 8, 9, 10, 12, 13, 15, 18, 21, 23, 24, 30, 32, 33, 41, 42, 44, 48, 52, 54F, 57F, 61F, 65F, 71F, 73F, 74F, 76F, 78F, 79F, 80F, 84F, 85F, 88F, 89F, 90F, 91F, 93F and 94F certificates and MC–F–13541 in order to: and MC–125996 Sub-No. 53 permit (1) broaden specific commodities descriptions as follows: (a) from various feeds and feed ingredients, meat products, canned foodstuffs, frozen foods, malt beverages, and canned goods to "food and related products" in its lead docket and Sub-Nos. 2, 3, 5, 6, 7, 8, 9, 10, 12, 13, 15, 18, 21, 23, 24, 30, 32, 41, 42, 44, 52, 53, 54F, 57F, 71F, 74F, 76F, 78F, 79F, 80F, 84F, 85F, 89F, 90F, 91F, 93F and 94F certificates; (b) from rugs and carpets, rug and carpet padding and materials and supplies used in installation to "textile mill products" in its Sub-No. 33 certificate; and (c) from agricultural chemicals to "chemicals and related products" in its Sub-No. 48 certificate; (d) from periodicals and magazines and perioddicals in its Sub-No. 88F and MC-F-13541 to "printed matter;" (2) replace specified points with county-wide authority as follows: Buhl and Hagerman with Twin Falls and Gooding Counties, ID (lead and Sub-Nos. 3, 5, 7); Albin, Irwin and Gallio with Laramie, Natrona and Converse Counties, WY; and Converse Counties, WY; and Ardmore and Pine Ridge with Fall River and Shannon Counties, SD (Sub-No. 12); LeMars with Plymouth County, IA (Sub-No. 13); Siloam Springs and Gentry with Benton County, AR; and Proctor and Kansas with Adair and Delaware Counties, OK (Sub-No. 15); Hospers with Sioux County, IA (Sub-No. 18); Deerfield with Lake County, IL (Sub-No. 23); Crete with Saline County, NE (Sub-No. 24); Gibbon and Hastings with Buffalo and Adams Counties, NE (Sub-No. 30); New Hampton with Chickasaw County, IA (Sub-No. 32); City of Commerce and Pico Rivera with Los Angeles County, CA; and Trenton with Mercer County, NJ (Sub-No. 33); Madison with Madison County, NE (Sub-No. 41); Grand Island with Hall County, NE (Sub-No. 42); Springfield with Greene County, MO; and Manhattan and Newton with Riley and Harvey Counties, KS (Sub-No. 44); Muscatine with Muscatine County, IA (Sub-No. 48); Huron and Mitchell with Beadle and Davison Counties, SD (Sub-No. 52); Carroll, Denison, Iowa Falls, Fort Dodge and Cherokee with Carroll, Crawford, Hardin, Webster and Cherokee Counties, IA (Sub-No. 54); Pocatello with Bannock County, ID (Sub-No. 61); Estherville with Emmet County, IA; Sioux Falls with Minnehaha County, SD; and Worthington with Nobles County, MN (Sub-No. 71); West Jordan and Lehi with Salt Lake and Utah Counties, UT; Bonne Terre with St. Francois County, MO; Plymouth with Marshall County, IN; and Biwabik with St. Louis County, MN (Sub-No. 73); Worthington and Austin with Nobles and Mower Counties, MN; Huron with Beadle County, SD; Fort Dodge and Ottumwa with Webster and Wapello Counties, IA (Sub-No. 74); Emporia and Wichita with Lyon and Sedgwick Counties, KS; Dakota City with Dakota County, NE (Sub-No. 76); Terre Haute with Vigo County, IN (Sub-No. 78); Muscatine and Mitchellville with Muscatine and Polk Counties, IA (Sub-No. 80); Fairmont with Martin County, MN; and Sioux City with Polk County, IA (Sub-No. 84); Britt and Mason City with Hancock and Cerro Gordo Counties, IA (Sub-No. 85); Pewaukee with Waukesha County, WI (Sub-No. 88 and MC–F–13541); Connell, Moses Lake, Quincy and Richland with Franklin, Grant and Benton Counties, WA; Hermiston and Weston with Umatilla County, OR; Nampa and American Falls with Canyon and Power Counties, ID (Sub-Nos. 89 and 93); Clovis and Fresno with Fresno County, CA (Sub-Nos. 90 and 91); and Holcomb with Finney County, KS (Sub-No. 94); (3) remove all of the following restrictions and limitations on commodity and territorial descriptions whenever they appear in the above certificates: (a) facilities restrictions; (b) originating at—destined to restrictions; (c) restrictions against transportation of specified commodities and commodities in bulk and/or hides; (d) restrictions specifying use of vehicles equipped with mechanical refrigeration; (e) restrictions against transportation in tank or hopper type vehicles; and (f) restriction limiting service to the transportation of traffic having a prior movement by water; (4) replace territorial description in its contract carrier permit with "between points in the United States" serving a named shipper(s) under continuing contract(s) in Sub-No. 53; (5) delete restriction against a specific commodity or commodities in bulk embraced in "such commodities" descriptions in Sub-Nos. 61F, 65F, 73F; and (6) expand its one-way authority to radial authority between various combinations of points in the U.S.

MC 134369 (Sub-20)X, filed May 7, 1981. Applicant: CARLSON TRANSPORT, INC., P.O. Box R, Byron, IL 61010. Representative: Allen C. Zuckerman, 39 S. LaSalle St., Chicago, IL 60603. Applicant seeks to remove restrictions in its Sub-Nos. 8, 10F and 17F certificates to: in Sub-No. 8, part (1) broaden the commodity description from sand and sand with additives to "ores and minerals", substitute Ogle County, IL, for the city designation of Oregon, IL, delete the "in bulk, in tank or hopper type vehicles" restriction, and substitute radial service in place of its one-way authority: "between Ogle County, IL, and points in the U.S. on and east of U.S. Hwy. 85 (except Bettendorf, Keokuk and Waterloo, IA); in Sub-No. 8, part (2), broaden the commodity description from foundry aggregates to "such commodities as are dealt in by foundries", remove the "in bulk, in tank or hopper type vehicles" restriction, change the one-way authorization to radial authority: "between points in the U.S. on and east of U.S. Hwy. 85 (except points in IL, IN, MI, PA, WV, OH, points in Pike, St. Louis, St. Charles, Jefferson, St. Francois, Marion, Washington and Stoddard Counties, MO, and Owensboro, KY) and points in IL, MI, IN and OH", and remove the restriction against the transportation of "(a) lime and limestone products from points in Dodge, Fond du Lac and Manitowoc Counties, WI, Knox County, TN, Davenport, IA, Kansas City, MO and Limedale, AR, to points in IL, IN, OH and MI, (b) sand from the facilities of Wedron Silica Company, at Whitehead, SC, Glen Rose, TX and Sewanee, TN, to points in IL, IN, MI, and OH, and (c) sand from Hanover, WI, to points in MI"; in Sub-No. 10F, broaden the commodity description from foundry compound and premix to "such

commodities as are dealt in by foundries", substitute the county designation of Winnebago County, WI and Black Hawk County, IA, for the city designations of Winnebago County, WI and Black Hawk County, IA, for the city designation of Neenah, WI, and Waterloo, IA, and authorize radial service in place of its one-way authority: "between Winnebago County, WI and Black Hawk County, IA"; in sub-Nos. 17F, broaden the commodity description from foundry compound and premix to "such commodities as are dealt in by foundries", substitute the county designations of Cook County, IL and Black Hawk County, IA for the city designations of Chicago, IL and Cedar Falls, IA, and authorize radial service "between Cook County, IL, and Black Hawk County, IA" in place of its one-way authority.

MC 140768 (Sub-50)X, filed May 8, 1981. Applicant: AMERICAN TRANS-FREIGHT, INC., P.O. Box 796, Manville, NJ 08835. Representative: Eugene M. Malkin, Suite 1832, 2 World Trade Center, New York, NY 10048. Applicant seeks to remove restrictions from its lead and Sub-Nos. 4, 14, 45F, 48F, 51F, 52F, 53F, 57F, 60F, 62F, 65F, 67F, and 68F permits to (1) broaden the commodity description (a) from plastic bathtubs and plastic bath fixtures; and from fiberglass tubs and fiberglass shower stalls to "rubber and plastic products" in the lead and Sub-No. 45F, (b) from brass, bronze, and copper pipe and tubing, brass and copper alloys, brass, bronze, copper and nickel products, copper billets, metal scrap, and fire brick to "metal products, waste or scrap materials, and clay, concrete, glass or stone products" in Sub-No. 4, (c) from cleaning products, nutritional foods and related articles, and toilet preparations to "chemicals and related products, food and related products, and rubber and plastic products" in Sub-No. 5, (d) from wheels, tires, hub caps, and battery parts to "rubber and plastic products, metal products, machinery, transportation equipment, lumber and wood products, and petroleum, natural gas and their products" in Sub-No. 14, (e) from steel bathtubs, lavatories, sinks and plumber fittings and supplies to "metal products, and clay, concrete, glass or stone products" in Sub-No. 19, (f) from cigarette packaging materials to "pulp, paper and related products, rubber and plastic products, and metal products" in Sub-No. 32, (g) from plumbers' goods and bathroom fixtures to "rubber and plastic products" in Sub-No. 48F, (h) from paper, paper products, furniture and plastic materials to "pulp, paper and related products, furniture and fixtures, and rubber and plastic products" in Sub-No. 53F, (i) from tin, solder and solder residue to "ores and minerals, and metal products", from iron and steel wire rods to "metal products" in Sub-No. 60F, (j) from paper, paper products, dispenser boxes, and liquid soaps to "pulp, paper and related products, rubber and plastic products, metal products, and chemical and related products", from paper and paper products to "pulp, paper and related products" in Sub-No. 62F, (k) from insecticides, herbicides, pesticides, fertilizer seed, argicultural chemicals and applicators therefor to "chemicals and related products, farm products and machinery" in Sub-No. 65F, and (l) from general commodities, with the usual exceptions to "general commodities (except classes A and B explosives) in Sub-Nos. 51F, 67F, and 68F, (2) eliminate in bulk restriction or size and weight restrictions in Sub-Nos. 4, 5, 14, 45F, 48F, 42F, 53F, 57F, 60F, 62F, and 65F, and (3) expand the territorial description in each permit to between points in the U.S. under Continuing contract(s) with named shippers.

MC 145990 (Sub-5)X, filed April 30, 1981. Applicant: LAWRENCEBURG TRUCKING, INC., 21 Catalpa Avenue, Lawrenceburg, IN 47025. Representative: John R. Bagileo, 918—16th ST., NW, Washington, DC 20006. Applicant seeks to remove restrictions to (A) broaden the commodity description in the lead (part 1), and Sub-No. 2F certificates to "food and related products" from alcoholic beverage (except in bulk); and broaden part (2) of the lead certificate to "clay, concrete, glass or stone products" from glass containers; (B) remove the restriction limiting service to that originating at the shipper's facilities and destined to the named destination, in the lead certificate; and (C) replace one-way authority with radial authority, and broaden the territorial descriptions from city-wide to county-wide authority: lead certificate, between (a) Dearborn County, IN (Lawrenceburg, IN), and, points in Will, Sangamon, Macon and Champaign Counties, IL (Plainfield, Springfield, Decatur, and Champaign, IL), and Chicago, IL, and (b) La Salle County, IL (Streator, IL), and, Cincinnati, OH; Sub-No. 2, between Dearborn County, IN (Lawrenceburg, IN), and, points in Lake County, IL (Waukegan, IL).

MC 148375 (Sub-3)X, filed February 18, 1981, previously noticed in the **Federal Register** of March 6, 1981, republished as follows: Applicant: LOWER COLUMBIA TRUCKING, INC., Rt. 1, Box 217, Cathlamet, WA 98612. Representative: Lawrence V. Smart, Jr., 419 N.W. 23rd Ave., Portland, OR 97210. Applicant seeks to remove restrictions from its Sub-No. 2F certificate. This Board previously broadened the certificate to include "general commodities, except Classes A & B explosives", to allow service at all intermediate points, and to remove a restriction against all traffic moving between 4 points. Applicant also sought off-route county-wide authority which was denied because it was determined to be an unreasonable broadening of territory. Because of a recent Commission decision declaring this type of broadening to be reasonable, the Restriction Removal Board has decided to renotice this application with respect to the proposed expansion of off-route points. Notice is hereby given that appliction seeks to expand its off-route points of Altoona, Roseburt, Deep River Camp, Puget Island, Long Beach, Seaview, Chinook and Megler, WA, to all points in Wahkiakum and Pacific Counties, WA.

MC 148903 (Sub-100)X, filed May 1, 1981. Applicant: J & M TANK LINES, INC., P.O. Box 589, Americus, GA 31709. Representative: Paul M. Daniell, P.O. Box 872, Atlanta, GA 30301. Applicant seeks to remove restrictions in its lead, and Sub-Nos. 1F, 2F, 3F, 5F, 7F, and 8F certificates to (A) broaden the commodity descriptions in all certificates to "clay, concrete, glass or stone products" from lime, rock, stone, cement, mortar mix, sand, tile grout, masonry coating, silica clay, fire-brick, limestone and gravel; to "ores and minerals" from aluminum clay sulphate and bauxite ore, "metal products" from fly ash, "food and related products" from salt, corn starch, corn sugar, and phosphate feed supplements, "petroleum or coal products" from cold mixed asphalt and liquid asphalt sealer, and "printed matter" from advertising matter, in the lead certificate; and to "chemicals and related products" from vinyl concrete patcher, fertilizers and materials, and acrylic paint and adhesives in the lead and Sub-No. 7 certificates; (B) remove restrictions limiting service to that "in bags," "in containers," "in bulk," "in tank vehicles" and "when moving in mixed loads"; (c) remove restrictions against shipments having a subsequent movment by water, and limiting traffic to that having a prior movement by rail, and restricted to traffic originating at a named plantsite and destined to the named destinations, in the lead certificate; (D) expand one-way authority to radial authority on service, generally between points in the southern and midwestern States; and (E) expend

authority to serve named plantsites and cities to county-wide authority, as follows: lead certificate, Bibb County, GA (plant at Macon, GA), Glynn County, GA (Brunswick, GA), Decatur County, GA (Bainbridge, GA), Sumter and Dougherty Counties, GA (Americus and Albany, GA), Shelby County, AL (Wilsonville, AL), Houston County, GA (plantsite, Clinchfield, GA), Richmond County, GA (Augusta, GA), Anson County, NC (plantsite at Lilesville, NC), Franklin County, TN (plantsite near Sewanee, TN), Sumter County, GA (plantsite, Andersonville, GA), Coffee and Tift Counties, GA (Douglas and Tifton, GA), Chatham, Bartow, Marion, Crawford and Macon Counties, GA (plantsites in Chatham, Bartow, Marion, Crawford and Macon Counties, GA), Jefferson County, AL (Birmingham, AL), Marengo County, AL (Demopolis, AL), and Carroll County, GA (facilities near Roopville, GA); Sub-No. 1, St. Clair County, AL (Ragland, AL); and Sub-No. 8, Chattanooga, TN (facilities at Chattanooga, TN).

[FR Doc. 81-15579 Filed 5-22-81; 8:45 am]

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by Special Rule of the Commission's Rules of Practice, see 49 CFR 1100.251. Special Rule 251 was published in the **Federal Register** of December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

Volume No. OPY-2-078

Decided: May 13, 1981.

By the Commission, Review Board No. 2, Members Parker, Chandler and Fortier.

MC 6992 (Sub-17F), filed April 28, 1981. Applicant: AMERICAN RED BALL TRANSIT CO., INC., 1335 Sadlier Circle, East Drive, P.O. Box 1127, Indianapolis, IN 46206. Representative: Andrus E. BILLING CODE 7035–01–M

DEPARTMENT OF JUSTICE

Antitrust Division

United States v. Revco D.S., Inc., and Zale Corp.; Proposed Judgment

Pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16, the following written comment on the proposed judgment filed with the United States District Court for the Northern District of Texas in *United States v. Revco D.S., Inc. and Zale Corporation* Civil Action No. 3–81–0157–H, was

received by the Department of Justice and is published herewith, together with Justice's response to the comment.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

United States District Court—Northern District of Texas

United States of America, Plaintiff, v. Revco D.S. Inc. and Zale Corporation, Defendants. Civil Action No. 3–81–0157–H.

Comments of The National Association of Retail Druggists

On February 6, 1981 the parties to this proceeding filed with this Court a stipulation and proposed Final Judgment. The proposal would settle by consent the lawsuit filed by the Department of Justice challenging the acquisition by Revco of Skillern's drug stores. Pursuant to the Antitrust Procedures and Penalties Act of 1974, 15 U.S.C. 16(e), before a consent judgment is entered, "The court shall determine that the entry of such judgment is in the public interest." In making its determination, the court may consider the competitive impact of the judgment and alternative remedies, as well as any other considerations bearing upon the adequacy of such judgment.

These comments are submitted on behalf of the National Association of Retail Druggists pursuant to the Antitrust Procedures and Penalties Act of 1974, 15 U.S.C. 16. The National Association of Retail Druggists ("NARD") is a national association of independent pharamacists. NARD represents the owners of more than 30,000 independent retail pharmacies. These pharmacies employ some fifty thousand pharmacists—owners and employees—and dispense two-thirds of the nation's prescriptions. Together, these pharmacies serve 18 million consumers daily. While NARD believes that the proposed consent decree provides limited relief, the decree fails to adequately protect the public interest. NARD therefore asks that the Court reject the proposed judgment unless it is modified for the reasons listed below.

The Complaint and Proposed Settlement

On February 2, 1981 the Antitrust Division of the Department of Justice filed a complaint charging that the acquisition by Revco of Skillern's drug stores would violate § 7 of the Clayton Act, 15 U.S.C. 17, in that it would substantially lessen competition in the sale of ethical drugs.

In particular the complaint alleged that:

(a) Competition between Revco and Skillern's in the retail sale of ethical drugs will be eliminated in the Dallas-Ft. Worth, El Paso and Tyler areas;

(b) Competition generally in the retail sale of ethical drugs will be substantially lessened in the Dallas-Ft. Worth, El Paso and Tyler areas; and

(c) Concentration in the retail sale of ethical drugs will be increased in the Dallas-Ft. Worth, El Paso and Tyler areas.

On February 8, 1981 the Department of Justice and the parties reached a proposed settlement, and filed a stipulation and proposed Final Judgment with this Court. The proposed decree would require Revco to divest itself of between 28 and 31 drug stores in the Dallas-Ft. Worth, El Paso and Tyler, Texas area. In the Dallas-Ft. Worth area, Revco would be required to divest itself of eight named pharmacies (six Skillern—two Revco) and one drug store from each of 17 identified groups. Each group is comprised of between two and four pharmacies. The choice of which pharmacy from within each group is to be divested is left with Revco.

In El Paso, Revco would be required to either divest itself of one pharmacy from each of two specified groups to a chain drug store (defined as four or more stores) presently operating in the El Paso area other than the leading competitor, or four drug stores to a new entrant into that area. The choice of which stores are to be divested is left with Revco.

In the Tyler area, Revco would be required to divest itself of one of two named pharmacies to a competitor presently in the Tyler area other than the two leading competitors in that area, or must sell one of the identified pharmacies plus one additional store in the Tyler area to a new entrant. Again, the choice of which stores are to be divested is left to Revco.

The proposed Final Judgment gives the Department of Justice the right to approve all purchasers, but articulates no standards regarding that procedure. The proposed Final Judgment contains no limitations on Revco's ability to make additional acquisitions.

Comments

The proposed Final Judgment submitted to the Court for approval fails to adequately assure that there will be no substantial lessening of competition as a result of the acquisition. First, the proposed decree fails to address the fact that the acquisition may affect competition in areas other than the three specific geographic areas. Second, while the decree does require that divestiture take place within the three designated localities, it fails to specifically identify which assets are to be divested. This failure provides a loophole that can allow Revco to circumvent the intent of the settlement. Third, the proposed decree inexplicably encourages Revco to sell certain assets to chain stores. Fourth, the proposed decree does not contain any limitations on future acquisitions by Revco.

A. *The Proposed Final Judgment Ignores the Fact That Competition May Be Substantially Lessened in Areas Other Than the Three Designated Localities.*

The proposed decree fails to address the lessening of competiton in areas other than Dallas-Ft. Worth, El Paso and Tyler, Texas. As of August 15, 1980, Revco operated approximately 1,276 pharmacies in 24 states. Fifty-eight of these were in the state of Texas. As of November 10, 1980, Skillern operated approximately 144 pharmacies in the states of Texas and New Mexico. The proposed Final Order only concerns itself with three localities, and does not address the fact that competition may be lessened in other parts of Texas and New Mexico. NARD believes that consolidation of Revco and Skillern will further entrench Revco's market power and will increase barriers to new entry, as the power should be modified before acceptance to provide greater assurance that competition is not lessened in the three localities where Skillern's and Revco now compete directly, by not allowing Revco to designate which stores are divested. While the proposed order requires Revco to divest itself of between 28 and 31 stores, Revco can choose all but eight of the stores that are to be sold. The stores are to be chosen by Revco from categories of stores listed in the proposed decree. In most cases, Revco must choose between selling its store or a Skillern store in the same neighborhood. This obviously gives Revco the opportunity to keep the more desirable location, while unloading the unproductive or less productive store. Allowing Revco to choose which stores will be sold can effectively impede the ability of a new competitor to succeed. NARD believes that the choice of stores to be divested should not be left open to Revco, but should be left to the new entrant. This can be assured by requiring Revco, acting in good faith, to make its stores available on comparable terms based on comparable valuations.

C. *The Proposed Final Judgment Should Not Encourage the Sale of Assets to a Drug Chain.*

The proposed Order is highly unusual in that it encourages Revco to sell its El Paso stores to a drug chain currently operating in El Paso. No explanation is made as to why sales to a chain (defined as four or more stores) are preferable, from an antitrust perspective, to sales to the owner of one, two, three or no other stores. It is hard to understand how competition is enhanced by requiring the sale of stores to a chain currently operating in El Paso rather than to a smaller entity. Moreover, the proposed Final Judgment provides that in El Paso, if Revco does not sell to a chain, it must sell four stores as a block. Competition will not be enhanced by having fewer competitors.

D. *The Proposed final Judgment Does Not Monitor Future Acquisitions by Revco.*

NARD believes that any Final Judgment in this matter should contain a provision prohibiting future acquisitions by Revco except with government approval. As stated above, Revco has reached its enormous position by acquiring small independent pharmacies and chains. The Final Judgment should recognize this and contain a provision requiring Revco to obtain the consent of the Department of Justice for any acquisition over a certain size for a ten year period. The failure to include such a provision, which is standard in most consent decrees, allows Revco to continue making additional acquisitions unchecked by the antitrust enforcement agencies.

E. *The Proposed Final Judgment Does Not Provide Any Standards which the Department Will Use in Approving Prospective Purchasers.*

The proposed Final Judgment provides that any purchaser of assets from Revco must be approved by the Department of Justice. The decree fails, however, to state what factors the Justice Department will consider before it exercises its right of approval. NARD believes that prospective purchasers should be carefully reviewed by the Department of Justice to make certain that competition would be enhanced if they acquired the

assets. NARD believes that the proposed decree should expressly prohibit the sale of any assets to any chain store currently owning 4 or more stores. To allow Revco to sell any assets to a chain such as Rite-Aid or Eckerd's would subvert the purposes of the lawsuit. While the Department of Justice has the ability to disapprove a purchase by a large chain, NARD believes that an explicit provision to that effect should be included in the Final Judgment.

Dated: April 10, 1981.

Respectfully submitted,

Richard M. Rindler,

Gilbert E. Geldon, Pepper, Hamilton & Scheetz, 1776 F Street NW., Washington, D.C. 20006, Counsel to National Association of Retail Druggists.

United States District Court

Northern District of Texas

United States of America, Plaintiff, v. Revco D.S., Inc. and Zale Corporation, Defendants. Civil Action No. 3-81-0157-H.

Response of the United States to the Comments of the National Association of Retail Druggists

Pursuant to Section 2(d) of the Antitrust Procedures and Penalties Act, 15 U.S.C. Section 16(d), the United States hereby responds to the comments submitted by the National Association of Retail Druggists (NARD) in opposition to the entry of the proposed Final Judgment that was filed with the Court on February 6, 1981.

A. *The Proposed Relief Is Substantially That Which Could Be Expected After a Trial on the Merits.*

The objective of the proposed relief is to insure that, at a minimum, the affected markets are restored to the competitive posture in which they were prior to the acquisition. Indeed, the relief proposed is substantially that which the government could expect after a trial on the merits, and in fact is greater than that obtained after a trial on the merits in *United States* v. *Revco Discount Drug Centers, Inc. and Cook United, Inc.*, Civil Action No. 76-265 (N.D. Ohio 1976).

By its terms, the proposed relief prevents any increase in concentration and encourages new entry into the market. The proposed relief assures that the markets will be at least as competitive as they were prior to the acquisition. Such a settlement clearly serves the public interest.

NARD objects to the proposed relief on the grounds that the acquisition will entrench Revco's market power and increase barriers to entry in areas other than the three localities where relief has been obtained. This argument, however, is misdirected. It attacks the scope of the government's complaint, not the proposed Final Judgment. The complaint alleges a violation of Section 7 of the Clayton Act in the three markets where the parties were horizontal competitors. Only those markets would have been at issue if the matter had proceeded to trial on the merits, and thus the proposed Final Judgment is limited to those three markets.

B. *The Specific Assets To Be Divested Are Left To Negotiation Between Revco And The Purchasing Party.*

NARD suggests that the proposed Final Judgment be modified to prevent Revco from choosing the stores it will divest. The proposed Final Judgment identifies eight specific drug stores that must be sold; all other stores are to be selected from groups of two to four stores in close geographic proximity to one another.

The proposed Final Judgment is drafted in this way to give the potential purchasers substantial flexibility in negotiating for the particular drug stores that they want. This flexibility enables the United States to rely on the expertise of the prospective purchasers in determining which stores are most compatible with a purchaser's needs, thereby enabling it to compete most effectively in the particular market. In most of the designated groups there are large and small stores offered in the same area, this allows for maximum flexibility tailored to the needs of the potential purchasers. This aspect of the proposed relief also provides for changing circumstances that otherwise could not be taken into account if specific stores were further identified.

Several provisions of the proposed Final Judgment provide effective checks on any attempt to subvert its purpose or intent. Section VIII requires that Revco provide the Department of Justice with a monthly report disclosing all offers to sell the stores and all parties expressing an interest in any or all of the stores. Section V provides for approval of any proposed sale by the United States, or, if the United States objects to the sale, that the proposal be submitted to the Court for approval. Finally, Revco has an additional incentive to negotiate in good faith with any potential purchaser since Section VI of the proposed Final Judgment provides for the appointment of a trustee to sell the assets if the divestiture is not accomplished by January 31, 1982.

C. *The Relief Proposed For El Paso Is Designed To Enhance Competition In That Market.*

NARD objects to the proposed Final Judgment provision that requires Revco to sell two stores from two identified groups to a presently competing drug store chain, or, in the alternative, four stores, including two from the identified groups, to a new entrant into the El Paso market. The clear thrust of this proposed relief is to enhance competition, either by new entry or increased competition from existing competitors in that market.

The language of the proposed relief is not intended to preclude a sale of drug stores to an existing competitor operating fewer than four drug stores in the market. Read alternatively, the language of the options should be interpreted to include an entity with fewer than four stores to be a new entrant for purposes of the requirements of Section V. The clear intent of the challenged provision is to enhance competition in this market and is not intended to eliminate an existing competitor with fewer than three stores from purchasing the stores. The only proscription on possible sale of the El Paso store is the exclusion of the largest competitor in the market as a potential purchaser.

If the potential purchaser is an entity that cannot be accurately defined within the language of the proposed Final Judgment, Section XI permits the parties either to present it to the Court for appropriate directions or to seek a modification of the decree.

D. *A Provision Requiring Department of Justice Clearance For Future Acquisitions By Revco Is Unnecessary.*

NARD argues that the Final Judgment should prohibit, for ten years, future acquisitions by Revco without government approval. While this type of provision is sometimes employed in consent decrees, it is not necessary in this case. The Department of Justice has no evidence to show that every future acquisition by Revco would be inherently anticompetitive. Instead, the Department would need to evaluate each future acquisition on a case-by-case basis, to determine whether its effect may be substantially to lessen competition or to tend to create a monopoly in violation of Section 7 of the Clayton Act.

The government's ability to monitor future acquisitions might actually be impaired by the consent decree procedure suggested by NARD. The type of retail store transaction involved here would ordinarily fall within the pre-merger notification requirements of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, 15 U.S.C. 18a. These pre-merger rules provide the government with a longer time period and more specific information than is usually the case in consent decree provisions. Moreover, under the pre-merger rules, acquisitions that require the consent of the government by the terms of a consent decree are exempted from the notification requirements and waiting periods of the Act. 16 CFR 802.70(b). Thus, in this situation, the advantages of the pre-merger notification rules and other monitoring devices which enable the United States to make a full evaluation of a proposed acquisition would be limited if the United States were to follow the consent decree procedure urged by NARD.

E. *The Proposed Final Judgment Adequately Provides for Review and Approval Of Any Proposed Divestiture.*

NARD suggests that the proposed Final Judgment should enumerate the standards that will be used in evaluating any divestiture proposal, and, further, that the sale of any assets to a drug store chain should be expressly prohibited.

Section V of the proposed Final Judgment provides a flexible approach to evaluation of any proposed divestiture; Revco is to submit all proposed sales to the United States for its approval. If the United States does not approve the proposed sale, the proposed Final Judgment provides that the matter be submitted to the Court. The standards governing the Department's evaluation will be based on the competitive consequences of the proposed purchase based upon existing case law and economic analysis. NARD's suggestion that all drug store chains be prohibited from purchasing the stores lacks merit in these markets since an additional or stronger chain may increase competition or at least not decrease competition. In view of the prospective nature of the relief obtained, further enumeration of standards to be

applied might unnecessarily encumber the objective of a prompt competitive divestiture. Therefore, the suggestion that specific standards and limitations be established and articulated is unwarranted.

Conclusion

For the foregoing reasons, the proposed Final Judgment is in the public interest and should be entered by the Court upon completion of the notice requirements of the Antitrust Procedures and Penalties Act.

Respecfully submitted,

Mary Coleen T. Sewell,

Larry R. Patton,

Attorneys, Antitrust Division.

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Office of the Secretary

[TA-W-9534]

Victoria Needlework, Inc.; Certification Regarding Eligibility To Apply for Worker Adjustment Assitance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met. It is determined in this case that all of the requirements have been met.

The investigation was initiated on July 28, 1980 in response to a petition which was filed on behalf of workers at Victoria Needlework, Incorporated, New York, New York. The workers produce ladies' handbags.

U.S. imports of handbags increased in 1979 compared to 1978 and increased in 1980 compared to 1979.

A survey was conducted by the Department of Labor of major customers of Victoria Needlework. The survey revealed that several major customers decreased purchases from Victoria Needlework and increased purchases of imported handbags in 1979 compared to 1978 and in 1980 compared to 1979. These major customers accounted for a substantial proportion of Victoria's sales declines in 1979 compared to 1978 and in 1980 compared to 1979.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with ladies' handbags produced at Victoria Needlework, Incorporated, New York, New York contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Victoria Needlework, Incorporated, New York, New York who became totally or partially separated from employment on or after July 9, 1979 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, D.C. this 20th day of May 1981.

James F. Taylor,

Director, Office of Management, Administration and Planning.

BILLING CODE 4510-28-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 414A]

Duke Power Co.; Receipt of Additional Antitrust Information; Time for Submission of Views on Antitrust Matters

Duke Power Company, pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, has filed information requested by the Attorney General for Antitrust Review as required by 10 CFR Part 50, Appendix L. This information concerns a proposed additional ownership participant, the Piedmont Municipal Power Agency, for the Catawba Nuclear Station, Unit 2. The current holders of the construction permit are Duke Power Company and North Carolina Municipal Power Agency Number 1.

The information was filed in connection with the application by Duke Power Company for construction permits and operating licenses for two pressurized water reactors. Construction was authorized on August 7, 1975 at the Catawba site located in York County, South Carolina. Although the Catawba facilities consist of two nuclear power plants, the proposed action affects only Catawba Nuclear Station, Unit 2.

The original application was dated November 10, 1972. The Notice of Receipt of Application for Construction

Permits and Facility Licenses and Availability of Applicant's Environmental Report; Time for Submission of Views on Antitrust Matters was published in the **Federal Register** on December 7, 1972 (37 FR 26053). Previously, the Notice of Hearing had been published in the **Federal Register** on December 1, 1972 (37 FR 25560).

A copy of the above documents are available for public examination and copying for a fee at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555 and at the York County Library, 325 South Oakland Avenue, Rock Hill, South Carolina.

Any person who wishes to have his views on the antitrust matters with respect to the Piedmont Municipal Power Agency presented to the Attorney General for consideration or who desires additional information regarding the matters covered by this notice, should submit such views or requests for additional information to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Chief, Utility Finance Branch, Office of Nuclear Reactor Regulation, on or before July 21, 1981.

Dated at Bethesda, Maryland, this 8th day of May 1981.

For the Nuclear Regulatory Commission.

E. Adensam,

Acting Chief, Licensing Branch #4, Division of Licensing.

[FR Doc. 81-14928 Filed 5-18-81; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50.247 and 50-286]

Consolidated Edison Co. of New York, Inc. (Indian Point Unit No. 2) and Power Authority of the State of New York (Indian Point Unit No. 3)

May 14, 1981.

Director's Decision Under 10 CFR 2.206

By letter dated April 1, 1981, Mr. Donald Ross and Ms. Joan Holt, on behalf of the New York Public Interest Research Group, Inc. ("NYPIRG") requested the Commission to "order the immediate suspension of operations at Indian Point on the grounds of noncompliance with the NRC's Final Emergency Planning Rule". In a letter dated April 6, 1981, Ms. Holt emphasized that NYPIRG was seeking "*immediate* relief" (emphasis in original) and expressed concern that NYPRIG's request was being treated as a request for action pursuant to 10 CFR 2.206 of the Commission's regulations. The Commission has determined that NYPIRG's request is most appropriately treated as a request for action pursuant to 10 CFR 2.206 and, accordingly, has referred the matter to me for action. After considering the request, I have concluded for the reasons which follow that the alleged noncompliance by the Indian Point facilities with the NRC's Final Emergency Rule does not warrant in itself the immediate suspension of a resumption of operations at the two Indian Point facilities. Accordingly, I have determined not to grant the requested relief.

Discussion

NYPIRG has requested that there be an immediate suspension of operations at Indian Point Units 2 and 3 until such time as there is a workable and implemented emergency plan for the two facilities and until such time as an investigation by the Atomic Safety and Licensing Board that was ordered by the Commission has been completed. The Commission has had occasion recently to consider this very issue and has resolved the issue in favor of allowing continued operation of the facilities.

On May 30, 1980, the Commission ordered a discretionary adjudication to resolve safety issues at the two Indian Point facilities raised by a previous petition submitted by the Union of Concerned Scientists. On July 15, 1980, the Commission decided that the risk posed by operation of the two facilities' did not warrant suspension of the facilities' operating licenses during the pendency of the adjudicatory proceeding. On January 8, 1981, the Commission, after having addressed a number of concerns including the lack of an emergency plan for the surrounding area, concluded that its earlier decision to permit continued operation of Indian Point 3 remained valid. With respect to Indian Point 2, however, the Commission declared that, prior to resumption of operations at the facility, it would reexamine its July 15, 1980 decision to permit continued operations at the facility in order to determine whether the July 15 decision remained valid.

Until April 1, 1981, the Commission's regulations did not require an emergency plan to be in effect for the service area. However, if after April 1, 1981, the NRC finds that the state of emergency preparedness does not provide reasonable assurance that appropriate protective measures can and will be taken in he event of a radiological emergency and if the deficiencies are not corrected within four months of that finding, the Commission will determine whether the reactor shall be shut down or whether other enforcement action is appropriate. With respect to Indian Point 2, on April 7, 1981, the Commission, in a meeting attended by Ms. Holt, addressed the question of whether its decision to permit continued operations of the facility remained valid. For the reasons set forth orally in that meeting, I recommended that the Commission not disturb its previous decision to allow continued operation of the plants. In that meeting, the Commission spent considerable time discussing the emergency plans for the Indian Point facilities. As reflected in the Commission Secretary's memorandum dated April 10, 1981 summarizing the April 7, 1981 meeting "[T]he Commission, by a vote of 3–1, agreed that its decision of July 11, 1980, to permit continued operation of Indian Point 2 and 3 remains valid." [1] On April 22, 1981, the Commission was further briefed on the status of offsite emergency preparedness around the nuclear power facilities in New York State. On April 24, 1981, letters were sent to all holders of power reactor operating licenses in New York State, including the Indian Point units, requesting that certain deficiencies identified to the NRC by the Federal Emergency Management Agency be corrected within 120 days.

The Commission has already determined, in accordance with my prior recommendation, that the two Indian Point facilities can operate despite alleged problems with the emergency plan for the facilities. Therefore, NYPIRG's request for immediate suspension of operations at Indian Point Units 2 and 3 based on alleged noncompliance with the NRC's Final Emergency Planning Rule is denied. I believe it is imporant to add, however, that as the Commission itself noted, this is not the final judgment on the safety of the two facilities. I will continue to monitor the operations of the two facilities, particularly with a view to the status of the emergency plans for the two facilities and will take appropriate action to protect the public's health and safety as circumstances warrant.

A copy of this decision will be placed in the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C. 20555 and in the local public document room for the two facilities, located at the White Plains Public Library, 100 Martine Avenue, White Plains, New York 10601.

---

[1] In a footnote to this statement, the Secretary's memorandum noted that the July 15, 1980 date, as discussed in the Commission's order of January 8, 1981, was in error and should have read July 11, 1980.

Additionally, a copy of this decision will be filed with the Secretary of the Commission for review by the Commission in accordance with 10 CFR 2.206(c) of the Commission's regulations. As provided in 10 CFR 2.206(c), this decision will constitute final action of the Commission twenty-five (25) days after the date of issuance, unless the Commission on its own motion institutes the review of this decision within that time.

Dated at Bethesda, Maryland this 14th day of May 1981.

Victor Stello, Jr.,

Director, Office of Inspection and Enforcement.

[Docket No. 50-155]

Consumers Power Co.; Issuance of Amendment To Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 43 to Facility Operating License No. DPR-6, issued to Consumers Power Company (the licensee), which revised the Technical Specifications for operation of the Big Rock Point Plant (the facility) located in Charlevoix County, Michigan. The amendment is effective as of its date of issuance.

The amendment approves changes in the Technical Specifications relating to (1) the setpoint values for the fire pump discharge pressure for the Reactor Depressurization System and (2) use of Thermo-Luminescent Dosimeters (TLD) as an alternate to film for environmental monitoring.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the applications for amendment dated February 4 and March 6, 1981, (2) Amendment No. 43 to License No. DPR-6, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Charlevoix Public Library, 107 Clinton Street, Charlevoix, Michigan 49720. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 14th day of May, 1981.

For the Nuclear Regulatory Commission.

Dennis M. Crutchfield,

Chief, Operating Reactors Branch No. 5, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-334]

Duquesne Light Co. et al.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 42 to Facility Operating License No. DPR-66 issued to Duquesnse Light Company, Ohio Edison Company, and Pennsylvania Power Company (the licensees), which revised Technical Specifications for operation of the Beaver Valley Power Station, Unit No. 1 (the facility) located in Beaver County, Pennsylvania. The amendment is effective as of the date of issuance.

The amendment revises the Technical Specifications to allow a deviation of ± 16 steps between rod demand and analog rod position indicators for operation during cycle 2.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated March 13, 1981, supplemented April 8, 1981, (2) Amendment No. 42 to License No. DPR-66 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001. A copy of items (2) and (3) may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 15th day of May, 1981.

[Docket No. 50-334]

Duquesne Light Co., et al.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 43 to Facility Operating License No. DPR-66 issued to Duquesne Light Company, Ohio Edison Company, and Pennsylvania Power Company (the licensees), which revised Technical Specifications for operations of the Beaver Valley Power Station, Unit No. 1 (the facility) located in Beaver County, Pennsylvania. The amendment was effective March 14, 1981.

This amendment was authorized by phone on March 14, 1981 and was confirmed by letter dated March 16, 1981. The amendment revises the Technical Specifications to provide a redundancy in decay heat removal capability for the plant in all modes of operation and provides for 23 feet of water over the reactor pressure vessel flange while in Mode 6. The amendment was issued on an expedited basis to allow plant startup.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the

Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated March 13, 1981, supplemented March 24, 1981, (2) the Commission's letter to the licensee dated March 16, 1981, (3) Amendment No. 43 to License No. DPR–66 and (4) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001. BILLING CODE 7590–01–M

[Docket Nos. 50–315 and 50–316]

Indiana and Michigan Electric Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 46 to Facility Operating License No. DPR–58, and Amendment No. 30 to Facility Operating License No. DPR–74 issued to Indiana and Michigan Electric Company (the licensee), which revised Technical Specifications for operation of Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2 (the facilities) located in Berrien County, Michigan. The amendments are effective as of the date of issuance.

The amendments provide further clarification of the term **Operable,** employed in the facilities Technical Specifications, as it applies to single failure criteria for safety systems.

The application for the amendments complies with the standards and requirements for the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated June 16, 1980, (2) Amendment Nos. 46 and 30 to License Nos. DPR–58 and DPR–74, and (3) the Commission's letter dated May 12, 1981. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Maude Reston Palenski Memorial Library, 500 Market Street, St. Joseph, Michigan 49085. [Docket No. 50–316]

Indiana and Michigan Electric Co; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 31 to Facility Operating License No. DPR–74 issued to Indiana and Michigan Electric Company (the licensee), which revised Technical Specifications for operation of Donald C. Cook Nuclear Plant, Unit No. 2 (the facility) located in Berrien County, Michigan. The amendment is effective as of the date of issuance.

The amendment revises the Axial Power Distribution Monitoring System (APDMS) technical specifications and the setpoint for the P–7 permissive (interlock).

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of the amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendment.

For further details with respect to this action, see (1) the application for amendment dated May 1, 1981 as supplemented May 7, 1981, (2) Amendment No. 31 to License No. DPR–74, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Maude Reston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085. BILLING CODE 7590–01–M

[Docket Nos. 50–361 and 50–362]

Southern California Edison Company, et al., San Onofre Nuclear Generating Station, Units 2 and 3; Order Extending Construction Completion Dates

Southern California Edison Company, San Diego Gas and Electric Company, the City of Riverside, California and the City of Anaheim, California are the holders of Construction Permit Nos. CPPR–97 and CPPR–98 issued by the

Atomic Energy Commission [1] on October 18, 1973 for the San Onofre Nuclear Generating Station. These facilities are presently under construction at the applicants' site at Camp Pendleton, San Diego County, California. By letters dated March 31, 1978, and April 23, 1980, Southern California Edison Company filed requests for extension of the latest construction completion dates for the facilities. The requests were granted by the Commission's Orders dated December 28, 1978, and August 5, 1980, respectively.

On March 16, 1981, Southern California Edison Company filed a request for another extension of the latest construction completion dates for the San Onofre 2 and 3 facilities. This request is to extend the latest completion dates to October 15, 1981 for Unit 2 and November 15, 1982 for Unit 3. Southern California stated that this extension was requested because construction has been delayed due to (1) regulatory and licensing delays following the TMI incident, (2) changes and/or additions to the facility design associated with TMI modifications, and (3) a strike by the boilermakers.

This action involves no significant hazards consideration, good cause has been shown for the delay, and the requested extension is for a reasonable period, the bases for which are set forth in the staff evaluation. The preparation of an environmental impact statement for this particular action is not warranted because there will be no significant environmental impact attributable to the Order other than that which has already been predicted and described in the Commission's Final Environmental Statement-Construction Permit Stage (FES–CP) for the San Onofre Nuclear Generating Station, Units 2 and 3, published in March 1973. A Negative Declaration and an Environmental Impact Appraisal have been prepared and are available, as is the FES–CP for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555 and at the local public document room established for the San Onofre Nuclear Generating Station, Units 2 and 3 at the Mission Viejo Branch Library, 24851 Chrisanta Drive, Mission Viejo, California 92676.

It is hereby ordered that the latest completion date for CPPR–97 be extended from April 15, 1981 to October 15, 1981 and the latest date for CPPR–98 be extended from June 15, 1982 to November 15, 1982.

Date of issuance: May 13, 1981.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing.

[FR Doc. 81-15559 Filed 5-22-81; 8:45 am]

BILLING CODE 7590-01-M

[1] Effective January 20, 1975, the Atomic Energy Commission became the Nuclear Regulatory Commission and permits in effect on that day continued under the authority of the Nuclear Regulatory Commission.

[Docket Nos. 50-361 and 50-362]

Southern California Edison Company, et al.; San Onofre Nuclear Generating Station, Unit Nos. 2 and 3; Negative Declaration Supporting; Extension of Construction Permit Nos. CPPR–97 and CPPR–98 Expiration Dates

The U.S. Nuclear Regulatory Commission (the Commission) has reviewed the Southern California Edison Company's request to extend the expiration dates of the construction permits for the San Onofre Nuclear Generating Station, Units Nos. 2 and 3 (CPPR–97 and CPPR–98) which are located in San Diego County in the State of California. The request is for an extension to the permits through October 15, 1981 for CPPR–97 and through November 15, 1982 for CPPR–98, to allow completion of construction of the facilities.

The Commission's Division of Licensing has prepared an environmental impact appraisal relative to these changes to CPPR–97 and CPPR–98. Based on this appraisal, the Commission has concluded that an environmental impact statement for this particular action is not warranted because there will be no significant environmental impact attributable to the proposed action other than that which has already been described in the Commission's Final Environmental Statement-Construction Permit Stage or evaluated in the environmental impact appraisal.

The environmental impact appraisal is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Mission Viejo Branch Library, 24851 Chrisanta Drive, Mission Viejo, California.

Dated at Bethesda, Maryland, this 13th day of May, 1981.

[Docket Nos. 50-338-50-339]

Virginia Electric Power Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments No. 29 and No. 10 to Facility Operating License Nos. NPF–4 and NPF–7 issued to the Virginia Electric and Power Company (the licensee) which revised the Technical Specifications for operation of the North Anna Power Station, Units No. 1 and No. 2 (the facility) located in Louisa County, Virginia. The amendments are effective as of the date of issuance.

The amendments make changes to Table 3.7–4 of the facility Technical Specifications by removing certain facility snubbers. The changes are needed based on the NRC required Multi-Structure Amplified Response Spectra Analysis presently underway at NA–1&2.

The applications for the amendments comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since these amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendments will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the applications for amendments dated May 13, 1981 and May 15, 1981; (2) Amendment No. 29 and No. 10 to Facility Operating Licenses No. NPF–4 and NPF–7 and (3) the Commission's related Safety Evaluation. These items are available for public inpection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555 and at the Board of Supervisor's Office, Louisa County Courthouse, Louisa, Virginia 23093 and at the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901. A copy of items (2) and (3) may be obtained upon request to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director Division of Licensing.

Dated at Bethesda, Maryland this 15th day of May, 1981.

BILLING CODE 7590-01-M

OFFICE OF MANAGEMENT AND BUDGET

Agency Forms Under Review

Background

May 20, 1981.

When executive departments and agencies propose public use forms, reporting, or recordkeeping requirements, the Office of Management and Budget (OMB) reviews and acts on those requirements under the Paperwork Reduction Act (44 U.S.C., Chapter 35). Departments and agencies use a number of techniques including public hearings to consult with the public on significant reporting requirements before seeking OMB approval. OMB in carrying out its responsibility under the Act also considers comments on the forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

Every Monday and Thursday OMB publishes a list of the agency forms received for review since the last list was published. The list has all the entries for one agency together and grouped into new forms, revisions, extensions (burden change), extensions (no change), or reinstatements. The agency clearance officer can tell you the nature of any particular revision you are interested in. Each entry contains the following information:

The name and telephone number of the agency clearance officer (from whom a copy of the form and supporting documents is available);

The office of the agency issuing this form;

The title of the form;

The agency form number, if applicable;

How often the form must be filled out;

Who will be required or asked to report;

The Standard Industrial Classification (SIC) codes, referring to specific respondent groups that are affected;

Whether small businesses or organizations are affected;

A description of the Federal budget functional category that covers the information collection;

An estimate of the number of responses;

An estimate of the total number of hours needed to fill out the form;

An estimate of the cost to the Federal Government;

An estimate of the cost to the public;

The number of forms in the request for approval;

An indication of whether Section 3504(h) of Pub. L. 96-511 applies;

The name and telephone number of the person or office responsible for OMB review; and

An abstract describing the need for and uses of the information collection.

Reporting or recordkeeping requirements that appear to raise no significant issues are approved promptly. Our usual practice is not to take any action on proposed reporting requirements until at least ten working days after notice in the **Federal Register**, but occasionally the public interest requires more rapid action.

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained from the agency clearance officer whose name and telephone number appear under the agency name. The agency clearance officer will send you a copy of the proposed form, the request for clearance (SF83), supporting statement, instructions, transmittal letters, and other documents that are submitted to OMB for review. If you experience difficulty in obtaining the information you need in reasonable time, please advise the OMB reviewer to whom the report is assigned. Comments and questions about the items on this list should be directed to the OMB reviewer or office listed at the end of each entry.

If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the reviewer of your intent as early as possible.

The timing and format of this notice have been changed to make the publication of the notice predictable and to give a clearer explanation of this process to the public. If you have comments and suggestions for further improvements to this notice, please send them to Jim J. Tozzi, Deputy Administrator, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place, Northwest, Washington, D.C. 20503.

BILLING CODE 3110-01-M

PRESIDENT'S COMMISSION FOR THE STUDY OF ETHICAL PROBLEMS IN MEDICINE AND BIOMEDICAL AND BEHAVIORAL RESEARCH

Meeting

Notice is hereby given, pursuant to Section 10(a)(2) of the Federal Advisory Committees Act, that the tenth meeting of the President's Commission for the Study of Ethical Problems in Medicine

and Biomedical and Behavioral Research will be held in Room 208, J. W. McCormack Post Office and Court House Building, Boston, Massachusetts from 9:00 a.m. to 5:00 p.m. on Thursday, June 4, 1981 and from 9:00 a.m. to 4:30 p.m. on Friday, June 5, 1981.

The meeting will be open to the public, subject to limitations of available space. The agenda for Thursday, June 4, will include, among other things (1) testimony on the ethical and legal aspects of decisions to forego life-sustaining therapy, especially in patients who may not be competent, and (2) consideration of a draft report on the determination of death. The agenda for Friday, June 5, will include among other things (1) an examination of the federal and institutional policies and procedures for the protection of human subjects of research, particularly when fraud and abuse have been alleged, and (2) a progress report on the study of means to assess the implementation of federal regulations on research involving human subjects.

During each afternoon fifteen minutes will be devoted to comments from the floor on the subject of any of the agenda items, limited to three minutes per comment. Written suggestions and comments will be accepted for the record from those who are unable to speak because of the constraints of time or those unable to attend the meeting.

Records shall be kept on all Commission proceedings and will be available for public inspection at the Commission's office, located in Suite 555, 2000 K Street, N.W., Washington, D.C. 20006.

For further information, contact Andrew Burness, Public Information Officer, at (202) 653–8051.

Alexander M. Capron,

Executive Director.

SECURITIES AND EXCHANGE COMMISSION

[File No. 500-1]

Brady Energy Corp.; Order of Suspension of Trading

May 19, 1981.

It appears to the Securities and Exchange Commission that questions have been raised with respect to the adequacy and accuracy of publicly available information concerning the identity of the purchasers of a controlling interest in Brady Energy Corporation, the status of the transaction and the financial arrangements involved in the transaction.

In view of the foregoing, the Commission is of the opinion that the public interest and the protection of investors require a summary suspension of trading in the securities of Brady Energy Corporation from 11:30 a.m. (EDT) on May 19, 1981 through midnight May 28, 1981.

By the Commission.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[File No. 1-5722]

Restaurant Associates Industries, Inc., Common Stock, $1 Par Value; Notice of Application To Withdraw From Listing and Registration

May 19, 1981.

The above named issuer has filed an application with the Securities and Exchange Commission pursuant to Section 12(d) of the Securities Exchange Act of 1934 (the "Act") and Rule 12d2-2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the Boston Stock Exchange, Inc. ("BSE").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

1. The common stock of Restaurant Associates Industries, Inc. (the "Company") is listed and registered on the BSE and the American Stock Exchange, Inc. ("Amex"). The Company has determined that because of the limited trading volume on the BSE, the continued expense of listing does not justify maintaining the dual listing of the common stock.

2. This application relates solely to withdrawal of the common stock from listing and registration on the BSE and shall have no effect upon the continued listing of such stock on the Amex. The BSE has posed no objection to this matter.

Any interested person may, on or before June 10, 1981, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

Small Business Investment Companies; Moratorium on New License and Transfer of Control Applications

AGENCY: Small Business Administration.

ACTION: Notice of 90-day moratorium.

SUMMARY: This Notice is to advise the public that, effective April 17, 1981, the SBA had placed a 90-day moratorium on all new SBIC license and transfer of control applications.

EFFECTIVE DATE: The moratorium was effective April 17, 1981.

FOR FURTHER INFORMATION CONTACT: Peter F. McNeish, Acting Associate Administrator for Investment, Small Business Administration, Washington, D.C. 20416, (202) 653–6848.

SUPPLEMENTARY INFORMATION: On April 17, 1981, the SBA placed a 90-day moratorium on all SBIC licensing activity including transfers of control. On April 28, 1981, this action was modified to authorize the processing and granting of licenses, transfers of control and conversions to partnership which were in process on April 17, 1981, but to continue the moratorium on all new license applications and all new transfer of control and conversion applications. The reason for the moratorium is the Administration's concern with the effectiveness of SBA's licensing standards and regulatory oversight of SBICs. During this moratorium period a comprehensive review of the SBIC licensing standards and regulations will be undertaken by the Agency and, if warranted, modifications to the standards and regulations will be proposed.

(Catalog of Federal Domestic Assistance Programs No. 59.011, Small Business Investment Companies)

Dated: May 20, 1981.

Michael Cardenas,

Administrator.

BILLING CODE 8025-01-M

DEPARTMENT OF STATE

[Public Notice CM-8/408]

Advisory Committee on the Law of the Sea; Partially Closed Meeting

In accordance with Section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) as amended by Pub. L. 94-409 Section 5(c), notice is hereby given that the Advisory Committee on the Law of the Sea will meet in closed session on Monday and Tuesday, June 8 and 9 and in open session on Tuesday, June 9, 1981. A group, cutting across subcommittee lines of the Advisory Committee on the Law of the Sea will also meet in closed session on Tuesday, June 9. The open session of the meeting will convene June 9 at 2:30 p.m. in Room 1410, U.S. Department of State, 21st and C Streets, N.W., Washington, D.C.

The purpose of the closed meeting is to consider the current review of the Law of the Sea Convention and the review process and to make preparations for the U.S. Delegation to the Resumed Tenth Session of the Third United Nations Conference on the Law of the Sea to be held in Geneva beginning August 3, 1981. The sub-group will advise U.S. negotiators on matters relating to potential reciprocal arrangements among like-minded nations that have enacted or may enact domestic mining legislation prior to possible entry into force of a comprehensive Law of the Sea Treaty. During the closed sessions, documents classified under the provisions of Executive Order 12065 will be discussed.

These documents relate to the issues which the United States is currently reviewing and has negotiated or will negotiate at the Conference. The documents are exempt under 5 U.S.C. 552b(c)(1) and 5 U.S.C. 552b(c)(9), and may be withheld from disclosure in the public interest.

The issues cover such subjects as the review, freedom of navigation on the high seas and in straits used for international navigation and related national security interest, the nature of a deep seabeds mining regime and deep seabed mining legislation, the continental margin, the economic zone, fisheries, marine pollution, scientific research, dispute settlement, and other topics involving U.S. national security and foreign relations matters. Premature disclosure of the contents of these documents could adversely affect our foreign relations interests and jeopardize United States law of the sea interests.

The open session of the Advisory Committee meeting will discuss all principal agenda issues which have been considered during the Third United Nations Conference on the Law of the Sea, including those issues stated above, but will not examine the classified items discussed during the closed session.

The Advisory Committee on the Law of the Sea represents a broad cross-section of industries, professions, academic disciplines, and other public groups. As such, it will comprehensively review the proposals which have come and will come before the Conference.

At the open session, beginning at 2:30 p.m., June 9, the general public attending may participate in the discussion subject to instructions of the Chairman.

As entrance to the State Department in controlled, members of the public who wish to attend the open session should contact Marsha Bellavance and provide their name and affiliation to facilitate their attendance. Her telephone number is (202) 632-0041.

Norman A. Wulf,

Acting Director, Office of the Law of the Sea Negotiations.

Integrated Services Digital Network (ISDN) Working Party of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT); Meeting

The Department of State announces that the ISDN Working Party of the U.S. Organization for the International Telegraph and Telephone Consultative (CCITT) will meet on June 3, at 10:00 a.m. in Room 1205 of the Department of State, 2201 C Street NW., Washington, D.C. This Working Party deals with the evolution of ISDN as it is being considered by CCITT Study Group XVIII.

Inasmuch as this will be the first meeting of the Working Party, the initial part of the meeting will be devoted to organizational and housekeeping matter. The remainder of the meeting will be spent in developing U.S. positions to be taken at the upcoming meeting of Study Group XVIII (June 22-July 1).

Members of the general public may attend the meeting and join in the discussion subject to instructions of the Chair. Admittance of public members will be limited to the seating avaiable. In that regard, entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. It is therefore requested that prior to June 3, 1981 members of the general public who plan to attend the meeting inform Mr. Richard H. Howarth, Office of International Communications Policy, Department of State, telephone (202) 632-1007, of their intention.

All non-Governmental attendees must use the C Street entrance to the building.

Dated: May 5, 1981.

Richard H. Howarth,

Chairman, U.S. CCITT National Committee.

Overseas Schools Advisory Council; Meeting

The Executive Committe of the Overseas Schools Advisory Council, Department of State, will be meeting Thursday, June 18, 1981 at 9:30 a.m. in Conference Room 2722B of the Department of State building, 2201 C Street NW., Washington, D.C.

Agenda items scheduled for discussion are as follows:

I. Welcome to Council Members
II. Results of Ballot Election of Council Chairman and Vice Chairman
III. Message from Assistant Secretary
IV. Discussion on Reports of Council Activities
  A. Status Report of 1980/1981 Program
  B. Fund-Raising Programs Organized Locally by the Schools and Activities of Regional Overseas Schools Associations
  C. Council Communications with U.S. Corporations and Foundations on Behalf of the Overseas Schools
V. Matching Gifts Programs
VI. Proposal Submitted to the Council Regarding Additional Benefits to the American-Sponsored Overseas Schools
VII. Other Business
VIII. Selection of Date for Full Council Meeting

For the purpose of fulfilling building security, members of the public wishing to attend the meeting should call Ms. Judy Knott, Office of Overseas Schools, Department of State, Washington, D.C., Area Code 703-235-9600, prior to June 18. The public may participate in discussions at the Chairman's discretion.

Dated: May 1, 1981.

Ernest N. Mannino,

Executive Secretary, Overseas Schools Advisory Council.

SUMMARY: The FHWA is issuing this notice to advise the public that an Environmental Impact Statement will be prepared for a proposed highway project in San Luis Obispo, California.

FOR FURTHER INFORMATION CONTACT: Albert J. Gallardo, District Engineer, Federal Highway Administration, P.O. Box 1915, Sacramento, California 95809, Telephone: (916) 440–2804.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the California Department of Transportation (Caltrans), will prepare an Environmental Impact Statement (EIS) on a proposal to improve the flow of San Luis Obispo Creek in the City and County of San Luis Obispo, California, at the intersection of Marsh Street and Higera Street (State Highway 227) near their junction with U.S. Highway 101. The project is considered necessary to reduce flood hazards during high flows. The project will be coordinated with the City for consistency with its plans for channel improvements both upstream and downstream of this project.

Alternatives under consideration include: (1) taking no action; (2) realign channel, build new bridge and revise ramps; (3) raise existing bridge and surrounding streets and revise ramps; and (4) realign channel only.

No scoping meetings have been scheduled at this time. Meetings will be scheduled to encourage affected parties to identify the crucial issues and insure that matters of importance are not overlooked in the early stages of review.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

Issued on: May 15, 1981.

Albert J. Gallardo,

District Engineer, Sacramento, California.

BILLING CODE 4910–22–M

National Advisory Committee on Outdoor Advertising and Motorist Information; Public Meeting

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of public meeting.

SUMMARY: Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C. App. I), notice is hereby given of a meeting of the National Advisory Committee on Outdoor Advertising and Motorist Information.

DATES: Meeting to be held on June 18 and 19, 1981.

TIME: Meeting wil be held from 8:30 a.m. to 5:00 p.m. on June 18 and 19.

ADDRESS: The meeting will be held at Room 4200, Nassif Buiilding, 400 Seventh Street, SW., Washington, D.C.

ATTENDANCE: The public is invited to attend. Any member of the public will be permitted to file a written statement with the Committee. Interested persons may be permitted to speak at the meeting in accordance with the bylaws established by the Committee.

AGENDA: The full committee will meet to:

1. Review and approve minutes,
2. Consider subcommittees' resolutions,
3. Vote on resolutions, and
4. Consider other matters as may be specified by the Chairman or Executive Director.

FOR FURTHER INFORMATION CONTACT: Mr. Gerald L. Kennedy, Executive Director of the National Advisory Committee, Room 4132, HRW–13, (202) 426–0142, or Mr. Edward V. A. Kussy, Deputy Assistant Chief Counsel, Room 4230, HCC–40, (202) 426–0791, Federal Highway Administration, 400 Seventh Stret, SW., Washington, D.C. 20590.

(Catalog of Federal Domestic Assistance Program Number 20.214, Highway Beautification—Control of Outdoor Advertising, and Control of Junkyards. The provisions of OMB Circular No. A–95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects apply to this program)

Issued on: May 20, 1981.

L. P. Lamm,

Executive Director.

BILLING CODE 4910–22–M

National Highway Traffic Safety Administration

[Docket No. IP81–13; Notice 1]

Iveco Trucks of North America, Inc.; Receipt of Petition for Determination of Inconsequential Noncompliance With Vehicle Identification Number Regulation

Iveco Trucks of North America, Inc. of Blue Ball, Pennsylvania, has petitioned to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 *et seq.*) for an apparent noncompliance with 49 CFR 571.115, *Vehicle Identification Number*, on the basis that it is inconsequential as it relates to motor vehicle safety.

This notice of receipt of a petition is published under section 157 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1417) and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Iveco imports the Z–100 truck (9,995 lbs. GVW) manufactured in Brescia, Italy. Due to mistranslation and interpretation the tenth character of the VIN was not changed at the proper time to signify Model Year 1981. The result is that over 1700 trucks, manufactured between June and December 1980, came into the country with the VIN translating as Model Year 1980, when in reality they were 1981 models.

The company's inconsequentiality arguments are not based upon the effect of the noncompliance but the effects that might result were an attempt made to correct it: "Great confusion and inaccuracies would result from attempts in the field to correct and re-register such vehicles; and it would be seriously detrimental to accurate and efficient documentation, which might be necessary in any recall campaign or potential future theft investigation." As for possible difficulties with State registration, Iveco proposes "identifying the vehicles and providing full explanations [and] will provide the National Auto Theft Bureau or proper involved agencies a listing of affected vehicle identification numbers, with proper model year designation."

Interested persons are invited to submit written data, views and arguments on the petition of Iveco Trucks of North America, described

above. Comments should refer to the docket number and be submitted to: Docket Section, Room 5109, National Highway Traffic Safety Administration, 400 Seventh Street, S.W., Washington, D.C. 20590. It is requested but not required that five copies be submitted.

All comments received before the close of business on the closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, notice will be published in the **Federal Register** pursuant to the authority indicated below.

The engineer and attorney primarily responsible for this notice are Nelson Erickson and Taylor Vinson, respectively.

Comment closing date: June 22, 1981.

(Sec. 102, Pub. L. 93-492, 99 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on May 15, 1981.

Michael M. Finkelstein,

Associate Administrator for Rulemaking.

[FR Doc. 81-15284 Filed 5-22-81; 8:45 am]

BILLING CODE 4910-59-M

DEPARTMENT OF THE TREASURY

Fiscal Service

[Dept. Circ. 570, 1980 Rev., Supp. No. 23]

Surety Companies Acceptable on Federal Bonds

A certificate of authority as an acceptable surety on Federal bonds is hereby issued to the following company under Sections 6 to 13 of Title 6 of the United States Code. An underwriting limitation of $503,000 has been established for the company.

Name of Company: ULICO CASUALTY COMPANY.

Business Address: 805 Third Avenue, New York, New York 10022.

State of Incorporation: Delaware.

Certificates of authority expire on June 30 each year, unless renewed prior to that date or sooner revoked. The certificates are subject to subsequent annual renewal so long as the companies remain qualified (31 CFR, Part 223). A list of qualified companies is published annually as of July 1 in Department Circular 570, with details as to underwriting limitations, areas in which licensed to transact surety business and other information. Federal bond-approving officers should annotate their reference copies of the Treasury Circular 570, 1980 Revision, at page 44513 to reflect this addition. Copies of the circular, when issued, may be obtained from the Audit Staff, Bureau of Government Financial Operations, Department of the Treasury, Washington, D.C. 20226.

Dated: May 14, 1981.

W. E. Douglas,

Commissioner, Bureau of Government Financial Operations.

FEDERAL ENERGY REGULATORY COMMISSION.

May 20, 1981.

TIME AND DATE: 10 a.m., May 27, 1981.

PLACE: Room 9306, 825 North Capitol Street, N.E., Washington, D.C. 20426.

STATUS: Open.

MATTERS TO BE CONSIDERED: Agenda.

Note.—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION: Kenneth F. Plumb, Secretary; telephone (202) 357-8400.

This is a list of matters to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda: however, all public documents may be examined in the Division of Public Information.

The consent agendas, power and miscellaneous agendas will be considered on Wednesday, May 27, 1981. The gas agenda will be considered on Thursday, May 28, 1981.

Consent Power Agenda—491st Meeting, May 27, 1981, Regular Meeting (10 a.m.)

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 135

[Docket No. 21134; Amendment No. 135-13]

Delay of Compliance Date for Instrument Rating Requirement

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment delays from February 1, 1981, to August 1, 1981, the date for compliance with the requirement that pilots in command of air taxi and commercial operator (Part 135) aircraft must have an instrument rating (§ 135.243). This action provides interim regulatory relief to pilots and operators under Part 135 while the FAA revises § 135.243 to provide permanent relief from the instrument rating requirement for certain operations. The Director, Office of Management and Budget (OMB), has exempted rules that delay compliance dates from sections 3, 4, 7, and 8 of Executive Order 12291. This amendment is consistent with the remaining requirements of Executive Order 12291 and the Regulatory Flexibility Act.

EFFECTIVE DATE: May 19, 1981.

FOR FURTHER INFORMATION CONTACT: William J. Sullivan, Chief, Safety Regulations Staff (AVS–20), Associate Administrator for Aviation Standards, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone (202) 755–8716.

SUPPLEMENTARY INFORMATION:

Compliance Date for Instrument Rating Requirements

On September 26, 1978, the FAA issued a revised Part 135 of the Federal Aviation Regulations (FAR), "Air Taxi Operators and Commercial Operators" (43 FR 46742; October 10, 1978). This revision was effective on December 1, 1978. Section 135.243(b)(3) requires an instrument rating for pilots in command of airplanes. Under § 135.10, pilots and operators were given until June 1, 1979, to comply with this requirement. The FAA received numerous petitions for exemption from the instrument rating requirement. As a result, the FAA determined that additional rulemaking regarding that requirement should be initiated before compliance with the instrument rating became mandatory. To allow this, the FAA changed the compliance date in § 135.10 for the instrument rating requirement to December 1, 1980 (44 FR 26737; May 7, 1979).

On November 28, 1980, the FAA again extended the compliance date for the instrument rating to February 1, 1981 (45 FR 80460; December 4, 1980). At the same time, the FAA issued Notice 80–23 (45 FR 80450) which proposed certain changes in the instrument rating requirement. The comment period on Notice 80–23 closed on February 4, 1981.

The FAA found that additional time was needed to evaluate properly comments received in response to Notice 80–23 and to formulate the FAA's final course of action. Therefore, the FAA planned to extend the compliance date to May 1, 1981. However, that extension was not completed before it became necessary to review the agency's regulatory actions to determine compliance with Executive Order 12291. Discussions were held with OMB on this proposed extension. This rulemaking, along with several others, generated an exemption from certain provisions of Executive Order 12291 by the Director of OMB. The exemption allows this particular document to be issued without submission to OMB.

The FAA has received numerous calls and exemption petitions from operators and pilots seeking relief from this rule. Many pilots claim that they face the loss of their jobs and, in some cases, they have lost their jobs. Operators claim that they are losing business. The FAA is developing a rule to provide permanent relief to certain operators based on comments received in response to Notice 80–23. The FAA has determined that it is appropriate to again delay the date for compliance with the instrument rating requirement for all Part 135 operators from February 1, 1981, to August 1, 1981, to allow completion of the rulemaking proposed in Notice 80–23.

Notice and Public Procedure

This amendment provides temporary regulatory relief to pilots and to air taxi and commercial operators and does not impose any economic burden on those operators. Accordingly, I find that notice and public procedure are unnecessary and contrary to the public interest and that good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, Part 135 of the Federal Aviation Regulations (14 CFR Part 135) is amended, effective May 19, 1981, by removing the date "February 1, 1981" in § 135.10(c) and inserting in its place the date "August 1, 1981."

Note.—The FAA has determined that this regulation provides interim relief for certain operators while the agency is completing rulemaking action proposed in Notice 80–23. It therefore: (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant regulation" under the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant a regulatory evaluation; and (4) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

(Secs. 313(a) and 601 through 605 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 through 1425); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Washington, DC, on May 18, 1981.

J. Lynn Helms,

Administrator.

DEPARTMENT OF TRANSPORTATION

14 CFR Parts 121 and 135

[Docket No. 20659; Amdt. Nos. 121-171 and 135-14]

Elimination of Duties and Activities of Flight Crewmembers Not Required for the Safe Operation of Aircraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule, notice of change of effective date.

SUMMARY: This amendment amends the effective date of Amendments 121-168 and 135-11 issued on January 14, 1981. The effective dates are being postponed for 30 days at the direction of the Office of Management and Budget in order that they be allowed to complete their review of these amendments as required by Section 7, paragraph (b) of Executive Order 12291.

EFFECTIVE DATE: As of May 18, 1981, the effective date of the regulations published at 46 FR 5500 has been delayed until June 18, 1981.

FOR FURTHER INFORMATION CONTACT: Edward P. Faberman, Assistant Chief Counsel (AGC-200), Regulations and Enforcement Division, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone (202) 426-3073.

SUPPLEMENTARY INFORMATION: On January 14, 1981, the FAA issued Amendment Nos. 121-168 and 135-11 (46 FR 5500, January 19, 1981.) These amendments prohibit performance of nonessential duties and activities by flight crewmembers which are not required for the safe operation of aircraft during critical phases of flight. These amendments require operators and flight crewmembers to assure a flight deck environment that is free from distractions created by the performance of nonessential flight crewmember duties.

Executive Order 12291 was issued by the President on February 17, 1981. Section 7, paragraph (b), requires that agencies report any regulation falling within the requirements of this section to the Director of the Office of Management and Budget (OMB) prior to the effective date of any rule that the agency has promulgated in final form, as of the date of the Executive Order, and that had not become effective. Since the effective date of Amendments 121-168 and 135-11 was May 18, 1981, it was necessary that the Director be notified of this rule. The General Counsel of the Department of Transportation notified OMB that this had been reconsidered under the Executive Order and should become effective.

On May 15, 1981 the Office of Information and Regulatory Affairs, OMB, notified the Office of the General Counsel of the Department of Transportation, by telephone, that they needed more time to review this rule and that, therefore, the effective date of the rule had to be postponed. In accordance with this direction, the effective date of this rule is postponed by 30 days to June 18, 1981.

Adoption of Amendment

In order to provide additional time for OMB to review this rule in accordance with Executive Order 12291, the effective dates of Amendments 121-168 and 135-11 are amended to June 18, 1981.

(Secs. 313(a) and 601 through 605 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 through 1425); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Note.—Since this document only involves a change of effective dates, the FAA has determined that: (1) It is not a major regulation under Executive Order 12291; (2) It is not significant under the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) It does not warrant preparation of a regulatory evaluation as the impact is so minimal.

Issued in Washington, D.C. on May 18, 1981.

J. Lynn Helms,

Administrator.

Department of Health and Human Services

Office of Human Development Services

Native American Programs; Announcement of Availability of FY 1982 Financial Assistance for Native American Projects

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Human Development Services

[Program Announcement 13612-821]

Native American Programs; Availability of Fiscal Year 1982 Financial Assistance

AGENCY: Office of Human Development Services, DHHS.

SUBJECT: Announcement of Availability of Fiscal Year 1982 Financial Assistance for Native American Projects.

SUMMARY: The Administration for Native Americans (ANA) announces that applications will be accepted for financial assistance under Section 803 of the Native American Programs Act of 1974, Pub. L. 93-644, as amended. Regulations covering this program are published in the *Code of Federal Regulations* in 45 CFR Part 1336.

DATE: Closing date for receipt of all applications under this program announcement is 90 days prior to the Budget Period End date (BPE) of the current ANA grant.

Scope of This Program Announcement

This program announcement is directed to the attention of Fiscal Year 1981 ANA grantees and provides guidance to those grantees in the preparation of their applications for FY '82 funding from the Administration for Native Americans. This announcement solicits applications for FY '82 grants and is being published to ensure that the public has notice of the Administration for Native American's funding priorities for fiscal year 1982.

This program announcement is intended to solicit applications only from Indian tribes and Native American organizations which are FY '81 grantees of ANA. Competition for other grant awards in FY '82 will be announced separately in the **Federal Register**.

Program Purpose

The purpose of the Administration for Native Americans is to promote economic and social self-sufficiency of American Indians, Alaskan Natives and Hawaiian Natives through financial assistance, training and technical assistance, and research, demonstration, and evaluation activities. Based on the authorization in the Native American Programs Act (Title VIII of Pub. L. 93-644, as amended), ANA supports activities that strengthen the ability of Indian tribes and Native American groups and organizations to determine and implement developmental strategies supportive of comprehensive social and economic progress.

ANA Program Goals

Consistent with ANA's mission of promoting self-sufficiency, the goal of the ANA program is to provide financial assistance to Indian tribes and Indian, Alaska Native and Hawaiian Native organizations to enable them to create and implement effective local social and economic development strategies. The implementation of these strategies is expected to result in sustained improvement in the social and economic conditions of Native Americans within the community, as well as in increased effectiveness and efficiency of the Indian tribe or Native American organization in defining and achieving its own economic and social goals.

The Administration for Native Americans operates on the principle that economic and social development are interrelated and that both must be balanced if Native Americans are to achieve self-sufficiency. This approach, developed in consultation with Native American leaders all over the nation, represents no radical break with the past, but provides a new perspective to the ANA mission, based inpart on the successful experiences of many grantees in moving toward self-sufficiency in recent years.

It is the policy of the Administration for Native Americans to encourage tribes and Native American organizations to achieve a balanced approach to social and economic development through locally determined and implemented strategies. This policy allows grantees to focus on social and economic barriers and move from dependence on social services to increasing opportunities for self sufficiency.

Because the local community knows the appropriate activities required to create its own social and economic balance, it is ANA's policy to strengthen tribes and Native American organizations in providing direction to social and economic development and in coordinating all resources, Federal and non-Federal, toward locally determined priorities. It is also ANA's policy to support the development of local leadership, on and off the reservation, in planning and implementing local programs which meet community needs.

Thus, the program and policy initiatives of the Administration for Native Americans in this program announcement are grouped into three major categories:

- Enhancement of the capability of tribal governments and Native American organizations to meet local needs and to influence social and economic growth.
- Development of diversified and stable economies or improved access to and development of programs which provide jobs, promote the economic well-being of Native American people, and reduce dependency on services.
- Development or improvement of comprehensive tribal social systems or improved access to and development of programs which safeguard the health and welfare of individuals, families and communities, and provide services needed to achieve and maintain a thriving community.

Program Objectives

Federally-Recognized Tribal Grantees

All ANA funded Federally recognized tribes and tribal consortia applying for fiscal year 1982 funding must indicate that the proposed project(s) will achieve one or more of the following objectives:

- To strengthen the ability of tribal governmental institutions and Indian leadership to plan, develop and implement community-determined programs supportive of balanced social and economic growth.
- To strengthen the ability of tribes to function as units of government.
- To develop and/or access, in a comprehensive manner, resources, services, and benefits necessary for meeting the economic needs of the tribe.
- To develop diversified and stable tribal economies which provide jobs, encourage business development, promote economic well-being and reduce dependency on services.
- To plan and carry out programs to gain private sector investment, technical assistance, markets and job opportunities for tribal economies.
- To strengthen the ability of tribal governments to plan and implement comprehensive social services.
- To improve tribal and individual access to resources, services and benefits necessary to meet social needs.
- To resolve problems of jurisdictional conflict and ill-defined areas of program responsibility which result in gaps in services for the tribes.
- To assist Indian tribes to ensure that Indian people exercise their rights and obtain the benefits to which they are entitled by virtue of the Federal trust relationship, legislative authority, or as citizens of the United States.
- To promote tribal coordination and control of local, State and Federal program efforts and initiatives in employment, energy, child welfare, environmental and occupational health, aging, rehabilitation and other areas

that enhance social and economic self-sufficiency.

Other Than Federally Recognized Tribal Grantees

All ANA funded off-reservation organizations and non-tribal consortia, urban Indian Centers, Native Alaskan and Native Hawaiian organizations applying for FY '82 funding must indicate that the proposed project(s) will achieve one or more of the following objectives:

- To plan, develop and manage the implementation of community-determined programs supportive of balanced community social and economic growth.
- To develop and/or access, in a comprehensive manner, resources, services, and benefits necessary for meeting the economic needs of the local Native American community and its members.
- To develop programs which provide jobs, encourage business development and community co-operatives and otherwise promote the economic well-being of Native Americans and reduce dependency on services.
- To plan and carry out programs to gain private sector investments, technical assistance, markets and job opportunities for Native Americans.
- To develop and/or improve, in a comprehensive manner, the accessibility of resources, services and benefits necessary for meeting the social needs of the Native American community.
- To make private and public agencies aware of and responsive to the rights of Native Americans to the services and benefits for which all citizens are eligible.
- To help Native Americans become aware of and obtain the services to which they are entitled by legislative authority and as citizens of the United States.
- To enhance coordination of local, State and Federal programs which are necessary to substained social and economic improvements for the community and its members.

Applicants who wish further clarification or explanation of this announcement should call Mr. Merv Tano or Ms. Pecita Lonewolf, ANA, (202) 245–7714.

Training And Technical Assistance

Program funds requested in the applications for financial assistance may be utilized for obtaining technical assistance and training required to support the activities designed to achieve the project objectives. The proposed technical assistance or training resources should be sufficiently detailed to assure its applicability to the overall project. Applicants must define the manner in which the proposed technical assistance and training will affect achievement of objectives.

Eligible Applicants

Indian tribes and Native American organizations which are FY '81 grantees of the Administration for Native Americans are eligible to apply for a grant awards under the program announcement. See Appendix A for a partial list of FY '81 ANA grantees funded to date in 1981. The list of all grantees funded in FY '81 will be published in October, 1981.

Budget Considerations

The Administration for Native Americans' FY '82 proposed budget is $28 million for Financial Assistance, Training and Technical Assistance, and Research, Demonstration and Evaluation. This represents a reduction of $5.8 million from the FY '81 level of $33.8 million. The budget for all programs funded for FY '82 under Section 803, Financial Assistance, including those to be funded under this program announcement is $25.6 million, which represents a reduction from the FY '81 level of $28 million for Financial Assistance.

Grantee Share of Project

Grantees must provide up to 20% of the total approved cost of the project. Grantee contributions may be in cash or in kind, fairly evaluated, including, but not limited to, plant, equipment, and services. The contribution must be project related and must be allowable under the Department's applicable regulations in 45 CFR Part 74, Subparts G and Q.

Under certain circumstances, some or all of the non-Federal share of the project may be waived by ANA. Further explanation is contained in Section 1336.52 of ANA's regulations which will be provided in the application kit.

The Application Process

Availability of Application Forms

In order to be considered for a grant under this program announcement, an application must be submitted on the forms supplied and in the manner prescribed by ANA. An application kit containing the necessary forms as well as supplemental descriptive project information will be sent to all eligible applicants 180 days prior to the Budget Period End date of their current ANA grant.

Application Submission

The grant application, including all attachments must be submitted to the address specified in the application kit.

The application shall be signed by an individual authorized to act for the applicant agency and to assume for the agency the obligations imposed by the terms and conditions of the grant award, including Native American programs Rules and Regulations.

A–95 Notification Process

In compliance with the Department of Health and Human Service's implementation of the Office of Management and Budget Circular No. A–95 Revised (procedures at 41 FR 2052, January 13, 1976), applicants, with the exception of Federally recognized tribes, who request grant support must, prior to submission of an application, notify both the State and Areawide Clearinghouses of the intent to apply for Federal financial assistance. Some State and Areawide Clearinghouses provide their own forms for the notification and others use the facesheet (SF–424) of the application form. Applicants should contact the appropriate Clearinghouses (listed at 42 FR 2210, January 10, 1977) for information on how they can meet the A–95 requirements.

Application Consideration

The Commissioner determines the final action to be taken with respect to each grant application for this program. Applications which do not conform to this announcement or are not complete will not be accepted for review and applicants will be notified in writing accordingly. Applications which are submitted by the appropriate due date and which are complete will be reviewed and evaluated by a panel of ANA staff against the published criteria. The ANA program specialist for the particular applicant will provide written comments on the application to the Commissioner and will also review the applicant's compliance performance on the submission of financial reports, project progress reports and audits for the prior year and for the current grant year. The results of the above three reviews assist the Commissioner in his consideration of each application. The Commissioner's consideration also takes into account the comments of the A–95 Clearinghouse and other interested parties. The Commissioner makes grant awards consistent with the purpose of the Act, the regulations, and the program announcement within the limits of funds available.

After the Commissioner has reached a decision either to disapprove or to fund a grant application, unsuccessful applicants are notified of the decision in writing. Successful applicants are

notified through the issuance of a Notice of Financial Assistance Awarded which sets forth in writing to the recipient the amount of funds awarded, the purpose of the grant, the terms and conditions of the grant award, the effective date of the award, the budget period for which support is given and the amount of recipient participation.

Criteria For Review And Condition For Funding

A preliminary review of each application will be performed to determine its timeliness of submission and completeness. Applications received after the due date and applications which are incomplete, will not be accepted for review and will be returned to the applicant without consideration for funding.

(1) *Timeliness:* Applications are due in the OHDS Grants Receiving Office 90 days prior to the Budget Period End Date (BPE). See Appendix A to determine the appropriate due date.

(2) *Completeness:* All applications must be submitted on the forms supplied and in the manner prescribed by ANA in Appendix B.

Each application will then be reviewed and evaluated on the following two areas:

(1) *Compliance Performance:* The applicant's performance in the timeliness and adequacy of the submission of the required reports for the previous and current year will be reviewed and will be a factor in the Commissioner's final funding decision.

(2) *Quality of the Application:* Applications which are complete and received by the appropriate due date will be evaluated against the following criteria:

(a) Applicant's goals are consistent with ANA program objectives as described in this program announcement. (10 points)

(b) Applicant's goals and objectives in the application are related to and consistent with the overall priorities of the applicant organization, as reflected in planning documents. (10 points)

(c) Applicant's objectives are clear, definitive, and measurable; objectives also reflect a capacity building social and economic development approach. (25 points)

(d) The proposed activities, methodologies will achieve project objectives. (10 points)

(e) Applicant is achieving its current ANA supported objectives in a reasonable time frame, and has set new objectives which further progress toward identified goals. (10 points)

(f) The training and technical assistance required to support the activities designed to achieve the stated objectives is indicated in detailed specific tasks indicating resources required, person days allocated, time schedule and cost. (10 points)

(g) Grantee has documented necessary administrative capabilities/functions; financial management system, personnel policies, travel policies, etc. (5 points)

(h) Project personnel are or will be well qualified to achieve project objectives. The person(s) responsible for developing the application is identified by name and position and his/her future responsibilities in the implementation of project objectives is indicated. (10 points)

(i) That the estimated cost to the government is reasonable and justified considering the anticipated results of the project. (10 points)

Due Date For Receipt Of Application

The due date for applications submitted in response to this program announcement is 90 days prior to the applicant's current Budget Period End date. See Appendix A for a partial list of due dates. The final list will be published in October, 1981.

Applications may be mailed or hand delivered. An application will be considered on time if it is received on or before close of business of the correct due date in the OHDS Grants Receiving Office in Washington, D.C. The official time or date of receipt is that registered by the Department of Health and Human Services.

Applications received after the due date because they were mailed or hand delivered too late or addressed incorrectly will not be accepted and will be returned to the applicant without consideration.

Grant Application Checklist

In order to be considered complete, an application must contain the following forms and material:

(1) Acknowledgment Post Card
(2) Form 424, Federal Assistance
(3) Part II, Project Approval Information
(4) Part III, Budget Information
(5) Part IV, Summary of Work Program
(6) Part V, Assurances
(7) HHS–441, Civil Rights Assurance
(8) HHS–641, Assurance of Compliance with Section 504 of the Rehabilitation Act of 1973
(9) Budget Breakdown
(10) Resolution of Approval of application by governing body
(11) Non-Federal share waiver request, if applicable, signed by the chairperson per Section 1336.52, ANA Regulations
(12) Maintenance of Effort Assurance per Section 1336.53(a), ANA Regulations
(13) Project Progress Report for first eight months of current budget period
(14) If applicable, copy of indirect cost rate agreement in effect for the proposed budget period.

The forms and instructions to prepare an application under this program announcement will be provided in the Application Kit which will be sent to all eligible applicants 180 days prior to the Budget Period End Date (BPE) of the FY '81 ANA grant.

Part V

Environmental Protection Agency

Standards Applicable to Owners and Operators of Hazardous Waste Treatment; Storage and Disposal Facilities

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 264

[SWH-FRL-1825-2]

Standards Applicable to Owners and Operators of Hazardous Waste Treatment; Storage and Disposal Facilities

AGENCY: Environmental Protection Agency.

ACTION: Supplemental notice of reproposed rulemaking.

SUMMARY: On February 5, 1981, EPA reproposed standards for permitting hazardous waste land disposal facilities. This notice supplements the reproposal by setting forth more fully the various issues which EPA has considered in developing the standards. The purpose of this notice is to enable the public to better comment on the February 5 proposal as well as other regulatory options.

DATE: The comment period for this notice will run concurrently with that set for the February 5, 1981 reproposal. Comments must be received on or before August 4, 1981.

ADDRESS: Comments should be addressed to Deborah Villari, Docket Clerk, Office of Solid Waste (WH-562), U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, (202) 755-9173.

Comments on the reproposed rule or today's supplemental notice should identify the regulatory docket as follows: "Section 3004: Permitting Standards for Land Disposal Facilities."

The public docket for this rulemaking is available at Room 2711B, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460 and is available for reviewing from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding hoildays.

FOR FURTHER INFORMATION CONTACT: For information on today's supplemental notice of reproposed rulemaking, contact Barry Stoll, Acting Chief, Land Disposal Branch, Office of Solid Waste (WH-564), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, (202) 755-9116. For information on the reproposed rule, contact Robert B. Taylor, Land Disposal Branch, Office of Solid Waste (WH-564), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, (202) 755-9120.

IX. Conclusion

I. Background

Under Section 3004 of the Resource Conservation and Recovery Act of 1976, as amended (RCRA), EPA is required to establish such performance standards, applicable to owners and operators of hazardous waste treatment, storage and disposal facilities (TSDF's), as may be necessary to protect human health and the environment. Some of these standards provide the basis for issuing permits to such facilities under Section 3005. Other standards establish the duties of owners and operators of existing treatment, storage and disposal facilities who qualify for "interim status", a period, established under section 3005(e) of RCRA, during which the facility is treated as if it has a permit. (See 45 FR 33158, May 19, 1980, for a description of "interim status".)

A. Past Rulemaking

In developing regulations under Section 3004, EPA has placed its standards for interim status facilities in 40 CFR Part 265 and those for issuing permits in 40 CFR Part 264. On May 19, 1980 (45 FR 33154) and January 12, 1981 (46 FR 2802), EPA issued a full set of regulations under Part 265 for interim status facilities. Also on May 19, 1980, EPA issued regulations under Part 264 that established certain administrative requirements for permitted facilities. The remainder of the Part 264 standards are being issued in stages. On January 12, 1981, EPA Issued permitting standards governing location of TSDF's, closure and post-closure care and requirements for TSDF's as well as specific technical standards for storage facilities. On January 23, 1981 (46 FR 7666), EPA issued technical standards for hazardous waste incinerators. With these actions, EPA has promulgated the principal elements of the Part 264 standards except for the technical standards applicable to land disposal facilities.

Technical standards for permitting land disposal facilities were originally proposed on December 18, 1978 (43 FR 58982). The basic approach taken in the December 18, 1978 proposal was to set uniform design requirements for landfills and surface impoundments, subject to opportunities for variances when alternative designs could achieve equivalent environmental protection. Many commenters criticized the proposal as being too inflexible and not adequately oriented towards a particular regulatory goal. In response, EPA reconsidered its approach and decided tentatively to move towards a site-specific risk assessment approach. On October 8, 1980, EPA published a supplemental notice of proposed rulemaking, briefly outlining the options which EPA has considered and announcing EPA's tentative selection of the risk assessment approach. A 30-day comment period was provided.

On February 5, 1981, EPA reproposed technical standards for permitting land disposal facilities. The reproposal adopted the site-specific risk assessment approach. A 180-day comment period was provided to promote full discussion of the complex

technical and policy issues concerning the various types of land disposal practices. EPA expects to promulgate final land disposal regulations in 1982.

EPA was concerned that the delay in promulgating final Part 264 standards for land disposal facilities would present problems for owners and operators of new disposal facilities, who may not begin to construct or operate these facilities without permits.[1] (Owners and operators of existing facilities who have qualified for interim status may continue to operate.) New land disposal facilities cannot receive permits until EPA has issued standards for such facilities. EPA was concerned that the delay in issuance of land disposal standards operated effectively as a moratorium on new land disposal facilities, a situation which could undermine the nation's need for environmentally-acceptable disposal capacity and could cause unnecessary economic hardship. Therefore, on February 13, 1981, EPA issued a temporary, interim standard for new land disposal facilities (40 CFR Part 267, 46 FR 12414) to provide a basis for issuing permits. This standard becomes effective on August 13, 1981.

B. Purpose of Notice

In developing the February 5 proposed regulations, EPA has had to consider a variety of broad and complex technical and policy issues and to choose from a large menu of regulatory options. The October 8, 1980 supplemental notice of proposed rulemaking briefly outlined some regulatory options that the Agency had considered.

Following the October 8, 1980 notice, EPA proposed the risk assessment approach in the February 5, 1981, standards. EPA provided a 180-day comment period on this proposal. EPA recognizes that providing the public a continued opportunity during the comment period to comment on all issues, relating to all potential regulatory approaches, would be beneficial. The purpose of this notice is to assist the public in considering these issues.

In this notice, EPA has tried to explain not only the available regulatory options but also the fundamental policy and technical issues underlying the selection of any approach. We hope that the notice will assist the public to evaluate and comment upon the various regulatory options.

Public comment on all issues relating to the land disposal of hazardous wastes will also assist EPA in complying with Executive Order 12291, signed by the President on February 17, 1981. The Executive Order requires all federal agencies, in promulgating major new rules, to prepare regulatory impact anslyses. For each such rule, the analysis must describe potential benefits and costs (including non-quantifiable benefits and costs) of the rule, determine the potential net benefits of the rule, and describe alternative approaches that could substantially achieve the same regulatory goal at lower cost. In addition, the anslysis will include an analysis of effects on small businesses as required by the Regulatory Flexibility Act.

Although EPA believes that in some cases, it may be appropriate to prohibit the land disposal of certain hazardous wastes, in other caes land disposal may be the most acceptable management option. It is our intent in developing final land disposal standards to consider intermedia trade-offs and to evaluate land disposal on the same basis as any other hazardous waste management option, allowing it to continue where there is adequate assurance that human health and the environment can be protected.

C. Format of Notice

This notice is divided into several sections. Sections II and III discuss the broad land disposal policy issues which EPA believes must be addressed in any regulatory approach. The remaining sections examine in some detail what we believe are the principal options available to regulate land disposal facilities and raise specific questions relating to these options.

The discussion reflects the present technical sophistication in designing land disposal facilities and estimating their environmental impacts. All experts agree that particular types of factors and mechanisms are relevant in designing and evaluating these facilities. The debate now focuses on detail: How critical is factor X in predicting the migration of contaminant Y? What is the degree of confidence with which one may predict that a particular design will now fail due to the occurrence of a particular type of unfavorable circumstance? EPA requests that commenters addressing the technical issues raised in this notice focus on these difficult issues rather than on generalities which are already well known and not subject to dispute (e.g., that bio-degradation and sorption are relevant to land disposal issues).

Further, the discussion concerning land disposal reflects the general technical consensus that complete containment of disposed wastes can be achieved only for a limited period; that any facility thus presents some risk; and that in designing and regulating land disposal facilities, one must focus upon limiting risk to acceptable levels. These questions broadly address the options for limiting risk in light of the uncertainty in the present scientific state of the art and the resources available to implement any selected policy option.

II. Preliminary Issues Concerning Risk

Hazardous wastes contain constituents which may present health and environmental risks for long periods of time. Many organic constituents are stable (degrade very slowly); other hazardous constituents (e.g., toxic metals) never degrade. Yet the existing technology for disposing of hazardous wastes on or in the land cannot confidently isolate these wastes from the environment forever.

Since disposing hazardous wastes in or on the land inevitable results in the release of hazardous constituents to the environment at some time, any land disposal facility creates some risk. RCRA requires EPA to establish such standards "as may be necessary to protect human health and the environment." Thus, EPA's task is to assure that risks from land disposal facilities do not exceed a level which is determined by some means to be acceptable.

The means of assuring acceptable risk include direct risk assessment, indirect methods such as design requirements or performance goals, or prohibitions that require that wastes be treated or disposed of by means other than land disposal. These approaches are discussed in detail in subsequent sections of this notice.

Before discussing and selecting appropriate means for reducing risk to acceptable levels, however, one must define the types and degrees of risks which can and should be considered. Furthermore, one must decide who is the appropriate party to determine acceptable risk. These broad but essential preliminary issues are discussed immediately below. Commenters are invited to address these broad issues either directly or in the context of discussing the more specific questions raised in subsequent sections of this notice.

A. To What Extent Can and Should Risks to Future Generations Be Considered?

In disposing of hazardous wastes that will remain potentially dangerous for many thousands of years, society has some responsibility to protect future

[1] A detailed discussion of these problems is set forth at 46 FR 12414–12417, February 13, 1981.

generations. But, while some duty to protect future generations is implied in all environmental regulations, to what relative degrees should protection be provided to today's and tomorrow's populations; that is, how can today's society equitably allocate risk over time?

This issue requires recognition of an essential distinction between present and future generations. Present-day society produces a variety of economic goods (e.g., cars, electrical appliances and plastic goods), resulting in generating and disposing of hazardous wastes. Thus, society accepts some degree of risk in return for the economic benefits of production. However, the risks imposed by today's land disposal upon society in the year 2080, for example, will be accompained by fewer corresponding economic benefits, since many of the goods produced today (or the infrastructure for producing those goods) will no longer be in use (or existence) in 2080. Thus, one may argue that the imposition of risk on future generations by today's land disposal activities for present economic gains may be unfair even in some situations where the same risk would be acceptable to present-day society.

A resolution of this issue requires a consideration of several subordinate issues. First, what assumptions may be made concerning future exposure to hazardous waste? For example, if the quantity of water consumption increases in the future or if available water sources are depleted (e.g., mining of ground-water resources which are not replenished naturally or artificially), then water which presently is unused may need to be used in the future for drinking or other purposes. Current trends in water usage in the United States do indicate an increasing need to tax previously unused ground-water resources. These trends include depletion or pollution of existing ground-water resources, and changing land use patterns which result in the development of formerly pristine areas and the increased use of ground water in these areas. If such trends continue, future generations may be forced to either allocate scarce water (by increasing the cost of consumption or by other means), treat the contaminated water, or increase risk by using the contaminated water. However, if such trends do not continue, then the contamination of ground water near selected and identifiable land disposal sites presents less of a danger to future populations, provided that contaminated ground water can be identified and its use limited accordingly. (Similarly, land use changes caused by population growth and other factors may or may not result in other types of exposures to wastes disposed in areas previously considered remote.)

Second, how likely is it that future societies will have developed the techological and economic capability to recover and treat wastes and to restore contaminated soil, ground water or surface water to their noncontaminated states, thereby reducing exposure to wastes? Can any sensible assumptions concerning future technological capability be made at this time?

Third, what assumptions can be made concerning the institutions available to provide long-term protection from hazardous wastes? Some institutional mechanisms are already being put into place under RCRA. See 40 CFR Parts 264 and 265, Subparts G and H. For example, most regulatory options discussed later in this notice would require some degree of post-closure care. This care may include long-term maintenance and ground-water monitoring together with a pre-financed fund to ensure that these activities can be carried out. In addition, EPA must make some assumptions about other institutional mechanisms (e.g., local land use controls, state or Federal clean-up efforts, common-law tort remedies and disclosure in private property transactions) that could achieve protection of future generations but that are not under EPA control. This issue suggests at least the following subsidiary questions:

i. Can and should owners or operators of land disposal facilities be relied upon to implement perpetual care (or long-term care, depending on whether and how rapidly the wastes decompose over time), if such care is required to successfully implement the selected regulatory option? Can and should they be required to set up financial mechanisms in advance which will assure long-term availability of adequate funds?

ii. Can and should a Federal, state or local agency be charged with the responsibility for long-term monitoring and maintenance of closed land disposal facilities? What special arrangements could be established to finance these activities? Can a governmental agency be relied upon to provide care for centuries if such care is or becomes necessary?

iii. Apart from owners or operators and governmental agencies, what other institutional arrangements may be used to assure long-term care and the existence of funds to pay for such care? Would a national fund analagous to but broader than that contained in section 107(k)(3) in the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (the post-closure liability fund) be appropriate? How should such a fund be financed: through general revenue, or through a tax on hazardous waste generators or land disposal facilities? As an alternative, could private funds (such as annuity funds or trust funds) be used?

EPA recognizes that predicting the future is conjectural at best. However, a decision on the degree of protection provided to future generations will be implicit in any regulatory approach. Thus, this issue must be faced squarely, based upon an analysis of past and present trends and a reasonably projection of future trends.

B. What Types of Risks (Effects Upon Human Health and the Environment) Are of Concern?

An evaluation of the total adverse effects caused by a land disposal facility requires consideration of the constituents of the wastes, the fate and transport of those constituents in the facility and into and through the environment, the extent of human and environmental exposures to the constituents, and the vast array of potential effects which the constituents may have upon people and the environment. The ability to consider all of these factors is constrained both by the limits of technical knowledge (e.g., the effects of many constituents are not well known at this time) as well as by the limits of available time and resources to perform the required analyses.

Therefore, it is appropriate to ask which of the many possible effects to people (e.g., cancer, liver damage, mild nausea), animals and plants and other parts of the environment (e.g., ground-water which may be used as a water source for irrigation or industrial cooling water) should be considered and the weight which should be assigned to these various effects. Should a regulatory approach consider all types of effects? What effects, if any, are so minor as to be not worth considering?

C. How Should the Degree of Risk be Calculated?

To assess the numerical risk presented by a particular facility in a particular location, one must attempt to calculate the risk and then decide whether that risk is acceptable. The extent to which this numerical calculation and risk assessment is performed depends on the regulatory approach. Conversely, the selection of a regulatory approach depends in part on

the extent to which actual calculation of risk is considered desirable or feasible.

First, the regulations could pursue some type of "zero" risk approach. As indicated earlier, it is probably impossible to avoid all releases of hazardous waste constituents forever. Yet it is possible to design facilities to contain wastes for some period of time and thereby achieve a zero or near-zero risk level during that period. Likewise, it is possible to prohibit the siting of disposal facilities in certain locations and thereby achieve zero risk from hazardous waste in those locations. Under this approach, calculating risk is not necessary. Examples of a hazardous waste regulation requiring the containment of hazardous wastes are the regulations for hazardous waste storage regulations in 40 CFR Part 264, Subparts I–L (46 FR 2802, January 12, 1981).

Second, the regulations may require facilities to be designed and managed in ways that limit risk, as defined by technical criteria. This approach, like containment, does not involve the calculation of risk and determination of acceptability of risk at particular facilities. Rather, it attempts to limit the total risks to society produced by all such facilities by setting stringent requirements. An example of this approach is contained in the standards for incinerators (40 CFR Part 264 Subpart O, 46 FR 7666, January 23, 1981). Those standards require, among other things, 99.99% destruction and removal of the principal organic hazardous constituents in the waste and a limitation of particulate emissions to 180 milligrams per day per standard cubic meter. Of course, reliance on uniform design and operating standards creates the possibility that the risks created under the standards are more or less than society would accept if it could and did conduct detailed numerical risk assessments for each facility. (Readers should note that, partly due to this last consideration, on January 23, 1981, EPA proposed amendments to its incinerator requirements to allow case-by-case risk assessment to be used as a variance from the 99.99% destruction and removal requirements.)

Third, the regulations could explicitly address the risk issue. The risks posed by a particular facility could be calculated, subject to uncertainties inherent in such calculations. The calculated risks (including the range of uncertainty) would then be judged for acceptability. The judgment could be based upon a uniform acceptable level determined in Federal or state regulations or upon an individual determination made by a permit writer. (See subsection D below, which discusses who should determine acceptability of risk.) An explicit risk assessment approach is contained in EPA's proposed land disposal regulations of February 5, 1981.

D. Who Should Determine Acceptable Levels of Risk?

Generally, when EPA sets standards for classes of facilities under any of the environmental laws which it implements, it sets uniform national standards. Uniform standards assure fairness by imposing similar costs upon similar facilities. They also lessen competition among states for new industry by setting uniform minimum environmental protection requirements. However, they also limit local determination of the desirable degree of environmental protection. Under section 3009 of RCRA, states may not have less stringent requirements than required by the national standards. (However, section 3009 does permit more stringent requirements.)

Section 3004 of RCRA expresses Congress' intent that EPA write nationally applicable standards. However, even national standards can be written to allow certain local determinations based upon local factors such as local hydrogeological conditions, the types of wastes being disposed at particular facilities, and local water usage and land use patterns. Going one step further towards local determination, a regulatory approach could allow even goals as well as the means to achieve those goals to be determined locally. For example, the reproposed land disposal regulations require the permit issuing authority to assess the risks posed by the facility and to determine whether they are acceptable. The regulations contain some numerical standards, but, for many constituents, acceptability is to be determined by the permit writer/

Allowing risk accepability to be judged at the state regulatory level could result in a facility in one state being judged as acceptable at the same time that a facility with similar site-specific conditions in another state is judged as unacceptable. Similar discrepancies could occur even within a state if the judgments are made by permit writers on a case-by-case basis.

How should decisions on the various elements of risk be allocated between national and state decisionmakers? If states make the decisions, to what extent will interstate competition for industry lower standards below that which is desired by the states and their citizens? In addition, if states make the decisions, should decisions be made uniformly through state regulation or on a case-by-case basis by permit writers?

III. Regulatory Perspectives

Once the broad policy issues discussed above are decided and regulatory goals are established, a means to implement the goals by issuing and denying permits must be developed. In setting standards under section 3004, EPA is mindful that the regulatory program must be capable of operating efficiently and of assuring the public that human health and the environment will be protected.

A. Assurances to the Public

The public has become justifiably concerned about the dangers presented by hazardous waste, and EPA strongly believes that the standards it sets under Section 3004 must provide reasonable assurances that the public's legitimate concerns about hazardous waste will be addressed. The RCRA permit must be formulated not only to require a certain level of protection but also to provide reasonable assurances that the level will in fact be achieved.

Some uncertainty is inherent in land disposal of hazardous waste. Many hazardous wastes are complex mixtures of chemical substances, each of which has unique properties. In addition, complicated waste interactions and hydrogeological and other environmental factors make it difficult to confidently predict the degree of containment, attenuation, or migration of waste constituents with precision. Finally, the health and environmental effects of most hazardous waste constituents are not always well understood, and synergistic and antagonistic effects of combinations of these constituents are even less well understood. Thus, uncertainty is a key problem that EPA must cope with in developing its land disposal regulations.

This uncertainty takes two principal forms. First, there is uncertainty in predicting potential effects of a given hazardous waste management scenario. Some possibility of error is always present. The questions to be considered are: (1) What degree of error can we tolerate in predicting a facility's performance or the potential adverse effects of wastes in the environment and still be able to say with some confidence that certain minimum levels of protection will be achieved? (2) What approach is appropriate when lack of knowledge results in an acceptable range of error? Can supplementary requirements compensate for error in making predictions?

Second, there is uncertainty concerning the way that the individuals and institutions that manage hazardous waste will behave. Any regulations controlling hazardous waste management must assume and compensate for human error. To provide a reasonable assurance of safety to the public, EPA must determine what margin of safety it should provide against the uncertainties of human behavior.

B. Need to Have Implementable Program

No regulatory program is acceptable if it cannot be operated efficiently by EPA and the approved states. Permitting agencies must be able to issue permits to environmentally-acceptable facilities. The chosen goal must be accompanied by a regulatory scheme which makes maximum and efficient use of available resources in an effort to collect sufficient amounts of data to develop permit requirements for the particular conditions at each individual site, but at the same time does not become a roadblock to issuing all necessary permits. Similarly, the approach cannot involve too much uncertainty, thereby inviting public opposition in hearings and litigation, which would also result in too few permits. Since there are a large number of existing land disposal facilities, an inefficient regulatory approach could jeopardize EPA's general effort to provide environmentally-acceptable disposal capacity nationwide and to phase out those facilities which are unacceptable.

EPA is concerned about the amount of time which permitting authorities' staffs would be required to spend in attempting to implement any particular regulatory approach. Unless the approach is carefully crafted, some permit applications could not be reviewed due to insufficient manpower. Another constraint is the degree of expertise needed to evaluate permit applications under a given regulatory approach. For example, the existing national pool of experts on the fate and transport of waste constituents in the environment is extremely limited.

EPA is also concerned about the burden which various regulatory approaches place on the regulated community. In addition to the costs of capital equipment and operating expenses, EPA is interested in the costs involved in preparing, analyzing and justifying a particular facility design and operating plan. EPA recognizes that there is a limited amount of resources available to provide environmental protection. EPA is, therefore, concerned about how various regulatory approaches affect the relative allocation of resources between environmental control equipment (including operating costs) and the data collection or analyses needed to prepare a complete permit application.

EPA urges commenters to address the issue of resource demands when they comment upon the options described later in this notice or other options which they may propose.

C. Regulatory Approaches

The following are the principal conceptual approaches available for regulating hazardous waste land disposal:

1. *Design and Operating Standards.* These are standards which specifically require permittees, to install particular pieces of equipment or use particular practices. This approach may include prohibitions against certain activities. Typical examples include liner specification (e.g., 5 feet of clay with a permeability of 10^{-7} cm/sec.) or a prohibition against disposing certain types of wastes in landfills.

2. *Technical Performance Standards Based on Best Available Technology.* Performance standards specify particular goals that permittees must achieve, allowing each permittee to choose any management method of his that satisfies the goal. A technical performance standard is one that is linked to the performance of a particular design or operating element of the facility.

The selection of the performance goal may be based on a decision about what the "best available technology" (BAT) performing a particular function can achieve. An example of a BAT technical performance standard is a requirement that a facility be designed to allow no more than a certain percentage of the disposed waste to enter the environment annually. The choice of "best" generally includes some consideration of cost, since almost any facility's performance may be improved by spending additional money for additional or better control.

3. *Technical Performance Standards Based on Acceptable Risk.* A technical performance standard could also be based on a decision that a particular level of performance achieved by a technology is adequate to protect against unacceptable environmental risk. An example might be a standard requiring containment of wastes for a certain number of years, based upon a judgment that the requirement provides an appropriate allocation of present and future risk.

4. *Environmental Performance Standards.* Such standards seek to set limits on what may be tolerated in the environment. This may take the form of risk specifications (e.g., 10^{-6} probability that an individual will die of cancer or that some other adverse environmental effect will occur), pollutant limits (e.g., 4.5 parts per billion of trichlorethylene), or prohibitions. This approach is used in part in the February 5, 1981, proposed regulations. See proposed 40 CFR 264.20, 46 FR 11161.

5. *Facility-Specific Risk Assessments Based on Narrative Standard.* This approach would establish broad narrative standards (e.g., no significant risk of cancer) and allow the permit writer to determine specific requirements after a full consideration of all the site-specific factors. This approach, like the one discussed in the preceding paragraph, is used in part in the February 5, 1981 proposed regulations. See proposed 40 CFR 264.21, 46 FR 11161.

IV. Risk Assessment: Predicting That any Release From the Land Disposal Facility Will be Environmentally Acceptable

As mentioned previously, EPA has reproposed land disposal standards which would require the permit applicant to predict the risk that a particular land disposal facility would impose upon human health and the environment and require the permit writer to review the application, independently determine the risks, and judge whether the risks are acceptable. This case-by-case approach has sometimes been referred to as "best engineering judgment" (BEJ). To distinguish this approach from other case-by-case "BEJ" approaches (e.g., a containment approach which requires the use of engineering judgment to determine the ability of a particular facility to contain particular wastes during the specified period), we will refer to this approach simply as "risk assessment."

A. General Approach

The basic approach of the reproposal is to create an initial presumption that no release of hazardous waste constituents to the water or air should be allowed. This presumption may be rebutted if, after a consideration of all relevant factors, the permit applicant demonstrates and the permit-issuing authority determines that no unacceptable effects on human health and the environment will result from any release from the facility. If only environmentally-acceptable releases will occur, then a permit may be issued. This approach thus contemplates that a

substantial burden will be placed on permit applicants to demonstrate that any releases from their facilities will not adversely affect human health or the environment.

The major steps in demonstrating environmentally-acceptable release are: (1) analyzing the hydrogeology, wastes and facility design; (2) predicting the rate and quality of leachate generation; (3) predicting the fate and transport of constituents leached from the facility to the unsaturated zone, the saturated zone and subsurface soil; (4) predicting the fate and transport of these constituents in the ground water (saturated zone); (5) predicting the fate and transport of gases and vapors which are released from the facility to the air; (6) predicting the exposures of people, animals, plants and other environmental components to released constituents; (7) calculating the total risk presented by the facility to human health and the environment; and (8) determining the acceptability of the calculated risk.

Predictions or calculations need not necessarily be expressed in single numbers. They may be statistical in nature (e.g., expressed in terms of means and standard deviations). This allows one to estimate risk while acknowledging the variability of the estimate. Qualitative estimates may be acceptable in extreme situations where the risks are clearly acceptable or unacceptable.

Many complicated and interlocking issues are inherent in the regulatory approach which EPA proposed on February 5, 1981. For manageability, EPA has broken the issues down into three broad areas of discussion: releases from the facility, migration of constituents in the environment, and human and environmental exposures and effects.

The issues are in most cases presented as a series of questions rather than in discussion form. EPA is interested in obtaining commenters' views. We have refrained from setting forth a detailed discussion of EPA's tentative or firm answers to the various questions. Where necessary to properly explain an issue, we have prefaced or supplemented the questions with some discussion.

In reviewing the technical questions, the reader will probably find that the answer varies depending on site-specific or waste-specific factors. Therefore, in answering the questions, commenters should clearly state their factual assumptions. Furthermore, commenters are encouraged to identify situations where predictions can be made relatively easily even when they are difficult to make with confidence in the general case. Similarly, commenters are encouraged to identify situations where predictions are relatively difficult to make even when they are easy to make with confidence in the general case. Both average and worst-case approaches to analyzing the confidence in making prediction would be useful.

The relationship of confidence in data or of predictions based on data to the cost of generating the data is important. For example, more extensive and expensive studies of local hydrogeological factors may yield greater confidence in predictions of the fate and transport of constituents in the ground. EPA encourages commenters to state how their confidence in predictions relates to cost. EPA also solicits comments on the ease or difficulty of developing the necessary data, including the time required to gather and analyze the data and the degree of expertise required to gather or analyze it. Also, EPA solicits comment on the current availability of such expertise as well as on the prospects for developing expertise through education and training where shortages exist.

A similar issue of confidence is the relationship of variability in data to variability in conclusions as to rates, velocities and concentrations of leached constituents. For example, mathematical models used to simulate contaminant plumes rely on series of equations which relate the many variables regarding the plume and its movement to one another. If one output of a model (e.g., concentration) is related exponentially or logarithmically to an input, it is possible that variability (or low confidence in prediction) of the output will be much larger or smaller than that of the input. In practice, the sensitivity of a particular output to a particular input is very complicated and may require several computer runs to be precisely determined. Moreover, different models incorporating different assumptions may yield somewhat different sensitivities. Therefore, EPA invites commenters to identify those factors whose variabilities either greatly or only minutely influence output (concentration or mass rate) variability and which therefore require a correspondingly large or relatively small data base. In short, we invite commenters to suggest which factors are most critical in plume migration models.

Finally, EPA requests that commenters consider management practices (e.g., waste separation) which could improve the reliability of predictions.

B. Releases from the Facility

In regard to surface-water and ground-water protection, the key concern is the mass rate (quantity per unit time) and quality of leachate produced at the facility. The following questions concern how leachate rate and quality may be predicted and managed at the facility:

1. What level of specificity of information must one have about the waste in order to predict the rate and quality of leachate produced? Is a detailed analysis of each waste's constituents required or will more general information suffice? Is prediction more easily made for particular classes of waste than others? How sensitive is prediction of leachate rate and quality to inadequate information on wastes?

2. a. What impact does disposing different wastes in the same cell or impoundment have on the reliability of predicting leachate discharge? How confidently can one account for reactions among wastes when predicting leachate quality? How sensitive is prediction of leachate rate and quality to errors in predicting such reactions?

b. How confidently can one predict the rates of decomposition of organic wastes and the most likely degradation by-products? How sensitive is prediction of leachate rate and quality to errors in predicting these factors?

c. Is it possible to confidently predict leachate quality by analyzing in detail the fate of a few representative or prominent constituents in the waste? What would be the most appropriate selection factors?

3. How sensitive is the prediction of leachate volume, rate and quality to errors in predicting water balance? How accurate are water balance methods and what are their primary limitations? Does the use of monthly averages for precipitation, evaporation, etc., provide reliable predictions? Under what circumstances will the moisture in the waste or the moisture resulting from decomposition of the waste be a significant source of liquid affecting leachate generation? Where these are significant, to what extent can one predict the contribution to leachate from moisture in the waste and moisture resulting from waste decomposition? To what extent can one predict subsurface migration of water into the facility? To what extent can one prevent such migration where the water table is high? Can prevention be maintained even after the facility is closed?

4. How sensitive is prediction of leachate rate and quality to correct and

precise analysis of clay liner materials, waste cells, and the unsaturated zone as to permeability, uniformity, moisture content, clay content and organic content?

5. With what confidence can one predict when leachate will first emerge from the waste? How sensitive is prediction of leachate rate and quality to errors in this factor?

6. How well can the following factors be accounted for in predictions of leachate rate and quality, and how sensitive are such predictions to these factors?

a. Differential settling of wastes (in a landfill) or of liner material;

b. Dessication of clay liners;

c. Degradation of synthetic liners;

d. Reactions between wastes and liner material;

e. Freeze-thaw cycles;

f. Contact time between waste and liquid; and

g. Other factors which lead to deviations of a facility from its routinely "expected" performance.

7. What costs and burdens are associated with predicting (calculating or estimating) each of the above-mentioned factors to the degree necessary to confidently predict leachate rate and quality? What type and degree of expertise is needed? How many experts among the regulated community and private consultants are currently qualified to perform such analyses? How capable are state regulatory agencies of reviewing and judging the correctness of such analyses? Where gaps in expertise exist, how much time is needed to close the gaps through education and training?

8. Which techniques are most useful for managing the rate and quality of leachate produced at the facility? EPA is particularly interested in comments concerning selective receipt of wastes, diversion systems, protective caps and waste stabilization and other pretreatment techniques. To what extent can these techniques be used to "fine-tune" leachate volume, rate and quality? For example, to what extent can these techniques be used to selectively reduce the concentration of particular constituents in leachate produced at the facility? For what constituents, or classes of constituents, are such techniques sufficient to achieve the required fine-tuning?

9. Given the absence of very long-term data, what confidence can we have that any particular management technique will, for a long period of time, result in the predicted leachate rate and quality? What is the risk that pretreatment reactions, sorption or other reactions may reverse themselves as the result of acid rain, microbial action or other factors?

In regard to air protection, the key concern is the mass rate and concentration of air emissions from the facility due to volatilization or wind dispersal. The following questions concern how air emissions may be predicted and managed at the facility.

10. What level of specificity of information must one have about the waste in order to predict the rate and concentration of air emissions from the facility? Is a detailed analysis of each waste's constituents required or will more general information suffice? Is prediction more easily made for particular classes of wastes than others? How sensitive are predictions of air emissions to errors in analyzing the wastes?

11. With what confidence can one predict the decomposition by-products of disposed hazardous waste which will volatilize or be dispersed by the wind? How sensitive are predictions of air emissions to errors in predicting the by-products?

12. With what confidence can one predict the upward migration of volatile constituents through the waste itself? How dependent is the prediction upon permeability, clay content, moisture content and organic matter content of cover materials?

13. How good is the present state of the art for monitoring and modeling emission rates of volatile compounds from land disposal facilities? What are the factors that may undercut accuracy in predicting the rates or concentrations of air emissions? How, if at all, can predictions account for such factors? (See, for example, the factors listed in question (f) above.) How sensitive are predictions of air emissions to errors in predicting these factors?

14. What costs and burdens are associated with developing adequate data with respect to each of the factors shown above to be necessary to confidently predict volume, rate and concentration of air emissions? What type and degree of expertise is needed? How many experts are currently qualified to do such analyses? What is the current capacity of state regulatory agencies to review such analyses?

15. Which techniques are most useful for managing the rate and concentrations of air emissions? EPA is particularly interested in comments concerning selective receipt of waste, protective caps, venting and treatment systems, and waste pretreatment. To what extent can these techniques be used to "fine-tune" the volume, rate and concentration of air emissions from the facility? For what constituents, or classes of constituents, can this "fine tuning" be accomplished?

16. Given the absence of very long-term data, what confidence can one have that a particular management technique will, for a long period of time, result in the predicted rate or concentration of air emissions?

Predictions of leachate or air emission characteristics require a substantial knowledge during the permit application process about the characteristics of waste which will be received at the facility throughout its operating life. It may be difficult for an owner or operator of a disposal facility, particularly a new facility, to have detailed knowledge about the wastes that he will receive. To what extent can a permit applicant predict the quality and quantity of waste that his facility will receive in the future?

C. Migration of Constituents in the Environment

In regard to surface-water and ground-water protection, the permit-issuing authority will need to know the extent of migration of waste constituents in the subsurface environment and in hydraulically-connected surface water. In addition, the permit-issuing authority will need to know the concentration of waste constituents at any affected point of ground-water use, which depends in turn on ground-water velocity and the extent to which the constituents diffuse, mix with ground water and are attenuated (e.g., degraded, sorbed, etc.). Furthermore, an analysis of the fate and transport of degradation products is required. The totality of possible events are referred to as "fate and transport" of constituents.

1. *Ground-water flow:* With what degree of confidence can we predict the direction and velocity of ground-water flow prior to contamination of the ground water by the leachate plume?

a. Are there certain types of geological systems (e.g., fractured strata or strata which may easily be dissolved) for which predictions of the direction of ground water flow would be too speculative to be made with any confidence? Where are such systems predominantly located?

b. Are there certain types of geological systems for which predictions of the direction of ground-water flow can be made with a high degree of confidence? Where are such systems predominantly located?

c. How good is the current state-of-the-art for estimating ground-water velocity throughout a hydrogeological

system which may receive discharges from a land disposal facility?

d. How is any prediction affected by the nearby presence of wells which are used for withdrawal or recharge of ground water by use of pumps or other means? How good is the state-of-the-art for calculating how far from such wells the leachate plume must be to remain relatively unaffected by the use or cessation of use of these wells?

2. *General movement of constituents in ground water.* If one ignores all attenuation, how well can one predict the transport of leachate constituents?

a. *Separation of phases based on specific gravity.* (i) *Heavy organics.* If a leachate plume contains organic constituents which are heavier than water, will those constituents form a separate plume which does not move with the ground water? If so, how well can we predict the direction and rate of flow of this plume? Which type of organic constituents are most likely to be part of this separate plume? With what precision must one know the leachate quality to determine the likelihood that such a separate plume will form?

(ii) *Light organics.* Answer for light organics the same questions as raised in Question (1) above.

(iii) Is the answer to questions (i) and (ii) dependent on the salt or mineral content of the ground water? To what degree?

b. *Molecular diffusion.* How well can we predict the degree of which the leachate plume will expand and concentrations of constituents will decrease by virtue of molecular diffusion?

(i) To what extent, if any, does this effect depend on the initial concentrations in the plume? Does the rate of diffusion differ for different constituents? To what degree?

(ii) To what extent does this effect depend on ground-water velocity?

c. *Dilution with ground water.* How well can we predict the degree to which constituents' concentrations will be decreased by virtue of mixing with the ground water? (Disregard the effect of plume separation discussed in Question (a) above.) How dependent is the dilution effect on ground-water velocity?

d. *Degradation of constituents.* To what extent can the following mechanisms be expected to cause the decay of constituents in the saturated zone? For what types of constituents, if any, is such decay likely to be significant? If not significant, can any fate equation or model ignore the degradation effect? If significant, how well can the effect be predicted, and how sensitive is any fate/transport prediction to error in predicting the degradation effect?

(i) Biological degradation—both aerobic and anaerobic processes.

(ii) Degradation by hydrolysis.

(iii) Degradation by photolysis.

(iv) Radioactive Decay.

(v) Destruction by reaction with other constituents in the leachate plume, ground water, or geologic environment.

(vi) Other.

e. *Sorption of constituents.* With what degree of confidence can the attenuation of constituents by sorption be predicted?

(i) How dependent is sorption capacity and rate upon factors such as soil particle size, organic content, porosity and cation exchange capacity? How much data concerning these factors is needed to characterize the geology and confidently predict sorption capacity and rate? Does sufficient expertise and equipment exist to make the required analyses?

(ii) To what degree is sorption enhanced by a low ground-water velocity?

(iii) How dependent is the sorption rate for a particular constituent upon the concentrations and sorption rates of the constituent or other constituents in the leachate plume? Is it likely that constituents would compete for sorption sites, or are enough sites available for all leached constituents within a short distance from the facility?

(iv) Is there any difficulty in assessing sorbability of particular constituents?

(v) What other factors, if any, are highly significant in predicting sorption rates?

(vi) How likely is it that sorption will be reversed over time? What factors are significant in promoting such reversal? In cases of potential reversal, how well can one predict the extent to which constituent concentrations will be altered by the sorption and subsequent desorption? In such cases, will the temporary sorption have reduced constituent concentrations through a retardation effect? How well can this be modeled?

f. *Attenuation or retardation by means other than sorption.* Are any mechanisms other than sorption significant enough and predictable enough to be evaluated in predicting attenuation of constituents? (Consider, e.g., ion exchange and precipitation.) How reversible are these mechanisms?

g. *Simplified approaches.* Where knowledge of the leachate quality entering the ground water is highly uncertain, what simplified approaches can be used to characterize plume migration?

(i) Can particular constituents known to be prominent constituents in the leachate be selected for analysis as representative of all constituents? (For example, select one or two metals, organic acids, organic bases, neutral polar organics and neutral non-polar organics.) What factors would one apply to determine representativeness? Chemical structure? Mobility? Toxicity? Concentration in the leachate?

(ii) Rather than select representative constituents, could "worst-case" highly mobile constituents be selected to determine the maximum mobility of all constituents? Going one step further, is it reasonable, in light of data and modeling difficulties, to not consider attenuation and degradation and only consider dispersion and ground-water mixing?

h. *Summary on water quality.* Is it possible to predict the concentration of constituents in the ground water even within several orders of magnitude? Is the answer dependent on a detailed knowledge of leachate quality? Can qualitative predictions suffice for some situations? Can worst-case analyses be used to assure acceptability of facilities? Is there an adequate supply of trained professionals to make these predictions and to evaluate them? If not, how much time is needed to develop the supply through education and training?

i. *Air quality.* In regard to air quality protection, the permit-issuing authority will need to know the extent of migration of waste constituents as well as the concentration of waste constituents at points of exposure. The following questions concern how migration of waste constituents in the air may be predicted:

(i) What level of specificity of information must one have about waste constituents and reactions among them in order to predict dispersion in the air?

(ii) What information must one have about patterns of air circulation and weather to predict migration in the air? How can the dynamic character of air circulation be accounted for in predictions of waste migration? To what extent can averaging fluctuations over long periods of time increase confidence in predicting impacts of air emissions upon ambient concentrations?

(iii) What costs and burdens are associated with accurately predicting waste constituent migration in the air? How advanced is the technology for collecting data to verify predictive models? What type and degree of expertise is needed? How many experts are qualified to do such analysis? Is the current state-of-the-art advanced enough to allow predictions of short-term concentrations relevant to determining acute effects, or are they

capable of dealing only with long-term averages?

3. *Miscellaneous Questions.* a. The approach of calculating and assessing risk requires, at a minimum, some knowledge of the concentrations of waste constituents in the vadose zone. In meeting its goal of protecting human health and the environment, EPA must decide whether the regulations should protect the vadose zone *per se*. For example, should the regulations prevent contamination of the unsaturated zone to assure that future uses (e.g., housing development or farming) in the area will not be affected by later migration within the unsaturated zone? This issue is important because it affects one's ability to use the natural soil below the facility as part of his leachate control system.

b. This approach involves prediction of waste constituent migration to points of ground-water use. What is an appropriate "point of use" for purposes of regulation? For example, in considering ground-water use, should the point of use be the home tap or the cone of depression surrounding a withdrawal well?

c. The rates and directions of ground-water movement and of contaminant plumes depend to a large extent upon gradient (the driving force for the movement). Gradient can be radically altered at a particular location by inducing changes in the vicinity such as ground-water pumping, cessation of pumping, discharge or recharge. Should and can an owner or operator be required to negotiate agreements with neighboring landowners to assure that they will not take actions which could significantly alter the gradient in that portion of the ground water which may be reached by the contaminant plume? If not, what confidence can be placed in predictions based on the assumption that ground-water flow patterns will remain unchanged over long periods of time?

D. Assessing Exposures and Effects

The following questions apply to the methodology of assessing risks from both air and water polution. The acceptable level of risk may be established in national regulations or in site-specific proceedings on individual permits. Wherever made, however, the determination of acceptable risk requires a consideration of the following questions, and EPA is interested in public comments on them. In formulating their responses, commenters should distinguish, when appropriate, between these two avenues for adverse effects.

1. What assumptions can one make about future ground-water and surface-water use and of future land-use patterns in order to predict future exposures?

2. What factors are most likely to undercut the accuracy of a prediction about environmental exposures? What range of uncertainty do they cause?

3. What degree of confidence can one attain in predicting environmental exposure? (Commenters may want to answer this question by indicating the range of error that might be expected in prediction.) To what extent does the absence of particular data significantly alter confidence in the prediction? Are there particular wastes or environments for which no confident prediction can be made? Identify these wastes or environments.

4. What costs and burdens are associated with accurately predicting near and long-term exposures? What type and degree of expertise is needed? How many experts are qualified to do such analysis?

5. What, if any, simplifying assumptions can one use to reduce the cost and burden of these predictions? How do assumptions affect the confidence in the prediction? Can a "worst-case" scenario be developed which provides high confidence that predictions of exposure to and adverse effects from waste constituents have not underestimated the significance of the effect?

6. Once the probable exposures to waste constituents are estimated, what methodologies are appropriate to predict human health effects? Consider effects such as acute toxicity, chronic toxicity, carcinogenicity, mutagenicity and teratogenicity. Consider Federal and State regulatory requirements (e.g., National Primary Drinking Water Standards under the Safe Drinking Water Act; toxic standards under the Clean Water Act; and National Ambient Air Quality Standards under the Clean Air Act); published, non-binding criteria (e.g., EPA's Water Quality Criteria and ACGIH's and OSHA's Threshold Limit Values); and published studies (e.g., by National Cancer Institute).

7. When published regulations, criteria or well-documented studies are unavailable, what is the cost of conducting tests adequate to demonstrate probable health effects? Are any screening mechanisms (e.g., Ames test) reliable enough to demonstrate that further testing is unnecessary (because the test results are either strongly positive or strongly negative)?

8. What methodologies, regulations, criteria or studies are appropriate for predicting environmental effects other than human health effects?

9. Does the state-of-the-art enable one to predict synergistic and antagonistic effects of several toxic or carcinogenic constituents?

10. In predicting human health effects, should EPA consider the number of people affected by exposure to waste constituents or should it focus on protecting any individual against a predetermined probability of risk? For example, should the level of "acceptable" contamination depend on the number of persons likely to be exposed to the contamination?

11. Should the EPA make assumptions about rates of ground-water use or should rate of use be determined on a site-specific basis, based on evidence submitted by the permittee? If commenters believe that assumptions about use are appropriate, they should suggest appropriate assumptions.

12. Even where a thorough analysis has been done, uncertainty may remain about what land-use patterns around a disposal facility are likely to be in the future. Where such uncertainty occurs, what presumptions should be made about future avenues of exposure?

13. In defining likely exposure levels, should the permit-issuing authority make any assumptions about whether water would be treated prior to consumption? If so, what assumptions should he make?

14. Should the risk calculations be aimed at the "normal" individual or should allowances be made for sensitive populations?

15. Should the permit-issuing authority apply a "margin of safety" when defining risk, particularly when the data on adverse effects is limited? What "margins of safety" should be applied?

16. What level of risk should be considered acceptable by the permit-writing authority or regulation-writing authority?

17. Should the regulations be concerned with the incremental risk posed by a facility or with the combined risk posed by the facility together with background concentrations? If the former, should background concentrations be considered at all? How does the answer to this question depend on the shape of assumed dose-response curves? If the latter, should any incremental risk be considered acceptable, provided that its combination with background yields an "acceptable" risk?

18. Should the regulations be concerned with distribution of risk by promoting the siting of facilities in areas where background concentrations are low? Is it inequitable to impose greater risks on some populations than others,

or does the freedom to move overcome any potential inequity?

V. Containment Approach to Land Disposal

The principal alternative to the risk assessment approach which EPA has considered to date has been the "containment" approach. In its original proposed rules of December 18, 1978 (43 FR 58946), EPA proposed the use of specific design and operating standards. As stated in the Preamble, the goal of those proposed regulations was "to prescribe design and operating standards which will provide maximum containment."

In the supplemental notice of proposed rulemaking issued on October 8, 1980, EPA outlined the major alternative approaches to land disposal being considered at that time. A containment approach was specifically discussed in that notice. Unlike the proposed rule, however, the supplemental notice presented the containment approach as a technical performance standard that would allow permit applicants to use various design and operating measures as long as they could demonstrate that the containment objective would be achieved.

EPA rejected the containment approach in its February 5, 1981 reproposed regulations because, while this approach can provide maximum environmental protection for a finite period, it does not, taken alone, address the environmental impact which will occur after the containment system is finally breached. For that reason EPA required in its reproposed regulations a site-specific assessment of both the short-term and long-term risks presented by a land disposal facility to human health and the environment.

A. General Approach

A containment approach would require that waste constituents not migrate beyond some boundaries within some period of time. In order to obtain a permit an applicant must demonstrate that the particular design and operating measures which he intends to use would achieve the specified containment goal.

Several variations of the containment approach are possible. First, the containment requirement may be limited to particular constitutents. For example, one could identify a set of high-risk constituents that must be contained in a facility for a certain period of time while ignoring the release of other components of the waste which may be more mobile but less toxic. Second, the boundaries for a containment zone could vary. Regulations could require containment within the facility or within a larger area around the facility, allowing some limited degradation in that area (*e.g.*, to the property boundary). Third, the time period for containment can vary (e.g., 50 years, 100 years, or 500 years). While a containment approach does not necessarily anticipate that all of the wastes in the facility will flush out of the facility once the containment period ends, it does imply that some quantity of waste material will begin to enter the environment after the containment period ends.

There are many approaches to designing a land disposal facility to contain wastes for a specified period. Although the reliability of most approaches is imperfect, the following factors generally will help contain the wastes:

1. Minimize exposure of the waste to water which would leach constituents out of the waste by, for example:

a. Locating in an arid area;

b. Preventing run-on of water from surrounding areas;

c. Placing the facility above the water table; and

d. Covering the facility, at the time of closure, with a highly impermeable cap.

2. Minimize the exit of leachate from the facility by use of leachate collection system.

The discussion below focuses on containment with respect to all environmental media except air. While this notice poses some technical questions about the applicability of the containment model to air emissions, EPA recognizes that it may be impossible to contain air emissions from certain land disposal facilities. (For example, it is not possible to completely contain volatile organic constitutents in surface impoundments. If such volatilization is considered a problem, pretreatment rather than containment would be appropriate.) Therefore, most of the discussion of containment will deal with prevention of discharges to soil, ground water and surface water.

B. Question

1. *Predicting Containment Life of a Particular Land Disposal Facility.* In a typical land disposal facility designed for containment, one would perform at least the following basic steps to estimate containment life:

a. Predict leachate generation by using water balance methods. These methods incorporate estimates or assumptions concerning precipitation and evaporation rates in the area of the facility runoff; vegetative cover which could contribute to transpiration of water from the facility; and permeability and thickness of soils and any liner overlying the waste, which indicate the extent to which contact of water with the waste will be prevented, thereby preventing leachate production. (For further information, see Tenn, D. G., K. J. Hanley and T. V. Degeare, *Use of the Water Balance Method for Predicting Leachate Generation from Solid Waste Disposal Sites*, EPA/630/SW-168 (1975), US-EPA, Cincinnati, Ohio; and Perner, E. R. and Gibson, A. C., *Hydrologic Simulation of Soild Waste Disposal Sites*, SW-868 (draft, September 1980), US-EPA, Cincinnati, Ohio.)

b. Predict when leachate causes any liner material beneath the waste to reach field capacity, after which any addition of leachate to the liner would result in the discharge of leachate through the bottom of the liner. This prediction involves analyzing the rate of leachate production (based primarily on the factors listed in paragraph (a) above), the efficiency of any leachate collection and removal system above the bottom liner, and the thickness, permeability and life (generally assumed to be 20 or 30 years) of any synthetic liner underlying the waste. (For further information, see Moore, C. A., *Landfill and Surface Impoundment Performance Evaluation Manual*, SW-869 (draft, September 1980), USEPA, Cincinnati, Ohio.)

In examining the appropriateness of a containment approach, EPA believes it is important to consider the uncertainties that arise in predicting the time of initial release and the rate of leachate migration into the environment. EPA, therefore solicits comments on the following questions:

i. Assuming that a water balance uses historical monthly net precipitation rates, how sensitive is the prediction of leachate generation rates and leachate containment periods to errors resulting from the inability to account in advance for catastrophic or unusual storm events occurring before or after closure of the facility? Are these factors significant in the case of surface impoundments or only in the case of landfills?

ii. How can one be assured that cap seepage due to dessication cracks, root channels, and channels caused by rain and freeze/thaw cycles will be completely prevented during a specified period? At what cost?

iii. How can one be assured that differential settlement (caused by waste consolidation) which causes cracks or slope slip will be completely prevented?

iv. How can one be assured that shrinking and swelling of caps or clay liners due to changes in moisture content will be prevented, thereby preventing channelization?

v. How detailed a knowledge must one have of the wastes which will be disposed of at the facility to assure that waste/liner reactions will not result in liner breaches (e.g., cracks in clay liners or degradation of synthetic liners) or increases in liner permeability? What, if any, waste/liner combinations (e.g., solvents and clay liners) should be banned in order to prevent premature discharge from the facility?

vi. What costs and burdens are associated with accurately predicting containment life of a disposal facility? How are the costs and burdens of predictions affected by variations in the factors identified in a–e above? For example, at a commercial facility which receives a variety of wastes, what costs (e.g., waste analysis) and burdens (e.g., modifications of predictive models) are needed to account for any incompatibility between the waste and the facility liner?

2. *Managing Land Disposal Facilities to Assure Containment.* The longer one wishes to contain waste, the more difficult the task becomes. Synthetic liners and caps will degrade; soil liners and caps may erode and crack. Therefore, it is assumed that some type of monitoring, inspection and maintenance program will usually be necessary to assure containment, even with a facility design that is expected to achieve long-term containment. EPA, therefore, solicits comments on the following questions:

a. Have any liner or cap designs been demonstrated to achieve long-term (e.g., greater than 25 years) containment without maintenance? EPA is not aware of any field data showing successful long-term containment of waste at facilities which have not been maintained over time. EPA urges commenters who are aware of such facilities to provide all relevant data (including ground-water monitoring information) about such facilities.

b. Under what conditions is it technically feasible to replace a cap? Can a cap be replaced without disrupting a landfill in a manner that accelerates leachate generation or release from the facility?

c. The roots of vegetation grown in the soil above a cap can penetrate the cap, creating channels which allow water to enter the facility. Assuring long-term containment, therefore, will generally require an ongoing vegetation management program by the facility owner or operator. What, if any, measures can be taken to reduce this responsibility? EPA is particularly interested in landfill design measures which have been demonstrated to obviate the need for vegetative management programs while achieving containment.

d. Are there any proven methods besides ground-water or leachate monitoring for detecting failure of a containment design? For any such alternative approach, commenters should describe any field experience with the technique.

e. Can a leachate detection system (e.g., collection and removal system below the liner) operate efficiently for long periods of time (e.g., 100 years)? What methods are available to unclog a leachate detection system? EPA urges commenters who address this question to report on any field experience with maintenance of leachate detection systems.

f. How often must ground-water monitoring equipment be replaced? What costs are associated with long-term maintenance of monitoring equipment? EPA is particularly interested in field demonstration of useful life of monitoring equipment.

3. *Subsequent Management of Buried Waste.* One rationale advanced in favor of a containment approach is that some time in the future, once waste management technology advances and the cost of resources increases, it may become reasonable to retrieve, treat or reclaim wastes that have been placed in land disposal facilities. This argument suggests the following questions:

a. Under what conditions is it now technically feasible to recover buried waste material? What risks are placed on those who exhume such material? Can commenters cite examples where waste recovery has been successful?

b. What design and operating measures can be taken in disposing of wastes today to facilitate their removal some time in the future?

c. What design and operating measures can be taken in disposing of waste today to facilitate in-situ treatment some time in the future?

4. *Containment with Respect to Air.* Organic chemical wastes placed in landfills, land treatment facilities and particularly surface impoundments may volatilize in the air. Metal wastes in most cases are not emitted in substantial volumes from land disposal facilities (except perhaps as particulate matter dispersed by the wind.)

Some measures are available to control air emissions. In landfills, sorption, biodegradation and other mechanisms may limit the amount of organic waste which may be volatilized. Cover may be used to limit the rate of migration of vapors or water rising to the ground surface where vapors may be released to the air. Furthermore, in a manner analogous to leachate collection systems, gas collection systems may be used to collect vapors and direct them to treatment systems (*e.g.*, burning or sorption). In surface impoundments, emissions may be substantially reduced by covering the surface with oily film. However, this interferes with aerobic processes, which are important for certain treatment processes in impoundments.

The containment approach has not generally been applied to air emissions. EPA solicits comments on whether containment approach is technically feasible for air emissions from land disposal facilities. In discussing this issue commenters are urged to consider whether a containment approach is feasible for particular facilities or waste types.

5. *Miscellaneous Questions.* a. The containment approach is one which provides maximum protection for a finite time period. One of the fundamental questions it raises is the attitude which should be taken toward risks that may be presented by releases to the environment occurring after the containment period. Any of the following approaches could be used:

i. Assume that any risks posed by the facility after the containment period passes are minimal or may be ignored for other reasons.

ii. Assess the risk to future generations caused by discharges from the facility, using the risk assessment methodology discussed in Section IV above. Such an assessment would involve predicting the quantity and quality of the discharged leachate, the degree to which people and the environment would be exposed to the discharge (which requires, for example, an assessment of future withdrawls and uses of ground-water near the closed facility), the risks which would result from those exposures, and future generations' technical and economic capability to avoid or minimize those risks through aquifer restoration or other methods.

iii. Require certain practices, such as leachate collection, to minimize leachate discharges. Some of these practices could be imposed during as well as after the containment period to minimize the post-containment discharges.

Commenters who favor using the containment approach should address the post-containment period issue, since its resolution is critical to any justification of a regulatory scheme based on containment. In addition, commenters should indicate their responses to issue A in section II of this notice, together with their views as to an appropriate containment period.

b. A closely related issue concerns the assumptions one makes about the likelihood of future waste management technology that will allow for retrieval, treatment or recycling of waste being placed in land disposal facilities today. One rationale for a containment approach may be an assumption that future generations will have the ability to better manage and prevent environmental damage from wastes being disposed of by today's society. Is that a reasonable assumption? Obviously, EPA does not except commenters to be omniscient. However, EPA does ask commenters who favor the containment approach based on this rationale to at least identify the current evidence which makes the assumption reasonable.

c. What is an appropriate containment zone? Should all wastes be contained within the facility (including its liner system)? Should the zone be extended to include the unsaturated zone or the facility property line?

VI. Alternatives to the Modifications of the Risk Assessment and Containment Approaches

Sections IV and V have set forth the two major alternative regulatory approaches which EPA has considered. The risk assessment approach attempts to define and then achieve an "acceptable" risk at each facility, while the containment approach seeks to attain a zero-risk level for a fixed period of time. While these two are reasonably comprehensive, there are good reasons to consider other approaches to replace, supplement, or modify either of these two basic approaches.

First, either approach involves many technical and institutional uncertainties. The present state of knowledge in designing facilities to contain wastes for long periods of time is limited, as is the ability to perform risk assessments. It is unclear whether the necessary institutions to prevent long-term risks can be established and maintained. Limited expertise, time and money further constrain our nation's ability to carefully design, assess, monitor and maintain each land disposal facility.

In light of these problems, it may properly be argued that both the risk assessment and containment approaches are inadequate. Some may argue that supplementary or alternative technical requirements are necessary in at least some situations. Others may argue that, for particular locations or wastes, the short and long-term risks created by land disposal facilities are so great that land disposal should not be allowed at all.

Second, it may be argued that particular alternatives to land disposal are environmentally superior and should be encouraged by restricting the permitting of landfills. For example, some have suggested that disposal of certain types of wastes in the deep portions of the ocean may be safer than land disposal. Still others may argue that no disposal is demonstrably safe and that treatment techniques should be encouraged to destroy wastes or allow their safe reuse. Ultimately, waste reduction and resource recovery probably provide the best alternative to land disposal. Some may contend that EPA's land disposal regulations should be designed to foster these alternatives.

Finally, it may be argued that some areas of the country need greater or lesser protection. On one hand, some areas may be so polluted or remote that they cannot or need not be protected. One may contend that such areas should be identified through federal or state rulemaking. Under a containment approach, requirements to contain wastes might then be waived in those areas. Under a risk assessment approach, an automatic assessment of no incremental risk might be made, thereby saving the time, expense and expertise otherwise needed to conduct a detailed risk assessment. On the other hand, some may contend that certain areas are entitled to absolute protection and that no facilities should be allowed in those areas regardless of how they are designed and how minimal their assessed risks appear to be.

EPA believes that these issues should be carefully considered in formulating a comprehensive policy on hazardous waste land disposal. EPA, therefore, solicits comments on alternatives to the risk assessment and containment approaches. The following discussion is designed to stimulate comment on these issues. Where an issue depends on particular facts, EPA requests that commenters submit relevant data together with their discussions of broad policy issues.

A. Supplementary or Alternative Design and Operating Requirements for Land Disposal Facilities

As mentioned above, a variety of factors may suggest that our current ability to achieve either a containment goal or an acceptable risk goal is uncertain. Therefore, it may be appropriate to provide an additional margin of safety by specifying particular design standards or operating practices.

One standard that might be applied is the required use of a leachate collection system which provides a specified minimum level of efficiency of removal. This would undoubtedly be a major feature of many facilities even without a regulatory requirement. However, for a facility which otherwise would not have a leachate collection system, this requirement would provide an additional margin of safety by lessening the amount of leachate which could exit through the bottom of the facility. This is especially important if a facility ultimately fails to contain or control the discharge of leachate as well as its permit requires.

A second set of standards, similar to those now contained in EPA's interim status regulations, are designed to limit the amount of liquid in a facility and thus minimize leachate generation. Such requirements might include the control of entry of liquids into landfills by the prevention of run-on, the collection of run-off, and keeping wastes containing or likely to produce (as a decomposition byproduct) free liquids out of landfills. For surface impoundments, an analagous requirement is the removal of standing liquids at the time of closure. On one hand, some may contend that in some situations (e.g., certain arid areas), these requirements are not necessary and should be subject to case-by-case determinations during permit proceedings. On the other hand, some may contend that the additional margin of safety provided by liquids controls are needed to protect against unforeseen circumstances (e.g., unusual storm events) and assure long-term protection of public health and the environment.

A third possible set of standards would involve requirements for liners above and/or below the buried wastes. The purpose of such requirements would be to delay or slow the rate of leachate generation and discharge. As in the case of the requirements mentioned above, arguments may be presented to oppose a requirement of liners as unnecessary in some instances or to support it as a necessary safety measure in all cases.

A fourth set of standards might require permittees to pretreat wastes prior to land disposal. To some extent, this may amount to a ban on disposing certain types of wastes in landfills. One example is banning wastes which contain more than a certain level of cyanide; this would in effect require cyanide destruction prior to land disposal. Another requirement might be to prohibit the codisposal (disposal in the same landfill cell or surface of impoundment) of certain wastes. Examples of waste combinations which could be regulated are acids with metals and solvents with certain highly toxic aromatic hydrocarbons. Finally, requirements for stabilization,

solidification or encapsulation of particular wastes might be required to reduce their leachability or mobility.

A fifth set of standards might require permittees to install equipment to control air emissions from landfills. For example, the regulations could require a gas venting system that channels air emissions to particular facilities where the vapors may be treated. Commenters who favor such a requirement are urged to discuss and recommend what performance standards might be appropriate for control of collected gases. For example, should land disposal operators achieve a destruction and removal efficiency comparable to that required for incineration of certain organic hazardous waste constituents, for any air emissions from its collection and treatment system?

In addition to using design standards to supplement a risk assessment or containment approach, they may be used independently where neither of the two approaches are deemed adequate, for the reasons discussed above. Thus, a set of minimum design and operating requirements could constitute a separate regulatory approach.

EPA requests that commenters favoring any of the above requirements as supplements to other approaches or as independent approaches explain fully why they are necessary and specify as much as possible what the requirements should be. Information on the reliability and cost of the suggested requirements should also be submitted. Commenters opposing particular requirements are urged to provide specific examples of situations where the requirements clearly would not be necessary to provide safety margins. EPA also welcomes comments suggesting further specific requirements which are not discussed above but which may be appropriate.

B. Requiring Selection of the Best Management Alternative

Several alternatives to land disposal are already used nationwide or in particular regions of the United States. These include incineration (including incineration-at-sea), thermal treatment, certain types of chemcial, physical and biological treatment, and ocean disposal. In addition, there are several alternative forms of land disposal (landfilling, placement in surface impoundments, land treatment and underground injection).

Many new hazardous waste treatment and disposal techniques are being studied or developed at present, and some may be expected to prove superior to land disposal for at least certain types of wastes in the future. A brief summary of some of these emerging technologies and a list of references for further information are provided in Booz, Allen & Hamilton, Inc. and Putnam, Hayes & Bartlett, Inc., *Hazardous Waste Generation and Commerical Hazardous Waste Management Capacity—An Assessment*, Appendix J ("Emerging Hazardous Waste Treatment and Disposal Technologies"), December 1980.

In addition, many of the existing technologies which currently handle only certain types of wastes may become able in the future to handle broader classes of wastes. For example, rotary kilns can incinerate more types of wastes than the more prevalent liquid incinerators can. As more rotary kilns become available, more types of wastes can be incinerated.

While it is premature to direct wastes away from land disposal facilities to technologies which are not yet available, one can at least direct wastes away from land disposal facilities when environmentally superior options are available. Under this approach, each operator of a particular type of land disposal facility, as part of the permit application process, would be required to demonstrate that no environmentally superior treatment or disposal option is available for handling the wastes in question. (Some states have begun to use this approach.)

This approach raises several issues. EPA asks commenters who address this alternative to consider the following:

i. How should the relative environmental merits of competing alternatives be judged? Can quantitative assessments of risks presented by each option be made in a manner that allows for quantitative comparisons between alternatives or must the permit writer ultimately make a comparison based on qualitative judgment alone?

ii. How can this approach account for the distribution of risks among the population? Various alternatives will present differing degrees of aggregate environmental risk. In addition, each alternative presents risk to differing groups of people and portions of the environment. Should any alternatives analysis consider the distribution of risk? If so, how?

iii. How should EPA determine that an alternative is "available" under this approach? Is this a question of technical feasibility or one that considers cost? How should cost be used in determining the availability of an alternative?

A broader approach for comparing environmental alternatives would be for EPA or a State agency to broadly assess various types of waste management techniques and the classes of waste for which they are most appropriate, considering technical, risk and cost factors. This type of effort is very difficult. However, EPA solicits suggestions on preferred options for particular types of waste.

C. Requirements Concerning Location

An additional approach which may be used to supplement or modify the risk assessment, containment, technical standards or alternative options approaches is one which allows broad regulatory decisions to be made with respect to particular locations.

Neither a containment approach nor a technical standards approach explicitly considers locational factors except as they relate to technical considerations such as local precipitation and evapotranspiration rates. The risk assessment approach does consider location on a case-by-case basis. However, it does not necessarily involve a general designation of geographical regions as acceptable or unacceptable locations for land disposal facilities. It is therefore appropriate to examine whether any specific provisions concerning location should be included in national hazardous waste regulations.

Several factors might be relied upon to justify placing land disposal facilities in particular locations. First, the ground water in an area may already be so contaminated by nature or by man as to be unsuitable for uses which could result in human exposures. Second, the area may be so remote that human exposures to buried wastes are unlikely at present and for the foreeseable future. Finally, it might be desirable to designate particular areas as waste sinks, provided that they are isolated from the public, to relieve the pressures for permitted waste disposal sites (or illegal disposal practices) in other areas where public exposure would be more likely to occur.

Several arguments, however, may be presented against encouraging land disposal at particular locations. First, the availability of a cheap land disposal option discourages the development and increased use of waste recycle and reuse, destruction and treatment. Second, as future water quality and quantity needs and land use patterns change, areas which are designated waste sinks today may be needed by future populations. Third, few areas are so remote that animals and plants cannot be placed at significant risk from unregulated waste disposal practices. Fourth, over long periods of time, ground water can move from a remote area to a less remote area. In some cases,

persistent constituents may migrate a significant distance from the waste burial site.

Several factors might be relied upon to justify prohibiting the location of land disposal facilities in particular areas. First, some areas may be so heavily populated that even a small risk that waste will be released to the environment may, when multiplied by the potentially exposed population, result in a significant risk to society. Similarly, areas underlain by ground water which is now or is likely in the future to be used for drinking water may deserve special protection. Third, environments which are sensitive to contamination (e.g., wetlands or areas with shallow water tables overlain by sandy soil) may deserve special protection.

An argument against banning land disposal facilities from particular locations is that facilities that might be designed to prevent unacceptable risk would be unfairly banned. This could create some hardship, particularly for existing generators in such areas who currently rely upon on-site disposal in landfills or on-site wastewater treatment in surface impoundments.

EPA recognizes that explicit regulation of location of hazardous waste land disposal facilities is a sensitive issue and believes that any such regulation should be carefully considered. EPA, therefore, urges commenters to provide any information relevant to this issue. What criteria should be applied to designate locations as waste sinks or waste-free zones? Can examples be provided of areas that might appropriately be designated as waste sinks or waste-free zones?

D. Prohibiting Land Disposal (Treatment and Long-Term Storage)

Given the current state of knowledge about hazardous waste management, some may contend that the risks of land disposal are too great to be borne. They might suggest that the land disposal of hazardous waste should be banned. Even if a ban is not imposed for all wastes, it may be unnecessary to assume the risks associated with land disposal of hazardous wastes for those wastes for which treatment (e.g., incineration) is now available. EPA invites commenters to suggest how this approach might be used and to identify those waste types which can be adequately treated with available technology.

In addition, it may be possible to safely store certain wastes above ground for long periods of time, avoiding the need for disposal with current technology. For example, it is possible to store liquid wastes in tanks and to completely contain them for 10, 20 or 30 years depending on design and maintenance. Indeed, storage tanks are already used for this purpose, although the contents of the tanks may be changed frequently. It should be possible to construct above-ground vaults to store various other wastes for significant periods of time.

If long-term storage is practicable, it could provide a bridge between any current shortage of environmentally-acceptable alternatives to land disposal and future capacity to handle today's excess wastes. This would allow a regulatory strategy which phases out at least some land disposal practices even where adequate treatment or disposal alternatives do not yet exist. It could also provide society more time to improve land disposal techniques and to develop a regulatory strategy for land disposal which is acceptable to the public.

EPA solicits public comment on the use of a long-term storage strategy for hazardous wastes. EPA is particularly interested in public comment (with appropriate data) identifying the particular wastes or waste types that should be placed in long-term storage and the types of storage facility designs that would be appropriate, together with associated costs of storage as well as of ultimate removal for treatment or destruction.

VII. Existing Facilities

A. Regulatory Approach to Existing Facilities

EPA is concerned about the problem of permitting existing land disposal facilities. At present, thousands of landfills and surface impoundments which dispose or treat hazardous waste are operating with interim status under section 3005(e) of RCRA. All of these require permits to be issued under the Part 264 standards.

The interim status standards promulgated on May 19, 1980, which contain certain minimum operating and ground-water monitoring requirements, should result in the improved operation of facilities and the identification of significant ground-water contamination. In addition, the closure and post-closure requirements and financial responsibility requirements promulgated on May 19, 1980, and January 12, 1981 should help assure proper closure and post-closure care of these facilities. Furthermore, the worst existing practices may be stopped under the authority of section 7003 of RCRA, which allows the EPA Administrator to sue in Federal court to restrain any hazardous waste management activity that may present an imminent and substantial endangerment to health or the environment. Section 3008 of RCRA provides further enforcement authority by authorizing EPA to issue a compliance or order to commence a civil action for appropiate relief, including a temporary or permanent injunction for violations of the regulations which have been promulgated to date under Subtitle C of RCRA, and by subjecting any person who knowingly commits certain types of illegal acts to criminal penalties, including a fine, imprisonment, or both. Finally, the recently-enacted Comprehensive Environmental Response, Compensation and Liability Act of 1980 has established a fund (commonly referred to as "Superfund") to help finance cleanups or other appropriate responses to the worst environmental emergencies.

While the interim status regulations and section 3008 and 7003 actions can go a long way toward addressing the problems presented by existing facilities, these two mechanisms are ultimately somewhat incomplete. On one hand, the interim status regulations, for example, do not address directly the complex issue of how EPA will protect ground water and air. On the other hand, compliance orders and lawsuits cannot be used to address the large number of existing land disposal facilities.

The first problem relating to existing facilities is that a large number of them exist and are potentially presenting human health and environmental risks. The Agency invites comments on the most efficient means for addressing this large number of existing facilities.

A second problem related to existing facilities is that many of them would need to be retrofitted to comply with EPA standards. Retrofitting may be more expensive than building a new facility. If land to build a new facility is unavailable, an existing facility may find it difficult to meet the permitting standards. The problem may be particularly acute for some facilities that rely upon on-site surface impoundments to treat their wastewater. Yet, many surface impoundments have in the past created significant risk to public health and the environment. Thus, upgrading these facilities will be necessary in some cases despite the costs.

Several options are available to balance the need to upgrade unacceptable facilities against the desire to avoid imposing unnecessary burdens on acceptable facilities.

One approach would be to conduct a detailed risk assessment at each facility.

This would assure that appropriate requirements are set for each reviewed facility. However, as noted above, this procedure would consume time and resources and could slow the permitting of many facilities. *See* 46 FR 11134 (February 5, 1981).

A second approach would be based on reviewing ground-water monitoring results under Part 265 Subpart F of the interim status standards. For example, one might impose additional requirements only on those facilities which appear to have leached any or some designated level of constituents to the ground water. A refinement of this approach would be to use the monitoring results to trigger a second and more detailed level or review prior to imposing particular requirements.

A variation on the second approach would be to first address those facilities which have already affected the ground water as a matter of first priority. After those facilities have been issued or denied permits, a more detailed assessment of the other facilities could be made to determine their future potential for creating risk and the need to require particular design or operation modifications.

EPA solicits comments on these options for handling existing facilities as well as on any strategies not mentioned above.

B. New Cells at Existing Facilities

EPA is also concerned about how to regulate new cells and impoundments at existing facilities. A "facility" is defined in 40 CFR 260.10 as "all contiguous land, and structures, other appurtenances, and improvements on the land, used for treating, storing, or disposing of hazardous waste. A facility may consist of several treatment, storage or disposal operational units (*e.g.*, one or more landfills, surface impoundments, or combination of them)." Thus, it is possible to have several cells or impoundments at a single facility. Where a new cell or impoundment is constructed at an existing facility, it may or may not involve retrofit problems of the sort discussed above, depending on the extent to which it is integrated with the previously existing cells or impoundments. However, EPA could, as a matter of policy, prohibit the connection of new cells and impoundments to existing structures if the connection would impede imposition of all necessary requirements.

Should EPA assess the extent to which new cells and impoundments are integrally connected to existing structures before imposing requirements? Or should EPA subject new cells and impoundments to the same requirements as new facilities?

VIII. Comparison of Alternatives

The previous three sections have explained the principal alternatives available for regulation of hazardous waste land disposal. EPA urges public commenters to compare these alternatives and provide their opinions on which approach, or combination of approaches, provides the most effective regulatory scheme. EPA is, of course, interested in the public's opinion on the relative advantages and disadvantages of the risk assessment approach. If commenters raise objections to that approach, however, EPA asks them to identify an appropriate alternative regulatory scheme and explain why it is preferable.

To assist in the comparison of alternatives, EPA suggests that commenters address the following questions:

1. As indicated earlier, public confidence is dependent on a belief that EPA's regulations deal comprehensively with the environmental effects of hazardous waste and that the measures required by a permit are reasonably certain to provide the level of protection desired. Which approach is most likely to provide comprehensive consideration of all relevant effects of hazardous waste? Which approach provides greatest certainty that its proposed goal will be reached, particularly for long periods of time?

2. Whatever their theoretical approach, EPA's hazardous waste regulations must be capable of being implemented. This means that the expertise must be available to do the technical analyses required and that permit decisions must be deliberate but not unnecessarily time-consuming. Commenters are asked to suggest which approach is more likely to be resource-intensive (with respect to staff time, expertise, and money) in its implementation. As part of that discussion, commenters should identify these elements of either approach for which there is limited available technical expertise.

3. EPA is concerned that the money spent on hazardous waste management be used for these activities which best assure long-term protection of human health and the environment. EPA is interested in public comment on which regulatory approach provides the best use of money spent on environmental protection. In particular, the Agency seeks comments and data on how prospective permittees expect various approaches will affect the total and relative costs for capital equipment, operating methods and permit acquisition.

4. Taken as a whole, which approach is most likely to minimize the overall risk to society presented by hazardous waste disposal? This question ultimately subsumes all others. EPA's permit program for land disposal facilities must address all disposal facilities and must consider each facility carefully. To accomplish this with its limited resources EPA must engage in certain balancing. An approach which requires EPA to "fine tune" permit conditions to the unique characteristics of each facility will make it difficult for EPA to address all facilities. Likewise, an approach which too heavily emphasizes simplicity in permitting runs the risk of overregulating or underregulating certain individual facilities. EPA urges commenters to express their views on which approach best minimizes overall societal risk over time by allowing EPA to address as many facilities as possible in a manner that will assure adequate environmental protection at each one.

IX. Conclusion

EPA has attempted in this notice to clearly delineate the complex issues relating to permitting hazardous waste land disposal facilities and thus assist the public in analyzing and commenting on these issues. We recognize that few commenters will be able to offer responses to all of the questions set forth in this notice. Therefore, we invite all members of the public to comment on any of the issues about which they are knowledgable or able to form an opinion. In particular we urge that advocates of specific regulatory approaches comment upon the broad policy issues (especially those discussed in sections II and III of this notice) which underlie the selection of any approach.

Dated: May 7, 1981.

Walter C. Barber,

Acting Administrator.

Part VI

Department of Agriculture

Farmers Home Administration

Emergency Loans; Amendments to Policies

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Parts 1809, 1945 and 1951

Emergency Loans

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) is amending its policies pertaining to insured Emergency (EM) loans. This action is needed to implement the provisions of Public Law (Pub. L. 96–438) which amended the Consolidated Farm and Rural Development Act and to implement other related administrative changes desired by FmHA. The intended effect of this action is to correct deficiencies identified under Supplementary Information and to restore fiscal integrity to the program.

DATES: Effective on May 26, 1981. Comments must be received by July 27, 1981.

ADDRESSES: Submit written comments in duplicate to Carl Opstad, Chief, Directives Management Branch, Farmers Home Administration, USDA, Room 6346–S, Washington, DC 20250, Telephone 202–447–4057. All written comments made pursuant to this notice will be available for public inspection during regular work hours at the above address.

FOR FURTHER INFORMATION CONTACT: James E. Vollmer, Emergency Loan Officer, Farmers Home Administration, USDA, Room 5336–S, Washington, DC 20250, Telephone 202–382–1647.

SUPPLEMENTARY INFORMATION: This final action has been reviewed and been classified as "significant" under Secretary's Memorandum 1955 and classified as a "major-action" under Executive Order 12291. The changes to 7 CFR, Part 1945, Subpart A and the changes to 7 CFR, Part 1951, Subpart A are internal management regulation changes. The majority of the changes to 7 CFR, Part 1945, Subpart B only implement the requirements imposed by Pub. L. 96–438. Dwight O. Calhoun, Acting Under Secretary for Small Community and Rural Development, has determined that an emergency situation exists which warrants publication of these changes and of 7 CFR, Part 1945, Subpart D, without opportunity for a public comment period prior to the effective date of this final action.

The requirements of sections 3 and 4 of Executive Order 12291 have been waived by David A. Stockman, Director, Office of Management and Budget.

The Farmers Home Administration has received criticism for its management of the disaster Emergency loan program from various sources, including hearings held October 17, 1979, by the Senate Subcommittee on Agriculture of the Committee on Appropriations; hearings held October 19, 1979, by the House of Representatives Subcommittee on Conservation and Credit of the Committee on Agriculture; Conference Report 96–533, dated October 24, 1979; and the General Accounting Office Report, CED–78–118, dated May 25, 1978, and CED–79–111, dated August 6, 1979. The USDA Office of the Inspector General agrees with much of this criticism. The Administration believes that these concerns are valid.

The Emergency loan program was established to restore farmers, who are victims of natural disasters, to their pre-disaster production capacity and living conditions. Under existing regulations, the loans are being used to expand the farming operations beyond pre-disaster levels. Program review reveals further that:

- Emergency loans are being made to farmers who have suffered losses to one crop despite offsetting good production in another crop(s).
- Applicants are obtaining Emergency loans even though they have valuable assets which are not involved in or essential to their farming operations. Such assets should be taken into consideration in determining the amount of government funds to be made available for disaster relief.
- Significant deviations from "normal" production are not unusual in agriculture. This fact is not always given adequate consideration in determining eligibility.
- The Emergency loan program was not intended to compete with commercial lenders but only to supplement commercial credit. In practice, Emergency loans often completely replace commercial financing by offering loans for purposes and on terms with which commercial lenders cannot compete.

Overly permissive regulations have allowed these practices to become widespread.

Although some corrective measures have been taken, there remains an urgent need for further revision of the regulations governing the Emergency loan program. It is important to take action immediately to prevent these practices from continuing, so that FmHA can direct its fiscal and staff resources toward more efficiently assisting farmers who truly need Federal financial assistance to overcome disaster-related difficulties. It is also important to act immediately so that the effect of these changes is not undercut by a potentially sizable number of loan awards—with terms that may last for several years involving several million dollars—made after announcement of the changes but before they are final. In order to further correct deficiencies and restore fiscal integrity to the program, the changes summarized below must be implemented immediately.

These regulations do not directly affect any FmHA programs or projects which are subject to A–95 clearinghouse review.

The Catalog of Federal Domestic Assistance number of Emergency Loans is 10.404.

FmHA amends Subpart A of Part 1809, Subparts A and B of Part 1945, and Subpart A of Part 1951 and adds a new Subpart D of Part 1945 in Chapter XVIII, Title 7, Code of Federal Regulations.

A summary of the changes made by this action are as follows:

Summary of Changes

7 CFR, Part 1945, Subpart A is completely revised and reissued to require that the Secretary of Agriculture designate natural disasters which have adversely affected more than 25 farmers, ranchers and/or aquaculture operators in any one county, and make emergency (EM) loan assistance available in those county(ies). When not more than 25 farmers, ranchers and/or aquaculture operators have been so affected by a natural disaster, the Farmers Home Administration (FmHA) State Directors through the FmHA Administrator may designate natural disasters. This action also discontinues the authority for making EM loans available in counties adjoining those designated as disaster areas, unless a separate disaster designation is obtained for those adjoining counties. (See §§1945.6, 1945.18, 1945.19, 1945.20, 1945.21, 1945.25, 1945.26, 1945.27, 1945.30, 1945.31, 1945.35, 1945.45 and Exhibit A).

7 CFR, Part 1945, Subpart B is amended to apply only to those applications for EM loans associated with FmHA disaster designations having a beginning incidence period predating May 26, 1981.

§1945.66(b)(2) (i) and (ii) are revised to implement time frame limitations on EM subsequent annual production loans as required by Pub. L. 96–438.

§ 1945.66 (d) and (e) are revised to implement loan ceilings for fiscal years 1981, 1982, 1983 and subsequent fiscal years on EM annual production and

major adjustment loans as required by Pub. L. 96–438.

§ 1945.69(t) is added to impose less stringent security requirements on applicants certifying that they can get their needed credit elsewhere.

§ 1945.80 (c) and (d) are removed to eliminate the requirement for County Committees to certify the amount of EM loan entitlement; this requirement was deleted by Pub. L. 96–438.

7 CFR, Part 1945, Subpart D is added to implement FmHA EM regulations for EM loan applications associated with disaster designations having a beginning incidence period date on or after May 26, 1981. Changes highlighted are those which are different than those requirements found in 7 CFR, Part 1945, Subpart B.

§ 1945.154(a)(12) defines a family size farm.

§ 1945.154(a)(15)(i) defines a single enterprise as categories of crops and livestock for use in EM loss loan eligibility determinations.

§ 1945.154(a)(23) requires the use of ASCS established yields prior to using county averages in EM loss loan eligibility and maximum EM actual loss loan entitlement determinations.

§ 1945.154(a)(30) requires EM production loss loan applicants to sustain at least a 30 percent loss of normal production in a single basic enterprise to qualify for EM loan assistance.

§ 1945.156(b)(3) stipulates that loan approval officials will require the disposition of any assets (farm and/or nonfarm) nonessential to the success of the farming operation prior to or within 12 months after the EM loan closing date.

§ 1945.161(c) requires ASCS established yields to be recorded on Form FmHA 1945–29.

§ 1945.163(a) requires EM production loss loan applicants to use the following record systems in order of priority as listed to establish the normal year's production: (a) Their own farm records; (b) ASCS established yields; (c) the 5-year county or State average yields as established by the State Statistical Reporting Service or similar source; and (d) under certain circumstances, combinations of the record systems in priority order of availability as listed in (a) through (c). This section also requires that prices used in EM loss loan calculations be based on the monthly average of the 36-month period immediately preceding the calendar year in which the disaster occurs, as indicated by State Crop and Livestock Reporting Service statistics. (See paragraphs (a)(1), (a)(2) (i) through (vi), and (a)(2(x)).

§ 1945.163(a)(2)(vii) requires that the maximum production loss loan be limited to *80 percent* of the total calculated actual production loss sustained by the applicant.

§ 195.166 deletes authority for FmHA EM loan funds to be used for *any* expansion of the pre-disaster normal farming operation. The dollar ceilings and time frame limitations authorized under Pub. L. 96–438 are also imposed in this section. A combined annual production and major adjustment outstanding principal indebtedness ceiling of $500,000 is imposed for the remainder of FY 1981. (See paragraphs (a)(1), (b)(1), (b)(2), (c), (c)(2), (c)(2)(i)(C), (c)(2)(ii), (c)(3)(iii), (c)(3)(xi), (c)(3)(xii), (d) and (e)).

§ 1945.167 prohibits the use of FmHA EM loan funds from being used to expand the pre-disaster normal farming operation. It also imposes a $300,000 principal indebtedness ceiling on the combined use of Major Adjustment Subtitle A and Subtitle B loan funds for refinancing debts which are to be secured with real estate. (See paragraph (a)).

§ 1945.168 prohibits scheduling of FmHA initial EM annual production loan repayment terms for longer than one production cycle. (See paragraphs (b)(1), (b)(1) (i) and (ii), (b)(2) and (b)(3) and (d).

§ 1945.169 revises conditions under which an applicant's potential repayment ability may be considered as "security" for EM loans.

Increases the limit of lending for FmHA EM annual production loans to the greater of $100,000 or 75 percent of the projected annual gross income, whenever an applicant can provide no security other than a first lien on the crop and/or livestock being financed with EM loan funds.

Directs EM loan approval officials to require at least the minimum level of comprehensive Federal Crop Insurance for all crops eligible under existing FCIC programs when any type of EM loan is primarily secured by crops and/or chattels. When required, the insurance is to be maintained over the full repayment period of the loan.

Directs that applicants who certify they can get credit elsewhere be required to pledge only that amount of security necessary to fully secure the loan and assure that the Government's interests will be fully protected. (See paragraphs (d), (e), (f), (i), (o), and (t)).

§ 1945.175 revises FmHA appraisal requirements when additional security is to be taken. (See paragraphs (c)(1) and (c)(4)).

Accordingly, Chapter XVIII, Title 7, Code of Federal Regulations is amended by amending Subpart A of Part 1809, revising Subpart A and amending Subpart B and adding a new Subpart D of Part 1945, and amending Subpart A of Part 1951 as follows:

PART 1809—APPRAISALS

Subpart A—Appraisal of Farms and Leasehold Interests

1. In § 1809.1, paragraph (b) is amended by changing the words "and Subpart B of Part 1945 of this chapter" to "and Subpart B and Subpart D of Part 1945 of this chapter."

PART 1945—EMERGENCY

2. Subpart A is revised to read as follows:

Subpart A—Disaster Assistance—General

Sec.

1945.1 [Reserved]
1945.2 Purpose.
1945.3–1945.4 [Reserved]

Subpart A—Disaster Assistance—General

§ 1945.1 [Reserved]

§ 1945.2 Purpose.

This Subpart prescribes the policies, procedures, and guidelines of the Farmers Home Administration (FmHA) for making emergency (EM) loans available in specified areas (counties); the relationship between FmHA and the Federal Emergency Management Agency (FEMA); the method for establishing and using Emergency Loan

Support Teams (ELST) and Emergency Loan Assessment Teams (ELAT); training of FmHA personnel; and the disaster public information functions.

§§ 1945.3-1945.4 [Reserved]

§ 1945.5 Abbreviations.

The following abbreviations are used in this Subpart.

(a) ASCS—Agricultural Stabilization and Conservation Service.

(b) CEB—USDA County Emergency Board.

(c) DAR—Damage Assessment Report.

(d) ELAT—Emergency Loan Assessment Team.

(e) ELST—Emergency Loan Support Team.

(f) EM—Emergency Loans.

(g) EOH—USDA Emergency Operations Handbook.

(h) FCIC—Federal Crop Insurance Corporation.

(i) FCO—Federal Coordinating Officer.

(j) FEMA—Federal Emergency Management Agency.

(k) FmHA—Farmers Home Administration.

(l) OMB—Office of Management and Budget.

(m) SBA—Small Business Administration.

(n) SEB—USDA State Emergency Board.

(o) USDA—United States Department of Agriculture.

§ 1945.6 Definitions.

The following definitions are applicable to this Subpart:

(a) *Disasters.* (1) *Major disaster.* Any disaster in any part of the United States which, in the determination of the President, causes damage of sufficient severity and magnitude to warrant unusual assistance above and beyond normal emergency services available from the State and Federal Government. Major disaster assistance makes all Federal disaster programs available automatically, and is intended to supplement the efforts and available resources of States, local governments and disaster relief organizations in alleviating the damage, loss, hardship, or suffering caused by disasters.

(2) *Natural disaster.* Any disaster caused by a natural phenomenon in any part of the United States; such as, hurricanes, tornadoes, cyclones, windstorms, excessive rainfalls, floods, earthquakes, blizzards, freezes, electrical storms, snowstorms, droughts, excessively high or low temperatures, and hailstorms; insects where abnormal weather contributed substantially to the spreading and flourishing of such insects; fires resulting from lightning, and fires of other origins which could not be controlled because of abnormal weather; and plant and animal diseases where abnormal weather contributed substantially to those diseases spreading into epidemic proportions.

(3) *Presidential emergency.* Any disaster in any part of the United States which is of such magnitude that the President makes a declaration requiring certain Federal emergency programs to be implemented as a supplement to State and local efforts as a means of saving lives and protecting property, preserving public health and safety, and/or lessening the threat of a more severe disaster.

(b) *Farmers.* Individuals, cooperatives, corporations or partnerships who are farmers, ranchers or aquaculture operators.

(c) *Incidence period.* The specific date or dates during which a disaster occurred.

(d) *National Office.* The Director, Emergency Loan Division.

(e) *Substantially affected.* The degree of physical and/or production losses a farmer must have sustained from a disaster to meet the actual loss eligibility requirements for an EM loan. The actual loss must have had such an adverse impact on the farming operation that EM loan assistance is necessary to enable the farm operator to continue the pre-disaster operation on a sound basis. A farmer will be considered to have been substantially affected if any one of the following types of losses has been sustained due to a declared/designated/authorized disaster.

(1) Damage or destruction of physical property that is essential to the successful operation of the farm; and if the property is not repaired or replaced, the farmer would not be able to continue operating on a sound basis. Physical property includes: farmland; structures on the land, e.g., buildings, fences, dams, etc.; machinery, equipment, and tools; livestock and livestock products; harvested crops; and materials and supplies. *or:*

(2) A production loss of at least 30 percent of normal yield per acre or production per animal in a single enterprise which constitutes a basic part of the total farming operation.

(f) *Termination date.* The date specified in a disaster declaration/designation/authorization which establishes the final date after which EM actual loss loan applications can no longer be accepted. For both physical and production losses, the termination date will be 9 months from the date of the disaster declaration/designation/authorization. Applications may, however, be accepted for EM actual loss loans after the termination date has passed, if the applicant had filed an application for disaster loan assistance with the Small Business Administration (SBA) during the period SBA could accept applications, but when not more than 6 months have elapsed since the FmHA's termination date.

(g) *United States or State.* Each of the several States, the Commonwealth of Puerto Rico, the Virgin Islands of the United States, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

§§ 1945.7-1945.17 [Reserved]

§ 1945.18 United States Department of Agriculture (USDA) Emergency Boards.

There is a USDA Emergency Board established to serve every State and every county (or comparable political subdivision) in the United States. The Boards are responsible for providing leadership to ensure that the Department's disaster programs are implemented when needed; to coordinate the Department's emergency disaster programs with those of other Federal Departments and Agencies; and to provide personnel, as needed and requested by FEMA, to help staff disaster assistance centers in major disaster areas.

(a) *State Emergency Boards (SEB).* These Boards are composed of representatives of the several USDA Agencies having emergency program responsibilities at the State level. The chairpersons of the SEBs are the ASCS State Executive Directors. FmHA State Directors are members of the SEBs.

(b) *County Emergency Boards (CEB).* These Boards are composed of representatives of the several USDA Agencies having available personnel at the county level. The chairpersons of the CEBs, in most cases, are the ASCS County Executive Directors. FmHA County Supervisors are members of the CEBs.

(c) *Emergency boards' policies and procedures.* These policies and procedures are set forth in the USDA Emergency Operations Handbook (EOH), available in any ASCS or FmHA Office.

§ 1945.19 Reporting natural disasters.

(a) *Purpose.* The purpose of reporting natural disasters is to provide a systematic procedure for rapid reporting of the occurrence and extent of damage and loss caused by such disasters, which may result in a need to make EM loans available in the disaster area.

(b) *Responsibility for reporting disasters.* USDA SEBs and CEBs representing their member agencies are best qualified at the State and county levels to accomplish the assessment of rural and agricultural losses resulting from disasters. These Boards are, therefore charged with the responsibility of reporting the occurrence of disasters and making recommendations whether or not to implement USDA disaster programs.

(c) *Actions to be taken.* Immediately after the occurrence of a natural disaster:

(1) The FmHA County Supervisor will report to the CEB chairperson, as specified in the EOH, all substantial property loss, damage or injury and severe production losses that have occurred in his/her County Office area, regardless of whether EM loans will be needed. The County Supervisor will assist the CEB in preparing the 24 hour report required in paragraph (c)(2) of this section. If the CEB has not completed its 24 hour report within two workdays after the disaster, the County Supervisor will report to the State Director on Form FmHA 1945–27, "Report of Natural Disaster." In urgent situations, the report may be made by telephone, followed by the CEB report or Form FmHA 1945–27. Either of these reports will be based on information obtained from personal knowledge and from farmers, agricultural and community leaders, representatives of other agricultural agencies, agricultural lenders, and from any other personally contacted reliable source(s). The County Supervisor will convey to the CEB chairperson all information pertaining to the disaster and provide the Chairperson with a copy of Form FmHA 1945–27, if prepared.

(2) The CEB will report the natural disaster, in accordance with the EOH to:

(i) The SEB; and

(ii) Appropriate county government representative(s).

(3) The SEB will provide copies of the CEB report to:

(i) The USDA Washington Offices of ASCS, FmHA and the Office of Intergovernmental Affairs; and

(ii) The State Governor's Emergency Coordinator and the State Department of Agriculture.

(4) The FmHA State Director will inform the National Office of each natural disaster as soon as possible and forward to the National Office a copy of the CEB report or Form FmHA 1945–27, with any attachments, and supplemented with the State Director's comments and recommendations. The State Director must include a statement as to the number of farmers, ranchers and aquaculture operators affected by the disaster. In urgent situations, the State Director will report to the National Office, Emergency Loan Division, by telephone, and immediately thereafter, send a written report to the National Office. The State Director will continue to notify the SEB chairperson of any additional information received concerning the natural disaster.

(5) The FmHA Administrator will notify the Office of the Secretary of Agriculture of the reported natural disaster and of any action taken or planned to be taken by the FmHA. The FmHA National Office will also provide the same information to members of the Congress and FEMA, if so requested.

(6) When inquiries are received from natural disaster victims, before the area is declared/designated/authorized; the following information will be provided the victims.

(i) Inquirers at the County Office will be advised:

(A) That EM loans are not available at this time;

(B) What assistance will be available if EM loans are authorized; and

(C) An application for EM loan assistance may be filed at that time, in which case it will *not* be processed until EM loans are authorized for the area; or the application can be filed after the EM loans are authorized, in which case it will be processed promptly. The inquirer should also be advised that in the event EM loans are not authorized, he/she can be considered for regular FmHA farm loan assistance.

(ii) Inquirers at the State or National Offices will be advised accordng to paragraph (c)(6)(i) of this section and referred to the appropriate county office.

(7) When inquiries are received from County Governing Bodies or Indian Tribal Councils concerning the designation of an area, they will be informed of the procedure for making EM loans available as specified in § 1945.20 of this Subpart.

(8) The actions required in paragraph (b) of this Section will be taken even if the Governor of a State has requested the President to declare a county(ies) a major disaster or Presidential emergency area.

§ 1945.20 Making EM loans available.

EM loans are made available in counties or similar political subdivisions named by (a) FEMA as eligible for Federal assistance under a major disaster or emergency declaration by the President, (b) the Secretary of Agriculture in any area where unusual and adverse weather conditions have resulted in severe production and/or physical losses, which have substantially and adversely affected more than 25 farmers, ranchers, and/or aquaculture operators in any given county; and (c) an FmHA State Director when 25 or fewer farmers, ranchers and/or aquaculture operators, in any given county, have been so affected by a natural disaster.

(a) *Declaration by the President.* When there is a Presidential major disaster or emergency declaration and FEMA has notified the National Office, the following actions *will* be taken:

(1) The National Office will immediately:

(i) Notify the State Director and the Director of the Finance Office by telephone and confirm in writing. The notification will contain:

(A) The date of the declaration;

(B) The name(s) of the county(ies) determined eligible for Federal disaster assistance;

(C) The type of disaster;

(D) The incidence period for the disaster;

(E) The termination date for accepting applications;

(F) The disaster declaration number (Examples: Major Disaster, M491; or Presidential Emergency, E061); and

(G) The date monthly loan activity reporting will commence. State Directors will consolidate the monthly reports and forward to the National Office within 10 working days after the last working day of each month.

(ii) Take the actions required by § 1945.21(a)(1) of this Subpart.

(2) The State Director will immediately:

(i) Notify the appropriate County Supervisor(s) and instruct him/her to make EM loans available in the declared counties. This notification will be confirmed by a State Supplement, or a revision thereof, containing that information listed in paragraphs (a)(1)(i)(A) through (G) of this section;

(ii) Notify the SEB chairperson in writing; and

(iii) Make such public announcements as are appropriate to adequately inform the farm community.

(3) The County Supervisor will immediately upon receiving notification that a county(ies) under his/her jurisdiction has been declared:

(i) Notify the CEB chairperson in writing;

(ii) Make such public announcements as are appropriate to adequately inform the local farm community;

(iii) Arrange and conduct meetings with local agricultural lenders and agricultural leaders to explain the purpose of and the assistance available under the EM loan program;

(iv) Make himself/herself available to help staff the FEMA disaster assistance centers, when requested to do so; and

(v) Establish and maintain a cumulative record of EM loan activity as set out in Exhibit A of this Subpart to be submitted monthly to the State Office. (Exhibit A is available in any FmHA Office).

(b) *Designation by the Secretary of Agriculture.* The Secretary of Agriculture shall designate a county(ies) as an EM loan area when a natural disaster has substantially and adversely affected farmers, ranchers and aquaculture operators; a written request from a State Governor for an EM loan designation has been received by the Secretary within 6 months from the last day of the occurrence of the natural disaster; the Secretary determines that unusual and adverse weather conditions have resulted in substantial production losses and/or damages or losses to livestock, farm machinery, farmland, farm buildings and structures, or aquaculture operations; and more than 25 farmers, ranchers, and aquaculture operators in a given county have been so affected by the disaster. A copy of the Governor's request will also be sent to the FmHA.

(1) Upon receipt of the Governor's request through the Secretary's Office, the FmHA National Office will immediately take the following actions:

(i) Acknowledge the Governor's request on behalf of the Secretary, and if any delay is anticipated in processing the request, state the reasons for such delay and when action will be taken;

(ii) Notify the FmHA State Director by phone and confirm in writing, the Governor's request; and

(iii) Notify the State Director that monthly reports of the action taken on the request will be sent to the Administrator, Attention: Director, Emergency Loan Division, giving a status report and the estimated date when complete information will be available for the Secretary to make a decision. These monthly reports will be identified by a Governor's Request (GR) number, which will be assigned by the National Office. Example: GR (State Abbreviations) 01, 02, 03, etc.

(2) The State Director will immediately:

(i) Notify the SEB chairperson that a Damage Assessment Report (DAR) is needed in accordance with the EOH for the requested county(ies); and

(ii) Review each DAR, when it becomes available, and forward it to the National Office with a transmittal memorandum containing his/her views, comments and recommendations concerning the need or lack of need for EM loans to be made available. Any additional supportive information not contained in the DAR should also be included in or attached to the transmittal memorandum.

(3) The National Office will immediately review the DAR and the State Director's recommendations and promptly forward recommendations with supporting information for approval or denial of the requested designation to the Secretary.

(i) If the Secretary denies the designation request, the Governor and the FmHA Administrator will be notified and the notice will set forth the reason(s) for denial. The National Office will provide the same information to the State Director.

(ii) When the Secretary approves the requested designation, the Governor and the FmHA Administrator will be notified.

(A) The National Office will immediately pursue the same course of action as described in paragraph (a)(1) of this section, except the disaster designation number will be coded S and 3 numbers (Example: S141).

(B) The State Director will immediately pursue the same course of action as described in paragraph (a)(2) of this section.

(C) The County Supervisor will immediately pursue the same course of action as described in paragraph (a)(3) of this section.

(c) *Authorization by State Directors.* (1) When a State Director determines that the requirements of paragraph (b) of this section are met in any single county, except that 25 or fewer farmers have been substantially affected by the natural disaster, EM loans may be authorized by the State Director. This authority of the FmHA State Director will be exercised only after the Governor, the County Governing Body or its authorized representative, or an Indian Tribal Council; and the CEB have formally recommended to the State Director that EM loans be authorized. The State Director must give notice to the National Office by telephone before authorizing EM loans.

(2) The State Director authorization will not be used to make EM loans available immediately after a disaster occurs in anticipaton of a later declaration by the President or designation by the Secretary based on that same disaster.

(3) Upon receipt of a positive recommendation from the appropriate sources, the State Director will promptly phone the National Office and:

(i) Identify:

(A) The type of disaster;

(B) The date the disaster occurred;

(C) The county(ies) affected by the disaster; and

(D) The number of farmers affected in each county.

(ii) Obtain from the National Office:

(A) The State Director authorization number (SDAN) (Example: N181);

(B) The incidence period for the disaster;

(C) The termination date for accepting applications; and

(D) The date monthly loan activity reporting to the National Office will commence.

(iii) Notify:

(A) Appropriate County Supervisor(s) to commence accepting EM loan applications in the authorized county(ies);

(B) The SEB chairperson; and

(C) The news media with appropriate announcements.

(iv) Send to the National Office:

(A) A confirmed copy of the authorization memorandum sent to the County Supervisor(s);

(B) A copy of the DAR; and

(C) One copy each of the formal written request from the Governor, or the County Governing Body or its authorized representative, or an Indian Tribal Council; and the CEB recommendation.

(4) The National Office will notify the Secretary of Agriculture and the Director of the Finance Office of the action taken by the State Director.

(5) Upon notification from the State Director that EM loans are authorized in a county, the County Supervisory will pursue the course of action described in paragraphs (a)(3) (i), (ii) and (v) of this section. Applications for EM loans will be accepted by County Supervisors only after authorization by the State Director, except as provided in § 1945.19(c)(6) of this subpart.

(d) *Subsequent natural disasters.* EM actual loss loans will be made available when a subsequent natural disaster(s) occurs in any area which had been designated/authorized to receive EM actual loss loan applications under paragraphs (a), (b) or (c) of this section during the same crop year, which substantially affects the same farming enterprises that suffered damages or loss due to the earlier disaster(s). When a subsequent natural disaster(s) occurs, the following actions will be taken:

(1) The County Supervisor will notify the State Director and provide the State Director with completed Form FmHA 1945–27, stating the new incidence period and requesting an extension of the termination date;

(2) The State Director will make a determination, after reviewing Form

FmHA 1945–27, and advise the County Supervisor whether or not losses from the subsequent natural disaster will be covered by the original disaster designation;

(3) The State Director will notify the National Office by a copy of Form FmHA 1945–27, and request an extension of the termination date;

(4) The National Office will provide the State Director with a new incidence period and termination date, when justified, in accordance with paragraph (f) of this section; and

(5) State Directors will *not* authorize extensions for areas authorized earlier if such extensions will result in more than 25 farmers in a county being affected by disasters in that production year. When the sum total of farmers affected by disaster exceeds 25, a secretarial designation will be initiated.

(e) *Continuing disaster conditions.* EM actual loss loans will be available when there is a continuation of the disaster conditions beyond the incidence period originally established for an ongoing disaster(s), such as, drought, flood, etc., in any area eligible for EM actual loss loans under paragraphs (a), (b) or (c) of this section. When a disaster(s) continues, the actions required by paragraphs (d) (1), (2), (3), (4) and (5) of this section will be taken.

(f) *Extension of termination dates.* Termination dates originally established when EM loans are made available may be extended by the National Office, when justified, due to subsequent disasters; continuing disasters; or when losses or damages, due to the original disaster which were not readily determinable at the time, show up at a later date. These extensions will be for certain periods, as determined necessary by the National Office, based on the State Director's recommendations; and will usually not exceed 60 days.

(g) *Limitations.* Actions authorized by paragraphs (b), (c), (d), (e), and (f) of this section cannot be taken if more than 6 months have passed since the original natural disaster occurred, except when the actions required by paragraph (b)(2) of this section have been delayed. Then the authorization must be no later than 9 months after the natural disaster. However, if the Administrator finds that an FmHA employee(s) has not acted in a timely and appropriate manner in response to a request for a disaster designation/authorization, he/she may authorize EM loans to be made available up to 12 months after the occurrence of the natural disaster.

§ 1945.21 Notification and coordination requirements.

After EM loans are made available under § 1945.20 of this Subpart, the following actions will be taken immediately:

(a) *By the National Office.* (1) When the President declares a major disaster or emergency, the Administrator or designee will notify the following, in writing, of the action taken under § 1945.20(a) of this subpart:

(i) Each member of the Congress (Senate and House) representing the area(s) involved;

(ii) The Secretary of Agriculture;

(iii) The Director of the FmHA Finance Office;

(iv) The FEMA;

(v) The SBA Central Office;

(vi) The ASCS National Office;

(vii) The FCIC National Office; and

(viii) The OMB.

(2) These notifications will contain the following information:

(i) The date of the declaration;

(ii) The name(s) of the county(ies) determined eligible for the EM loan program;

(iii) The nature of the damages and losses; and

(iv) The termination date for accepting EM loan applications.

(3) Subsequent to the initial notification, weekly reports will be sent to all recipients listed in paragraph (a)(1) of this section, except the Congressional delegates, informing them of the past week's disaster declaration/designation/authorization actions taken by FmHA. If no actions are taken in any particular week, negative reports will be made.

(4) When a natural disaster is designated by the Secretary under § 1945.20(b) of this Subpart, the Administrator, through the Secretary's Office, will simultaneously notify all those recipients listed in paragraph (a)(1) of this section; such notifications will contain the itemized details required in paragraph (a)(2) of this section.

(5) When an area is authorized by an FmHA State Director for EM loans under § 1945.20(c) of this Subpart, the Administrator or designee will simultaneously notify all those recipients listed in paragraph (a)(1) of this section; such notifications will contain the itemized details required in paragraph (a)(2) of this section.

(b) *By the State Director.* (1) Notify the appropriate County Supervisor(s) of the:

(i) Name(s) of the county(ies) declared/designated/authorized;

(ii) Date declared/designated/authorized;

(iii) Disaster number;

(iv) Type of disaster;

(v) Incidence period; and

(vi) Termination date for accepting applications.

(2) Notify the State ASCS Executive Director of the authority to make EM loans and promptly have a meeting with him/her to review and implement the provisions of the Memorandum of Understanding between ASCS and FmHA on Disaster Assistance, Exhibit C of Subparts B and D of Part 1945 of this Chapter, to arrive at a mutual understanding as to how ASCS disaster program benefits are to be handled in conjunction with the processing of FmHA EM actual loss loans so that duplication of benefits for the same losses are not received by disaster victims;

(3) Contact the FCIC Regional Director to review the Memorandum of Understanding between FCIC and FmHA, Exhibit A of Subpart N of Part 2000 of this Chapter (a copy of which is available in any FmHA office), and arrive at a mutual understanding as to how FCIC insurance payments are to be handled in conjunction with the processing of EM actual loss loans so that duplication of benefits for the same losses are not received by disaster victims;

(4) Make appropriate public announcements, including notices in Indian Tribal Council(s) news media. However, if the declaration was by the President, under § 1945.20 (a) of this Subpart, news releases should be cleared with the FEMA; and

(5) If the FEMA notices the State Director that an agreement between the State and Federal Government (FEMA) has been made to provide 408 grants in a major disaster area to those suffering damages and losses to housing and personal property, who are ineligible for disaster loan asssistance through the FmHA and/or SBA, the following actions will be taken:

(i) The State Director will notify the appropriate County Supervisor(s) of the address and phone number of the nearest FEMA office in the Supervisor's area; and

(ii) At the close of business each week, the County Supervisor will forward to the FEMA a list of applicants claiming physical losses who do not qualify for EM loan assistance, with the reason(s) they do not qualify.

(c) *By the County Supervisor.* (1) Notify the County ASCS Executive Director of the authorization and have a meeting with him/her to review and implement the provisions of the Memorandum of Understanding

between ASCS and FmHA on Disaster Assistance, Exhibit C of Subparts B and D of Part 1945 of this Chapter, to arrive at a mutual understanding as to how ASCS disaster program benefits and other information in ASCS's records will be made available and used in processing EM actual loss loans. Also, the County Supervisor will request that information regarding the availability of EM loans be placed in the ASCS's news letter;

(2) Notify the County Governing Body, Indian Tribal Council(s) and make appropriate public announcements including notices in Indian Tribal Council(s') news media; and

(3) Explain the assistance available under the EM program to agricultural lenders and leaders in the area including Indian agricultural lenders and leaders.

§§ 1945.22–1945.24 [Reserved]

§ 1945.25 Relationship between FmHA and FEMA.

(a) *General.* When a major disaster or emergency declaration is made by the President, the FEMA is charged with the responsibility for seeing that disaster assistance is made available to disaster victims. Also, FEMA is responsible for coordinating the actions of other Federal Agencies who have programs to provide disaster assistance. A Federal Coordinatng Officer (FCO) is appointed for each major disaster or emergency to coordinate Federal assistance in the disaster area.

(b) *Before the declaration.* (1) When a request for a major disaster or emergency declaration is made by the Governor of a State, the FEMA through its Regional Director is responsible for obtaining an assessment of the losses and damages to respond to the request.

(2) If the FEMA makes a request for information from FmHA on losses and damages caused by a natural disaster, the FEMA representative will be advised to contact the SEB Chairperson. The EOH provides that the SEB will request the CEB to prepare the DAR. State Directors and County Supervisors should cooperate with SEB and CEB Chairpersons in preparing the DAR's.

(c) *After the declaration.* Where a major disaster has been declared by the President and the FEMA establishes a disaster assistance center(s) in the local disaster area(s):

(1) The SEB Chairperson will be responsible for:

(i) Selecting qualified USDA employees to represent USDA at each center, after consulting with other board members in making the selection. FmHA State Directors will cooperate with the SEB Chairpersons in seeing that centers are properly staffed;

(ii) Orienting the selected employees on all current USDA disaster programs. FmHA State Directors will cooperate in this orientation to ensure that the USDA representatives at the center(s) are familiarized with the FmHA EM loan program and other FmHA loan programs that could be of assistance to the disaster victims; and

(iii) Informing the FEMA that USDA representatives are available to help at each of the assistance centers.

(2) The FmHA State Director will be responsible for pursuing the following policy in working with the FEMA and the FCO by:

(i) Authorizing receipt of EM loan applications in the counties named by the FEMA. However, no EM loan can be approved until the National Office has given such notification according to § 1945.20(a)(1) of this subpart;

(ii) Attending or delegating a representative to attend any meeting(s) called by the FCO to discuss Federal assistance under the disaster declaration;

(iii) Advising the FCO to contact the SEB Chairperson, if a request is made by the FCO for FmHA employees to help staff the FEMA's Disaster Assistance Centers; and

(iv) Advising the FCO that reports on FmHA EM loan activity will be provided periodically, if requested, but not more often than once a week.

§ 1945.26 Relationship between USDA, FmHA and SBA.

(a) *General.* Pub. L. 94–305 authorized SBA to assist farmers under its physical disaster and economic injury loan programs; and Pub. L. 96–302 increased FmHA's responsiblity to meet the financial and other needs of farmers caused by disasters. It is the policy of USDA and FmHA to cooperate with SBA in the use of each Agency's respective loan making authorities, both disaster type and regular authorities, to compliment the activities of each other; and, to the extent possible, improve the delivery of disaster assistance to the agricultural segment of the country.

(b) *How SBA disaster loans are made available.* SBA physical and economic injury disaster loans are available in counties;

(1) Named by the FEMA under a major disaster or emergency declaration by the President; or

(2) Declared by the SBA Administratror.

(c) *Notification of SBA disaster areas.* The SBA Central Office will notify the FmHA National Office when its disaster loan program is made available. The National Office will advise State Directors, by letter, of the SBA disaster areas and State Directors will notify the appropriate County Supervisor(s).

(d) *"Memorandum of Understanding Between SBA and FmHA Pertaining to Disaster Loan Assistance Programs".* Exhibit B of Subparts B and D of Part 1945 is a Memorandum of Understanding between SBA and FmHA pertaining to Disaster Loan Assistance Programs, which was entered into on September 26, 1980, and which sets forth how and to what extent the two agencies will cooperate in serving the farm and rural communities affected by disasters.

§ 1945.27 Relationship between FCIC and FmHA.

(a) *General.* Exhibit A of Subpart N of Part 2000 of this Chapter (a copy of which is available in any FmHA office) is a Memorandum of Understanding between FCIC and FmHA. This Memorandum of Understanding is intended to assist in maintaining and improving the working relationship between the FCIC and the FmHA by providing encouragement to regular FmHA borrowers to use Federal crop insurance, where available; requiring certain operating type emergency loan borrowers to obtain and maintain Federal Crop Insurance, where available; assisting FmHA borrowers to obtain crop or other agricultural commodity insurance coverage; and exchanging information essential to the elimination of duplicating compensatory disaster benefits from the FCIC and FmHA for the same disaster losses.

(b) *Annual meeting with FCIC.* FmHA State Directors will meet with FCIC Regional Directors at least once each year to review the Memorandum of Understanding and rededicate their efforts and those of their respective Agency employees to comply with the agreements contained in the Memorandum of Understanding.

(c) *Contact after EM actual loss loans are made available.* After each disaster when EM loans are made available, State Directors are required to promptly contact the FCIC Regional Director to review the Memorandum of Understanding and agree on how each agency will fulfill its responsibilities in dealing with the disaster situation.

(d) *Notification to County Offices.* State Directors *will* provide instructions for actions to be taken by County Supervisors in maintaining a good working relationship with the FCIC staff.

§ 1945.28–§ 1945.29 [Reserved]

§ 1945.30 FmHA Emergency Loan Support Teams (ELST).

(a) *Use of ELSTs.* ELSTs are to be used when a disaster warrants immediate attention by FmHA in implementing the EM loan program. Also, ELSTs are used when such unusually large numbers of EM loan applications are received that personnel from other areas are required to be temporarily assigned to assist in rendering prompt service to the affected area(s).

(b) *State Office ELST.* Each State Director shall form an ELST to be deployed, when needed, in areas affected by a major disaster, Presidential emergency, or a natural disaster. ELSTs shall assist the State Directors in expediting the making of EM loans to disaster victims.

(1) State Directors shall use the ELSTs formed in their State(s) and all other FmHA personnel within their State(s) in making EM loans available. If additional help is needed beyond that available in the State, including the use of overtime, temporary personnel, and/or private contractors, the State Director shall advise the National Office of these needs and request assistance.

(2) Upon request of a State Director, the Assistant Administrator, Farmer Programs, will consider detailing ELSTs from other States to assist in the making of EM loans.

(3) State ELSTs will consist of a team leader and team members, selected by the State Director.

(i) The State ELST can include Farmer Programs Specialists, County and Assistant County Supervisors, Office Management Assistants, County Office Assistants, and County Office Clerks.

(ii) So that no one person or County Office unit bears an unfair burden, State team members will be changed from time to time.

(iii) Team members will provide training in EM loan making and EM loan servicing to all County Office employees.

(iv) District Directors are responsible for notifying the State Director of any need to change a team member within their district.

(4) State ELSTs will be trained as follows:

(i) The National Office will hold training meetings or workshops for ELST leaders as needed; and

(ii) State ELST leaders will be responsible for training and keeping the State team and all other State personnel currently informed on all phases of EM loans.

(5) Each State Director will issue a State Supplement establishing an ELST for the State(s) under his/her jurisdiction. This Supplement will name the team leader and all members. A copy of this Supplement will be sent to the National Office, Attention: Director, Emergency Loan Division.

(c) *National Office ELST Leaders.* The National Office has established a cadre of ELST team leaders.

(1) National Office team leaders will be used as follows:

(i) Training of FmHA field personnel, other USDA personnel, and temporary personnel in the making of EM loans;

(ii) Assisting State Directors in the organizing and expediting of assistance to eligible disaster victims; and

(iii) Leading ELSTs in areas with an unusually large volume of EM loan applications.

(2) Upon request from a State Director, the Assistant Administrator, Farmer Programs, will consider detailing one or more National Office team leaders to assist in the training of personnel and organizing of EM loan processing activities.

§ 1945.31 FmHA Emergency Loan Assessment Teams (ELAT).

In widespread disaster areas where large numbers of EM loan applications are being received, the State Director will deploy ELATs to the affected areas to monitor EM loan processing activities, in order to minimize loan errors, especially in loss calculations and eligibility determinations. The team leader will keep the State Director informed by telephone and by submission of weekly written reports, setting forth the problems discovered and the corrective actions taken or to be taken. Such teams will be composed of State Office Farmer Programs staff members, District Directors or Assistant District Directors, Office Management Assistants, and auditors from the Office of Audit, if they desire to participate. State Directors will monitor the handling of this quality control measure and report their findings to the National Office.

§§ 1945.32–1945.34 [Reserved]

§ 1945.35 Special EM loan training.

(a) *General.* When it is evident that a large number of farmers were affected by a widespread disaster in a State, the National Office will send a qualified representative from the Emergency Loan Division to the State to assist the State Director in conducting a training meeting(s) with State, District and County employees, provided there has not been a recent training meeting in that State.

(b) *Purpose.* A good training program is a must in disaster areas. This program should adequately instruct State and County Office personnel so that when the training is completed they will be well qualified to process EM loans without undue delay. The training meeting will last 2 days (16 hours) and include a workshop and a test.

(c) *Objective.* The basic objective of this training program is to keep State and County personnel properly trained in the currently correct methods of EM loan processing and loan making. This will result in more expeditious service to disaster victims during critical times and minimize erroneous interpretations of regulations by FmHA employees in administering the EM loan program.

(d) *Comprehensive EM loan training package.* A comprehensive EM loan training package has been developed for use by National Office and State Office personnel in training all EM loan writers (both regular and temporary employees). This package, including an application kit, will be used for the EM loan training meetings, and any subsequent EM loan training meetings conducted by State or District personnel.

§§ 1945.36–1945.44 [Reserved]

§ 1945.45 Public information function.

A good public information program is a must in disaster areas. This program should inform farmers and the general public when and where EM loans are available. Also, the information will state the EM loan objectives, eligibility requirements, and type of assistance available. Public information functions will be performed according to Exhibit A of Subpart B of Part 2015 of this chapter, which is available in any FmHA office.

§§ 1945.46–1945.50 [Reserved]

* * * * *

3. The title of Subpart B is revised to read as follows:

Subpart B—Emergency Loan Policies, Procedures and Authorizations for Those Applications Associated With Disaster Designations Having a Beginning Incidence Period Date Prior to May 26, 1981

4. In § 1945.66, paragraphs (b)(2) (i) and (ii), (d) and (e) are revised to read as follows:

§ 1945.66 Loan purposes.

* * * * *

(b) *Annual production purposes.*

* * * * *

(2) * * *

(i) Borrowers with loans outstanding for any EM purpose on December 15, 1979, may receive subsequent EM loans for annual production purposes, provided no more than five subsequent EM annual production loans are made per disaster, and provided they are made within six full calendar years after the disaster authorization date.

(ii) Borrowers not having outstanding EM loans on December 15, 1979, may receive subsequent EM loans for annual production purposes, provided no more than two subsequent EM annual production loans are made per disaster, and provided they are made within three full calendar years after the disaster authorization date.

* * * * *

(d) *Annual production and major adjustment loan indebtedness ceiling.* The total combined annual production and major adjustment loan(s) principal indebtedness owed by a borrower, insured and/or guaranteed, cannot exceed $1,000,000 at any time during fiscal year 1981, regardless of the number of disasters under which an applicant may qualify. During fiscal year 1982, no such loan assistance may be made or guaranteed in an amount that would cause the combined total of unpaid principal indebtedness to exceed $500,000; and during fiscal year 1983, and all fiscal years thereafter, no such loan assistance may be made or guaranteed in any amount. However, borrowers with EM loans outstanding on December 15, 1979, may receive subsequent EM annual production loans according to the provisions of paragraph (b) of this section in amounts necessary to continue their normal farming operation(s), without regard to this indebtedness ceiling.

(e) *Relationship with Ecomonic Emergency (EE) loans.* When an EM loan(s) for annual production and/or major adjustment purposes is made at the same time as, or after, an EE loan, the EE loan (outstanding principal only) will be subtracted from the loan ceilings set out in paragraph (d) of this section. The difference is the maximum loan which can be made for EM annual production and/or major adjustment loan purposes. However, borrowers indebted for any EM loan on December 15, 1979, will not have the amount of the EE loan subtracted from any subsequent EM annual production loan.

5. In § 1945.69, paragraph (t) is added to read as follows:

§ 1945.69 Security requirements.

* * * * *

(t) *Applicants who can get credit elsewhere.* Those applicants who are able to get credit elsewhere will be required to pledge only that amount of security necessary to fully secure the loan and assure that the Government's interest will be adequately protected.

§ 1945.80 [Amended]

6. In § 1945.80, paragraphs (c) and (d) are removed.

7. Subpart D is added and reads as follows:

* * * * *

Subpart D—Emergency Loan Policies, Procedures and Authorizations for Applications Associated With FmHA Disaster Designations Having a Beginning Incidence Period Date on or After May 26, 1981

Sec.

1945.151 Introduction.
1945.152 Program objectives.
1945.153 [Reserved]
1945.154 Definitions and abbreviations.
1945.155 Relationship between FmHA and other federal agencies.
1945.156 The test for credit and certification requirements for availability of credit elsewhere.
1945.157–1945.160 [Reserved]
1945.161 Receiving and processing applications.
1945.162 Eligibility requirements.
1945.163 Determining qualifying losses, eligibility for actual loss loan(s) and the maximum amount of actual loss loan(s), annual production and major adjustment loan(s).
1945.164–1945.165 [Reserved]
1945.166 Loan purposes.
1945.167 Loan limitations and special provisions.
1945.168 Rates and terms.
1945.169 Security requirements.
1945.170–1945.172 [Reserved]
1945.173 General provisions—compliance requirements.
1945.174 [Reserved]
1945.175 Options, planning, and appraisals.
1945.176–1945.179 [Reserved]
1945.180 County Committee certification.
1945.181 [Reserved]
1945.182 Loan docket preparation.
1945.183 Loan approval or rejection.
1945.184 [Reserved]
1945.185 Actions after loan approval.
1945.186–1945.187 [Reserved]
1945.188 Chattel lien search.
1945.189 Loan closing.
1945.190 Revision of the use of EM loan funds.
1945.191 [Reserved]
1945.192 Loan servicing.
1945.193–1945.200 [Reserved]

* * * * *

Subpart D—Emergency Loan Policies, Procedures and Authorizations for Applications Associated With FmHA Disaster Designations Having a Beginning Incidence Period Date on or After May 26, 1981

§ 1945.151 Introduction.

(a) *Policy.* This Subpart prescribes the policies, procedures, and authorizations of the Farmers Home Administration (FmHA) for making Insured Emergency (EM) Loans to farmers, ranchers, and aquaculture operators (hereinafter referred to as farmers). FmHA's policy is to make loans to any otherwise qualified applicant without regard to race, color, religion, sex, national origin, marital status, age, or physical/mental handicap (provided the applicant can execute a legal contract). These regulations apply to borrowers and FmHA personnel involved in making EM loans.

(b) *Program administration.* The County Supervisor is the local contact person for loan processing and servicing activities.

§ 1945.152 Program objectives.

The objective of EM loans is to provide financial assistance to cover actual losses sustained by eligible farmers, make major adjustments, and provide annual production credit so that they can maintain sound farming operations after they have sustained substantial losses as a result of an authorized disaster. EM loans are made to assist eligible disaster victims in sustaining and rehabilitating their normal operations. This objective will be accomplished through the extension of credit and such supervisory assistance as is determined necessary to achieve the objectives of the loan and protect the Government's interest. Supervisory assistance will be given in accordance with the provisions of Subpart B of Part 1924 of this Chapter.

§ 1945.153 [Reserved]

§ 1945.154 Definitions and abbreviations.

(a) *Definitions.* (1) *Applicant.* The person or entity carrying on the farming operation at the time of the disaster and requesting EM loan assistance from FmHA.

(2) *Approval official.* An FmHA official who has been delegated loan and grant approval authorities within applicable loan programs, subject to the dollar limitations contained in tables available in any FmHA Office (see FmHA Instruction 1901–A, Exhibit C).

(3) *Aquaculture.* The husbandry of aquatic organisms in a controlled or selected environment. Aquatic organisms are fish (the term "fish"

includes any aquatic gilled animal commonly known as "fish," as well as mollusks, crustaceans, or other invertebrates produced under controlled conditions—that is, feeding, tending, harvesting, and such other activities as are necessary to properly raise and market the products—in ponds, lakes, streams, or similar holding areas), amphibians, reptiles, or acquatic plants. An aquaculture operation is considered to be a farm only if it is conducted on grounds which the applicant owns, leases, or has an exclusive right to use. An exclusive right to use must be evidenced by a permit issued to the applicant and the permit must specifically identify the waters available to be used by the applicant only.

(4) *Borrower.* All parties liable for the loan or any part thereof.

(5) *Calendar year.* The 12-month period beginning January 1 and ending December 31.

(6) *Consolidate.* To combine and reschedule the rates and terms of two or more EM loans made for operating purposes. This also may include a new EM loan made for operating purposes.
